

FHA

FEDERAL HOUSING
ADMINISTRATION

ANNUAL MANAGEMENT REPORT

FISCAL YEAR 2018

This Annual Management Report (AMR) for the fiscal year ending September 30, 2018 provides the Federal Housing Administration's (FHA) financial and summary performance information in accordance with OMB Circular A-136, Financial Reporting Requirements.

FHA's AMR is available on the following website:

<https://www.hud.gov/sites/dfiles/Housing/documents/FHAFY2018ANNUALMGMNTRPT.PDF>

FHA welcomes feedback on the form and content of this report.

This report is divided into four sections:

- ***A Message from the Assistant Secretary for Housing and Federal Housing Commissioner*** highlights the Office of Housing's achievements for the current fiscal year, and challenges and opportunities in the coming year.
- ***Management's Discussion and Analysis (MD&A)*** defines the organization's mission, program activities, performance goals and objectives, and includes management's assurances regarding compliance with relevant federal financial management and accounting standards, regulations, circulars, bulletins, financial management manuals, and other applicable laws, regulations and legislation.
- ***Principal Financial Statements*** include the following: Balance Sheet; Statement of Net Cost; Statement of Net Position; and Statement of Budgetary Resources; as well as the Notes to the principal financial statements.
- ***Auditor's Report*** on FHA's fiscal year 2018 financial statements, internal controls, and compliance with laws and regulations.

A MESSAGE FROM THE ASSISTANT SECRETARY FOR HOUSING AND FEDERAL HOUSING COMMISSIONER

November 15, 2018

TO THE CONGRESS OF THE UNITED STATES, MEMBERS OF THE HOUSING INDUSTRY,
AND THE AMERICAN PUBLIC:

In June of this year I rejoined HUD as Assistant Secretary for Housing and Federal Housing Commissioner. While nearly nine years have passed between my tenures, what hasn't changed is the enduring value that the Federal Housing Administration (FHA) brings to the nation's homebuyers, homeowners, renters, and communities.

Throughout the pages of this report, you will find a discussion of FHA's operations throughout Fiscal Year (FY) 2018. Embedded in this narrative is the dedication of the people of FHA and the Office of Housing. This past fiscal year we made safe, affordable housing and access to quality healthcare services a reality for millions of Americans. Much of this credit belongs to our previous Acting Federal Housing Commissioner Dana Wade, whose careful stewardship has set the stage for the work to come.

While the devastating effects of Hurricanes Harvey, Irma, and Maria may be fading for some – replaced by the new challenges of Hurricanes Florence and Michael – at FHA we are acutely aware of the ongoing struggles many families in all the impacted areas continue to face. This report outlines our hurricane relief efforts during 2018, but we will continue to focus our resources on assisting in the recovery for as long as needed.

In 2019 and beyond, FHA must continue to seek the right balance between serving the nation's families and our fiduciary responsibility to effectively manage risk to our insurance funds. Considering this, we must remain vigilant that we are operating programs that are sustainable for borrowers, renters, taxpayers, and all stakeholders; otherwise, we will jeopardize the sanctity of the government's full-faith-and-credit backing and the strength of our private markets and housing investments.

It is clear to me that the lack of modern technology is FHA's greatest operational risk and one requiring immediate attention. Updating FHA's legacy information technology systems is a priority for this

Administration. It is encouraging that there is a growing consensus that this effort is critical to the continued effectual operation of FHA.

FHA will continue to address its challenges in 2019 and beyond.

Thank you,

A handwritten signature in black ink, appearing to read "BDM", is positioned above the printed name of the signatory.

Brian D. Montgomery

Assistant Secretary for Housing and Federal Housing Commissioner

MANAGEMENT'S DISCUSSION AND ANALYSIS

FEDERAL HOUSING ADMINISTRATION AT A GLANCE

The Federal Housing Administration (FHA) was established by the National Housing Act of 1934. Headquartered in Washington, D.C., with field offices throughout the United States, FHA was integrated into the United States Department of Housing and Urban Development (HUD) in 1965.

FHA is the largest provider of mortgage insurance in the world. Since its inception, FHA has insured over 47.5 million single family homes and 48 thousand multifamily and healthcare facility mortgages.

FHA provides mortgage insurance for Single Family, Multifamily, and Healthcare Facility mortgages financed by FHA-approved lenders throughout the United States and its territories, backed by the full faith and credit of the U.S. government. This guarantee of payment in the event of default enables lenders to provide financing to eligible borrowers who may not otherwise have access to mortgage credit through the conventional mortgage market. FHA collects upfront mortgage insurance premiums at the time of loan origination, as well as monthly insurance premiums. These premiums are used to pay mortgage insurance claims.

Over the course of its history, FHA has been a critical player in the U.S. housing market, including serving millions of first-time and low-to-moderate income homebuyers; providing safe and affordable rental housing; supporting access to quality healthcare; stepping in as a countercyclical backstop during times of economic stress; and providing relief to individuals and families affected by disasters. FHA's efforts include maintaining a strong financial management strategy that balances risk to its insurance funds with its mission to serve homebuyers, renters and communities.

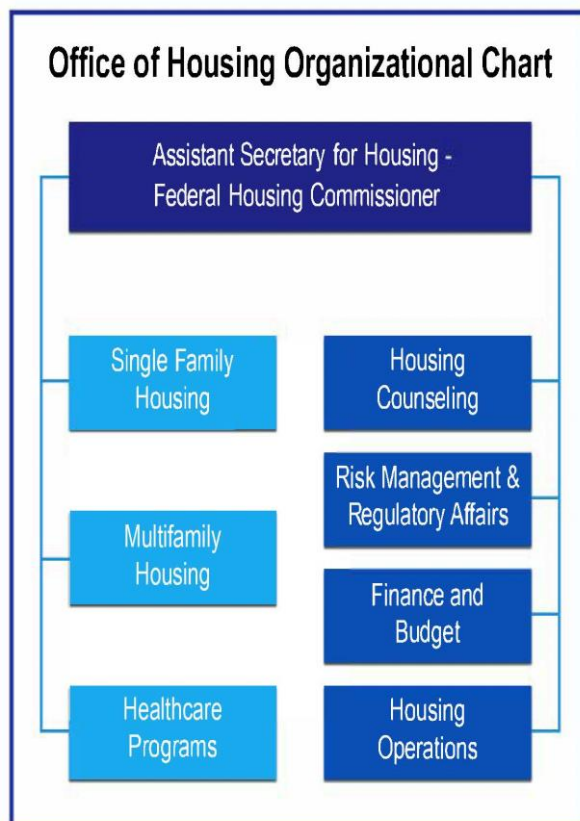

ORGANIZATIONAL STRUCTURE

FHA is part of HUD's Office of Housing and is led by the Assistant Secretary for Housing, Federal Housing Commissioner who is responsible for ensuring effective execution of its programs and policies.

Within the Office, several core support and program offices, depicted below, play a key role in administering these programs and providing financial management and accountability.

FHA administers mortgage insurance programs through its Single Family, Multifamily and Healthcare Program Offices. The Office of Housing Counseling supports FHA in achieving its mission by managing a network of HUD-approved Housing Counseling Agencies. These agencies, in turn, provide tools to current and prospective homeowners and renters so that they can make responsible choices to address their housing needs.

Among the support offices, the Office of Risk Management and Regulatory Affairs measures, monitors, and manages operational and credit risk to ensure FHA is achieving its strategic objectives. The Office of Finance and Budget (FAB) is responsible for the Office's financial activities, which include: financial management; budget formulation and execution activities; and the overall integrity of FHA's accounting records.

Additionally, FAB prepares consolidated annual financial statements and the Annual Management Report and oversees the competitive sale and disposition of mortgage notes. The Office of Housing Operations supports all office divisions with a variety of services, including contracting and procurement.

RECOVERY EFFORTS FOR NATURAL DISASTERS

Both 2017 and 2018 marked some of the worst periods of natural disasters in U.S. history in terms of level of unprecedented devastation, the enormous impact to homeowners and others, and the recovery cost. Although disaster recovery efforts began immediately, those impacted have a long road ahead to full recovery.

The Department of Housing and Urban Development (HUD) is the lead federal coordinating organization for long-term disaster-related housing needs. FHA plays a major role within the Department in providing relief to individuals and families, as well as its business stakeholders, impacted by these disasters. This report highlights FHA's disaster relief and recovery support, including:

- Granting extended foreclosure moratoriums in affected areas to so that homeowners with FHA-insured mortgages could focus on recovery without having to deal with losing their homes;
- Modifying policies in the most severely affected areas to provide additional options to assist Single Family homeowners in bringing their mortgage payments current;
- Supporting Multifamily property owners, lenders, and tenants with inspections of all FHA-insured properties in the affected areas;
- Providing structural engineers and support teams to inspect hospitals and residential care facilities in the impacted areas; and
- Actively engaging with HUD-approved Housing Counseling Agencies in the impacted areas to ensure continuity of operations and to provide tools and resources to assist counselors in working with clients.

Beyond policy actions, FHA continues to play an instrumental role in supporting HUD's "on-the-ground" efforts, with staff members working directly in the impacted areas in the immediate aftermath of the disasters.

FHA remains committed to providing relief to individuals and families, as well as its stakeholders, impacted by these disasters. More recently, Hurricanes Florence and Michael in September and October of 2018, respectively, impacted the lives and properties of thousands of homeowners with FHA-insured mortgages. At this time, the expected loss from the damage caused by these hurricanes cannot be reasonably estimated.

FHA'S INSURANCE FUNDS

Overview

FHA programs are operated primarily through two insurance funds, the Mutual Mortgage Insurance Fund (MMIF) and the General Risk and Special Risk Insurance (GI/SRI) Fund:

- The MMIF comprises FHA's Single Family forward mortgage business and its Home Equity Conversion Mortgage (reverse mortgage) portfolio for endorsements in fiscal year 2009 and later.
- The GI/SRI comprises Multifamily insurance programs, healthcare facility programs, pre-2009 Home Equity Conversion Mortgages, and Single Family Title I Manufactured Housing and Property Improvement programs.

The Mutual Mortgage Insurance Fund Capital Ratio

In the National Affordable Housing Act of 1990, Congress introduced a capital ratio requirement for gauging the financial status of FHA's MMIF (12 USC 1711(f)(4)). The MMIF's capital ratio compares the "economic net worth" of the MMIF to the dollar balance of active, insured loans, at a point in time. Economic net worth is defined as a net asset position, where the present value of expected future revenues and net claim expenses is added to current balance sheet positions. The capital ratio computation presented below combines the MMIF's actual capital resources as of September 30, 2018 with the net present value of future cash flows from outstanding books of business.

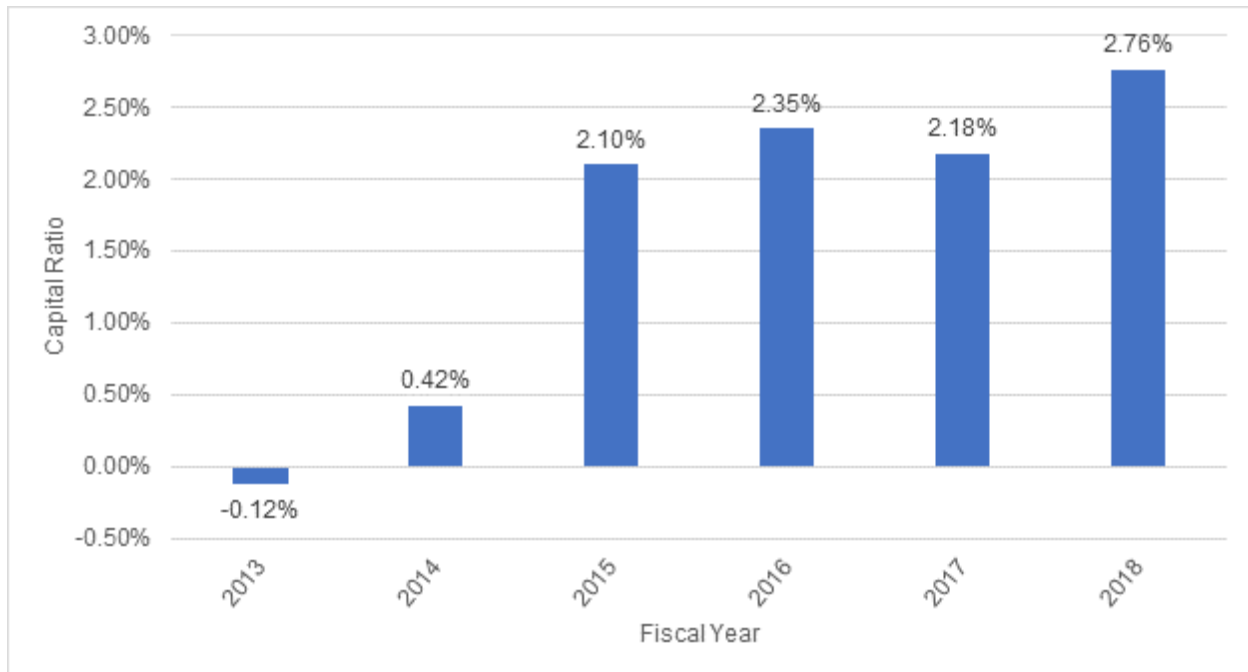

Capital resources of the MMIF are in two types of accounts: a financing account and a capital reserve account. Funds in the financing account cover expected losses over the life of each insurance cohort, while capital reserve balances are accumulated for unanticipated losses.

In fiscal year 2018, the MMIF's economic net worth increased from \$26.75 billion for fiscal year 2017 to \$34.86 billion for fiscal year 2018. Similarly, the capital ratio increased from 2.18 percent to 2.76 percent between the end of fiscal year 2017 and the end of fiscal year 2018. The MMI Fund's economic net worth has increased by \$36.19 billion since fiscal year 2013. The MMI Fund capital ratio similarly increased by 2.88 percentage points over that time, from negative (-) 0.12 percent to 2.76 percent.

The portfolio valuation underlying the statutory capital ratio calculation is performed by independent consultants, using FHA data and applying the economic assumptions for the President's Fiscal Year 2018 Budget Mid-Session Review. That valuation is subject to uncertainty both from future economic conditions and from borrower behavioral patterns that could vary from underlying assumptions built into forecasting equations. FHA performed its own internal risk evaluation with the assistance of independent contractors throughout fiscal year 2018. As required by law, FHA also engaged an independent actuarial firm to produce an independent estimate of the net present value of the future cash flows from the MMI Fund's current book of business. For FY 2018, the Independent Actuary concluded that FHA's Cash Flow NPV is reasonable and within Pinnacle's reasonable range of Actuarial Estimates. The Independent Actuary's Cash Flow Net Present Value (Cash Flow NPV) estimates for the Forward and HECM portfolio

combined total negative \$10.76 billion, versus the negative \$14.38 billion FHA baseline estimate. The difference between the two estimates of \$3.62 billion is 0.29 percent of IIF.

MMIF Capital Ratio

SOURCE: U.S. Department HUD/FHA, October 2018

We have seen increased risk coming to the fund in fiscal year 2018 as measured by a higher percentage of forward mortgages with down payment assistance; an increase in cash out refinance transactions, and borrowers with higher debt-to-income ratios. The HECM portfolio also continues to adversely impact the health of the MMIF.

For more information about the Mutual Mortgage Insurance Fund, risk characteristics and drivers of financial results, access FHA's *Annual Report to Congress Regarding the Financial Status of the Mutual Mortgage Fund for Fiscal Year 2018* at: <https://www.hud.gov/fhammifrpt>

PERFORMANCE GOALS AND OBJECTIVES

HUD STRATEGIC PLAN

The Government Performance and Results Act (GPRA) requires that Federal agencies develop multiyear strategic plans that include program goals and performance measures, the results of which are reported to the public. Under Secretary Carson's leadership, HUD has developed a new strategic plan. One of the main goals of HUD's plan is to reimagine how HUD itself works, which includes how the Agency can deliver services more efficiently and effectively. It also means that as stewards of the public trust, HUD must be accountable as the public's servant.

FHA's ability to responsibly support homeownership opportunities, allow private capital to play a substantial role in housing markets, and manage its programs with more efficiency will play a large role in shaping and implementing this strategic plan.

Performance Reporting

Performance reporting of targets and actual achievements as of September 30, 2018 will be reported in HUD's Annual Performance Report (APR) to be published in February 2019, and will be available on the following website: https://www.hud.gov/program_offices/spm/pmd.

Note on Forward-Looking Information

Information contained in this document is considered "forward-looking" as defined by the Federal Accounting Standards Advisory Board's (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) No. 15, "Management's Discussion and Analysis," and Statement of Federal Financial Accounting Concepts (SFFAC) No. 3, "Management's Discussion and Analysis Concepts." While the agency does have reasonably reliable processes, procedures, and systems to collect performance data and their supporting attributes, there are inherent limitations to the completeness and reliability of performance information. Such forward-looking information includes estimates and is subject to risks and uncertainties that could cause actual results to differ materially from the estimates used in the document. Additionally, economic and legislative factors outside of FHA's control may affect its ability to influence key performance goals.

FHA PROGRAMS AND PERFORMANCE SECTION**Office of Single Family Housing Programs**

The Office of Single Family Housing is responsible for administering FHA mortgage insurance policies and programs that help make homeownership opportunities available for millions of mostly first-time, and low-to-moderate income borrowers each year. We have a fiduciary responsibility to help prudently manage FHA's \$1.2 trillion Mutual Mortgage Insurance Fund while providing mortgage insurance for individual and families who are ready to become homeowners.

Gisele Roget, Deputy Assistant Secretary
Office of Single Family Housing

Overview

The Office of Single Family Housing (SFH) supports affordable homeownership and refinancing opportunities for qualified borrowers through its Single Family mortgage insurance programs. FHA's Single Family programs insure mortgage lenders against losses from default, encouraging lenders to provide mortgage financing to eligible homebuyers, including first-time and low-to-moderate income homebuyers. Historically, more than 80 percent of the purchase mortgages FHA insures annually are for first-time homebuyers.

FHA's Single Family insurance endorsement program is self-funded through its Mutual Mortgage Insurance Fund (MMIF). The MMIF is funded through the collection of two types of mortgage insurance premiums: an up-front mortgage insurance premium charged to borrowers for each FHA-insured mortgage at endorsement and monthly insurance premiums that lenders collect from borrowers and remit to FHA.

