

2026 Release Notes Summary

Version v3.2.13.0

Production Release Date: June 11, 2026

Deployment to Staging: May 27, 2026

Enhancements

- **How to Set Component Estimated Useful Life:** Guidance has been added to the Age of Component section header on the Components, Alts & Recs page to improve user clarity.
- **Gross Square Footage (GSF) Enhancement:** Introduced a new Gross Square Footage (GSF) field, separate from the existing Total Building Sq Ft, on the Buildings page. Updated the Building Summary section with new data elements. Added tooltips on Building and Unit Type pages to provide additional context. Updated GSF values for existing CNAs to align with these changes and ensured building updates are consistently reflected across Copy/Paste, Import/Export, Create a new version functionalities, and the Property Insurance Schedule report.
- **Reserve for Replacement Ending Balance Analysis Compliance Indicator:** Updated the logic to display “Pass” for Year 1 and Year 2 when the ending balance is greater than 0.

Bug Fixes

- Resolved an issue causing an “Oops” error when using Pin/Unpin and Hide/Unhide actions with selected CNAs.
-

Version v3.2.12.0

Production Release Date: March 23, 2026

Deployment to Staging: March 13, 2026

Enhancement/Upgrades

- **Platform Upgrades:** Upgraded Spring Boot from version 2.7.2 to the supported version 3.5.9 and updated the underlying application servers to improve stability, security, and maintainability.
 - **Reserve for Replacement Data Synchronization Fix:** Resolved inconsistencies in Reserve for Replacement data during export, ensuring it now matches the data displayed on the page.
 - **Tooltip** has been added to the STD EUL field on the Components, Alts & Recs page, providing users with brief descriptions to guide data entry.
-

Version v3.2.11.2

Production Release Date: February 20, 2026

Deployment to Staging: February 18, 2026

Security Update

This release is security-focused and does not introduce functional changes for end users.

- **Enhanced Password Security:**
Server passwords are now encrypted, eliminating the use of clear-text password storage.
-

Version v3.2.11.1

Production Release Date: January 23, 2026

Deployment to Staging: January 15, 2026

Bug Fixes

- **Annual Deposit Schedule Correction:**
Fixed an issue in the *Annual Deposit Schedule* table on the *Reserve for Replacement* page where the relative year number displayed incorrectly when the Relative Year of Change was set to 0 or 1.
- **Admin Chart Generation Fix:**
Resolved a problem that prevented charts from generating for admin users.
