A.

General

YCHA's admission policy is designed to provide for deconcentration of poverty and income-mixing by bringing higher income tenants into lower income projects and lower income tenants into higher income projects.

Gross annual income is used for income limits at admission and for income-mixing purposes.

Skipping of a family on the waiting list specifically to reach another family with a lower or higher income is not to be considered an adverse action to the family. Such skipping will be uniformly applied until the target threshold is met.

The YCHA will gather data and analyze, at least annually the tenant characteristics of its public housing stock, including information regarding tenant incomes, to assist in the deconcentration efforts.

The PHA will use the gathered tenant incomes information in its assessment of its public housing developments to determine the appropriate designation to be assigned to the project for the purpose of assisting the PHA in its deconcentration goals.

If the YCHA's annual review of tenant incomes indicates that there has been a significant change in the tenant income characteristics of a particular project, the PHA will evaluate the changes to determine whether, based on the PHA methodology of choice, the project needs to be redesignated as a higher or lower income project or whether the PHA has met the deconcentration goals and the project needs no particular designation.

Deconcentration and Income-Mixing Goals

Admission policies related to the deconcentration efforts of the PHA do not impose specific quotas. Therefore, the PHA will not set specific quotas, but will strive to achieve deconcentration and income-mixing in its developments.

The YCHA's income-mixing goal is a long-range goal and may not be achieved in the first year of implementation. The YCHA will use its annual analysis of its public housing stock and tenant incomes to provide benchmarks.

Project Designation Methodology

The YCHA will determine and compare tenant incomes at the developments with those in the Census Tracts in which the developments are located.

Upon analyzing its findings the YCHA will apply the policies, measures and incentives to bring higher income families into lower income developments and lower income families into higher income developments.

The YCHA's goal is to have eligible families having higher incomes occupy dwelling units in projects predominantly occupied by eligible families having lower incomes, and eligible families having lower incomes occupy dwelling units in projects predominantly occupied by eligible families having higher incomes.

Families having lower incomes include very low-and extremely low-income families.

Skipping of families for deconcentration purposes will be applied uniformly to all families.

When selecting applicant families and assigning transfers for a designated project the PHA will determine whether the selection of the family will contribute to the PHA's deconcentration goals.

The PHA will not select families for a particular project if the selection will have a negative effect on the PHA's deconcentration goals. However, if there are insufficient families on the waiting list or transfer list, under no circumstances will a unit remain vacant longer than necessary.

The YCHA will review the annual resident income of all of its sites and using the incomes of all families in all developments as a baseline, determine the average income of all of its resident families.

The YCHA will designate higher income developments those with average income above the aggregate average.

The YCHA will designate lower income developments those with average income below the aggregate average.