The National Housing Act, as amended by the Housing and Economic Recovery Act of 2008 (HERA), requires FHA to set Single Family forward mortgage limits at 115 percent of median house prices, subject to a floor and a ceiling on the limits. FHA's forward mortgage limits are set by Metropolitan Statistical Area and county. In 2018, the loan limit floor for a forward mortgage on an FHA-insured single family property in a low-cost area was \$294,515, and the loan limit ceiling in a high-cost area was \$679,650. There is a higher ceiling for loan limits in Alaska, Hawaii, Guam, and the U.S. Virgin Islands.

Fiscal Year 2018 Portfolio and Performance Highlights

- Insured 1,014,609 single family forward mortgages with an Unpaid Principal Balance of \$209 billion
- Served 641,921 first-time homebuyers, constituting over 82 percent of total forward purchase mortgage endorsements
- Insured 48,327 reverse mortgages with a Maximum Claim Amount totaling \$16.2 billion

Single Family Housing Programs Division Structure

Headquartered in Washington, D.C., SFH is comprised of the Office of the Deputy Assistant Secretary and three headquarters-based Program Offices. It also includes four regional Homeownership Centers – located in Atlanta, Denver, Philadelphia, and Santa Ana – each of which supports the operational aspects of FHA mortgage insurance for a designated geographic area.

- The **Office of Single Family Program Development** is responsible for the development and implementation of all SFH origination through endorsement policies, program guidelines, standards, and operating procedures for FHA's Single Family Title I and Title II mortgage insurance programs under the National Housing Act. It also is responsible for the development and oversight of SFH employee and external stakeholder communications, marketing, outreach, and training that supports these efforts.
- The **Office of Single Family Asset Management** is responsible for the development and implementation of policies that helps protect homeowners and the Government's financial interests in FHA's insured mortgages from the point of loan insurance through loan payoff or disposition. The Office includes the FHA National Servicing Center based in Oklahoma City and Tulsa, Oklahoma.
- The **Office of Lender Activities and Program Compliance** provides oversight and enforcement and uses risk management strategies to implement process changes for FHA-approved lenders. Additionally, it takes enforcement actions against Multifamily lenders as it relates to recertification or non-compliance with approval requirements.

Insurance Programs

FHA insures mortgages for one-to-four unit single family residential properties through its Title II forward and reverse mortgage programs. Under Title I programs, FHA insures loans for both manufactured homes titled as personal property, and property improvement loans.

Title II Forward Mortgage Programs

Single Family Title II mortgage insurance programs include:

- **Section 203(b): Mortgage Insurance for One-to-Four Family Homes:** FHA insures loans made by lending institutions for new or existing one-to-four unit single family residences, including manufactured homes and individual condominium units, with loan terms up to 30 years.
- **Section 203(h) Mortgage Insurance for Disaster Victims:** This section of the National Housing Act authorizes FHA to insure mortgages to victims of a Presidentially-Declared Major Disaster Area for the purchase or reconstruction of a single family property or a unit in an FHA-approved condominium project.
- **Section 203(k) Rehabilitation Mortgage Insurance Program:** Section 203(k) insurance enables homebuyers and homeowners to finance both the purchase or refinancing of a house and the cost of its rehabilitation through a single mortgage, or to finance the rehabilitation of their existing home.

FHA offers additional Title II forward mortgage insurance programs. A complete list of programs can be found on the Single Family Housing pages of HUD's website at https://www.hud.gov/program_offices/housing/sfh

Title I Insurance Endorsement Program

Title I Manufactured Home Loan Program: The Title I Manufactured Home Loan Program provides insurance on loans made by lenders to borrowers for the purchase of manufactured homes.

Title I Home Improvement Loan Program: The Title I Home Improvement Loan Program provides insurance on property improvement loans made by lenders which may be used to finance alterations, repairs, and improvements to a home, including a manufactured home, or to finance a nonresidential structure located on the property.

Success Story – Portfolio Recovery

The Office of Single Family Asset Management minimizes losses to the FHA Mutual Mortgage Insurance Fund by refining its reserve prices on upstream asset disposition strategies. For fiscal year 2017, upstream dispositions accounted for 55% of claims and for fiscal year 2018 upstream dispositions accounted for 65% of claims. The strategy of leveraging upstream dispositions has resulted in an improved Portfolio Recovery Rate of 53% for fiscal year 2018, as compared to the fiscal year 2017 Portfolio Recovery rate of 47%.

Title II Reverse Mortgage Program

Section 255: Home Equity Conversion Mortgage (HECM): FHA's HECM reverse mortgage program enables senior homeowners, aged 62 or older to age in place, who meet various borrower, property ownership, and financial requirements, to withdraw a portion of the value of their home without any corresponding periodic requirement to repay amounts borrowed. Instead, the principal borrowed, along with interest, mortgage insurance premiums, and servicing fees are added to the mortgage balance over time. As a result, HECM balances may eventually exceed the value of the home. HECM borrowers remain responsible for the payment of taxes, insurance, and property charges. Insurance under the HECM program helps protect lenders from losses and encourages them to participate in the program.

Fiscal Year 2018 Portfolio and Performance Accomplishments

In fiscal year 2018, FHA insured 1,014,609 single family forward mortgages with an unpaid principal balance of \$209 billion. FHA insured 48,327 Home Equity Conversion Mortgages (HECM), with a Maximum Claim Amount of \$16.2 billion. Table 1 below reflects FHA's Single Family insurance portfolio profile in fiscal years 2016 through 2018.

Table 1 - FHA's Single Family Insurance Portfolio Profile

Single Family FHA Portfolio	FY2016*	FY2017*	FY2018
Total Forward Endorsements	1,258,050	1,246,438	1,014,609
Total 203(b)	1,241,071	1,230,771	1,002,772
203(b) Purchase	863,753	867,656	765,339
Manufactured Homes (Title II)	20,367	22,334	24,300
203(b) Refinance	377,318	363,115	237,433
Manufactured Homes (Title II)	9,011	9,909	6,767
Total 203(k)	16,979	15,667	11,837
203(k) Purchase	15,760	14,424	10,945
203(k) Refinance	1,219	1,243	892
Total Reverse Endorsements (HECM)	48,868	55,291	48,327
HECM Adjustable Rate	43,667	49,576	43,424
HECM Fixed Rate	5,201	5,715	4,903
Total Single Family Endorsements	1,306,918	1,301,729	1,062,936
Total Active Loans at Year-End (Forward)	7,838,495	7,982,070	8,048,639
Total Active Loans at Year-End (Forward and Reverse)	8,430,315	8,548,921	8,596,360
Total Title I Loans	4,621	3,955	3,426
Manufactured Homes	861	848	526
Property Improvement	3,760	3,107	2,900

**The prior years' data have been updated to reflect small changes.*

The Single Family mortgage insurance programs continue to be critically important sources of home financing for many individuals and families. In fiscal year 2018, 82.7 percent of home purchasers under the forward mortgage insurance program were first-time homebuyers, and 33.9 percent of all purchase and refinance borrowers were minority borrowers. Table 2 below provides additional detail on the profile of borrowers served through the Single Family mortgage insurance programs.

Table 2 – FHA’s Single Family Borrowers Profile

Borrowers Served - Single Family Mortgage Loans	FY2016*	FY2017*	FY2018
Forward Mortgage Insurance Endorsements			
Average Loan Amount	\$195,068	\$201,338	\$206,041
Average Credit Score of Borrowers**	680	676	670
First-Time Homebuyers	722,070	725,221	641,921
% of SF FHA Forward Purchasers	82.1%	82.2%	82.7%
Minority Borrowers	340,919	365,580	326,550
% of all SF FHA Forward Mortgage Borrowers**	32.5%	33.7%	33.9%
Low and Moderate Income Borrowers	600,672	612,335	552,857
% of all Forward Mortgage Borrowers**	57.3%	56.4%	57.4%
Reverse Mortgage Insurance Endorsements			
Average Initial Principal Limit (amount available)	\$180,060	\$191,775	\$185,106
Average Maximum Claim Amount	\$300,000	\$319,962	\$334,989
Minority Borrowers	8,006	8,517	6,379
% of all SF FHA Reverse Mortgage Borrowers	16.4%	15.4%	13.2%
Average Age of Borrowers	73	73	73

*The prior years' data have been updated to reflect small changes.

**The calculation excludes streamline refinances.

Strengthening the HECM Program

Due to the nonrecourse nature of a HECM, the financial soundness of the HECM program is contingent on the use of an accurate property value. To further strengthen the financial viability of the HECM program, FHA published revised appraisal requirements for new HECM originations. The new appraisal policy subjects all appraisals for loans originated after October 1, 2018 to a collateral risk assessment and requires lenders to provide a second appraisal under certain circumstances.

After further review, FHA will determine at a future date whether to extend the appraisal review process beyond fiscal year 2019.

Information Technology Modernization

SFH has begun work on a multi-year, multi-million-dollar information technology (IT) initiative to replace its antiquated systems infrastructure. This effort will permit SFH to:

- Increase compliance;
- Reduce operational burdens experienced by FHA-approved lenders and other stakeholders; and
- Save government resources.

Currently, SFH technology operates on legacy IT systems, some that are more than 40 years old, which are highly expensive to maintain and are unfit to meet the needs of 21st century business. As an example, the Computerized Homes Underwriting Management System (CHUMS), the primary mortgage insurance endorsement system, was built in 1978 and based on the Common Business Oriented Language (COBOL) programming language that was first introduced in 1959.

Through the end of fiscal year 2018, there were 174 outages of Single Family's core systems. This unreliability can prevent both FHA and its partners from doing business.

It is essential that FHA modernize its IT infrastructure to current industry standards. Without a modern system of credit risk assessment, collateral evaluation, appraisal validation, and data and records management, FHA's mission and the sustainability of its programs are substantially compromised.

The President's FY 2019 Budget requests \$20 million per year over a period of four years to develop a new Single Family FHA technology infrastructure. In preparation for the future funding, throughout fiscal year 2018, SFH has developed a technology roadmap, which provides a framework for technology projects, including:

- An automated underwriting system that will include a collateral valuation system to manage appraisal quality and valuation risk; as well as provide a comprehensive credit risk assessment and enhanced portfolio visibility;
- Paperless processing capabilities resulting in an electronic insurance endorsement binder that will streamline operations;
- A counterparty management system to provide oversight for condominium projects, non-profit organizations, 203(k) consultants and appraisers; and
- A modern Case Assignment, Insurance Application and Endorsement System.

Disaster Recovery Efforts

In the wake of Hurricanes Irma, Harvey, and Maria, and the California wildfires in the fall of 2017, SFH played a significant role in recovery efforts in affected areas and acted immediately to protect its single family assets and financial exposure. To assist homeowners with FHA-insured mortgages who live or work in Presidentially-Declared Major Disaster Areas (PDMDAs), FHA provided an initial 90-day moratorium on foreclosures, and subsequently extended the moratorium for an additional 90 days for properties located in Federal Emergency Management Administration (FEMA)-declared Individual Assistance Areas within the Hurricane Harvey, Irma, and Maria PDMDAs.

SFH further extended the moratorium in Puerto Rico and the U.S. Virgin Islands, providing a total of eight months of foreclosure moratorium relief for all borrowers, which concluded in May 18, 2018, and provided an additional 90 days, through August 16, 2018, for a targeted group of borrowers in these areas. Not only did SFH reinforce to its mortgagees that they must extend forbearance and other appropriate loss mitigation options to eligible homeowners with FHA-insured mortgages, SFH revised its loss mitigation policies to improve upon delinquent mortgage cures and avoid future foreclosure. The most significant of these changes was the introduction of the Disaster Standalone Partial Claim option, announced on February 22, 2018. The Disaster Standalone Partial Claim option was designed to help eligible borrowers on forbearance resume their pre-disaster mortgage payments and avoid payment shock.

Further, FHA revised its loss mitigation guidance for borrowers impacted by Hurricane Maria. FHA issued Mortgagee Letter 2018-05 on August 15, 2018. This Mortgagee Letter moves the Disaster Standalone Partial Claim to the top of the loss mitigation waterfall allowing lenders to evaluate Maria-impacted borrowers for the Partial Claim before performing the loan modification review. This change is designed to get more FHA borrowers into permanent loss mitigation solutions while offsetting risks and costs to FHA. FHA expects to see an increase permanent loss mitigation uptake resulting from this policy change before it sunsets on May 1, 2019.

SFH continues to actively assess the recovery in all affected areas, and the impact of disaster loss mitigation policies.

Risk Management

SFH has taken several measures relating to its loan portfolio to ensure proper risk management. Some of these measures include:

- Identifying the areas of vulnerability, especially where the dollar amounts are large; and
- Updating progress on strategies, procedures and other steps to prevent or mitigate the risk

Annual Lender Recertification - Quality Control Reviews: FHA's counterparty risk management strategy extends across all Single Family program offices and business functions. The Office of Lender Activities and Program Compliance implemented this strategy in Lender Approval and Recertification operations by ensuring that quality control reviews are performed on all auto-completed Annual Recertification packages. As of September 30, 2018, FHA's Lender Approval and Recertification Division successfully completed quality control reviews on 100 percent of the fiscal year 2017 auto-completed Certification packages, ensuring that lenders remain in compliance with financial reporting requirements.

Loan Review System (LRS): In fiscal year 2018, FHA celebrated the one-year anniversary of its LRS, an electronic platform that provides a more precise and transparent methodology for FHA quality assurance reviews. Defect Taxonomy, which was implemented as part of LRS, helps manage and consolidate all aspects of FHA's Single Family loan-and-lender-level quality assurance processes, including post-endorsement loan reviews, Direct Endorsement test cases, lender monitoring reviews, and self-reporting of fraud and other material violations of FHA policy. This consolidation significantly enhances loan quality reporting and analytics.

FHA has provided lenders with supplemental guidance on a variety of LRS functionality including self-reporting, responding to review findings, and accessing reports. Additionally, FHA held quality assurance discussions with targeted lenders aimed at reducing the initial defect rate. In fiscal year 2018, LRS continuous improvement efforts included making detailed review data available to lenders for their own analysis and comparison to national outcomes; providing clearer information about batches of loans submitted for review; and other incremental enhancements.

Mortgagee Review Board: Administrative Actions Published in Federal Register: On April 25, 2018, FHA published a notice in the Federal Register (Docket No. FR-6097-N-01) of all completed administrative actions taken by HUD's Mortgagee Review Board during fiscal year 2017. The notice provided a description of, and the cause for, the Mortgagee Review Board's administrative actions against HUD-approved mortgagees in 20 fact-based cases and 75 annual recertification violations.

Loan Sales

The Office of Asset Sales (ASO) within the Office of Finance and Budget sells single family, multifamily and healthcare notes. The goal of the Loan Sale program is to maximize returns to the FHA insurance funds. Single Family Loan Sales (SFLS) provide another disposition alternative for defaulted single family mortgages, including HECM notes. By developing the infrastructure to market and sell these loans in bulk, the agency is positioned to benefit from today's unique market dynamics where investors' demand is very high.

SFLS include the sale of forward mortgage notes as well as the sale of HECM notes. In fiscal year 2018, FHA did not have a forward mortgage sale, but conducted one HECM note sale of Secretary-held, due and payable, vacant HECM loans consisting of four pools of notes. The notes were sold through a competitive auction to qualified bidders. In this sale, HUD awarded 579 loans with an unpaid principal balance (UPB) of \$76.1 million and an updated loan balance of \$120.7 million, respectively. The notes were sold to 2 bidders with an average Bid to BPO (Broker Price Opinion) of 70 percent. This result is significantly higher than the 2 HECM notes sold in fiscal year 2017, where the Bid to BPO was 53% and 57%, respectively. The high bids received in the fiscal year 2018 sale reflects increased demand for the purchase of note packages, and results in reduced losses to FHA.

To dispose of multifamily and healthcare assets, FHA can either sell a property through foreclosure or sell the mortgage note. Note sales have historically demonstrated a greater return to the FHA Insurance Fund as compared to foreclosures. During fiscal year 2018, FHA sold 5 Multifamily first lien mortgage notes, for \$13,801,000 (33.6% of UPB) and 15 Healthcare first lien mortgage notes, for \$23,168,836 (22.4% of UPB), to successful bidders.

Office of Multifamily Housing Programs

This fiscal year, the Office of Multifamily Housing Programs maintained its commitment to producing and preserving affordable rental housing. Not only did we hit a historic low with our delinquency rate, but we also reached 100,000 public housing units converted through the Rental Assistance Demonstration program. As we move into the new fiscal year on a strong footing, we look forward to continuing to provide liquidity in the credit market as well as safe, affordable rental housing.

C. Lamar Seats, Deputy Assistant Secretary
Office of Multifamily Housing Programs

Overview

The Office of Multifamily Housing Programs provides mortgage insurance to approved lenders to facilitate the construction, rehabilitation, repair, refinancing, and purchase of multifamily rental housing projects. FHA's Multifamily mortgage insurance endorsement program is self-funded through FHA's General Insurance and Special Risk Insurance (GI/SRI) Fund. Multifamily insurance programs are funded through mortgage insurance premiums paid by lenders at the time of endorsement.

Through its broad set of programs, the work of the Office supports thousands of private-sector jobs in the construction, property management, supportive service provision, financial services and administrative fields.

Fiscal Year 2018 Portfolio and Performance Highlights

- Endorsed 908 multifamily loans totaling \$15.2 billion
- Insured 11,625 multifamily loans with an unpaid principal balance of \$95.4 billion
- Oversaw 2.6 million insured and assisted units for a total of 31,154 properties
- Maintained low default rate of 0.08%

Fiscal Year 2018 Operational Highlights

- Converted 26,977 public housing units to the Section 8 platform through the Rental Assistance Demonstration Program
- Provided disaster support by conducting preliminary assessments on 4,821 properties and onsite final assessments on 380 properties

Multifamily Housing Programs Division Structure

Headquartered in Washington, D.C., the Office of Multifamily Housing Programs is led by the Office of the Deputy Assistant Secretary for Multifamily Housing Programs and includes the following program offices:

- **Office of Production** is responsible for providing direction, technical assistance and oversight for multifamily property mortgages originated for an FHA-insurance endorsement.
- **Office of Recapitalization** is responsible for the preservation and recapitalization of federally assisted affordable housing, and also oversees and processes financial transactions to ensure the long-term physical and financial viability of affordable rental housing.
- **Office of Asset Management and Portfolio Oversight** is responsible for the portfolio of multifamily assets after the development phase.

