#### **Tifton Housing Authority Deconcentration Policy**

##### **I. INTRODUCTION**

The Quality Housing and Work Responsibility Act of 1998 (QHWRA) requires that the Authority adopt policies and procedures governing the deconcentration of very low-income families and income mixing as required by section 10(a)(3)(B) of the 1937 Housing Act. To implement this requirement, the Authority will compare the relative incomes of each development occupied predominantly by families with children. A development with more than 50% of its occupants being families with children shall be considered to fall under this policy.

The goal of this policy is to create mixed-income communities and lessen the concentration of very low-income families within the Authority's public housing developments through admissions practices designed to bring higher income tenants into lower income developments and lower income tenants into higher income developments.

The Deconcentration Policy is intended to work in conjunction with the Authority's annual income targeting requirements that require that 40% of all new admissions to public housing developments during a fiscal year must be residents whose household income, at the time of admission, is equal to or lower than 30% of the Area Median Income. This income targeting requirement is separate from the Deconcentration Policy, which is comparative in nature.

##### **II. DEFINITIONS**

The following definitions are provided in order to clearly define the affected developments and families under this Deconcentration Policy.

*PHA-Wide Average Household Income:* The average annual household income of all residents of all developments with more than 50% of its occupants being families with children.

*Development Average Household Income:* The average annual household income of all residents of a specific development with more than 50% of its occupants being families with children.

*Higher Income Development:* A development where the Development Average Household Income is greater than 115% of the PHA-Wide Average Household Income.

Lower Income Development: A development where the Development Average Household Income is less than 85% of the PHA-Wide Average Household Income.

Higher Income Family: A family whose annual household income is greater than 115% of the PHA-Wide Average Household Income.

Lower Income Family: A family whose annual household income is less than 85% of the PHA-Wide Average Household Income.

### III. TESTING

*In order to achieve and maintain deconcentration, the Authority will calculate the PHA-Wide Average Household Income for all developments with 50% or more of its occupants being families with children on at least an annual basis. At the same time, the Authority will calculate the Development Average Household Income for each development with 50% or more of its occupants being families with children. The results shall be documented as follows:*

- A. If the Development Average Household Income for a particular development is greater than 115% of the PHA-Wide Average Household Income, then that development shall be identified as a High-Income Development.
- B. If the Development Average Household Income for a particular development is less than 85% of the PHA-Wide Average Household Income, then that development shall be identified as a Low-Income Development.

*Testing can be run more frequently to determine the effectiveness of various initiatives employed to achieve deconcentration.*

### IV. CORRECTIVE ACTION

Once a development has been identified as a High-Income Development or a Low-Income Development, the Authority will define and communicate specific procedures to be employed with the goal of achieving deconcentration. It is the goal of the Authority to generally increase the level of income for residents of public housing, create more stratified developments, and obtain agency self sufficiency, therefore; the Deconcentration Policy shall not be employed to be counterproductive to that goal. In addition, the policy will, under no circumstances, be employed though steering or in any way reducing the choice in residence of the individual family.

*In order to correct a concentrated development, the Authority will, to the greatest extent possible, provide incentives to promote a Lower-Income Family to select a Higher-Income Development and to promote a Higher-Income Family to select a Lower-Income Development.*

Procedures to be employed in the development of a corrective action plan may include:

- A. Incentives to select particular developments.
- B. Payment Plans for deposits.
- C. Flexibility in move-in dates.

Since it is impossible to design a policy that will address every scenario, the Authority will, upon the identification of a need to deconcentrate, develop a specific Action Plan that will be included in the Annual Plan update.
