

**Eco-Healthy
Child Care[®]**

Training Quiz

1. What two heavy metals are of particular concern when considering children's health?
_____ and _____
2. What plastics does EHCC recommend avoiding?

3. Where are these plastics (and plastic softeners) found in child care settings?

4. What are potential asthma triggers in child care settings?

5. EHCC recommends that you idle your car engine no more than _____ seconds.
6. Why is idling your car particularly bad for air quality?

7. What are potential sources of lead in child care settings?

8. What characteristics of aerosols make them a potential health threat to children?

9. What chemical leaches from CCA-treated wood? _____

10. What is the name of the management system, EHCC recommends that child care programs use, rather than resorting to chemical pest control methods?

11. What health trends are increasing in severity due, in part, to environmental triggers?

12. What environmental health threat is particularly important to you and why?

A recipient of EPA's Children's Environmental Health Excellence Award in 2006, Eco-Healthy Child Care® (EHCC) is a national program that seeks to improve the environmental health of children by partnering with child care professionals to eliminate or reduce environmental health hazards found in child care facilities. Originally created by the Oregon Environmental Council in 2005, EHCC is now managed by Children's Environmental Health Network.

For more information about the Eco-Healthy Child Care® program, go to www.cehn.org/ehcc or call 202-543-4033 ext. 13.