Insurance Programs

FHA insures mortgages for multi-unit rental properties under a variety of programs:

- **Sections 213, 220, 221(d)(4), 231 and 241(a)** provide mortgage insurance on market rate and below market rate mortgages to facilitate new construction or substantial rehabilitation of multifamily rental properties, elderly housing, cooperative housing and Single Room Occupancy (SRO) projects; and insurance on loans to finance repairs, additions and improvements on projects already insured by FHA.
- **Sections 223(f) and 223(a)(7)** provide mortgage insurance for the purchase or refinance of existing rental properties financed with conventional or FHA loans and a streamlined refinancing option for mortgages that already have an FHA insurance endorsement.
- **Sections 542(b) and 542(c)** provides risk-sharing arrangements for loans for affordable multifamily rental properties originated, underwritten, and serviced by State Housing Finance Agencies (HFA), Qualified Public Entities (QPE) or Public Housing Authorities (PHAs). FHA assumes an agreed upon loss percentage on these loans and pays the entities when they dispose of defaulted loans.

Rental Assistance Demonstration

The Rental Assistance Demonstration (RAD) allows PHAs and owners of other HUD-assisted properties to leverage the private market to make capital improvements and to preserve the properties for long-term affordability. The program converts units from their original regulatory platform to project-based Section 8 contracts.

SUCCESS STORY

Park Square Homes

Park Square Homes in Baltimore, MD, consists of 262 market rate and 58 affordable units restricted at 50% of Area Median Income (AMI). The total development budget of \$80 million includes a FHA insured loan of \$56 million; \$12 million of taxable bonds from the City of Baltimore purchased by Black Rock, T. Rowe Price and Oppenheimer Funds; a \$550,000 City Municipal Grant; and \$12 million of equity/deferred developer fee from the developer, La Cite Development and the sale of Low Income Housing Tax Credits (LIHTCs). Read more about this project [here](#). The FHA insured Section 221(d)(4) loan for \$56 million was closed in January 2018.

Fiscal Year 2018 Portfolio and Performance Accomplishments

[Table 1](#) below provides information on FHA's Multifamily insurance portfolio in fiscal year 2018.

Table 1: Multifamily Endorsements by Program			
Section of the Act	Endorsements for Fiscal Year		
	2016 *	2017 *	2018 *
Section 221(d)(4): New Construction and Substantial Rehabilitation Program <ul style="list-style-type: none"> • Volume (\$Millions) • Percentage • # of Mortgages 	\$3,653 33.5% 214	\$4,453 29.2% 204	\$6,349 41.7% 269
Sections 223(f) and 223(a)(7): Purchase/Refinancing Program of Existing MHP Projects <ul style="list-style-type: none"> • Volume (\$Millions) • Percentage • # of Mortgages 	\$6,312 57.9% 592	\$9,846 64.6% 757	\$8,076 53.1% 570
Section 542(b) and 542(c): Risk-Sharing with QPEs & HFAs <ul style="list-style-type: none"> • Volume (\$Millions) • Percentage • # of Mortgages 	\$934 8.6% 82	\$941 6.2% 94	\$790 5.3% 69
Totals	\$10,899	\$15,239	\$15,215

*Percentages are based on the total mortgages endorsed. The Multifamily endorsements shown in Table 1 are based on available data for initially endorsed projects in the Development Application Processing (DAP) system. DAP is used to track and monitor Multifamily basic FHA and Risk Share loan applications.

Rental Assistance Demonstration (RAD). RAD First Component. In fiscal year 2018, 253 RAD First Component public housing transactions were closed, covering 26,977 units. Through these transactions, the PHAs secured \$1.5 billion for construction investment in our nation's public housing stock. In fiscal year 2018, RAD First Component surpassed two milestones: RAD reached \$5.9 billion in construction work generated by September 2018 and in that same month, converted its 100,000th unit since RAD's inception.

- **Two Notices Published Strengthening and Simplifying RAD.** These notices expand the tools which participants can access to preserve and recapitalize properties while continuing to ensure the equitable treatment of residents. [Click here for more info.](#)
- **RAD Cap Increased.** New legislative language in the fiscal year 2018 Appropriations Act increased the number of public housing units that could be converted under RAD by 230,000 from 225,000 units to a new cap of 455,000 units.
- **RAD Second Component.** A total of 28,835 units representing 247 projects have been converted through RAD Second Component since the program's inception through September 30, 2018.
- **Section 236 Preservation.** This program preserves the affordability of rental housing units originally developed through the Section 236 mortgage program. It allows project owners and purchasers to submit applications for prepayment approval, regulatory waivers, and continuation of interest reduction payments after refinancing directly to Recap through its centralized processing application system. In fiscal year 2018, Recap preserved 7 projects representing 7,262 units of affordable rental housing.
- **Mark-to-Market and Post Mark-to-Market (M2M).** These programs preserve affordability and availability of low-income rental multifamily properties with federally insured programs by reducing rents to market levels through restructuring of existing debt to levels supportable by these rents. In fiscal year 2018, M2M processed 12 transactions for a total of 1,328 units, of which 7 were full debt restructures with 908 units; 1 transaction with 50 units was completed as a rent restructuring; and the remaining 4 transactions with 370 units were completed as actions other than closing with the potential to re-enter the program for the full debt restructuring. Post M2M processed 21 transactions with 2,089 units, and with privately funded rehabilitation costs that averaged \$30,565 per unit. Further, Post M2M collected \$8.181 million in paydowns of the HUD-held M2M debt.

Property Disposition (PD) Foreclosure Process

The Office of Asset Management and Portfolio Oversight (OAMPO) promotes the highest standards of asset management practices. OAMPO is responsible for the portfolio of multifamily assets after origination of the asset. OAMPO's careful vigilance of its portfolio has led to a historically low default rate for Multifamily properties in fiscal year 2018.

- In fiscal year 2018, FHA sold 7 Multifamily properties; 3 were sold to Units of Local Governments (ULGs)/non-profits; PD has begun foreclosure on 21 additional properties and is working with 8 troubled assets in the pre-disposition stage. Gross proceeds on the closed properties totaled \$260,020 which represents a 41 percent rate of return based upon the unpaid principal balance.

- For post-closing transactions, PD collected over \$2.6 million in equity participation and administered over \$51 million in active Upfront Grants on redevelopment or rehabilitation for 18 post-sale properties; and addressed 34 post-closing transaction requests.
- In fiscal year 2018, PD managed **23** properties (**5** active mortgagee in possession (MIP)), **2** active HUD-owned, and began actions on 16 additional pending assets) to protect tenants who were adversely impacted by the owner's non-compliance. Relocations were completed for 64 families at **7** closed properties; 113 families have been relocated from 6 active properties; and 4 properties have relocations pending.

[Click here](#) for the list of pending foreclosure sales and the list of properties sold.

Disaster Relief and Recovery Efforts and Highlights

Multifamily staff provided support for owners and managers who had properties affected within Presidentially Declared Major Disaster Areas (PDMDAs). Preliminary Assessments were conducted on all multifamily properties designated in a Presidentially Declared Disaster area for individual assistance and a damage code is assigned from information received during this phase. Multifamily Assessment Teams are deployed to conduct onsite/final assessments on properties coded with moderate and severe damage. The teams provide onsite technical assistance to owners/agents during the onsite assessment, which are the foundation for review/approval of the restoration plan. The plan outlines all aspects of the restoration processing, including repairs, resident displacement/tracking, sources and uses of funds, and estimated completion dates. FHA will continue to closely engage with property owners and managers as they develop longer-term recovery plans and to ensure that the residents are receiving the needed assistance.

Risk Management

Risk management is integrated into all Office of Multifamily Housing programs and processes. During fiscal year 2018, the Office of Multifamily Housing continued to improve processes with a goal of better identifying and managing risk within its programs. Delinquencies on FHA-insured Multifamily mortgages remained below 0.2 percent, and when a property shows signs of trouble, HUD staff engage a variety of stakeholders to ensure all tenants are receiving quality housing. Staff work with owners to develop an action plan to address property issues and hold them accountable to make improvements.

Rapid Response and Recovery Team. To improve HUD's response to troubled assets, several recommendations generated in the previous fiscal year were implemented, including a notice to require industry standard repairs at HUD properties and an increase in oversight on contract Real Estate Assessment Center (REAC) inspectors. Other changes are in process but require a regulatory change or funding to enact. The Office of Multifamily Housing continues to work on implementing the Rapid Response and Recovery Team's additional long-term recommendations.

Office of Healthcare Programs

The Office of Healthcare Programs administers FHA's healthcare mortgage insurance programs and manages a growing portfolio of over \$35 billion in healthcare assets nationwide. Operating at no upfront cost to the American taxpayer, these successful programs promote economic development and enable the affordable financing of needed residential care facilities and hospitals in local communities across the United States.

Roger Lukoff, Deputy Assistant Secretary
Office of Healthcare Programs

Overview

The Office of Healthcare Programs (OHP) administers FHA's programs that provide mortgage insurance to residential care facilities and hospitals under Section 232 and Section 242 of the National Housing Act. Section 232 was established by Congress in 1959 to support the critical care needs of a vulnerable aging population in residential care facilities across the country. Section 242 was enacted in 1968 to support capital financing for urgently needed hospitals.

With access to FHA mortgage insurance, private lenders are encouraged to increase their capital investments in the healthcare market. Hospitals, nursing homes, and assisted living facilities can access capital at lower interest rates, resulting in significant cost savings and the ability to invest in construction, improvement, and/or refinancing projects that ultimately strengthen the quality of services available to residents and communities.

Fiscal Year 2018 Portfolio and Performance Highlights

- Section 232 Residential Care Facilities
 - Insured 3,636 mortgages for residential care facilities with a total UPB of \$29.0 billion
 - Maintained a low annual claim rate of 0.62%, net of recoveries
 - Instituted National Lender/Servicer Training which provided an opportunity to increase communication between the Office of Residential Care Facilities and lenders/servicers
- Section 242 Mortgage Insurance for Hospitals
 - Insured 92 mortgages for hospital facilities with a total UPB of \$6.5 billion
 - Maintained a low cumulative claim rate of 1.31%, net of recoveries
 - Developed and implemented Asset Management Tools to improve portfolio monitoring and management
 - Developed and deployed a new Risk Rating System to standardize credit risk assessment

As of September 30, 2018, the total FHA-insured Healthcare loan portfolio consisted of 3,728 loans with an unpaid principal balance of \$35.4 billion. The programs maintain low claim rates and contribute credit subsidy receipts to the General Insurance (GI) Fund.

Healthcare Programs Division Structure

Headquartered in Washington, DC, OHP is comprised of the Office of the Deputy Assistant Secretary for Healthcare Programs that oversees the following program and support offices:

- **Office of Residential Care Facilities (ORCF)** is responsible for FHA's Section 232 mortgage insurance program that insures mortgages for residential care facilities such as skilled nursing facilities, assisted living centers, and board and care homes.
- **Office of Hospital Facilities (OHF)** is responsible for FHA's Section 242 healthcare mortgage insurance program that insures mortgages for acute care hospitals.
- **Office of Architecture and Engineering (OAE)** supports both programs with technical expertise related to architectural, engineering, and environmental issues.

Section 232 Mortgage Insurance for Residential Care Facilities

The Section 232 Mortgage Insurance Program for Residential Care Facilities insures loans to finance the construction, substantial rehabilitation, acquisition, or refinancing of nursing homes, assisted living facilities, and board and care homes. Year-end statistics for fiscal year 2018 included:

- **Production Volume:** A total of 391 applications were received and ORCF issued 318 commitments totaling \$3.7 billion in fiscal year 2018.
- **Asset Management Volume:** The Section 232 portfolio totaled 3,636 loans with an unpaid principal balance of \$29.0 billion at the end of fiscal year 2018.

In addition to providing insurance on mortgages for important healthcare facilities, FHA-insured construction projects have a significant economic impact on local communities, including a substantial impact on employment. In fiscal year 2018:

- **Economic Impact During Construction:** Section 232-insured projects that involve construction will create over 1,545 full-time equivalent construction jobs with a total economic impact of \$444.0 million.
- **Economic Impact After Construction:** Once complete, fiscal year 2018 projects will support over 583 full-time equivalent jobs and sustain a total economic benefit of \$236.3 million annually in their local communities.

Oasis @ 56th Provides Affordable Assisted Living Care for Seniors

Oasis @ 56th, a Section 232 new construction project for an assisted living facility located in Indianapolis, Indiana, broke ground in February 2018. The \$17 million FHA-insured loan closed in December 2017.

The construction project will be comprised of one large, four-story residential building containing 124 dwelling units, enclosed stair towers, and two elevators providing access to all units on each floor. Amenities within the structure will consist of administrative offices, an entrance lobby, exercise room, mail room, activity areas, dining areas, library, commercial kitchen, and maintenance areas. *Oasis @ 56th* is a Low-Income Housing Tax Credit (LIHTC) project that will provide affordable assisted rental housing for low-income residents.

Section 242 Mortgage Insurance for Hospitals

The Section 242 Mortgage Insurance Program for Hospitals supports access to affordable financing for acute care hospitals to fund capital projects, such as new construction or modernization projects. Additionally, the Section 242/223(f) program provides options for hospitals wishing to refinance existing loans without new construction or major rehabilitation. Year-end statistics for fiscal year 2018 included:

- **Production Volume:** The OHF issued one insurance commitment for \$200 million for a hospital construction project and two loan modifications for \$707 million that allowed portfolio hospitals to reduce interest rates on their FHA-insured loans.
- **Asset Management Volume:** The Section 242 portfolio consisted of 92 active hospital loans with a total unpaid principal balance of \$6.5 billion at the end of fiscal year 2018.

FHA hospitals range from small rural hospitals to major medical centers, all of whom serve as major community anchors that provide not only critical healthcare services, but jobs and economic support to their communities.

Albany Medical Center Builds Pediatric Emergency Center

Albany Medical Center is constructing the first pediatric emergency department in New York State's Capital Region with an FHA-insured Section 241 supplemental loan. When completed, this project will be the only specialized pediatric emergency center in northeastern New York State and western New England.

The four-story, 70,500-square-foot pediatric emergency department is expected to be completed in late 2018. Located adjacent to an existing emergency department, the pediatric center will be opened 24 hours a day, seven days per week. The department will provide a setting designed specifically to meet the needs of children and families and will offer a full range of pediatric specialties. Rooms have been specifically designed for the safety and comfort of children and parents, including negative pressure rooms for suspected contagious diseases. The emergency department is also close to Albany Medical Center's rooftop medical helicopter pad for improved emergency access.

Fiscal Year 2018 Portfolio and Performance Accomplishments

In fiscal year 2018, the Office of Healthcare Programs continued to provide training to lenders and implemented additional tools to monitor portfolio risk.

- **National Lender/Service Training:** ORCF's Asset Management division held a national, all-day lender training event for servicing lenders participating in the Section 232 Residential Care Facilities Mortgage Insurance Program. Through this robust training session, FHA and industry participants learned how to better work collectively to implement process improvements that would further advance working relationships.
- **Development and Implementation of Asset Management Tools:** OHF, in conjunction with consultants, developed and implemented a comprehensive Portfolio Management Dashboard report to better monitor and proactively manage all insured hospitals within the Program. Financial information contained in Moody's RiskAnalyst™ is analyzed quarterly to develop a comprehensive summary of key financial data and related risk exposures for the hospital portfolio. The tool also identifies key financial trends that may signal weakening financial conditions for individual borrowers.
- **Development and Deployment of Risk Rating System:** In fiscal year 2018, OHF instituted a risk rating and ranking system to provide better granularity and clarity for assessing borrower risk. The risk rating system is used during the underwriting process and it is an integral element of portfolio monitoring and management. The system serves as a common measuring stick that unifies production and asset management. Many of the same risk identification factors that are used in this model are also deployed by the three major rating agencies that include Moody's, S&P and Fitch.

Disaster Relief and Recovery Efforts and Highlights

In the wake of the unprecedented fiscal year 2017 Atlantic hurricane season, wildfires in California, and flooding in Texas, FHA played a significant role in relief and recovery efforts in disaster-impacted areas. In fiscal year 2018, OHP undertook the following relief and recovery efforts.

- **Implemented an internal tracking system** to monitor the insured healthcare portfolio, assisting lenders and borrowers of impacted facilities in the aftermath of events whenever possible.
- **Proactively monitored new legislation and/or requirements** developed in response to disaster events to assist FHA-insured facilities to remain in compliance with state and/or local requirements, providing informational updates and guidance via email blast to program stakeholders.
- **Participated in joint disaster relief and recovery efforts** with the Federal Emergency Management Agency (FEMA), Department of Health and Human Services (HHS), and United States Army Corps of Engineers (USACE) to address hospital and healthcare facility inspection and assessment needs in Puerto Rico and the U.S. Virgin Islands.

Management Initiatives and Program Improvements

In fiscal year 2018, OHP focused on enhancing underwriting and asset management capabilities. Enhancements were designed to improve workflow and mitigate risk.

- **Previous Participation Process Improvement:** ORCF held an internal process improvement working session in July 2018 to focus on standard work practices that better implement its Previous Participation regulations. These regulations were recently revised to modernize the submission and review process for principal participants in the Section 232 Program. Improvements included establishing consistent processing guidelines for flagging participants; removing flags once an action has been mitigated; and improving documentation, justification and appeals processes.
- **Standard Work Action Team:** During fiscal year 2018, ORCF created the Standard Work Action Team (SWAT), which addresses standard work processes and documents in Section 232 Asset Management. SWAT is creating or modifying processes and standardized work on more than 25 of the Office's asset management processes.
- **GAAP Accounting Standards & Rating Agency Training:** OHF routinely engages healthcare industry experts to execute staff training in order to maintain awareness and proficiency of the highly regulated and ever-changing healthcare environment. Annually, numerous new laws, regulations, accounting pronouncements, standards and policies are enacted that impact the financial performance and reporting, compliance, reimbursement methodologies and other areas of hospital operations. Staff receives in-depth training on changes to these areas and are continuously trained in executing complex financial statement and cash flow analysis.
- **Real Estate Assessment Center Physical Inspection Process Improvement:** During fiscal year 2018, ORCF has continued to improve its processes related to Real Estate Assessment Center (REAC) Physical Inspection follow-up. A key piece to the improvement is the centralized process for tracking and follow-up on all projects with REAC inspection scores below 60. ORCF has developed a Standard Work Protocol for projects with REAC scores below 60 and above 30, and REAC scores of 30 and below. Each project will now have a comprehensive review of its history with FHA and administrative actions to be taken. In addition, ORCF has established a Rapid Response Team to address follow-up on projects with scores below 31. These projects are inspected by Rapid Response Team Account Executives.

