Attachments

Use this section to provide any additional attachments referenced in the Plans.

Attachment #1: DECONCENTRATION AND INCOME MIXING

Analysis revealed that all incomes of applicants and residents are below the median family income limit for the MSA. The PHA adopted a system of income targeting ranges that would provide for de-concentration of poverty and income mixing in its developments and to avoid concentrations of the most economically deprived families with serious social problems. The PHA will continue to monitor the average incomes of all families and make adjustments for a family whose income falls within the 50% or 80% of median income for this MSA. No action is needed at this time. To date, the PHA has not been successful in attracting higher income residents to apply for public housing.
