

FHA Catalyst: **Claims Module** **Developer Guide** **V1.4**

U.S. Department of Housing and Urban Development

February 6, 2026

FHA Catalyst: Claims Module Developer Guide

Document History

Version No.	Date	Author	Revision Description
0.1	1/19/2021	HUD Contractor	Original Draft Document
0.2	3/26/2021	HUD Contractor	Modifications to API
1.0	5/21/2021	HUD Contractor	Finalizing API services documentation
1.1	9/22/2023	HUD Contractor	Added bulk certification, document upload
1.2	1/17/2025	HUD Contractor	Updated Appendix E: FHA Catalyst Claims Data Dictionary
1.3	2/24/2025	HUD Contractor	Added 33-Non-HAMP Partial Claim (PSPC or COVID), Maximum file upload size of 25MB, Account Manager requirement, claimSubmissionId requirement for claim certification/submission, and Document Upload sample form
1.4	2/6/2026	HUD Contractor	Update the Data Dictionary including additional data for the NLMW requirements.

FHA Catalyst: Claims Module Developer Guide

1. Overview: *FHA Catalyst* platform

FHA Catalyst is the new technology platform for managing loan origination and loan servicing information exchange throughout the loan lifecycle for FHA insured loans. The platform includes a user interface and a web services architecture for system-to-system integration with authorized parties. *FHA Catalyst* is comprised of modules for each stage of the loan lifecycle. To learn more about the broader scope of the *FHA Catalyst* platform, please visit <https://www.hud.gov/catalyst>.

1.1 *FHA Catalyst* API Developer Guide

The *FHA Catalyst*: Claims Module Application Programming Interface (API) Developer Guide provides a way for FHA Approved Lenders and their Authorized Parties to build easy, secure integration with *FHA Catalyst*. The API is intended for your internal IT staff only. Your data is secured using a private API key. This document is designed for developers building integrations to *FHA Catalyst*.

For FHA policies and requirements for loan servicing, please utilize:

- Handbook 4000.1, FHA Single Family Housing Policy Handbook
https://www.hud.gov/program_offices/housing/sfh/handbook_references

For questions about this Guide, please contact FHACatalyst@hud.gov or the FHA Resource Center at 1-800-CALLFHA (1-800-225-5342). Persons with hearing or speech support needs may use TDD/TTY by calling 1-877-TDD-2HUD (877-833-2483).

FHA Catalyst: Claims Module Developer Guide

2. Overview: Claims Module API

2.1 Business Workflow

The *FHA Catalyst* Developer Guide for Claims provides the technical information needed to establish a system-to-system interface between the *FHA Catalyst*: Claims Module and the servicing platforms. Lenders and their Authorized Parties to use the following APIs:

- Claim Query
- Claims Submission
- File Upload (Future Service)

NOTE: The Claims API Module will validate the first 5 digits of Lender ID for all requests.

2.2 Technical Summary

The *FHA Catalyst* platform supports technical integration using Amazon Web Services (AWS) Cognito for OAuth-2 based authentication and a REST API for all interactions using JavaScript Object Notation (JSON).

All API interaction with *FHA Catalyst* is initiated by the integrating system, to which *FHA Catalyst* responds synchronously. *FHA Catalyst* does not initiate interactions to integrating systems.

The *FHA Catalyst*: Claims APIs provide support to the following workflow methods:

I. Claim Query

A. Single Claim:

GET /claim/api/claimsubmission/{claimId}

1. Returns the claim details if matching claim id is found
2. Requestor is the Holding Lender, Servicing Lender, or their Authorized Party

B. Bulk Claim Query:

POST /claim/api/bulk/query

1. Holding and Servicing Lenders and their authorized parties can request claim details by the following ways:
 - i. By sending a list of FHA case numbers and/or claim ids. Results will contain all claims related to the fhaCaseNumbers and/or claimId submitted.
 - ii. By sending a lenderId and daysLastChanged. Result will contain all claims related to the lender matching the ID that the status has updated in the past x days set by daysLastChanged.
 - iii. HUD assigned lenderId for an FHA Approved Holding Lender or Servicing Lender is obtained from the OAuth2 token.
2. Responds with a unique Tracking ID that can later be used to obtain the processing status of the request. Upon successful completion of the request, bulk claim query results will be available through a document id for download.

II. Claims Submission

A. Claim Request & Response:

POST /claim/api/bulk/submission

FHA Catalyst: Claims Module Developer Guide

1. Holding and Servicing Lenders and their authorized parties can create draft claims for the following claim types:
 - i. 01A-Conveyance A
 - ii. 01B-Conveyance B
 - iii. 02-Assignment
 - iv. 05-Supplemental
 - v. 06-CWCOT
 - vi. 07-PFS
 - vii. 11A-Reacquisition A
 - viii. 11AB-Reacquisition AB
 - ix. 31-Special Forbearance
 - x. 32-Loan Modification
 - xi. 33-HAMP Partial Claim
 - xii. 33-Natural Disaster Partial Claim
 - xiii. 33-National Emergency Partial Claim
 - xiv. 33-Non-HAMP Partial Claim
 - xv. 41A-Replacement-Conveyance A
 - xvi. 41B-Replacement-Conveyance B
 - xvii. 46-Replacement-CWCOT
 - xviii. 47-Replacement-PFS
2. Responds with a unique Tracking ID that can later be used to obtain the processing status of the request.