Risk Management

With an outstanding portfolio balance of over \$35.4 billion, managing risk is an important focus of the OHP programs. OHP mitigates risk upfront during the underwriting process, after loan closing, through the identification and monitoring of troubled properties, and through actions to reduce claim payments.

- **OHP continues to work to improve underwriting standards** and to ensure consistent applications while reducing processing time. Utilization of Lean Processing in the Section 232 program has improved business practices by standardizing nationwide submission and underwriting. This process has allowed for greater focus on the creditworthiness of the operator and its principals.
- **Proactive asset management** also plays an important role in risk management and loss prevention. In 2018, OHP actively engaged lenders and servicers to improve strategies to coordinate asset functions and responsibilities. Open communication with industry stakeholders improves the quality of risk management and helps OHP strengthen asset management and avoid or reduce insurance claims.
- **Other approaches to loss prevention** include working with state agencies on early notification of potential adverse actions; expediting refinancing; working with lenders who have identified potential owners, operators or equity providers with increased risks; and using available options to supplement funds until a property is stabilized.
- **Options for minimizing losses** on HUD-held loans include partial payment of claims, positioning notes for re-assignment, modifying mortgages and identifying equity providers and purchasers. Working in concert with internal and external stakeholders, OHP maximizes asset management outcomes for the benefit of the General Insurance and Special Risk Insurance (GI/SRI) Fund.

Continuing into the next fiscal year, other OHP risk management initiatives will include more proactive collaboration with industry groups to identify appropriate candidates for healthcare mortgage insurance to diversify the Sections 232 and 242 portfolios.

Office of Housing Counseling

The mission of HUD's Office of Housing Counseling is to provide individuals and families with the knowledge they need to obtain, sustain, and improve their housing. We accomplish this mission by supporting a strong national network of HUD-approved housing counseling agencies and counselors.

Sarah Gerecke, Deputy Assistant Secretary
Office of Housing Counseling

Overview

Through the Office of Housing Counseling (OHC), HUD supports a national network of nonprofit and government housing counseling agencies. These agencies, in turn, provide tools to current and prospective FHA borrowers and renters so that they can make responsible choices to address their housing needs. The Housing Counseling Program is authorized by Section 106 of the Housing and Urban Development Act of 1968, as amended (12 U.S.C. 1701x). The network consists of more than 1,800 housing counseling agencies trained and approved to offer guidance to current and prospective homeowners and renters to help them make wise housing decisions. While the Housing Counseling program is funded outside of FHA, the activities contribute to FHA's mission by helping borrowers make responsible homeownership choices. By teaching consumers basic principles of housing and money management, HUD-approved housing counselors show consumers ways they can increase their residual income and savings, improve their housing conditions, understand mortgage credit, and give them greater stability and confidence. Housing counselors also serve as a gateway to legitimate state, local, federal and private housing assistance programs. HUD-approved housing counselors provide an important safeguard against discrimination, scams and fraud.

Fiscal Year 2018 Portfolio and Performance Highlights

- \$50.5 million in Grant Awards
 - \$47 million to help 207 agencies reach approximately 1 million households.
 - \$3.5 million to four national organizations to train housing counselors to effectively assist families with their housing needs.

Housing Counseling Division Structure

The Office of Housing Counseling is composed of four offices that work together collaboratively to manage the national housing counseling program and its network of HUD-approved housing counseling agencies.

- **Office of the Deputy Assistant Secretary (DAS)** is responsible for overseeing regulations, standards and performance for HUD's Housing Counseling Program. It also works closely with industry representatives to build coalitions and leverage additional resources for HUD-approved housing counseling agencies. Office of Oversight and Accountability (OOA) monitors the compliance and effectiveness of HUD-approved agencies and counselors.
- **Office of Outreach and Capacity Building (OCB)** promotes additional housing counseling capacity for underserved areas and populations, trains partners in housing counseling programs and practices, and supports campaigns to promote customer awareness of housing counseling services.
- **Office of Policy and Grant Administration (OPGA)** is responsible for research, program policies and procedures, and grant administration.

Through the network of housing counseling agencies, HUD is able to support a full spectrum of housing counseling and education services, including homeless, rental, pre-purchase, post-purchase, reverse mortgage, and foreclosure prevention counseling.

[Chart 1: Number of Clients receiving Housing Counseling Services from HUD-approved Housing Counseling Agencies](#)

Housing Counseling Client Outcomes FYTD 2018 (October 1, 2017 Through June 30, 2018)	
259,884	Received information on fair housing, fair lending and accessibility rights
212,780	Developed a sustainable household budget
120,579	Improved their financial capacity
117,949	Gained access to resources to improve their housing situation
23,717	Received homebuying counseling and purchased housing
18,616	Received reverse mortgage counseling and obtained a HECM
24,779	Prevented or resolved a mortgage default

Housing Counseling Partnerships

Industry partnerships are a critical part of the success of housing counseling, and HUD meets regularly with industry representatives from lending institutions, HOPE NOW, the Financial Services Roundtable, various real estate trade and professional associations and academics, and other experts in financial and housing education. Through OHC, HUD also provides technical assistance to federal, state and local regulators in the lending, consumer protection and housing fields. For instance, OHC represent HUD on the Financial Literacy and Education Commission (FLEC) which plays a central role in the federal government's efforts to enhance financial literacy, financial capability, and individual financial well-being.

Fiscal Year 2018 Performance Accomplishments

In fiscal year 2018, the Office of Housing Counseling awarded 207 housing counseling grant awards and reached a variety of milestones to increase the impact of housing counseling, maximize the efficiency and effectiveness of its services, and engage stakeholders to support and improve the program. Several of these accomplishments are highlighted below.

Grant Awards

OHC awarded \$50.5 million in housing counseling grants to hundreds of national, regional and local organizations to help families and individuals with their housing needs and to prevent future foreclosures. The bulk of the money is used to fund comprehensive housing counseling grants to provide a wide range of housing counseling services. These services may include pre-purchase homeownership counseling, delinquency and foreclosure prevention counseling, and counseling on issues such as home maintenance, rental counseling, homelessness counseling, and counseling for seniors seeking reverse mortgages. A portion of the funds, \$3.5 million was awarded to four national organizations to train housing counselors to assist families with their housing needs.

Maximize Program Efficiency and Effectiveness

OHC completed many initiatives that helped to improve the efficiency and effectiveness of its program that also benefits the FHA insured portfolio overall. Efforts in this area include the following:

- **Making Housing Counseling Data Part of the Mortgage Process.** OHC and Freddie Mac led efforts to encourage the housing counseling and mortgage industries to adopt the Mortgage Industry Standards Maintenance Organization (MISMO) data standards for housing counseling information. This initiative standardizes counseling data and its collection through an automated process, making it possible to integrate housing counseling into the mortgage transaction. The result improves data consistency, promotes confidence in data reliability, and facilitates reporting from housing counseling agencies to funders.
- **Housing Counseling Federal Advisory Committee.** In fiscal year 2018 the HUD Housing Counseling Federal Advisory Committee (HCFAC) made a series of recommendations aimed at improving counseling services, such as: HUD OHC should work to increase awareness and visibility of housing counseling services among consumers; help loan originators better understand the services housing counselors provide; and help identify ways to enhance the sustainability of funding for housing counseling.

Outreach: Engaging Stakeholders to Support the Housing Counseling Program and Increase Impact

- **Homebuyers Guide to Success.** In collaboration with its stakeholders and operating partners, OHC developed and published the Homebuyers Guide to Success which educates homeowners about the critical first steps to take if they are at risk of missing a mortgage payment or facing foreclosure. This guide is available in 11 different languages.
- **National Homeownership Month.** To help ensure prospective homebuyers are aware of the housing counseling services available to them, OHC celebrated National Homeownership Month with a new suite of First-time Homebuyer brochures and a social media campaign highlighting the many ways housing counselors can help you prepare to buy a home. The campaign, *Find Your Place*, emphasized the importance of helping consumers achieve sustainable homeownership.

*OHC Staff and
Deputy Secretary
meeting with housing
counseling agencies*

*Hurricane-damaged
home, Christiansted,
St. Croix*

In June 2018, OHC staff accompanied Deputy Secretary Patenaude through Puerto Rico and the Virgin Islands, attending meetings with numerous public, private and philanthropic partners engaged in disaster recovery.

The trip included tours of St. Croix, USVI; Humacao, Ponce and San Juan, PR. OHC DAS Sarah Gerecke met with the leadership of the USVI housing counseling program and toured St. Croix with the USVI HFA. OHC staff also met with leadership from NHS of Puerto Rico and CCCS of Puerto Rico to better understand the challenges of disaster recovery.

Disaster Relief and Recovery Efforts and Highlights

In fiscal year 2018, the Office of Housing Counseling continued its training efforts to inform Housing Counseling Agencies about FHA policies and procedures available to impacted homeowners in Presidentially-Declared Major Disaster Areas (PDMDA). Throughout fiscal year 2018, the OHC's Disaster Assistance Recovery Team (DART) worked with numerous housing counseling agencies who were the recipients of supplemental grant funds designated for training on disaster counseling.

HUD Approved Housing Counseling Agency, PathStone, Helps Survivor of Hurricane Maria Recover

Jonathan De Jesús and Aleshka Ramos attended the first HUD Disaster Recovery Resource Fair in Comerío, PR on February 15, 2018. Jonathan was looking for assistance and guidance to correct his application to FEMA. He was frustrated, and without a home for his pregnant wife and their little boy. Hurricane María destroyed their wooden rental home and took all the family's belongings. Housing counselors at the fair assisted Jonathan to submit the additional information he needed to provide; two weeks later he received the approval needed to replace his personal property. He also received guidance from USDA and, on February 27, 2018, received a Letter of Priority, which helped secure a safe rental home for Jonathan and his family. PathStone, a HUD-approved Housing Counseling Agency, guided them through the entire process and, on March 16, provided financial assistance to purchase needed appliances and basic furniture.

Additional Programs

The Office of Housing Counseling has assisted the Secretary's EnVision Center initiatives by introducing housing counseling agencies to the EnVision Center directors in Detroit and sharing information about the initiatives nationwide. Housing counseling supports the EnVision Center goal of self-sufficiency, in particular, through the Economic Opportunity pillar.

Risk Management

Streamlining the Office of Housing Counseling (OHC) Performance Review Process

Risk Management is integrated into all aspects of the OHC programs and processes. OHC conducts Performance Reviews of all HUD-approved housing counseling agencies. Performance Reviews are designed to assess housing counseling agency compliance with federal rules and regulations.

Working with FHA's Office of Risk, the OHC Risk Mitigation Team evaluated all areas of housing counseling agency practices and worked to streamline current processes by identifying and validating the key risk factors. Three primary areas of risk: Stewardship of Federal Funds, Quality Counseling, and Organizational Systems were identified. OHC is updating its approach to conducting performance reviews to reflect these areas of priority.

OHC continues to build clear, consistent and transparent communication among its stakeholders while including them in this streamlined process. Continuing into the next fiscal year, other OHC risk management initiatives will include more proactive collaboration with its stakeholders and HUD-approved housing counseling agencies.

Program Improvements

In fiscal year 2018, OHC focused on improving its performance review process relating to oversight and monitoring of HUD-approved housing counseling agencies. This process is being revised by updating the current risk analysis and reporting capabilities. Enhancements were applied to re-design the Tier/Risk categorization of performance reviews. Agency risk categorization is now focused on the measured outcomes of performance review results.

Office of Risk Management and Regulatory Affairs

Office of Risk Management and Regulatory Affairs (ORMRA) measures, monitors and manages credit and operational risk related to each program area as part of a comprehensive enterprise risk management strategy across the entire Office of Housing.

Shawn Jones, Acting Deputy Assistant Secretary,
Office of Risk Management and Regulatory Affairs

Overview

The Office of Risk Management examines the financial, credit and operational risks facing the Office of Housing, and articulates effective strategies and procedures to mitigate current and emerging risks. The strategies and procedures to mitigate these risks are based on best risk management practices and established governance policy. In pursuit of this goal, the office promotes a risk-conscious climate in a manner consistent with the mission of the Office of Housing. ORMRA includes the Office of Manufactured Housing which provides oversight of manufactured housing construction and safety standards.

ORMRA conducts analyses and makes risk management recommendations based on independent research, as well as collaboration with program areas. Formal credit committees within each of FHA's program offices, composed of Office of Housing leadership, are forums where risk management recommendations are presented, discussed, and debated in a transparent manner. Mitigation strategies are developed and refined by incorporating credit and operational risks and mission objectives. ORMRA partners with the program offices to support enhanced risk management elements of program policies and practices. Examples include evaluating "best execution" asset management transactions to strengthen the portfolio risk profiles, governance related to underwriting policy, and economic modeling to provide quantitative solutions to manage the risk to the FHA insurance funds.

Fiscal Year 2018 Performance Highlights

- Implemented a model risk governance structure and improved its modeling of risk to the MMI and GI/SRI funds.
- Developed and began implementing a modernization of the mortgage performance data and reporting for commercial mortgages.
- Developed and implemented the automated Operational Risk register.

ORMRA is working with the program areas to continually identify and mitigate emerging risks. To better manage programmatic and financial risk in fiscal year 2018, ORMRA continued to execute the following courses of action:

- Senior leadership continued its commitment to, and participation in, regularly scheduled credit risk meetings;
- ORMRA continued to monitor and refine the modeling process through the Credit Reform Board;
- The Office instituted earlier involvement in the commercial mortgage endorsement process to manage and mitigate risk to the GI/SRI;
- ORMRA provided housing market analyses as well as discussions of trends and key performance indicators (KPIs) with the Office of Housing program management and senior leadership;
- The Office developed Key Operational Risk Indicators and a risk profile for the Office of Housing.

These actions ensure that the Office of Housing's portfolios are comprehensively monitored. By benchmarking results against other financial institutions, ORMRA is able to provide lessons-learned and best practices.

Risk Management and Regulatory Affairs Structure

The Office of Risk Management and Regulatory Affairs includes the following:

- **Office of Risk Management** is responsible for systematically defining and articulating risk management strategies and procedures across the Offices of Single Family Housing, Multifamily Housing Programs, and the Office of Healthcare Programs.
- **Office of Evaluation (OE)** provides financial valuations of the various FHA insurance portfolios, including single family forward and reverse mortgages, multifamily properties, and healthcare facilities.

The Office of Manufactured Housing Programs (OMHP) implements the National Manufactured Housing Construction and Safety Standards Act of 1974 (the Act). The Act authorizes HUD to establish federal standards for the design and construction of manufactured homes to assure quality, durability, safety, and affordability to protect the health and safety of the owners of manufactured homes.

Fiscal Year 2018 Portfolio and Performance Accomplishments

Single-Family Risk Management. In fiscal year 2018 ORMRA provided in-depth policy analyses which allowed the FHA to adjust and improve current policy positions to better manage risk to the MMI Fund. During fiscal year 2018, ORMRA assisted in implementing new appraisal rules surrounding the HECM program to mitigate possible appraisal bias which was seen in HECM originations. ORMRA also played an important role in the analysis of impacts to the fund from various natural disasters throughout FY 2018. Additionally, ORMRA performed calculations of reserved prices for the Claims Without Conveyance of Title (CWOCT) and asset sales; provided responses to internal and external requests from agencies such as the Government Accountability Office, the Department of Justice, and the Consumer Financial Protection Bureau; and

developed the budget estimates and re-estimates. ORMRA implemented a model risk governance structure and improved its modeling of risk to the MMI Fund. This governance provided a framework to examine more closely the inherent risks in the HECM program. The overhaul of the loan origination applications was launched as FHAs Insurance Origination Network of Applications, known as FIONA, that will automate Single Family's underwriting systems, as well as our case management and review systems.

Commercial Risk Management: ORMRA completed a multi-year project to break down the GI/SRI budget estimate and re-estimate data by risk category and cohort, allowing ORMRA and senior leadership granular insight into the impacts of performance and economic factors on the credit subsidy rate using sensitivity analysis tools. ORMRA developed and began implementing a modernization of the mortgage performance data and reporting for commercial mortgages, and developed and implemented a statistically validated key performance indicator credit rating system that measures the risk of individual loans. ORMRA additionally led risk analyses of multiple policy proposals with significant industry impact. Current and emerging risks to the commercial mortgage portfolio (multifamily apartments, hospitals, and residential care facilities) include: influx of larger mortgage endorsements, shift from single-entity owners to portfolios, and concentrated risk among borrowers, lenders, and geography.

Operational Risk Management: ORMRA continued to collaborate with HUD's Chief Risk Officer to integrate Enterprise Risk Management (ERM) framework and provide updates to senior leadership with key information to make risk-informed decisions and to effectively allocate resources. Risk assessment tools and techniques were developed to capture and mitigate the Office of Housing's operational risks arising from people, processes, information technology, and external events. Newly implemented analytic tools allowed ORMRA to develop a link to agency-priority goals and strategic goals per OMB Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. ORMRA developed a data-driven Office of Housing risk profile and identified emerging operational risks. Current and emerging operations risks to the Office of Housing include: staffing, severe recourse constraints, aging technology and infrastructure, and insufficiently defined and documented procedures and processes for many critical functions.

Dispute Resolution Oversight - OMHP also implements and administers the Dispute Resolution Program to resolve disputes between manufacturers, retailers, and installers of manufactured homes. OMHP has administers the federally run program in 25 states that have no Dispute Resolution program of their own, and also oversees regulatory compliance for the 25 state programs that operate their own programs.

Disaster Relief and Recovery Efforts and Highlights

FHA implemented several measures to mitigate and reduce risks in fiscal year 2018 for the mortgages insured for properties in Presidentially-Declared Major Disaster Areas (PDMDAs). ORMRA played a vital role in the measurements, calculations, and estimated impacts of these risks to the FHA insurance funds. Systematic enhancements to geospatial analyses and reporting for all FHA-insured properties allowed Office of Housing leadership clarity into the impact from the natural disasters that occurred in end of year fiscal year 2017 and fiscal year 2018.

ANALYSIS OF FINANCIAL STATEMENTS

This section presents a summary analysis of FHA's financial statements. The financial statements in this report were prepared using General Accepted Accounting Principles (GAAP) for federal entities, the Federal Credit Reform Act of 1990 and in accordance with the Office of Management and Budget (OMB) Circular A-136, *Financial Reporting Requirements (Revised)*. FHA's management is responsible for the integrity and objectivity of the financial information presented in the financial statements.

