CNA e-Tool P282 Release

**U.S. Department of Housing and Urban
Development**

June 11, 2026

Release Date: 6/11/2026

The June release includes several enhancements and bug fixes designed to improve usability and data accuracy.

Guidance on how to set the component Estimated Useful Life (EUL) has been added to the Age of Component section header on the Components, Alts & Recs page to improve user clarity.

A new Gross Square Footage (GSF) field has been introduced, separate from the existing Total Building Sq Ft, and the Building Summary section has been updated with revised data elements. Tooltips have been added to the Building and Unit Type data elements to provide users with additional context and guidance. In addition, GSF values for existing CNAs have been updated to align with these changes. Building updates are now consistently reflected across Copy/Paste, Import/Export, Create a new version functionalities and Property Insurance Schedule report.

The Reserve for Replacement Ending Balance Analysis Compliance Indicator has also been updated to display “Pass” for Year 1 and Year 2 when the ending balance is greater than 0.

Finally, a bug was resolved that previously caused an “Oops” error when using Pin/Unpin and Hide/Unhide actions.
