

To update your current DCD 2.3.3 software you need to install the software patch by following these steps:

IMPORTANT: If you experience problems after the patch installation, you must re-install the DCD software completely. Follow the instructions provided:

1. Start your Internet Browser and proceed to the REAC software download page at <http://www.hud.gov/offices/reac/products/pass/main23.cfm>
2. Proceed to the **Software Update Component Page**.
3. Click on the **Main Executable File** link to start downloading. The file name is exe233.exe.
4. Once downloaded, double-click on the exe233.exe file to unzip it. This executable will install a file named inspect.exe to the *c:\ProgramFiles\DCD* folder.
5. Start the Physical Inspection Software. The initial log on screen should read: Copyright 1997 - 2009, Department of Housing and Urban Development, November 2009. **The date is key, if you do not have the same date you do not have the correct version of the software.** Navigate the software to verify that your inspection data files behave the same as before the patch installation.