FHA restated its fiscal year 2017 Financial Statements and related Notes to correct a discounting error in the HECM Return on Assets (ROA) Cash Flow Model. The correction impacted both the GI/SRI and the MMIF. The fiscal year 2017 Note 3, Fund Balance with U.S. Treasury, was also restated due to an incorrect classification of Borrowing Authority Carried Forward as an Unavailable Resource instead of an Available Resource. Furthermore, FHA restated the Statement of Net Cost, the Statement of Net Position, and Notes 13 and 16 to reflect additional salary and administration costs allocated from HUD to FHA. The details of the restatements are reflected in Note 22 of the financial statements. In addition, Note 23 describes the changes in presentation due to combining both the subsidy and interest expense in the Technical Re-estimate line instead of having two separate lines. There is also a reclass from Multifamily Interest Expense to Multifamily Accumulation Interest Expense, as well as presenting the LLR Technical/Default Re-estimate in LLR Adjustments Other line.

Overview of Financial Position

A summary of FHA's change in financial position from fiscal year 2017 to fiscal year 2018 is presented in the following sections on Assets and Liabilities, Net Cost and Budgetary Resources.

Assets and Liabilities

FHA's balance sheet assets primarily consist of fund balances with the U.S. Treasury, investments, and loan receivables and related foreclosed property. The nature of FHA's business requires it to carry, or acquire through borrowing, the fund balance necessary to pay estimated claim payments on defaulted guaranteed loans. Additionally, FHA must meet credit reform requirements of transferring subsidy expense and credit subsidy re-estimates. These subsidy transfers are invested in U.S. Treasury securities. The subsidy expense and re-estimate calculations are based on assumptions of premium collections, prepayments, claims, and recoveries on credit program assets. Accordingly, FHA's net assets can fluctuate significantly depending largely on economic and market conditions and customer demand.

During fiscal year 2018, there was an increase of \$4,578 million in fund balance with U.S. Treasury primarily attributable to a decrease in MMI/CMHI investments in U.S. Treasury securities and an increase in cashflows from insurance operations (premiums and recoveries exceeded claims in fiscal year 2018).

Loan Guarantee Liability

The loan guarantee liability (LGL) is comprised of two components, the liability for loan guarantee (LLG) for post-1991 loan guarantees and the loan loss reserves (LLR) for pre-1992 loan guarantees. FHA's portfolio of pre-1992 loan guarantees has significantly decreased, as such the LLR represents an insignificant value of the LGL.

Post-1991 LLG

The LLG related to Credit Reform loans (made after September 30, 1991), is comprised of the present value of anticipated cash outflows, such as claim payments, premium refunds, property expense for on-hand properties and sales expense for sold properties; less the present value of anticipated cash inflows, such as premium receipts, proceeds from property and note sales, and principal and interest on Secretary-held notes.

Schedule of Liability for Loan Guarantees (Dollars in Millions)					
	FY 2018	FY 2017	Difference	%	Change
Single Family Forward	\$ (921)	\$ (1,786)	\$ 865	-48%	
HECM	24,147	26,519	(2,372)	-9%	
Multifamily/Healthcare	(4,120)	(4,125)	5	0%	
Total	\$ 19,106	\$ 20,608	\$ (1,502)	-7%	

The \$865 million single family forward LLG increase is mainly due to unfavorable loan performance projections and slight changes in economic forecasts in the MMI Fund.

There was a \$2,372 million decrease in the HECM LLG. The MMI portion of HECM decreased by \$288 million due to slightly more favorable loan performance projections and minor changes in economic forecasts, while the GI/SRI portion of HECM decreased by \$2,084 million, reflecting the wind-down of the pre-2009 cohorts.

The \$5 million multifamily/healthcare LLG slight increase can be attributed to several programs. The Section 223(f), Section 223(a)(7), and Section 221(d)(4) liabilities increased by \$2 million, \$52 million, and \$130 million, respectively, due to higher claim expectations. This was offset by a decrease of \$125 million in the Section 232 Program due to an increase in insurance-in-force and a decrease in prepayment projections. There was also a \$12 million decrease in the Section 242 Program due to higher premium revenue caused by decreased prepayment expectations as well as lower claims expected. The remaining difference is explained by the other multifamily programs.

Net Cost/ (Surplus)

In fiscal year 2018, FHA reported a net surplus. The most important facet of FHA's cost and revenue activity is the treatment of loan guarantee subsidy cost. Loan guarantee subsidy cost is the estimated long-term cost to FHA of a loan guarantee calculated on a net present value basis, excluding administrative costs. The cost of a loan guarantee is the net present value of the estimated cash outflows to cover claims and other expenses offset by cash inflows, including premiums, penalties, and recoveries.

Schedule of Net Cost (Surplus) (Dollars in Millions)					
	Restated				
	FY 2018	FY 2017	Difference	% Change	
Program Cost	\$ (6,707)	19,336	\$ (26,043)	-135%	
Less: Program Revenues	2,080	1,752	328	19%	
Net Cost (Surplus)	\$ (8,787)	\$ 17,584	\$ (26,371)	-150%	

FHA had a net program surplus in fiscal year 2018. Single Family and HECM Gross Costs with the Public decreased by \$6,039 million and \$21,197 million, respectively. The program cost difference is primarily due to the decrease in the re-estimate expenses relating to Single Family and HECM. Re-estimates are the recalculation of subsidy costs and are performed annually. The decrease in the re-estimate was the primary driver for the over-all program cost decrease in fiscal year 2018, compared to fiscal year 2017.

Budgetary Resources

FHA finances its operations through appropriations, borrowings from the U.S. Treasury, spending authority from offsetting collections, and prior year unobligated balances carried forward.

Spending authority from offsetting collections include collections of premiums, fees, sales proceeds of credit program assets and credit subsidy transferred between different FHA accounts. FHA's budgetary resources are increased by Appropriations received and Spending authority from offsetting collections. The decrease in Appropriations received is primarily due to a decrease in the upward re-estimate appropriation received in the GI/SRI Program Account, which decreased from \$4,318 million in FY 2017 to \$1,923 million in FY 2018. Borrowings authority decreased slightly by \$171 million. Spending Authority from offsetting collections decreased by \$16,118 as a result of decreased reestimates in FY 2018 compared to FY 2017.

Budgetary Resources (Dollars in millions)					
	FY 2018	FY 2017	Difference	%Change	
Unobligated balance from prior year budget authority, net	\$ 57,005	54,070	\$ 2,935	5%	
Appropriations (discretionary and mandatory)	2,078	4,473	(2,395)	-54%	
Borrowing authority (discretionary and mandatory)	8,205	8,376	(171)	-2%	
Spending authority from offsetting collections (discretionary and mandatory)	31,835	47,953	(16,118)	-34%	
Total budgetary resources	\$ 99,123	\$ 114,872	\$ (15,749)	-14%	

These resources were used to cover the fiscal year 2018 obligations totaling \$42,110 million. These obligations included: subsidy/re-estimate costs, claim payments on defaulted guaranteed loans, the cost of maintaining and disposing of foreclosed properties, and other. These costs were offset by FHA collections totaling \$42,697 million and included: premiums, notes, property, interest earned, subsidy/re-estimate, and other.

SYSTEMS, CONTROLS AND COMPLIANCE**Overview**

FHA continues to maintain and improve its overall financial management and system control environment by addressing areas identified through regular self-assessments, management reviews and independent auditor's reviews.

FHA Compliance with OMB Circular A-123, Management's Responsibility for Enterprise Risk Management and Internal Control

To comply with the requirements in OMB Circular A-123, an internal control certification statement is provided to the Chief Financial Officer by the Department's Assistant Secretaries to support the overall statement from the Secretary. Annually, Housing prepares an Internal Control Assurance Statement. This statement attests that Housing:

- Is in compliance with Sections 2 and 4 of the Federal Manager's Financial Integrity Act
- Systems generally comply with the requirements of the Federal Information Security Management Act (FISMA) requirements, Appendix III of OMB's Circular A-130, "Management of Federal Information Resources", and FFMIA Appendix D of OMB Circular A-123.

Fiscal Year 2018

Annual Assurance Statement on Internal Control over Financial Reporting

The Federal Housing Administration's (FHA) management is responsible for establishing and maintaining effective internal control over financial reporting, which includes the safeguarding of assets and compliance with applicable laws and regulations. FHA conducted its assessment of the effectiveness of the FHA internal control over financial reporting in accordance with OMB Circular A-123, Management's Responsibility for Enterprise Risk Management and Internal Control. Based on the results of this evaluation, FHA provides a qualified assurance that internal controls over financial reporting were operating effectively as of September 30, 2018 with the noted exception of one material weakness in the area of cashflow modeling processes. Other than the noted exception, the internal controls were operating effectively, and no other material weaknesses were found in the design or operation of the internal controls over financial reporting.

Federal Housing Commissioner
Assistant Secretary for Housing

In addition, FHA conducted its assessment of the effectiveness of internal control over financial reporting in accordance with the requirements of Appendix A of OMB Circular A-123. Based on the results of this evaluation, FHA provides qualified assurance that its internal controls over financial reporting were operating effectively as of September 30, 2018 with the exception of one material weakness (Section 2) in the area of cashflow modeling processes. Other than the noted exception, no other material weaknesses were found in the design or operation of the internal controls over financial reporting.

FHA Compliance with OMB Circular A-123, Financial Management Systems

FHA's management has reviewed FHA's core financial system and seventeen financial and mixed financial systems for compliance with the OMB Circular A-123 "Management's Responsibility for Enterprise Risk Management and Internal Control," and the Federal Financial Management Improvement Act (FFMIA) Compliance Determination Framework. Management has concluded that FHA's core financial system complies with the Federal Financial Management system requirements and applicable accounting standards and implements the U.S. Standard General Ledger at the transaction level. FHA's seventeen financial and mixed financial and program systems are integrated with the core financial system through extensive electronic interfaces. Operating interdependently, these financial systems taken together are substantially in compliance with FFMIA and OMB Circular A-123 requirements.

The Office of the Housing FHA Comptroller continuously monitors all FHA accounting and financial operations through weekly management meetings and through exception reporting for operational problems identified by managers and staff. FHA has sustained program operations with its current systems through significant changes in its mortgage insurance operations to implement the goals of FHA's multi-year strategic plan which includes sustainable growth, stabilizing housing markets and increasing availability of funding. Included in the strategic plan is improvement in the utilization of data by streamlining HUD's data collection processes, creating common data definitions, and ensuring only necessary data are collected and reported. The strategic plan also includes promotion of innovative IT service delivery, including modernizing IT infrastructure to enable on the ground staff to enhance program execution. To track the progress towards this objective, one of the performance indicators that HUD will use is the number of HUD mainframe systems decommissioned, after necessary data are transferred and standardized into HUD's new cloud-based Enterprise Data Warehouse.

FHA management also recognizes that its systems must continue to meet advancing standards and new expectations for efficiency and flexibility of operation. In fiscal year 2018, FHA enhanced system security and implemented new data processing capabilities to better manage risk to the FHA insurance portfolio.

- FHA continued to improve information system security practices and documentation to enhance the overall level of compliance with National Institute of Standards and Technology (NIST) and HUD standards
- FHA and HUD's Office of the Chief Financial Officer is implementing a new Enterprise Data Warehouse to improve data quality and access for enhanced reporting.

Per reference in 2017 Congress Conference Report, funds were made available for IT development to facilitate FHA modernization. The funding request will be submitted with the fiscal year 2020 but it is still in the finalization process. As part of the IT modernization process, FHA's goal is to move to a paperless endorsement process. This will assist FHA to have the ability to collect more comprehensive and robust data prior to endorsement and allow effective risk management. In this regard, FHA has been working to overhaul its system that serves both servicing and loan origination areas and will include the following:

- 1) For servicing area, the Asset Management Roadmap requests to revise all the systems used for servicing and paying claims. This is a shared endeavor between Single Family Housing and Office of Finance and Budget.
- 2) The overhaul of the loan origination applications was launched as FHAs Insurance Origination Network of Applications (FIONA) that will automate Single Family's underwriting systems, as well as our case management and review systems.

Fiscal Year 2018 Financial Statements Audit Findings

The Office of the Inspector General (OIG) has identified one material weakness in the Internal Control Report for FHA's FY 2018 financial statement audit. The OIG noted in its finding that weaknesses continued in FHA's modeling practices. The OIG noted that FHA addressed some prior year modeling weaknesses, but improvements are still needed. As identified by the OIG, FHA continued to face challenges with its model governance and model practices and failed to test or consider the impact of assumptions used in its Home Equity Conversion Mortgage (HECM) models.

Management has already taken steps to resolve these findings and will continue working to address the remaining auditor recommendations in the coming fiscal year.

Status of Fiscal Year 2017 Financial Statement Audit Findings

The status of the two material weaknesses identified in the fiscal year 2017 financial statement audit are below:

1. Weaknesses Identified in Cash Flow Modeling Processes

This material weakness was the result of FHA's failure to ensure that well-controlled modeling processes were implemented. Specifically, FHA had ineffective model documentation, model governance, and modeling practices. This resulted in FHA failing to prevent or detect a material error in its model output, which supported FHA's loan guarantee liability (LGL) balance in the financial statements. To correct this material weakness, FHA established and implemented an effective quality control process to prevent or detect model processing errors, reevaluated the existing model's documentation and coding, implemented procedures to monitor the work performed by the modeling contractors, and revisited the model's ability to predict future performance of the single-family portfolio. While FHA addressed many of the previous year's modeling weaknesses, the OIG noted that improvements were still needed. In FY 2019, FHA will continue to improve its model governance and modeling practice.

2. FHA's Controls over Financial Reporting Had Weaknesses

This material weakness resulted from several financial reporting issues identified by the OIG. This finding included issues related to the timing in the recognition of credit subsidy expense and unrecorded accruals. Additionally, FHA had material note disclosure errors in note 7 of the financial statements, including the inaccurate disclosure of the 2016 and 2017 loan endorsement amounts for the single-family and HECM programs and an incorrect allocation of LGL reestimates between subsidy and interest expense components in 2016. Furthermore, FHA may have missed an opportunity to better use its unobligated funds because invalid obligations were not always de-obligated in a timely manner. These issues occurred because FHA did not have effective processes in place to ensure that accounting events were recorded on time, that accrual methodologies were reviewed regularly for accuracy, and that data in the financial statements were accurate. As a result, adjustments had to be recorded to correct FHA's accounting records. To correct this material weakness, FHA ensured that invalid obligations from fiscal year 2017 were de-obligated as appropriate, developed and implemented a reconciliation process to verify that the information in various systems were consistent for all accounting events, and developed and implemented policies, procedures,

and controls to confirm that current-year endorsements in the Home Equity Reverse Mortgage Information Technology system (HERMIT) and the Single Family Housing Enterprise Data Warehouse (SFHEDW) agreed with the Computerized Homes Underwriting Management System (CHUMS).

Due to these actions, FHA was able to reduce this material weakness to a significant deficiency this fiscal year. FHA will continue to improve the controls over its financial reporting, specifically surrounding the accounting for activity pertaining to the Federal Financing Bank, the timely de-obligation of invalid obligations, and the processes involved in recording HECM assignments.

Improper Payments Elimination and Recovery Improvement Act of 2012

In accordance with the Improper Payments Elimination and Recovery Improvement Act of 2012 (IPERIA) and the OMB Memorandum M-18-20 dated June 26, 2018, FHA assessed its disbursement programs for their risk of improper payments Pursuant to the Act, FHA has analyzed the dollar volumes of each disbursement program for fiscal year 2018. In fiscal year 2018, we used fiscal year 2017 for disbursement data and all other IPERIA related control documents. Based on a three-year cycle, FHA has reviewed the following disbursements programs for fiscal year 2018.

- Single Family Insurance Claims (SFIC)
- Multifamily Insurance Claims (MFIC)
- Multifamily Notes
- Multifamily Property
- Multifamily Premium Refunds

During fiscal year 2018, limited risk assessments were conducted on all programs to determine whether the programs were susceptible to significant improper payments. Our risk assessment revealed that there were no significant changes to processes by which the disbursements were processed, leading us to conclude that disbursement programs are not susceptible to improper payments. We conducted the Risk Assessment Survey and Managers Interviews which included the OMB prescribed nine risk factors. The findings of the survey revealed that FHA disbursements programs are not susceptible to significant improper payments. We also analyzed Do Not Pay initiatives and found no significant incidence of erroneous payments.

In fiscal year 2018, we assessed SFIC, MFIC, Multifamily Notes, Multifamily Property and Multifamily Premium Refunds. We created a Risk Matrix and Managers Interview Response Matrix for each program. In prior years, SFIC was assessed as susceptible to improper payments. FHA estimated the amount improper payments made. In addition, we conducted limited review of OIG audit findings and GAO audit recommendations in fiscal year 2018 and previous years to assess their impacts on improper payments. We have performed random statistical sampling of MFIC case files. The review of case files has confirmed that MFIC is not susceptible to significant risk of improper payments for the fiscal year 2018. In addition, FHA's internal control review required by OMB Circular A-123, Appendix C, concluded that each of these programs has adequate internal controls that are fully documented and implemented to control fraud, waste and abuse.

IPERIA requires agencies that enter into contracts worth more than \$1 million in a fiscal year to complete a cost-effective program for identifying errors made in paying contracts and grants and recovering any improper payments. For the fiscal year 2018 review, we estimated total contract disbursements of \$112 million.

FHA's recovery auditing program is part of its overall program of effective internal control over disbursements. Internal control policies and procedures establish a system to monitor improper payments and their causes and include controls for preventing, detecting, and recovering improper payments.

Limitations of Financial Statements

The following limitations apply to the preparation of the fiscal year 2018 financial statements:

- The principal financial statements are prepared to report the financial position and results of operations of the reporting entity, pursuant to the requirements of 31 U.S.C.3515 (b).
- The statements are prepared from the books and records of the Federal entity in accordance with Federal GAAP and the formats prescribed by OMB. Reports used to monitor, and control budgetary resources are prepared from the same books and records.
- The statements should be read with the realization that they are for a component of the U.S. Government.