B. Claim Certification:

POST /claim/api/claim/certify

1. Employees of Holding and Servicing Lenders and their authorized parties can sign and submit draft claims using their unique Claim Submission ID.
2. Responds with an HTTP 200 Response Status code.
3. The user making the request must be an Employee of the lender in FHA Catalyst, not a Contractor.

III. Request List and Status

A. Request Status Query Request & Response:

GET /claim/api/bulk/{bulkJobId}

1. Responds with an HTTP 200 Response Status code and a JSON body indicating the processing status.
2. If the processing status is complete, then the response document id will be returned in the JSON for the client to retrieve the Request Status file associated with the queried request.

IV. Response Document

A. Request Response Document:

GET /claim/api/bulk/response/{responseDocumentId}

FHA Catalyst: Claims Module Developer Guide

1. Returns the response document details if matching the response document id is found
2. Requestor is the Holding Lender, Servicing Lender, or their Authorized Party

V. Document Upload

A. Document Upload Request & Response:

POST /claim/api/claim/document/{claimSubmissionId}/{claimPart}

1. Holding and Servicing Lenders and their authorized parties can upload supporting documents to draft claims using their unique Claim Submission ID and the part of the claim the document was uploaded for (e.g. "PART A").
2. Responds with an HTTP 200 Response Status code.
3. The user uploading the document must be the same user who submitted this claim, and the claim part must be valid for this claim type.
4. Maximum file upload size is 25MB.

FHA Catalyst: Claims Module Developer Guide

3. Integration Project Planning

3.1 Pre-Integration Prerequisites

Holding and Servicing Lenders must be set up in advance in *FHA Catalyst* with appropriate permissions to access or submit FHA claims. Similarly, *Lenders* delegating the servicing activities to an *Authorized Party* must be approved to use the *FHA Catalyst* and provide required servicing information to FHA.

3.1.1 *FHA Catalyst*

FHA Catalyst allows API utilization for Direct Integrators or their Authorized Parties. To begin your system to system integration with *FHA Catalyst*:

- **FHA Approved Mortgagee:** For direct integrators to *FHA Catalyst*, please contact FHA Resource Center answers@hud.gov with subject line "*FHA Catalyst: Claims Module API.*"
- **For FHA Approved Mortgagees using Authorized Party Integrator:** Please complete the ***FHA Catalyst Authorized Party Registration Form*** (See [Appendix D](#)) and return to answers@hud.gov. Please use the subject line "*FHA Catalyst Claims Module API Authorized Party.*"

3.1.2 Claims Required Servicing Information

For Holding and Servicing Lenders who will be direct integrators using Servicing APIs, you will need to be able to provide your Lender ID and all the individual users who will be calling the API.

For a Servicing's Authorized Party who will be accessing Servicing APIs on behalf of multiple lenders, you will need to be able to provide your platform's unique ID, Lender IDs for all lenders you will be reporting on behalf of, and all the individual users who will be calling the API.

3.2 Integration Account Set Up

An FHA representative will review your information and then contact you to provide your test account information for the partner test environment, partner test environment endpoints for the Claims APIs and explain how to obtain the required OAUTH-2 security token issuance credentials.

When you receive your test account information, please complete the setup of your account promptly to avoid the expiration of your temporary credentials.

A user with the FHA Claims Permission Set must be assigned as Account Manager on the account.

3.3 Integration Testing

FHA requires all integration partners to successfully complete an initial integration test suite.

All custom application development and testing must be formed using the Catalyst Partner environment. This environment exposes the same API as the Catalyst PROD environment, but the functionality provided can vary slightly to facilitate development and testing. Integration testing must be performed with test data. Do not use production or real-world information for integration testing.

FHA Catalyst: Claims Module Developer Guide

Due to the variety and volume of participants using the environment, we ask that Partners limit their interaction for the number of submissions needed to functionally test the integration. In other words, please do not use the Partner test environment for any type of load or performance testing.

3.4 Approval to Go Live in Production

After completing the integration testing, FHA Approved lenders may request access for a new user account by contacting the FHA Resource Center at answers@hud.gov

Note: Holding and Servicing Lenders using an Authorized Party to submit and manage services in *FHA Catalyst* on their behalf, controls the permissions within *FHA Catalyst*. Please ensure all permissions are set up before you begin your testing.

3.5 Production Account Set Up and Maintenance

After you have completed your production account set up, you can begin to use the *FHA Catalyst* web services in production. Protect your system access credentials and update them as required. Account passwords are required to be changed on a regular basis; the system will prompt you to update passwords in advance of expiration.

Self-service password resets for established users are available on the *FHA Catalyst* webpage. Assisted credential provisioning is available by contacting your organization's system administrator or the *FHA Catalyst* help desk.

Note: The use of test data is not permitted in the *FHA Catalyst* production environment. Holding and Servicing Lenders and their Authorized Parties who would like to test their workflow processes in *FHA Catalyst*, such as new business relationships or regression testing their own system releases, must use the *FHA Catalyst* partner test environment.

