Outstanding Team: Resident Officer in Charge of Construction, Recruit Training Command Great Lakes Recapitalization Team, Facilities Team Midwest, Department of the Navy

The Resident Officer in Charge of Construction, Recruit Training Command Great Lakes Recapitalization Team is an integral component of the conversion of the Navy's only Boot Camp from a facilities-centered, WW II-era base into a 21st century, training centered environment and the Navy's single largest construction program. Because of exceptional management and technical acumen of each member individually and, more importantly, together, this small but mighty Team is successfully accomplishing this comprehensive program on time and at cost.