PRINCIPAL FINANCIAL STATEMENTS

(THIS PAGE LEFT BLANK INTENTIONALLY)

MESSAGE FROM THE DEPUTY ASSISTANT SECRETARY FOR FINANCE AND BUDGET

November 15, 2018

The Federal Housing Administration (FHA) is pleased to receive an unmodified audit opinion on its fiscal year (FY) 2018 Financial Statement Audit. FHA is also pleased that it maintained the two percent Mutual Mortgage Insurance (MMI) Fund Capital Ratio requirement mandated by Congress for the fourth consecutive year.

We continue to provide strong financial management. As part of our goal of making financial reporting more efficient and effective, FHA made numerous improvements to its financial reporting processes. In addition, FHA made several changes in accounting and reporting policy due to updated reporting requirements published in OMB Circular A-136, *Financial Reporting Requirements*, and the need for consistency with HUD consolidated reporting. FHA also met fourth quarter reporting requirements with the Digital Accountability and Transparency Act (Data Act). This was a tremendous undertaking that involved close cooperation with FHA's programs offices and HUD's Chief Financial Officer (CFO).

Resolving audit findings continued to be the focus in FY 2018. FHA made improvements to its internal controls over financial reporting, resolving several FY 2017 financial statement recommendations. FHA also made substantial progress on others, including reducing its FY 2017 material weakness related to controls over financial reporting to a significant deficiency.

As part of the FY 2018 financial statement audit, FHA was cited for one material weaknesses and three significant deficiencies. The material weakness was related to FHA's modeling practices. The first significant deficiency was related to FHA's controls over financial reporting, while the second significant deficiency relates to FHA's controls over partial claims. The third significant deficiency relates to FHA's weaknesses in selected FHA information technology systems. FHA management has already taken steps to resolve these findings and will continue working to address remaining auditor recommendations in the coming fiscal year.

FHA will continue to operate with a high degree of public and fiscal accountability. A primary focus will be addressing the recommendations and resolving audit findings identified in its audit report, as well as preventing future findings. We will continue to work collaboratively with the Office of Inspector General (OIG) in the coming year, to achieve these goals.

I would like to thank the Office of Finance and Budget staff for their tireless efforts and commitment to FHA's mission. I am proud of the work ethic and dedication exhibited by them in advancing FHA's excellence in financial management.

A handwritten signature in black ink that reads "Susan A. Betts". The signature is fluid and cursive, with a long horizontal line extending from the end of the name.

Susan A. Betts
Deputy Assistant Secretary for Finance and Budget

NOTES TO THE FINANCIAL STATEMENTS

September 30, 2018

Note 1. Significant Accounting Policies

Entity and Mission

The Federal Housing Administration (FHA) was established under the National Housing Act of 1934 and became a wholly owned government corporation in 1948 subject to the Government Corporation Control Act (31 U.S.C. § 9101 et seq.), as amended. While FHA was established as a separate federal entity, it was subsequently merged into the Department of Housing and Urban Development (HUD), when that department was created in 1965. FHA does not maintain a separate staff or facilities; its operations are conducted, along with other Housing activities, by HUD organizations. FHA is headed by HUD's Assistant Secretary for Housing/Federal Housing Commissioner, who reports to the Secretary of HUD.

FHA administers a wide range of activities to make mortgage financing more accessible to the home-buying public and to increase the availability of affordable housing to families and individuals, particularly to the nation's poor and disadvantaged. FHA insures private lenders against loss on mortgages, which finance single family homes, multifamily projects, healthcare facilities, property improvements, manufactured homes, and reverse mortgages, also referred to as Home Equity Conversion Mortgages (HECM). The objectives of activities carried out by FHA relate directly to the development of affordable housing.

FHA categorizes its insurance programs as Single Family (including Title 1), Multifamily, Healthcare, and HECM. Single Family activities support initial or continued home ownership; Title I activities support manufactured housing and property improvement. Multifamily and Healthcare activities support high-density housing and medical facilities. HECM activities support reverse mortgages, which allow homeowners 62 years of age or older to convert the equity in their homes into lump sum or monthly cash payments without having to repay the loan until the loan terminates.

FHA supports its insurance operations through five funds. The Mutual Mortgage Insurance fund (MMI), FHA's largest fund, provides basic Single Family mortgage insurance and is a mutual insurance fund, whereby mortgagors, upon non-claim termination of their mortgages, share surplus premiums paid into the MMI fund that are not required for operating expenses and losses or to build equity. The Cooperative Management Housing Insurance fund (CMHI), another mutual fund, provides mortgage insurance for management-type cooperatives. The General Insurance fund (GI), provides a large number of specialized mortgage insurance activities, including insurance of loans for property improvements, cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities, nonprofit hospitals, and reverse mortgages. The Special Risk Insurance fund (SRI) provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. To comply with the FHA Modernization Act of 2008, activities related to most Single Family programs, including HECM, endorsed in Fiscal Year 2009 and going forward, are in the MMI fund. The Single Family activities in the GI fund from Fiscal Year 2008 and prior remain in the GI fund. The Hope for Homeowners (H4H) program began on October 1, 2008 for Fiscal Year 2009 as a result of *The Housing and Economic Recovery Act of 2008*. This legislation required FHA to modify existing

programs and initiated the H4H program and fund, which guaranteed loans for three years. No new H4H loans have been guaranteed since FY 2011.

For the Loan Guarantee Program at FHA, there are Single Family and Multifamily activities in both the MMI/CMHI and GI/SRI funds. The H4H fund only contains Single Family activity.

The following table illustrates how the primary Single Family program activities for FHA are now distributed between MMI/CMHI and GI/SRI funds based on the year of endorsement:

Fund	Loans Endorsed in Fiscal Years 2008 and Prior	Loans Endorsed in Fiscal Years 2009 and Onward
GI/SRI	234(c), HECM	N/A
MMI	203(b)	203(b), 234(c), HECM

In fiscal year 2010, FHA received appropriations for the Energy Innovation and Transformation Initiative programs. The Energy Innovation program is intended to catalyze innovations in the residential energy efficiency sector that have the ability to be replicated and to help create a standardized home energy efficient retrofit market. The appropriation for the Transformation Initiative was for combating mortgage fraud.

Basis of Accounting

The principal financial statements are presented in conformity with accounting principles generally accepted in the United States of America (GAAP) applicable to federal agencies, as promulgated by the Federal Accounting Standards Advisory Board (FASAB). The recognition and measurement of budgetary resources and their status for purposes of preparing the Combined Statement of Budgetary Resources (SBR), is based on concepts and guidance provided by the Office of Management and Budget (OMB) Circular A-11, *Preparation, Submission, and Execution of the Budget* and the Federal Credit Reform Act of 1990. The format of the SBR is based on the SF 133, *Report on Budget Execution and Budgetary Resources*.

Basis of Consolidation

The accompanying principal financial statements include all Treasury Account Fund Symbols (TAFSS) designated to FHA, which consist of principal program funds, revolving funds, general funds and a deposit fund. All inter-fund accounts receivable, accounts payable, transfers in and transfers out within these TAFSS have been eliminated to prepare the consolidated balance sheet, statement of net cost, and statements of changes in net position. The SBR is prepared on a combined basis as required by OMB Circular A-136, *Financial Reporting Requirements, Revised*.

Fund Balance with U.S. Treasury

Fund balance with U.S. Treasury consists of amounts collected from premiums, interest earned from Treasury, recoveries and appropriations. The balance is available to fund payments for claims, property and operating expenses and of amounts collected but unavailable until authorizing legislation is enacted (see Notes 2 and 3).

Investments

FHA investments include investments in U.S. Treasury securities and Multifamily Risk Sharing debentures. Under current legislation, FHA invests available MMI/CMHI capital reserve fund resources, in excess of

its current needs, in non-marketable market-based U.S. Treasury securities. These U.S. Treasury securities may not be sold on public securities exchanges, but do reflect prices and interest rates of similar marketable U.S. Treasury securities. Investments are presented at acquisition cost net of the amortized premium or discount. Amortization of the premium or discount is recognized monthly on investments in U.S. Treasury securities using the interest method in accordance with the Statement of Federal Financial Accounting Standards (SFFAS) No. 1 *Accounting for Selected Assets and Liabilities*, paragraph 71.

Multifamily Risk Sharing Debentures [Section 542(c)] is a program available to lenders where the lender shares the risk in a property by issuing debentures for the claim amount paid by FHA on defaulted insured loans. In FY 2017, FHA reported Securities Held Outside of Treasury, marketable stock, received as part of a settlement and held outside of the U.S. Treasury by a broker authorized by the Treasury. The stocks were liquidated this fiscal year.

Credit Reform Accounting

The Federal Credit Reform Act (FCRA) established the use of program, financing, general fund receipt and capital reserve accounts to separately account for transactions that are not controlled by the Congressional budget process. It also established the liquidating account for activity relating to any loan guarantees committed and direct loans obligated before October 1, 1991 (pre-Credit Reform). These accounts are classified as either Budgetary or Non-Budgetary in the Combined Statement of Budgetary Resources. The Budgetary accounts include the program, capital reserve and liquidating accounts. The Non-Budgetary accounts consist of the credit reform financing accounts.

In accordance with the SFFAS No. 2, *Accounting for Direct Loans and Loan Guarantees*, the program account receives and obligates appropriations to cover the subsidy cost of a direct loan or loan guarantee and disburses the subsidy cost to the financing account. The program account also receives appropriations for administrative expenses. The financing account is a Non-Budgetary account that is used to record all the cash flows resulting from Credit Reform direct loans, assigned loans, loan guarantees and related foreclosed property. It includes loan disbursements, loan repayments and fees, claim payments, recoveries on sold collateral, borrowing from the U.S. Treasury, interest, negative subsidy and the subsidy cost received from the program account.

FHA has two general fund receipt accounts. FHA's receipt accounts are general fund receipt accounts and these amounts are not earmarked for the FHA's credit programs. The first is used for the receipt of amounts paid from the GI/SRI financing account when there is negative subsidy from the original estimate or a downward reestimate. They are available for appropriations only in the sense that all general fund receipts are available for appropriations. Any assets in these accounts are non-entity assets and are offset by intragovernmental liabilities. At the end of the fiscal year, the fund balance in this general fund receipt account is transferred to the U.S. Treasury general fund.

The second general fund receipt account is used for the unobligated balance transferred from GI/SRI liquidating account and loan modifications. Similar to the general fund receipt account used for the GI/SRI negative subsidy and downward reestimates, the amounts in this account are not earmarked for FHA's credit programs and are returned to Treasury at the end of the fiscal year. Any assets in this account are non-entity assets and are offset by intragovernmental liabilities.

Negative subsidy and downward reestimates in the MMI/CMHI fund are transferred to the Capital Reserve account. Capital Reserve balances are accumulated for unanticipated losses.

The liquidating account is used to record all cash flows to and from FHA resulting from pre-Credit Reform direct loans or loan guarantees. Liquidating account collections in any year are available only for obligations incurred during that year or to repay debt. Unobligated balances remaining in the GI and SRI liquidating funds at year-end are transferred to the U.S. Treasury's general fund. Consequently, in the event that resources in the GI/SRI liquidating account are otherwise insufficient to cover the payments for obligations or commitments, the FCRA provides that the GI/SRI liquidating account can receive permanent indefinite authority to cover any resource shortages.

Loans Receivable and Related Foreclosed Property, Net

FHA's loan receivables includes mortgage notes assigned (MNA), also described as Secretary-held notes, purchase money mortgages (PMM), notes related to partial claims, and direct loans relating to the Federal Financing Bank Risk Share program. Under the requirements of the FCRA, PMM notes are considered to be direct loans while MNA notes are considered to be defaulted guaranteed loans. The PMM loans are generated from the sales on credit of FHA's foreclosed properties to qualified non-profit organizations. The MNA notes are created when FHA pays the lenders for claims on defaulted guaranteed loans and takes assignment of the defaulted loans for direct collections. The majority of MNAs are HECM notes. HECM loans, while not in default, are assigned to HUD when they reach 98% of their maximum claim amount. In addition, Multifamily and Single Family performing notes insured pursuant to Section 221(g)(4) of the National Housing Act may be assigned automatically to FHA at a pre-determined point. Partial claims notes arise when FHA pays a loss mitigation amount to keep a borrower current on their loan. FHA, in turn, records a loan receivable which takes a second position to the primary mortgage.

In accordance with the FCRA and SFFAS No. 2, Credit Reform direct loans, defaulted guaranteed loans and related foreclosed property are reported at the net present value of expected cash flows associated with these assets, primarily from estimated proceeds less selling and maintenance costs. The difference between the cost of these loans and property and the net present value is called the Allowance for Subsidy. Pre-Credit Reform loans receivable and related foreclosed property in inventory are recorded at net realizable value which is based on recovery rates net of any selling expenses (see Note 7).

Loan Guarantee Liability

The net potential future losses related to FHA's central business of providing mortgage insurance are reflected in the Loan Guarantee Liability in the consolidated balance sheet. As required by SFFAS No. 2, the Loan Guarantee Liability includes the Credit Reform-related Liabilities for Loan Guarantees (LLG) and the pre-Credit Reform Loan Loss Reserve (LLR) (see Note 7).

The LLG is calculated as the net present value of anticipated cash outflows and cash inflows. Anticipated cash outflows include: lender claims arising from borrower defaults (i.e., claim payments), premium refunds, property costs to maintain foreclosed properties arising from future defaults and selling costs for the properties. Anticipated cash inflows include premium receipts, proceeds from asset sales and principal and interest on Secretary-held notes.

FHA records loss estimates for its Single Family LLR (includes MMI and GI/SRI) to provide for anticipated losses incurred (e.g., claims on insured mortgages where defaults have taken place, but claims have not yet been filed). Using the net cash flows (cash inflows less cash outflows), FHA computes an estimate based on conditional claim rates and loss experience data, and adjusts the estimate to incorporate management assumptions about current economic factors.

FHA records loss estimates for its Multifamily LLR (includes CMHI and GI/SRI) to provide for anticipated outflows less anticipated inflows. Using the net present value of claims less premiums, fees, and recoveries, FHA computes an estimate based on conditional claim rates, prepayment rates, and recovery assumptions based on historical experience.

Use of Estimates

The preparation of the principal financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Amounts reported for net loans receivable and related foreclosed property and the Loan Guarantee Liability represent FHA's best estimates based on pertinent information available.

To estimate the Allowance for Subsidy associated with loan receivables and related foreclosed property, and the Liability for Loan Guarantees (LLG), FHA uses cash flow model assumptions associated with loan guarantee cases subject to the Federal Credit Reform Act of 1990 (FCRA), as described in Note 7, to estimate the cash flows associated with future loan performance. To make reasonable projections of future loan performance, FHA develops assumptions, as described in Note 7, based on historical data, current and forecasted program and economic assumptions.

Certain programs have higher risks due to increased chances of fraudulent activities perpetrated against FHA. FHA accounts for these risks through the assumptions used in the liabilities for loan guarantee estimates. FHA develops the assumptions based on historical performance and management's judgments about future loan performance.

General Property, Plant and Equipment

FHA does not maintain separate facilities. HUD purchases and maintains all property, plant and equipment used by FHA, along with other Office of Housing activities.

Current HUD policy concerning SFFAS No. 10, *Accounting for Internal Use Software*, indicates that HUD will either own the software or the functionality provided by the software in the case of licensed or leased software. This includes "commercial off-the-shelf" (COTS) software, contractor-developed software, and internally developed software. FHA has several procurement actions in place and incurred expenses for software development are transferred to HUD to comply with departmental policy.

Appropriations

FHA receives appropriations for certain operating expenses for its program activities. Additionally, FHA receives appropriations for GI/SRI positive subsidy, upward reestimates, and permanent indefinite authority to cover any shortage of resources in the liquidating account.

Full Cost Reporting

SFFAS No. 4, *Managerial Cost Accounting Concepts and Standards* and SFFAS No. 55, *Amending Inter-Entity Cost Provisions* to account for costs assumed by other Federal organizations on their behalf, require that Federal agencies report the full cost of program outputs in the financial statements. Full cost reporting includes all direct, indirect, and inter-entity costs. HUD allocates each responsibility segment's share of

the program costs or resources provided by other federal agencies. As a responsibility segment of HUD, FHA's portion of these costs was \$18 million for fiscal year 2018 and \$13 million for fiscal year 2017, and it was included in FHA's financial statements as an imputed cost in the Consolidated Statement of Net Cost, and as imputed financing in the Consolidated Statement of Changes in Net Position.

Distributive Shares

As mutual funds, excess revenues in the MMI/CMHI Fund may be distributed to mortgagors at the discretion of the Secretary of HUD. Such distributions are determined based on the funds' financial positions and their projected revenues and costs. No distributive share distributions have been declared from the MMI fund since the enactment of the National Affordable Housing Act (NAHA) in 1990.

Liabilities Covered by Budgetary Resources

Liabilities of Federal agencies are required to be classified as those covered and not covered by budgetary resources, as defined by OMB Circular A-136, and in accordance with SFFAS No. 1. In the event that available resources are insufficient to cover liabilities due at a point in time, FHA has authority to borrow monies from the U.S. Treasury (for post-1991 loan guarantees) or to draw on permanent indefinite appropriations (for pre-1992 loan guarantees) to satisfy the liabilities.

Liabilities Not Requiring Budgetary Resources

Liabilities that have not previously, nor will in the future, require the use of budgetary resources. These include clearing accounts, non-fiduciary deposit funds, custodial accounts and unearned revenue. FHA's General Fund receipt accounts also fall into this category.

Statement of Budgetary Resources

The Statement of Budgetary Resources has been prepared as a combined statement and as such, intra-entity transactions have not been eliminated. Budget authority is the authorization provided by law to enter into obligations to carry out the guaranteed and direct loan programs and their associated administrative costs, which would result in immediate or future outlays of federal funds. FHA's budgetary resources include current budgetary authority (i.e., appropriations and borrowing authority) and unobligated balances brought forward from multi-year and no-year budget authority received in prior years, and recoveries of prior year obligations. Budgetary resources also include spending authority from offsetting collections credited to an appropriation or fund account.

Unobligated balances associated with appropriations that expire at the end of the fiscal year remain available for obligation adjustments, but not for new obligations, until that account is canceled. When accounts are canceled, five years after they expire, amounts are not available for obligations or expenditure for any purpose.