FHA Catalyst: Claims Module Developer Guide

4. User Roles and Integration Security

4.1 Transport Security

FHA Catalyst exposes a set of web services that are secured with industry standard encryption protocols and cipher suites. Integration systems must be able to create a connection to an HTTPS enabled website. The *FHA Catalyst* site uses TLS 1.2 and an SSL Certificate from a publicly trusted issuer.

4.2 *FHA Catalyst* User Roles and Credentials

As part of an *FHA Catalyst* organizational account, *FHA Catalyst* provides separate accounts for human end users and client applications. Holding and Servicing Lenders and their Authorized Parties can use the *FHA Catalyst* Claims APIs.

Holding and Servicing Lenders will be able to view all Claim information uploaded or processed on their behalf by the Authorized Party when they log into the *FHA Catalyst* website. Similarly, Holding and Servicing Lenders and their Authorized Party will be able to view all Claim information (with appropriate authorizations) they have uploaded or processed across their Lender clientele when they log into the *FHA Catalyst* website.

Software that uses the *FHA Catalyst* API must present two sets of credentials: one set of credentials identifies the client application and permits system to system communications and the other credentials identifies the end user(s) submitting the Claim. For example, a Claim Certification request may only be submitted by an end user marked as an Employee, not a Contractor or an authorized third party.

4.3 Application Security Tokens

FHA Catalyst requires a valid security token for any API call that involves the submission or retrieval of Servicing data. Using system tokens greatly reduces the need to exchange system access credentials when using the API.

FHA Catalyst uses Amazon Web Services (AWS) Cognito as its Identity Provider for web services. AWS Cognito supports a process to validate the security tokens to authenticate the client application/system. Using AWS Cognito requires that your system be able to request a security token, using specific system issued credentials for the Identity Provider interaction. The security token has an expiration date that you can read from the token; your system must be able to request a new token when the previously issued token has expired in order to avoid interruption in the business processes.

FHA Catalyst: Claims Module Developer Guide

In order for requests to be successfully authorized by the *FHA Catalyst* services, a valid security token must be sent in the headers of **every** HTTP requests. An example of a request that can be authorized is below. Line number 9 demonstrates the header for authentication.

```
2 Host: fhacatalyst.hud.gov
3 User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64; rv:77.0) Gecko/ 20100101 Firefox/77.0
4 Accept: text/html,application/xhtml+xml,application/xml;q=0.9,image/webp,*/*;q=0.8
5 Accept-Language: en-US,en;q=0.5
6 Accept-Encoding: gzip, deflate, br
7 Connection: keep-alive
8 Upgrade-Insecure-Requests: 1
9 Authorization: <security token here>
```

Figure 1: HTTP Request

Any request that does not include a valid security token will receive an HTTP 403 error for a response. Sample code that can use the AWS SDK to translate a set of credentials into a valid security token is available upon request from the *FHA Catalyst* Team.

FHA Catalyst: Claims Module Developer Guide

5. API Details

5.1 Domain Model and Business Logic

The Claims Module API uses mortgage industry standards for FHA loan data. HUD lending partners are assumed to have a similar industry knowledge of these concepts and definitions. The following highlights key information in the context of how the Claims Module queries claim information.

The unique identifiers for the APIs are as follows:

1. For Single Claim Query: `claimId`
 - *FHA Catalyst unique id assigned to a claim*
2. For Bulk Claim Query: **`fhaCaseNumber`** or **`claimId`** or **`lenderId`**
 - HUD assigned *lenderId* for an approved holding or servicing lender is obtained from the OAUTH2 token. A Servicing's authorized party must provide the *lenderId* of the servicing lender whose behalf they are using this API.
3. For request: `bulkJobId`
 - Unique id assigned to request job to track status
4. For response document request: `responseDocumentId`
 - Unique id assigned to documents used to store request job results
5. For document upload: `claimSubmissionId` and `claimPart`
 - `claimSubmissionId` is the same unique claim ID as `claimId` in other methods
 - `claimPart` is the top-level organization of claim details, corresponding to one page of claim data in FHA Catalyst
6. For Claim Certification and Submission: `claimSubmissionId`

Note: Refer to [Appendix E](#) for FHA Catalyst Claim Data Dictionary.

FHA Catalyst: Claims Module Developer Guide

5.2 Technical Workflow Diagram

The sequence diagram shows the interaction between a client being a Servicing Lender and the Claims API. Methods not shown here use a similar workflow to these examples.

