What do they think?

"I grew up in Kellogg, Idaho. I played in the tailings from the lead mines; I ate fish from the streams laced with lead wastes. And look at me – I'm a state senator."

Idaho State Senator from Kellogg

"So if we find kids poisoned from lead paint, then the Butte site is not responsible, and ARCO is off the hook and we have to pay?"

Montana State Senator, on learning that ARCO is paying for a lead screening program in Butte

Environment and Public Health

"Improved health owes less to advances in medical science than to changes in the external environment, and to a favorable trend in the standard of living...medicine is in danger of neglecting what has hitherto proved its most powerful resource – the manipulation of the external environment."

Rene Dubos – Winner of the 1969 Pulitzer Prize for general non-fiction.

Building Codes

*"When enforced, **housing and building codes** have resulted in better constructed and maintained buildings and in improved health. For example, strict housing code enforcement has been demonstrated to reduce the likelihood of death in **residential fires** (Cummins and Jackson 2001) and lead poisoning in homes where lead-poisoned children live (Brown et al. 2001). A large number of **programs, codes, and regulations** exist that have the potential to influence changes in the environmental conditions in homes."*