Note 2. Non-Entity Assets

Non-entity assets consist of assets that belong to other entities but are included in FHA's consolidated balance sheets. To reflect FHA's net position accurately, these non-entity assets are offset by various liabilities. FHA's non-entity assets as of September 30, 2018 and 2017 are as follows:

(Dollars in millions)	FY 2018	Restated FY 2017
Intragovernmental:		
Fund Balance with Treasury	\$ 17	\$ 19
Total Intragovernmental	17	19
Cash and Other Monetary Assets	22	26
Total Non-Entity Assets	39	45
Total Entity Assets	86,586	80,727
Total Assets	\$ 86,625	\$ 80,772

FHA's non-entity assets consist of escrow monies collected by FHA from the borrowers of its loans.

Cash and other monetary assets that are collected from FHA borrowers consist of escrow monies that are either deposited at the U.S. Treasury or minority-owned banks or invested in U.S. Treasury securities. Subsequently, FHA disburses these escrow monies to pay for maintenance expenses on behalf of the borrowers.

Note 3. Fund Balance with U.S. Treasury

FHA's fund balance with U.S. Treasury was comprised of the following as of September 30, 2018 and 2017:

(Dollars in millions)	FY 2018	Restated FY 2017
Fund Balances:		
Revolving Funds	\$ 32,919	\$ 28,000
Appropriated Funds	250	269
Other Funds	521	843
Total	\$ 33,690	\$ 29,112
Status of Fund Balance with U.S. Treasury:		
Unobligated Balance --		
Available	\$ 9,851	\$ 5,809
Unavailable	20,007	19,549
Obligated Balance Not Yet Disbursed	3,832	3,754
Non-Budgetary FBWT	-	-
Total	\$ 33,690	\$ 29,112

Revolving Funds

FHA's revolving funds include the liquidating and financing accounts as required by the FCRA. These funds are created to finance a continuing cycle of business-like operations in which the fund charges for the sale of products or services. These funds also use the proceeds to finance spending, usually without requirement of annual appropriations.

Appropriated Funds

FHA's appropriated funds consist of annual or multi-year program accounts that expire at the end of the time period specified in the authorizing legislation. For the subsequent five fiscal years after expiration, the resources are available only to liquidate valid obligations incurred during the unexpired period. Adjustments are allowed to increase or decrease valid obligations incurred during the unexpired period that were not previously reported. At the end of the fifth expired year, the annual and multi-year program accounts are canceled, and any remaining resources are returned to the U.S. Treasury.

Other Funds

FHA's other funds include the general fund receipt accounts established under the FCRA and the deposit funds for the receipt of bid deposits for asset sales. Additionally, the capital reserve account is included with these funds and is used to retain the MMI/CMHI negative subsidy and downward credit subsidy reestimates transferred from the financing account. If subsequent upward credit subsidy reestimates are calculated in the financing account or there is shortage of budgetary resources in the liquidating account, the capital reserve account will return the retained negative subsidy to the financing account or transfer the needed funds to the liquidating account, respectively.

Status of Fund Balance with U.S. Treasury

Unobligated Fund Balance with U.S. Treasury represents Fund Balance with U.S. Treasury that has not been obligated to purchase goods or services either because FHA has not received apportionment authority from OMB to use the resources (unavailable unobligated balance) or because FHA has not obligated the apportioned resources (available unobligated balance). Fund Balance with U.S. Treasury that is obligated, but not yet disbursed, consists of resources that have been obligated for goods or services but not yet

disbursed either because the ordered goods or services have not been delivered or because FHA has not yet paid for goods or services received by the end of the fiscal year.

Note 4. Cash and Other Monetary Assets

(Dollars in millions)

	FY 2018	FY 2017
With the Public:		
Escrow Monies Deposited at Minority-Owned Banks	\$ 22	\$ 26
Deposits in Transit	12	14
Total	\$ 34	\$ 40

Escrow Monies Deposited at Minority-Owned Banks

FHA holds in trust escrow monies received from the borrowers of its Multifamily mortgage notes to cover property repairs and renovation expenses. These escrow monies are deposited at the U.S. Treasury (see Note 2) or deposited at minority-owned banks.

Deposits in Transit

Deposits in Transit is cash that has not been confirmed as being received by the U.S. Treasury. Once the U.S. Treasury has confirmed that this cash has been received, the cash will be moved from Deposits in Transit to Fund Balance with U.S. Treasury.

Note 5. Investments

Investment in U.S. Treasury Securities

As discussed in Note 1, all FHA investments in Treasury securities are in non-marketable securities issued by the U.S. Treasury. These securities carry market-based interest rates. The market value of these securities is calculated using the bid amount of similar marketable U.S. Treasury securities as of September 30th. The cost, net amortized premium/discount, net investment, and market values of FHA's investments in U.S. Treasury securities as of September 30, 2018 were as follows:

(Dollars in millions)

FY 2018	Cost	Amortized (Premium) / Discount, Net	Investments, Net	Market Value
MMI/CMHI Investments	\$ 26,461	\$ 236	\$ 26,697	\$ 26,678
Total	\$ 26,461	\$ 236	\$ 26,697	\$ 26,678

The cost, net amortized premium/discount, net investment, and market values as of September 30, 2017 were as follows:

FY 2017	Restated	Cost	Amortized (Premium) / Discount, Net	Investments, Net	Market Value
MMI/CMHI Investments		\$ 30,744	\$ 51	\$ 30,795	\$ 30,747
MMI/CMHI Accrued Interest				46	-
Total		\$ 30,744	\$ 51	\$ 30,841	\$ 30,747

In fiscal year 2017, FHA overstated the MMI/CMHI Investment Market Value amount by incorporating accrued interest in the amount of \$46 million to the presentation of the Market Value total. In fiscal year 2018, the presentation has been updated to exclude accrued interest from the Market Value total.

Investments in Private-Sector Entities

Investments in Private Sector Entities as of September 30, 2018 and 2017 were as follows:

(Dollars in millions)	Beginning Balance	New Acquisitions	Share of Earnings or Losses	Redeemed	Ending Balance
FY 2018					
Securities Held Outside of Treasury	\$ 13	\$ -	\$ -	\$ (13)	\$ -
Risk Sharing Debentures	31	-	(17)	(6)	8
Total	\$ 44	\$ -	\$ (17)	\$ (19)	\$ 8
FY 2017					
Securities Held Outside of Treasury	\$ -	\$ 13	\$ -	\$ -	\$ 13
Risk Sharing Debentures	31	-	-	-	31
Total	\$ 31	\$ 13	\$ -	\$ -	\$ 44

Note 6. Accounts Receivable, Net

Accounts receivable, net, as of September 30, 2018 and 2017 are as follows:

(Dollars in millions)	Gross		Allowance		Net	
	FY 2018	FY 2017	FY 2018	FY 2017	FY 2018	FY 2017

Miscellaneous Receivables	17	89	-	-	17	89
Total	\$ 343	\$ 529	\$ (206)	\$ (309)	\$ 137	\$ 220

Receivables Related to Credit Program Assets

These receivables include asset sale proceeds receivables and rent receivables from FHA's foreclosed properties.

Premium Receivables

These amounts consist of the premiums due to FHA from the mortgagors at the end of the reporting period. The details of FHA premium structure are discussed in Note 14 – Earned Revenue/Premium Revenue.

Partial Claim Receivables

Partial Claim receivables represents partial claims paid by FHA to mortgagees as part of its loss mitigation efforts to bring delinquent loans current for which FHA does not yet have the promissory note recorded.

Generic Debt Receivables

These amounts are mainly comprised of receivables from various sources including Single Family Indemnifications and Single Family Restitutions.

Settlement Receivables

FHA receives signed consent judgments that are approved by the courts, but which funds have not been received.

Miscellaneous Receivables

Miscellaneous receivables include late charges and penalties receivables on delinquent premium receivables, refund receivables from overpayments of claims, distributive shares, and other immaterial receivables.

Allowance for Loss

The allowance for loss for these receivables is calculated based on FHA's historical loss experience and management's judgment concerning current economic factors.

Note 7. Direct Loans and Loan Guarantees, Non-Federal Borrowers

Direct Loan and Loan Guarantee Programs Administered by FHA include:

Single Family Forward Mortgages
Multifamily Mortgages
Healthcare Mortgages
Home Equity Conversion Mortgages (HECM)

FHA reports its insurance operations in four overall program areas: Single Family Forward mortgages, Multifamily mortgages, Healthcare mortgages, and Home Equity Conversion Mortgages (HECM). FHA operates these programs primarily through four insurance funds: Mutual Mortgage Insurance (MMI), General Insurance (GI), Special Risk Insurance (SRI), and Cooperative Management Housing Insurance (CMHI), with the MMI fund being the largest. There is a fifth fund, Hope for Homeowners (H4H), that became operational in fiscal year 2009 and only contains minimal activity.

FHA encourages homeownership through its Single Family Forward programs (Section 203(b), which is the largest program, and Section 234) with its mortgage insurance programs. These programs insure mortgage lenders against losses from default, enabling those lenders to provide mortgage financing on favorable terms to homebuyers. Multifamily Housing Programs (Section 213, Section 221(d)(4), Section 207/223(f), and Section 223(a)(7)) provide FHA insurance to approved lenders to facilitate the construction, rehabilitation, repair, refinancing, and purchase of multifamily housing projects such as apartment rentals, and cooperatives. Healthcare programs (Section 232 and Section 242) enable low cost financing of healthcare facility projects and improve access to quality healthcare by reducing the cost of capital. The HECM program provides eligible homeowners who are 62 years of age and older access to the equity in their property with flexible terms.

FHA Direct Loan and Loan Guarantee Programs and the related loan receivables, foreclosed property, and Loan Guarantee Liability as of September 30, 2018 and 2017 are as follows:

Direct Loan Programs:

Starting in FY 2015, FHA began a Federal Financing Bank (FFB) Risk Share program, an inter-agency partnership between HUD, FFB and various Housing Finance Authorities (HFAs). The FFB Risk Share program provides funding for multifamily mortgage loans insured by FHA. Under this program, FHA records a direct loan with the public as an asset on its balance sheet, and conversely, borrowing from FFB as a liability. The program does not change the basic structure of Risk Sharing; it only substitutes FFB as the funding source. The HFAs originate and service the loans and share in any losses.

The cash flow model for FFB direct loan program is developed by collecting and consolidating data from FHA's program and accounting systems. The model is based upon trends and assumptions of historical data and analysis but, where necessary, management's judgment. The model uses actual data through June of the current fiscal year and projections are used to estimate the direct loan cash flows for the 4th quarter. The model estimates total loan commitments and the percentage of commitments that will be disbursed prior to the end of the fiscal year.

Home Equity Conversion Mortgage (HECM):

HECM (reverse mortgages) are not included in the previous tables due to the unique nature of the program. Since the inception of the program, FHA has insured 1,100,659 HECM loans with a maximum claim amount of \$269 billion. Of these 1,100,659 HECM loans insured by FHA, 547,779 loans with a maximum claim amount of \$144 billion are still active. As of September 30, 2018, the insurance-in-force (the outstanding balance of active loans) was \$100 billion. The insurance in force includes balances drawn by the mortgagee; interest accrued on the balances drawn, service charges, and mortgage insurance premiums. The maximum claim amount is the dollar ceiling to which the outstanding loan balance can grow before being assigned to FHA.

Other Information on Foreclosed Property:

Additional information on FHA foreclosed property as of September 30, 2018 and 2017 is as follows:

	FY 2018	FY 2017
Average number of days in inventory for Sold Cases	136	146
End of Fiscal Year active inventory	7,968	11,205

The above chart references the average holding period for FHA foreclosed property, and the total number of foreclosed properties on-hand as September 30, 2018. Foreclosed properties are primarily Single Family properties.

Defaulted Guaranteed Loans (Pre-92 and Post-91)

Restrictions on the use/disposal of foreclosed property:

The balance relating to foreclosures as of September 30, 2018 is comprised of only Single Family properties. There are no Multifamily properties currently in inventory.

The Secretary has the authority under the National Housing Act (12 U.S.C 1710 (g)) to manage or dispose of eligible HUD-owned property assets in a manner that will provide affordable, safe and sanitary housing to low-wealth families, preserve and revitalize residential neighborhoods, expand homeownership opportunities, minimize displacement of tenants residing in rental or cooperative housing, and protect the financial interest of the Federal government.

Single Family properties may be sold to eligible entities (24 CFR 291.303) through public asset sales. Eligibility of bidders will be determined by the Secretary and included in the bid package with a notice filed in the Federal Register. In addition, HUD must ensure that its policies and practices in conducting the single family property disposition program do not discriminate on the basis of disability (24 CFR 9.155(a)).

Several presentation updates were made this year. Refer to **Note 23. Financial Statement Presentation and Policy Disclosures** for details of changes to Note 7.

Credit Reform Valuation Methodology

FHA values its Credit Reform LLG and related receivables from notes and property inventories at the net present value of their estimated future cash flows.

To apply the present value computations, FHA divides loans into cohorts and “risk” categories. Multifamily and Healthcare cohorts are defined based on the year in which loan guarantee commitments are made. Single Family mortgages are grouped into cohorts based on loan endorsement dates for the GI/SRI and MMI fund. Within each cohort year, loans are subdivided into product groupings, which are referred to as risk categories in federal budget accounting. Each risk category has characteristics that distinguish it from others, including loan performance patterns, premium structure, and the type and quality of collateral underlying the loan. For activity related to fiscal years 1992-2008, the MMI Fund has one risk category, and for activity related to fiscal years 2009 and onward, the MMI Fund has two risk categories. The second category is for HECM loans, which joined the MMI Fund group of programs in 2009. The Single Family GI/SRI loans are grouped into four risk categories. Also in the GI/SRI Fund, there are nine multifamily risk categories and three health care categories.

The cash flow estimates that underlie present value calculations are determined using the significant assumptions detailed below.

Significant Assumptions – FHA developed economic and financial models in order to estimate the present value of future program cash flows. The models incorporate information on the expected magnitude and timing of each cash flow. The models rely heavily on the following loan performance assumptions:

- Conditional Termination Rates: The estimated probability of an insurance policy claim or non-claim termination in each year of the loan guarantee’s term, given that a loan survives until the start of that year.
- Claim Amount: The estimated amount of the claim payment relative to the unpaid principal balance at the time the claim occurs.
- Recovery Rates: The estimated percentage of a claim payment or defaulted loan balance that is recovered through disposition of a mortgage note or underlying property.

In FY 2017, FHA used a middle of year (MOY) discount period methodology to calculate and record the year-end financial statement reestimate subsidy and interest expenses and a beginning of year (BOY) discount period methodology for the liquidation of the FY 2017 reestimate in FY 2018. During FY 2018, FHA discovered that OMB’s Credit Subsidy Calculator uses a BOY discount period default, regardless of each agency’s independent methodology. To be consistent with OMB, FHA management has made the decision to use BOY discount period methodology for the FY 2018 year-end financial statement reestimate and will continue to use this methodology going forward. This methodology change will also be consistent with the subsidy and interest expense allocation being published in the President’s Budget and Federal Credit Supplement.

Had FHA used the BOY discount period methodology consistently throughout the year, its allocation between subsidy and interest components for the technical reestimate would have had the following impact on Note 7: Loan Guarantee technical reestimate GI/SRI subsidy expense component would have decreased by \$12 million and the interest expense component would have increased by \$12 million. Loan Guarantee MMI subsidy expense component would have decreased by \$74 million and the interest expense component would have increased by \$74 million. Direct Loan GI/SRI subsidy component would have decreased by \$2 million and the interest expense component would have increased by \$2 million.

The Note 13 impact would have been as follows: the Single Family Forward subsidy expense component would have decreased by \$39 million, with a corresponding increase in the Single Family Forward interest expense component. The HECM subsidy expense component would have decreased by \$67 million, with a corresponding increase in the HECM interest expense component. The Multifamily subsidy expense component would have increased by \$15 million, with a corresponding decrease in the Multifamily interest expense component. The Healthcare subsidy expense component would have increased by \$3 million, with a corresponding decrease in the Healthcare interest expense component.

The total technical reestimate subsidy expense component would have decreased by \$88 million and the interest expense component would have increased by \$88 million for both Note 7 and Note 13. There was no net change to either Note 7 or Note 13 total technical reestimate expense as a result of this discount period methodology inconsistency.

Additional information about loan performance assumptions is provided below:

Sources of data: FHA developed assumptions for claim rates, prepayment rates, claim amounts, and recoveries based on historical data obtained from its internal business systems.

Economic assumptions: Independent forecasts of economic conditions are used in conjunction with loan-level data to generate Single Family, Multifamily, and Healthcare claim and prepayment rates. OMB provides the central economic assumptions used, such as interest rates, house price appreciation and the discount rates used against the cash flows. Other sources are used to distribute the central assumptions geographically.

Reliance on historical performance: FHA relies on the historical performance of its insured portfolio to generate behavioral response functions that are applied to economic forecasts to generate future performance patterns for the outstanding portfolio. Changes in legislation, program requirements, tax treatment, and economic factors all influence loan performance. FHA assumes that its portfolio will continue to perform consistently with its historical experience, respecting differences due to current loan characteristics and forecasted economic conditions.

Current legislation and regulatory structure: FHA's future plans allowed under current legislative authority, have been taken into account in formulating assumptions when relevant. In contrast, future changes in legislative authority may affect the cash flows associated with FHA insurance programs. Such changes cannot be reflected in LLG calculations because of the uncertainty over their nature and outcome.

Discount rates: The disbursement-timing-weighted interest rates on U.S. Treasury securities of maturities comparable to the terms of the guaranteed loans create the discount factors used in the present value calculations for cohorts 1992 to 2000. For the 2001 and future cohorts, the rates on U.S. Treasury securities of maturities comparable to the cash flow timing for the loan guarantees are used in the present value calculations. This latter methodology is referred to as the basket-of-zeros discounting methodology. OMB provides these rates to all Federal agencies for use in preparing credit subsidy estimates and requires their use under OMB Circular A-11, Part 4, and "Instructions on Budget Execution." The basket-of-zeros discount factors are also disbursement weighted.

Analysis of Change in the Liability for Loan Guarantees

FHA has estimated and reported on LLG calculations since fiscal year 1992. Over this time, FHA's reported LLG values have shown measurable year-to-year variance. That variance is caused by four factors: (1) adding a new year of insurance commitments each year; (2) an additional year of actual loan performance data used to calibrate forecasting models, (3) revisions to the methodologies employed to predict future loan performance, and (4) programmatic/policy changes that affect the characteristics of insured loans or potential credit losses.

Described below are the programs that comprise the majority of FHA's loan guarantee business. These descriptions highlight the factors that contributed to changing LLG estimates for FY 2018.

