Deconcentration Policy

It is Macon Housing Authority's policy to avoid and reduce concentration of the lowest income residents in the lowest income developments. It is also Macon Housing Authority policy to insure that no less than 40% of public housing admissions are reserved for families below 40% of area median income. To these ends, management is authorized to utilize resident selection procedures in which a family is advanced ahead of others on the waiting list based on income.

The Macon Housing Authority will affirmatively market our housing to all eligible income groups. Lower income residents will not be steered toward lower income developments and higher income people will not be steered toward higher income developments.

Prior to the beginning of each fiscal year, management will analyze the income levels of families residing in each development, the income levels of census tracts in which the developments are located, and the income levels of the families on the waiting list. Based on this analysis, management will determine the level of marketing strategies and deconcentration incentives to implement. The worksheet for the analysis is attached as part of this policy.

The Macon Housing Authority may offer one or more incentives to encourage applicant families whose income classification would help to meet the deconcentration goals of a particular development. Incentives are expected to be used primarily to encourage working families to accept a unit in lower income developments where such families are underrepresented. Various incentives may be used at different times, or under different conditions, but will always be provided in a consistent and nondiscriminatory manner. Specific incentives will be individually approved by the Board of Commissioners.

It is the policy of the Macon Housing Authority to fully implement the rental choice provisions of QHwRA (flat rents) to insure that the market based rents of the lowest income developments reflect the actual value of such units. This will enable such developments to compete more effectively with internal and external competition for the working poor. This policy is also intended to ameliorate disincentives to employment and encourage existing residents to increase their incomes.
