Q. Will the new siding be the same on the front of the building as on the east side?

A. Yes.

Q. Moisture was unable to get out of the area between brick and inside wall. Is that what caused the mold?

A. Yes, the brick is very porous, with rain soaking through the sheathing. The sheathing in the building is not the correct material. The difference of building codes from the late 70's early 80's until now.

Q. When they start working on the west side of the building, it was suggested that we cover all the windows on that side of the building with plastic. Not just the alcove they are working on at the time.

A. Good idea. I agree that all windows on one side should have plastic at the same time.

Q. Are all the a/c units covered while contractors are removing the brick, etc.?

A. No only the a/c's in the alcoves being worked on were covered. I agree that all of these should be covered at the same time also.

Q. So, the outside work is to be done in 2008 and the inside in 2009?

A. Yes, that is the plan at this time.