Retrieve Claim Details:

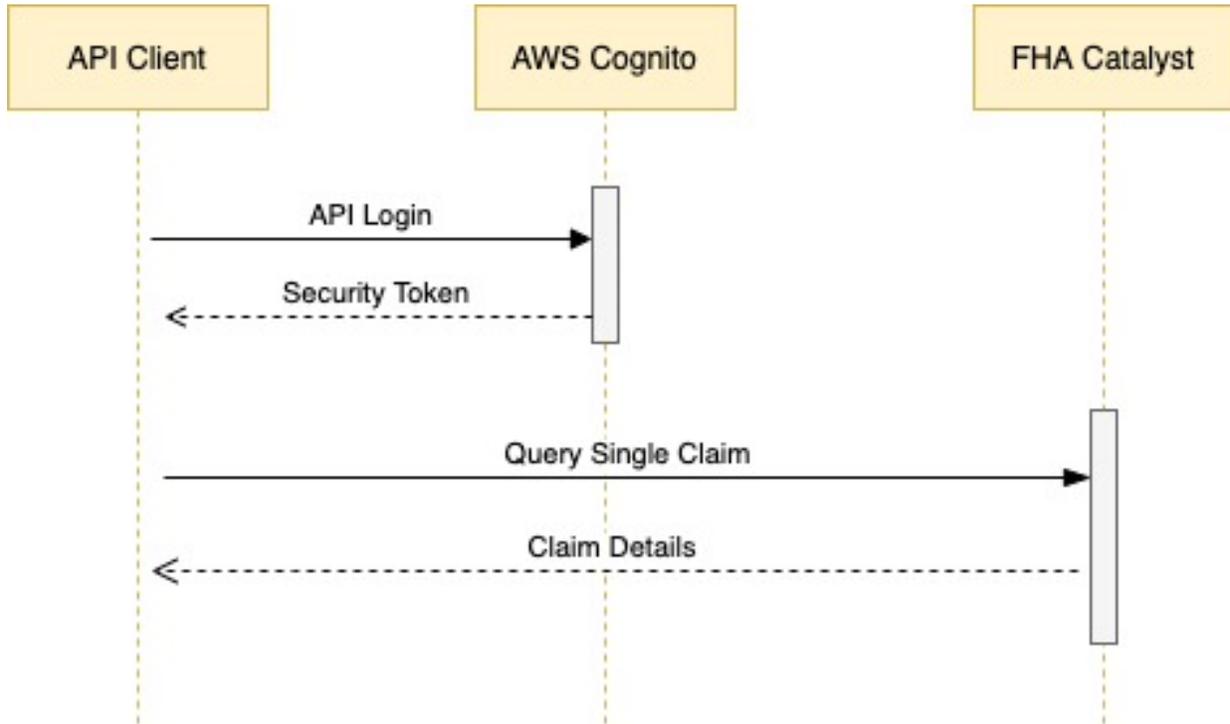

Figure 2: Retrieve Claim Details Query and Response

FHA Catalyst: Claims Module Developer Guide

Retrieve Bulk Claim Query Details

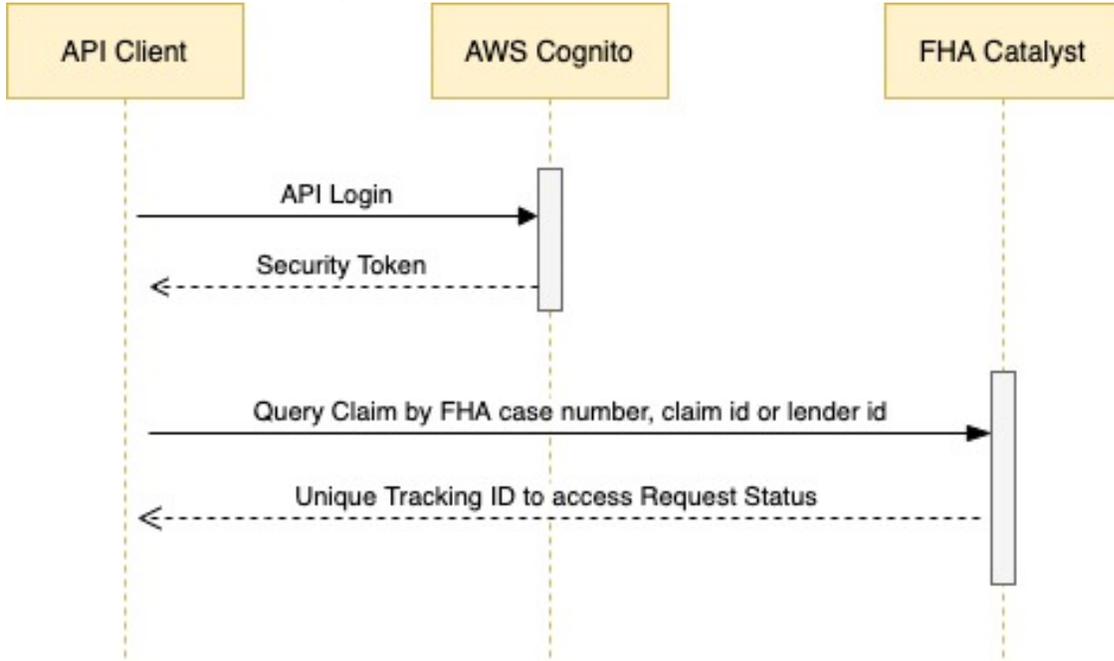

Figure 3: Bulk Specific Claim Details Request and Response

Claims Request:

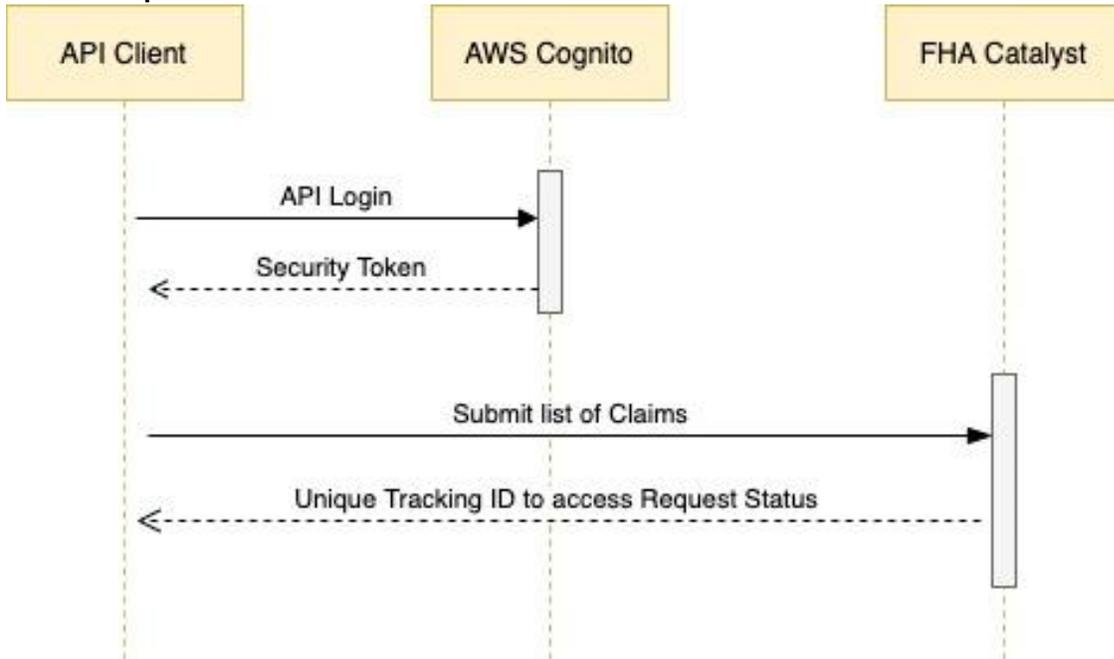

Figure 4: Claim Request and Response

FHA Catalyst: Claims Module Developer Guide

Request Status:

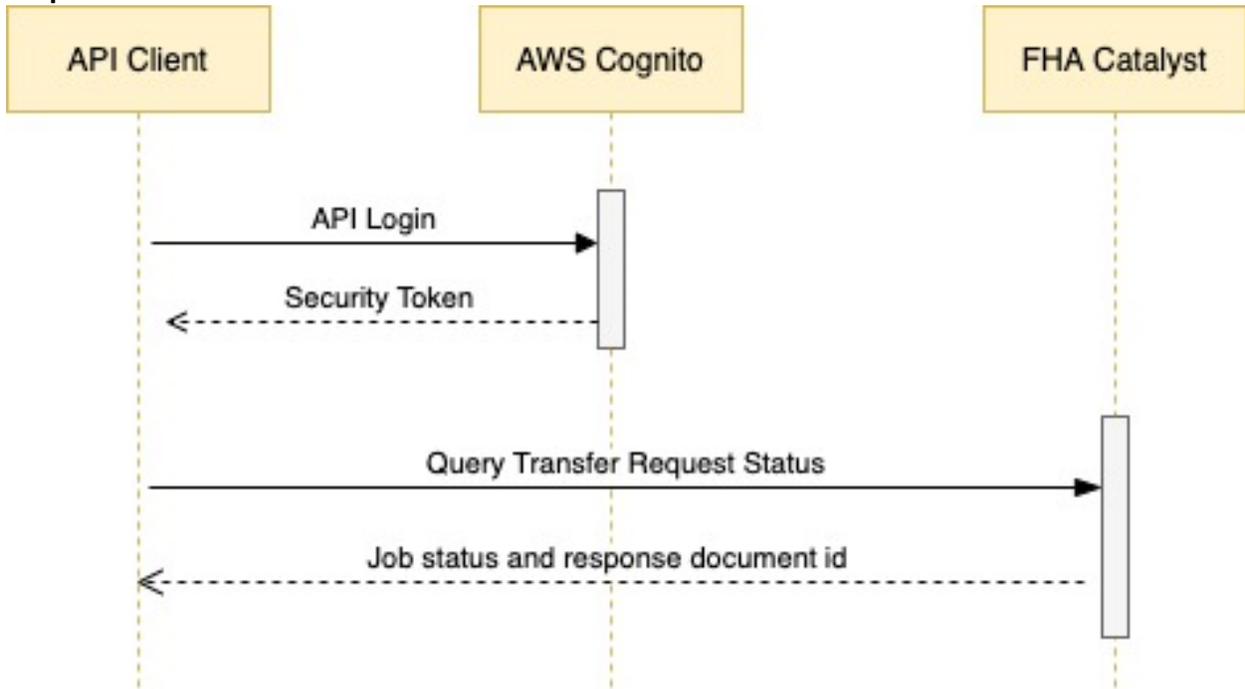

Figure 5: Request Status

Retrieve Response Document:

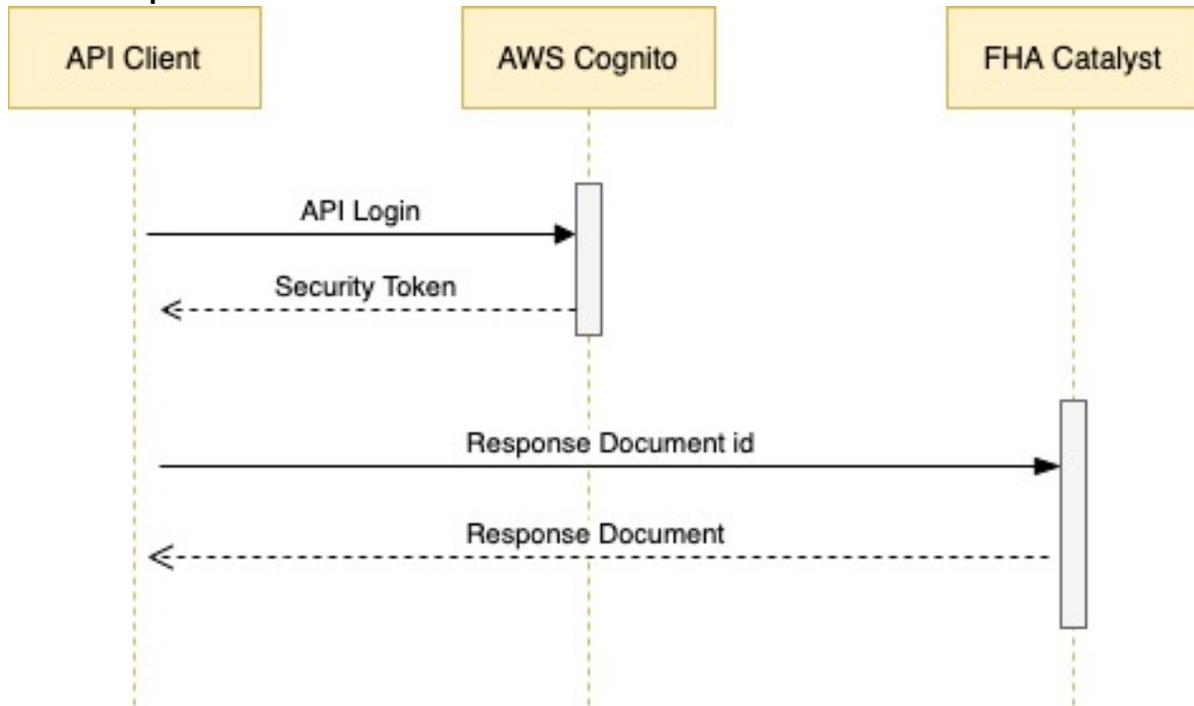

Figure 6: Retrieve response document

FHA Catalyst: Claims Module Developer Guide

5.3 Method: Single Claim Query

Method: ***HTTP GET /claim/api/claimssubmission/{claimId}***

- a. Retrieve key claim details associated with the claimId provided
- b. Claims Module API responds with JSON formatted findings

Sample Request:

```
curl --request GET 'https://.../claim/api/claimssubmission/{claimId}'  
--header 'Authorization: BEARER (security token here)'
```

Note: Refer to [Appendix A](#) for the Sample Query Response JSON Format.

HTTP Response Codes for Single Claim Query:

HTTP Status Code	Description
200	The data that was requested will be returned in the response body.
400	The Claim Identifier provided does not meet the validation requirements.
403	The user is not allowed to access the data requested or specified.
404	The Claim Identifier specified does not exist in the system.
500	The server is currently down and not able to process incoming requests.

Table 1: HTTP Response Codes for Single Claim Query

5.4 Method: Bulk Claim Query Request and Response

Method: ***HTTP POST /claim/api/bulk/query***

- a. Submit a specific claim details request file submitted as a JSON file or gzip JSON file. The headers of Content-Type and Content-Length are required. The accepted content type are 'application/json' and 'application/gzip'. The Content-Length should be the size of the file in bytes.
- b. Retrieve all claims and claim details associated with either a list of fhaCaseNumbers or claimId or the lenderIds of the holding or servicing lender and daysLastChanged (maximum 14 days). An error will be returned if fhaCaseNumbers or claimId or lenderIds and daysLastChanged are sent together.
- c. Claims Module API responds with a unique Tracking ID that can later be used to obtain the processing status of the request. Upon successful completion of the request, bulk claim query results will be available for download through a dynamically generated URL

FHA Catalyst: Claims Module Developer Guide

Sample Request:

```
curl --request POST 'https://.../claim/api/bulk/query'  
--header 'Authorization: BEARER (security token here)'  
--header 'Content-Type: application/json'  
--header 'Content-Length: 54'
```

Sample Request Payload:

```
{  
  "fhaCaseNumbers": [  
    "371-4687838",  
    "371-3958073"  
  ]  
}  
Or  
{  
  "claimIds": [  
    "e262023d-953b-4db6-a1e3-c5bcb7aee859",  
    "c523023d-3b95-b64d-cde4-eb5cb2aac254"  
  ]  
}  
Or  
{  
  "lenderIds": [  
    "3958054875"  
  ],  
  "daysLastChanged":14  
}
```

Sample Response:

```
bf6e3e06-eade-484d-a85d-c578c88dc9a9
```

Sample Response from File URL when request is completed:

Refer to [Appendix A](#) for the Sample Query Response JSON Format for one claim. File will contain a record for each claim from request.

