D.1 Overview

IDIS users with reporting privileges are allowed to download data—called *data extracts*—from IDIS database tables. There are sixteen categories of data that users can extract data; these categories include financial data for the CDBG, HOME, ESG, and HOPWA programs. Users can extract data by selecting the **Data Downloads** link, which appears under the **Utilities** option in IDIS.

D.2 What This Appendix Contains

This appendix provides:

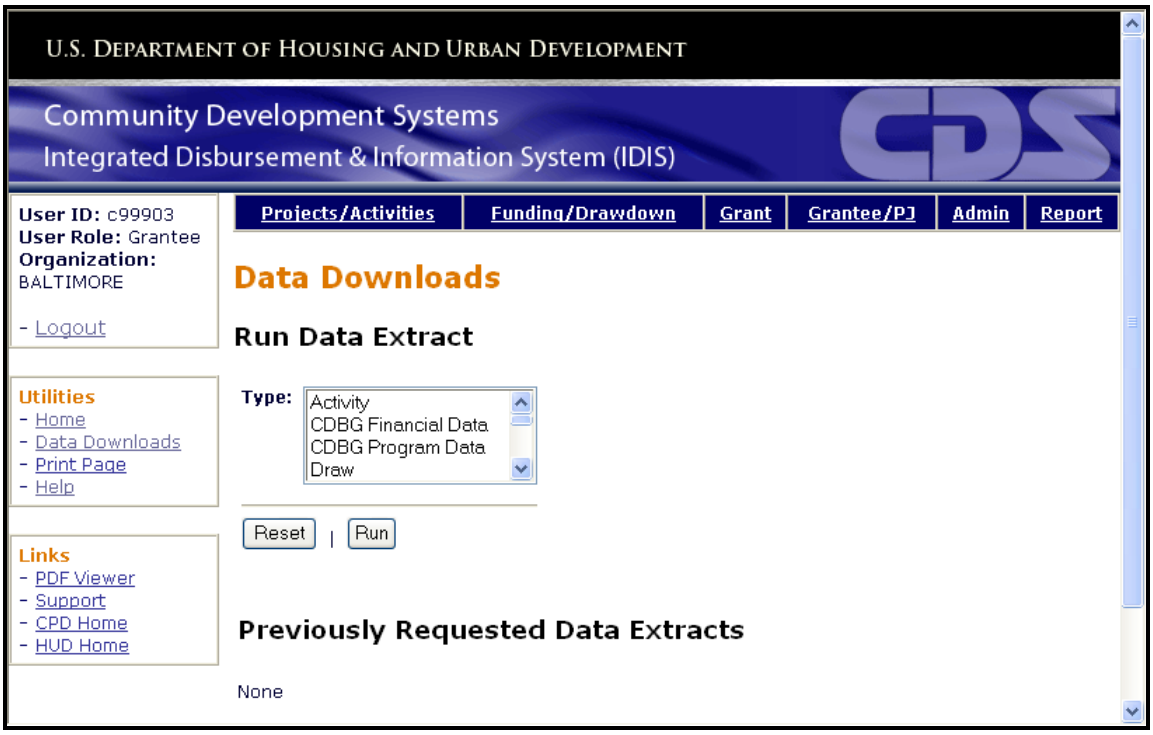
- Instructions for requesting a data download.
- An alphabetical listing of the data extract files and the associated IDIS database tables. This listing also includes a brief description of the download data.
- A key to the layout structure of a data extract file.
- For each data category, a section that provides information to assist you in translating file names previously downloaded in legacy IDIS and where that data can be now found. The categories are described in the same order that they appear on the **Data Downloads** screen.

D.3 Requesting a Data Download

To request a data download:

1. Select the data download type(s) you wish to run from the **Type** menu.

   To select multiple files, hold down the CTRL key and click each of the types to be run.



2. Click the **Run** button.

   Extracted data files are compressed and packaged as one zip file per user per extract type. Extract file names have the following format:

   [extract prefix configuration value]-[executing userid]-table #.zip

   Example: Data_Extract_Activity-H99999-1.zip
