

Neighborhood Networks Week 2005
Invite the Neighborhood. Widen the Network.

Why I Like the Center

By Jihan Eli

It makes my life more interesting because I learn interesting things. The interesting things that I learn are that you can make artwork out of sticks and a tomato is not a vegetable. It makes my life better because people are here to help me with my homework. When people help my homework, I get better grades on my report card.

If the center was not here I wouldn't learn interesting things. I wouldn't have anybody to help me. I would have bag grades on my report card. The center is great. People come from all over Nashville just to teach us interesting things.

Neighborhood Networks Week 2005