HTTP Response Codes for Bulk Claim Query:

HTTP Status Code	Description
200	Specific Claim Query request has been accepted and passed basic validation. The response body will contain a Tracking ID that will allow you to track the status of the report as it gets processed.
400	Specific Claim Query request has not passed basic validation. This could be for invalid JSON format, invalid file type compression, and/or invalid field types. The response body of the 400 will be in JSON and contain all error details. Data will not be processed.
403	You do not have permission for this service.
404	The given HTTP method was not valid. Data will not be processed.
500	Internal Server Error. Server encountered an unexpected condition. Try again later.

Table 2: HTTP Response Codes for Bulk Specific Claim Query

FHA Catalyst: Claims Module Developer Guide

5.5 Method: Bulk Claim Submission Request & Response:

Method: [HTTP POST /claim/api/bulk/submission](https://.../claim/api/bulk/submission)

- Submit a claim request file submitted as a JSON file or a gzip JSON file. The headers of Content-Type and Content-Length are required. The accepted content type are 'application/json' and 'application/gzip'. The Content-Length should be the size of the file in bytes.
- Claim Module API responds with a unique Tracking ID that can later be used to obtain the processing status of the request.
- Multiple claim requests may be sent within the same request payload with a maximum of 200 claims.

Sample Request:

```
curl --request POST 'https://.../claim/api/bulk/submission'  
--header 'Authorization: BEARER (security token here)'  
--header 'Content-Type: application/json'  
--header 'Content-Length: 6680'
```

Note: Refer to [Appendix B](#) for the Sample request JSON Format payload.

Sample Response:

```
bf6e3e06-eade-484d-a85d-c578c88dc9a9
```

Sample Response with JSON validation errors:

```
{  
  "errors": [{  
    "errorMessage": "mortgageeContactInformation.phoneNumber: does not  
match the regex pattern [()][2-9]{1}[0-9]{2}[][0-9]{3}-[0-9]{4}"  
  },  
  {  
    ...  
  }  
}]  
}
```

FHA Catalyst: Claims Module Developer Guide

Sample Response from File URL when request is completed:

```
[{
  "claimId": " e262023d-953b-4db6-a1e3-c5bcb7aee859"
  "fhaCaseNumber": "999-1234567",
  "claimType": "32-Loan Modification",
  "claimsLenderStatus": "Draft",
  "lenderLoanIdentifier": "24689",
  "errors": [{
    "errorCode": "Part B: Title Search - Foreclosure,
Acquisition, C",
    "errorMessage": "Part B: Title Search - Foreclosure,
Acquisition, Conveyance and Other Costs (from Line 307, Part D) is not
allowed."
  },
  {
    ...
  }]
},
{
  ...
}]
```

HTTP Response Codes for Bulk Claim Submission Request:

HTTP Status Code	Description
202	Claim request has been accepted and passed basic validation. The response body will contain a Tracking ID that will allow you to track the status of the report as it gets processed.
400	Claim request has not passed basic validation. If the Headers is missing or invalid Content-Type/Content-Length, the response should be 400 and return error message.
403	You do not have permission for this service. Or missing Authorization Header Information
405	The given HTTP method was not valid. Data will not be processed.
500	Internal Server Error. Server encountered an unexpected condition. Try again later.

Table 3: HTTP Response Codes for Claim Request

FHA Catalyst: Claims Module Developer Guide

5.6 Method: Bulk Claim Certification:

Method: [HTTP POST /claim/api/claim/certify](#)

- Submit a claim certification request file submitted as a JSON file. The headers of Content-Type and Content-Length are required. The accepted content type is 'application/json'. The Content-Length should be the size of the file in bytes.
- Multiple claim requests may be sent within the same request payload with a maximum of 200 claims.

Sample Request:

```
curl --request POST 'https://.../claim/api/claim/certify'  
--header 'Authorization: BEARER (security token here)'  
--header 'Content-Type: application/json'  
--header 'Content-Length: 6680'
```

Note: Refer to [Appendix C](#) for the Sample request JSON Format payload.

HTTP Response Codes for Bulk Claim Certification:

HTTP Status Code	Description
200	Claim request has been accepted. Claims in the request which are in any Draft status and which this user is authorized to certify will be signed and submitted to HUD. Claims which are not valid for this request will not be updated.
400	Claim request has not passed basic validation (e.g. header missing, malformed JSON).
403	You do not have permission for this service, or missing Authorization Header Information. Specifically, a user has permission to use this method only if the Contact in FHA Catalyst with a matching email address has a "Relationship of User to Mortgagee" of "Employee".
500	Internal Server Error. Server encountered an unexpected condition. Try again later.

Table 4: HTTP Response Codes for Claim Certification

5.7 Method: Request Status Query Request & Response:

Method: [HTTP GET /claim/api/bulk/{bulkJobId}](#)

- Query the status of a previously submitted bulk query or bulk submission
- Successful invocation of this service will respond withResponse status code and a JSON body indicating the job status.
- If the job status is COMPLETED or COMPLETED_WITH_ERRORS, then the JSON with responseDocumentId will be returnedfor the client to know where to retrieve the response file associated with the request(s).

Sample Request:

```
curl --request GET 'https://.../claim/api/bulk/{bulkJobId}' \  
--header 'Authorization: BEARER (security token here)'
```

Sample Response:

FHA Catalyst: Claims Module Developer Guide

```
{
  "bulkJobId": "29a557a7-e66d-4e8f-9510-7e5ca578ca0b",
  "submissionDate": "2021-12-31T12:56:45",
  "requestType": "CLAIMS_SUBMISSION",
  "jobStatus": "COMPLETED",
  "responseDocumentId": "951029a5-7e5c-78ca-57a7-e66da50b4e8f"
}
```

Processing Status Values:

Name	Description
ACCEPTED	The file has been accepted, but processing has not started.
PROCESSING	The file is currently being processed
FAILED_VIRUS_SCAN	The file being processed failed to pass the virus scan
FAILED_VALIDATION	The file failed being validated by a json schema. A list of validation errors will be in the response document.
COMPLETED	The file processing has completed.
COMPLETED_WITH_ERRORS	The file processing has completed, but there are errors with the data submitted for one or more requests
STOPPED_EXCEPTION	The file processing has stopped and is in an exception state. Clients should reach out to technical support with the Tracking id for assistance.

Table 5: Processing Status Values for Requests

HTTP Response Codes for Request Status Query:

HTTP Status Code	Description
200	The claim bulk request processing has completed, and the status and other details will be returned in the response body.
202	Claim bulk request has been accepted and is under processing. In the response body, job status will be 'ACCEPTED' or 'PROCESSING'.
400	The bulk job identifier provided does not meet the validation requirements.
403	The user is not allowed to access the data requested or specified.
404	The bulk job identifier specified does not exist in the system.
500	The server is currently down and not able to process incoming requests.

Table 6: HTTP Response Codes for Document Request

FHA Catalyst: Claims Module Developer Guide

5.8 Method: Download Response Document

Method: **HTTP GET /claim/api/bulk/response/{responseDocumentId}**

- Retrieve key document associated with the responseDocumentId provided
- Claims Module API responds with JSON formatted findings

Sample Request:

```
curl --request GET
'https://.../claim/api/document/{responseDocumentId}' \
--header 'Authorization: BEARER (security token here)'
```

HTTP Response Codes for Download Response Document:

HTTP Status Code	Description
200	The data that was requested will be returned in the response body.
400	The Claim Identifier provided does not meet the validation requirements.
403	The user is not allowed to access the data requested or specified.
404	The Claim Identifier specified does not exist in the system.
500	The server is currently down and not able to process incoming requests.

Table 7: HTTP Response Codes for Download Response Document

5.9 Method: Document Upload:

Method: **HTTP POST /claim/api/claim/document/{claimSubmissionId}/{claimPart}**

- Upload a supporting document to the 27011A Detail object specified by the claimSubmissionId and claimPart provided.
- For claim parts that have a detailed description for file uploads (e.g. claim type 11A-Reacquisition A, Part A), optionally specify the description in the request body, with key 'uploadedFor'. If none is specified, the API will choose the first one.
- The file to upload should be in the request body, with key 'file'.
- Claims Module API responds with HTTP response code.

HTTP Response Codes for Download Response Document:

HTTP Status Code	Description
200	File uploaded successfully.
400	The request is invalid: claim does not exist, claim part does not exist, no file provided, etc. For example, claim type 01A cannot specify Part B.
401	The user is not the submitter of this claim and is not authorized to upload documents to it.
403	The user is not allowed to upload this data (invalid authorization token).
500	The server is currently down and not able to process incoming requests.

Table 8: HTTP Response Codes for Document Upload

FHA Catalyst: Claims Module Developer Guide

Appendix E: *FHA Catalyst* Authorized Party Registration Form

FHA CATALYST

FHA Catalyst Authorized Party Registration Form

This form allows FHA Approved Mortgage to register their Authorized Parties (APs) to have access and/or integrate via Application Programming Interface (**API**) with *FHA Catalyst*. The *FHA Catalyst* modules includes Loan Origination, Property Valuation, Servicing, Claims and Disposition.

An AP would include, but not limited to, a Loan Origination System (LOS) Vendor, Lender Agent, Appraisal Management Company, Servicing Platform Vendor, Service Bureau, Claim Platform Vendor, or Third Party Vendor. The *FHA Catalyst* team will create an account for the entity and develop the relationship. Items that are required are denoted with a red asterisk (*).

Please submit one (1) Authorized Party Form for each Catalyst module (Test and Production environment)

FHA Approved Mortgagee Information:

Please select at least one checkbox below first

- Lender/Servicer
- Service Bureau

Lender Name*:	Lender ID*:
First Name*:	Last Name*:
Business Email*:	Credit Reporting Agency:

Authorized Party Information:

Please select at least one checkbox below first

- Software Platform Company
- Lender / Servicer
- Service Bureau