Mutual Mortgage Insurance (MMI) – On net, the MMI Fund LLG increased to \$13,711 million at the end of fiscal year 2018. The increase in liability can be attributed to slight changes in economic forecasts and actual loan performance.

MMI Single Family Forward (SFF): The 2018 SFF LLG is very similar to the 2017 methodology. The models use historical data to generate claim and prepayment probabilities based on various borrower and loan-specific factors. These projections feed a Cash Flow Model (CFM) that discounts all cohort years using the latest Single Effective Rate (SER) specific to each cohort, in accordance with Federal Credit Reform Modeling guidelines. As with the 2017 LLG, the 2018 LLG estimate uses a single path (President's Economic Assumption released in June 2018) to compute the expected net present value of the future cash flows.

MMI Home Equity Conversion Mortgage (HECM): Like the SFF program, in 2018, the HECM LLG was modeled first by using actuarial models to estimate the "termination" probability for each loan. A HECM termination event was grouped into three (3) categories; borrower death, borrower move out of subject property or borrower refinance of subject property. These projections are used in calculating the LLG in the Cash Flow Model (CFM). The CFM discounts all cohort years using the latest Single Effective Rate (SER) specific to each cohort, in accordance with Federal Credit Reform Modeling guidelines. As with the 2017 LLG, the 2018 LLG estimate uses a single path (President's Economic Assumption released in June 2018) to compute the expected net present value of the future cash flows.

GI/SRI (HECM) - HECM endorsements from fiscal years 1990-2008 remain in the GI/SRI Fund. Estimation of the GI/SRI HECM LLG is consistent with that of the MMI HECM LLG estimation. The liability for these loans decreased to \$9,248 million at the end of FY 2018 reflecting the winddown of the pre-2009 HECM cohorts. This liability is driven more by long term house price appreciation forecasts than short term forecasts. The majority of the remaining GI/SRI HECM loans have adjustable interest rates, which impacts the LLG through its influence on unpaid balances, claim and recovery rates.

GI/SRI Section 223(f) - Section 223(f) of the National Housing Act permits FHA mortgage insurance for the refinance or acquisition of existing multifamily rental properties consisting of five or more units. Under this program, FHA may insure up to 85 percent of the lesser of the project's appraised value or its replacement cost. Projects insured under the program must be at least three years old. The Section 223(f) program is the largest multifamily program in the GI/SRI fund with an insurance-in-force of \$37.2 billion. The Section 223(f) liability is negative, meaning that the present value of expected future premium revenues is greater than the present value of expected future (net) claim expenses. The 223(f) liability increased this year by \$2 million, from (\$1,563) million to (\$1,561) million, due to higher claim expectations.

GI/SRI Section 223(a)(7) - Section 223(a)(7) gives FHA authority to refinance FHA-insured loans. Under this program, the refinanced principal amount of the mortgage may be the lesser of the original amount of the existing mortgage or the remaining unpaid principal balance of the loan. Loans insured under any sections of the National Housing Act may be refinanced under 223(a)(7), including those already under 223(a)(7). The Section 223(a)(7) program has an insurance-in-force of \$18.7 billion. The Section 223(a)(7) liability is negative, meaning that the present value of expected future premium revenues is greater than the present value of expected future (net) claim expenses. The 223(a)(7) liability increased this year by \$52 million, from (\$630) million to (\$578) million due to higher claim expectations.

GI/SRI Section 221(d)(4) - Section 221(d)(4) of the National Housing Act authorizes FHA mortgage insurance for the construction or substantial rehabilitation of multifamily rental properties with five or more units. Under this program, FHA may insure up to 90 percent of the total project cost. This is the second largest multifamily program in the GI/SRI fund with an insurance-in-force of \$19.8 billion. The Section 221(d)(4) liability increased by \$130 million this year, from (\$333) million to (\$203) million, due to higher claim expectations.

GI/SRI Section 232 Healthcare New Construction (NC) - The Section 232 NC program provides mortgage insurance for construction or substantial rehabilitation of nursing homes and assisted-living facilities. FHA insures a maximum of 90 percent of the estimated value of the physical improvements and major movable equipment. The Section 232 NC program has an insurance-in-force of \$3.0 billion. The Section 232 NC liability increased by \$1 million this year, from (\$98) million to (\$97) million due to a decrease in insurance-in-force.

GI/SRI Section 232 Healthcare Purchasing or Refinancing - The Section 232 Refinance program provides mortgage insurance for two purposes: purchasing or refinancing of projects that do not need substantial rehabilitation, and installation of fire safety equipment for either private, for-profit businesses or non-profit associations. For existing projects, FHA insures a maximum of 85 percent of the estimated value of the physical improvements and major movable equipment. The Section 232 Refinance program has an insurance-in-force of \$26.4 billion. The Section 232 Refinance liability decreased by \$125 million this year, from (\$808) million to (\$933) million due to an increase in insurance-in-force and a decrease in prepayment expectations.

GI/SRI Section 242 Hospitals - The Section 242 Hospitals program provides mortgage insurance for the construction, substantial rehabilitation, or refinance of hospitals and/or the purchase of major hospital equipment to either private, for-profit businesses or non-profit associations. FHA insures a maximum of 90 percent of the estimated replacement cost of the hospital, including the installed equipment. The Section 242 program has an insurance-in-force of \$7.1 billion. The Section 242 liability decreased by \$12 million this year from (\$206) million to (\$218) million due to higher premium revenue caused by decreased prepayment expectations as well as lower claims expected.

Risks to LLG Calculations

LLG calculations for some programs now use Monte Carlo simulations and stochastic economic forecasts. What is booked as an LLG value is the average or arithmetic “mean” value from a series of projections that view loan portfolio performance under a large variety of possible economic circumstances. The individual economic scenario forecasts are designed to mimic the types of movements in factors such as home prices, interest rates, and apartment vacancy rates that have actually occurred in the historical record. By creating a large number of these scenarios, each independent of the others, one creates a universe of potential outcomes that define the possible set of LLG values in an uncertain world. Using the mean value across all forecast scenarios is valuable for providing some consideration for “tail risk.” Tail risk occurs in most loan

guarantee portfolios because potential losses under the worst scenarios are multiples of potential gains under the best scenarios. The inclusion of tail events in the mean-value calculation creates an addition to LLG, which is the difference between the mean value from the simulations and the median value. The median is the point at which half of the outcomes are worse and half are better. By booking a mean value rather than a median, FHA is essentially providing some additional protection in its loss reserves against adverse outcomes. At the same time, booking an LLG based on a mean value results in a better than even chance future revisions will be in the downward direction.

The uncertainty built into Monte Carlo forecasts is only for economic risk, and not for model risk. All LLG values are fundamentally dependent upon forecasts of insured-loan performance. Those forecasts are developed through models that apply statistical, economic, financial, or mathematical theories, techniques, and assumptions to create behavioral-response functions from historical data. All such models involve risk that actual behavior of borrowers and lenders in the future will differ from the historical patterns embedded in the forecasting models. Model risk also emanates from the possibility that the computer code used to create the forecasts has errors or omissions which compromise the integrity and reliability of projections.

Each year, HUD works with its contractors to evaluate the forecasting models for reasonableness of results on a number of dimensions. Model risk is also addressed through a continuous cycle of improvement, whereby lessons learned from the previous round of annual portfolio valuations—in the independent actuarial studies, LLG valuations, and President’s Budget—are used as a basis for new research and model development in the current year.

For Multifamily programs, LLG risk comes from claims, recoveries and premiums. Claims and recoveries are dependent on continued rental-income trends and rental-price growth. Premiums are driven by FHA policy and industry demand for FHA products. Generally, risk comes from market, economic, and demographic influences such as changes in local employment conditions, the supply of rental housing in each market where FHA has a presence, population growth, and household formation. FHA’s policy of insuring loans pre-construction in its 221(d)(4) program subject LLG calculations to risk from their capability to operate post-construction.

For Healthcare programs (Sections 232 and 242), LLG risk comes principally from healthcare reimbursement rates from Medicare and Medicaid. In addition, the financial health of State and Municipal government entities also is a source of LLG risk, as many of the FHA-insured projects benefit, in part, from periodic cash infusions from those entities. Risk also varies as does the quality of business management at each facility, and from the supply of medical care in each community relative to demand and the abilities of facility management to adapt to changing technologies and the competitive landscape. These are factors for which it is difficult to predict future trends.

For the SFF mortgage programs, LLG risk comes from claims, recoveries, and premiums. Claims and recoveries are largely dependent on house price appreciation and local market conditions such as demand to supply ratio and share of homes in foreclosure status. FHA recoveries are also dependent on the type of claim disposition. Various disposition types such as pre-foreclosure sale, CWCOT, and Note Sales typically recover more funds for FHA than REOs. Premiums are driven by FHA policy, industry demand for FHA products, and interest rate outlook, which determines the incentive of refinances. Generally, risk comes from portfolio characteristics, market and prevailing economic conditions.

For both HECM programs (GI/SRI and MMI cohorts), LLG risk comes from claims, recoveries and premiums. Claims and recoveries are largely dependent on house price appreciation and borrower behavior such as home maintenance and ability to meet property tax and insurance obligations. Premiums are driven

by FHA policy and interest rates which determine the growth of HECM unpaid principal balances (UPB). Generally, risk comes from portfolio characteristics, market and prevailing economic conditions.

Pre-Credit Reform Valuation Methodology

FHA values its Pre-Credit Reform related notes and properties in inventory at net realizable value, determined on the basis of net cash flows. To value these items, FHA uses historical claim data, revenues from premiums and recoveries, and expenses of selling and maintaining property.

MMI Single Family LLR - For the single-family portfolio, the aggregate liability for the remaining pre-credit reform loans in FY 2018 is \$1.7 million.

GI/SRI Multifamily & Healthcare LLR - For the multifamily and healthcare portfolio, the remaining insurance-in-force for pre-credit reform loans is \$173.8 million. The aggregate liability for the remaining pre-credit reform loans in FY2018 is (\$916) thousand, which is a \$30 thousand decrease from the (\$886) thousand estimate in FY2017. The year-over-year decrease in aggregate liability is due to lower claim expectations.

Note 8. Accounts Payable

Accounts Payable as of September 30, 2018 and 2017 are as follows:

(Dollars in millions)

	FY 2018	FY 2017
Intragovernmental:		
Claims Payable to Ginnie Mae	\$ 1	\$ 1
Miscellaneous Payables to Other Federal Agencies	1	1
Total	\$ 2	\$ 2

	FY 2018	FY 2017
With the Public:		
Claims Payable	\$ 285	\$ 284
Premium Refunds Payable	142	124
Single Family Property Disposition Payable	43	28
Miscellaneous Payables	85	78
Total	\$ 555	\$ 514

Claims Payables

Claims payables represent the amount of claims that have been processed by FHA, but the disbursement of payment to lenders has not taken place at the end of the reporting period.

Premium Refunds Payables

Premium refund payables are refunds of previously collected Single Family premiums that will be returned to the borrowers resulting from prepayment of the insured mortgages.

Single Family Property Disposition Payables

Single family property disposition payables includes management and marketing contracts and other property disposition expenses related to foreclosed property.

Miscellaneous Payables

Miscellaneous payables include interest enhancement payables, interest penalty payables for late payment of claims, generic debt payables and other payables related to various operating areas within FHA.

The following tables describe the composition of Debt held by FHA as of September 30, 2017 and 2018:

	FY 2017			FY 2018		
	Beginning Balance	Net Borrowings	Ending Balance	Beginning Balance	Net Borrowings	Ending Balance
Other Debt:						
Borrowings from FFB	554	633	1,187	1,187	484	1,671
Borrowings from U.S. Treasury	30,319	(2,364)	27,954	27,954	(3,246)	24,708
Total	\$ 30,873	\$ (1,731)	\$ 29,141	\$ 29,141	\$ (2,762)	\$ 26,379

	FY 2017	FY 2018
Classification of Debt:		
Intragovernmental Debt	\$ 29,141	\$ 26,379
Total	\$ 29,141	\$ 26,379

In accordance with Credit Reform accounting, FHA borrows from the U.S. Treasury when cash is needed in its financing accounts. Usually, the need for cash arises when FHA has to transfer the negative credit subsidy amounts related to new loan disbursements and existing loan modifications from the financing accounts to the general fund receipt account (for cases in GI/SRI funds) or to the capital reserve account (for cases in MMI/CMHI funds). In some instances, borrowings are also needed to transfer the credit subsidy related to downward reestimates from the GI/SRI financing account to the GI/SRI receipt account or when available cash is less than claim payments due.

During fiscal year 2018, FHA's U.S. Treasury borrowings carried interest rates ranging from 1.02 percent to 7.59 percent. The maturity dates for these borrowings occur from September 2018 – September 2030. Loans may be repaid in whole or in part without penalty at any time prior to maturity.

Borrowings from Federal Financing Bank

Starting in FY 2015, FHA began a Federal Financing Bank (FFB) Risk Share program, an inter-agency partnership between HUD, FFB and the Housing Finance Authorities (HFAs). The FFB Risk Share program provides funding for multifamily mortgage loans insured by FHA. Under this program, FHA borrows from the FFB to disburse direct loans.

Note 10. Other Liabilities

The following table describes the composition of Other Liabilities as of September 30, 2018 and 2017:

(Dollars in millions)

FY 2018	Current
Intragovernmental:	
Receipt Account Liability	\$ 2,787
Total	\$ 2,787

With the Public:	
Trust and Deposit Liabilities	\$ 39
Multifamily Notes Unearned Revenue	252
Premiums collected on unendorsed cases	212
Miscellaneous Liabilities	79
Total	\$ 582

FY 2017	Restated Current
Intragovernmental:	
Receipt Account Liability	\$ 1,734
Total	\$ 1,734

With the Public:	
Trust and Deposit Liabilities	\$ 46
Multifamily Notes Unearned Revenue	250
Premiums collected on unendorsed cases	243
Miscellaneous Liabilities	97
Total	\$ 636

Receipt Account Payable Liability

The receipt account payable liability is created from downward credit subsidy reestimates in the GI/SRI receipt account.

Trust and Deposit Liabilities

Trust and deposit liabilities include mainly escrow monies received by FHA for the borrowers of its mortgage notes and earnest money received from potential purchasers of the FHA foreclosed properties. The escrow monies are eventually disbursed to pay for maintenance expenses on behalf of the borrowers. The earnest money becomes part of the sale proceeds or is returned to any unsuccessful bidders.

Multifamily Notes Unearned Revenue

Multifamily Notes unearned revenue primarily includes the deferred interest revenue on Multifamily notes that are based on work out agreements with the owners. The workout agreements defer payments from the owners for a specified time but, the interest due on the notes is still accruing and will also be deferred until payments resume.

Premiums Collected on Unendorsed Cases

Premiums collected on unendorsed cases are mortgage insurance premium amounts collected by FHA for cases that have yet to be endorsed.

Miscellaneous Liabilities

Miscellaneous liabilities mainly include disbursements in transit (cash disbursements pending Treasury confirmation), unearned premium revenue, and any loss contingencies that are recognized by FHA for past events that warrant a probable, or likely, future outflow of measurable economic resources.

Note 11. Total Liabilities Not Requiring Budgetary Resources

	<u>2018</u>	<u>2017</u>
Total Liabilities Covered by Budgetary Resources	46,604	50,883
Total Liabilities Not Requiring Budgetary Resources	2,808	1,760
Total Liabilities	<u><u>\$ 49,412</u></u>	<u><u>\$ 52,643</u></u>

In fiscal year 2018, FHA presented Total Liabilities Not Requiring Budgetary Resources to align with OMB Circular A-136 guidance.

Total Liabilities Covered by Budgetary Resources – includes liabilities incurred that are covered by realized budgetary resources as of the Balance Sheet date.

Total Liabilities Not Requiring Budgetary Resources – includes liabilities that have not in the past required and will not in the future require the use of budgetary resources.

Note 12. Commitments and Contingencies

Litigation

FHA is party in various legal actions and claims brought by or against it. In the opinion of management and general counsel, the ultimate resolution of these legal actions will not have an effect on FHA's consolidated financial statements as of September 30, 2018. There are pending or threatened legal actions where judgment against FHA is reasonably possible with an estimated potential loss of \$10.3 million or more.

Activity with Ginnie Mae

As of September 30, 2018, the Government National Mortgage Association ("Ginnie Mae") held defaulted FHA-insured mortgage loans. These loans, acquired from defaulted mortgage-backed securities issuers, had the following balances:

	FY 2018 (in Millions)	FY 2017 (in Millions)
Mortgages Held for Investment & Foreclosed Property (Pre-claim)	3,125	3,137
Short Sale Claims Receivable	22	47

"Ginnie Mae" may submit requests for claim payments to FHA for some or all of these loans. Subject to all existing claim verification controls, FHA would pay such claims to Ginnie Mae, another component of HUD, upon conveyance of the foreclosed property to FHA. Any liability for such claims, and offsetting recoveries, has been reflected in the Liability for Loan Guarantees on the accompanying financial statements based on the default status of the insured loans.

Note 13. Gross Costs

Gross costs incurred by FHA for the period ended September 30, 2018 and 2017 are as follows:

FY 2018	Single Family Forward	HECM	Multifamily	Healthcare	Administrative Expenses	Total
Intragovernmental:						
Interest Expense	\$ 671	\$ 264	\$ 146	\$ 43	\$ -	1,124
Imputed Cost	-	-	-	-	17	17
Other Expenses	-	-	-	-	157	157
Total	\$ 671	\$ 264	\$ 146	\$ 43	\$ 174	1,298
With the Public:						
Salary and Administrative Expense	\$ -	\$ -	\$ -	\$ -	\$ 566	566
Subsidy Expense	(6,650)	(80)	(467)	(225)	-	(7,422)

Interest Expense

Intragovernmental interest expense includes interest expense on borrowings from the U.S. Treasury and the Federal Financing Bank (FFB) in the financing account.

Imputed Costs/Imputed Financing

Imputed costs represent FHA's share of the departmental imputed cost calculated and allocated to FHA by the HUD CFO office. Federal agencies are required to report imputed costs under SFFAS No. 4, *Managerial Cost Accounting Concepts and Standards*, and SFFAS No. 55, *Amending Inter-Entity Cost Provisions* to account for costs assumed by other Federal organizations on their behalf. The HUD CFO receives its imputed cost data from the Office of Personnel Management (OPM) for pension costs, federal employee health benefits (FEHB) and life insurance costs. It also receives Federal Employees' Compensation Act (FECA) costs from the Department of Labor (DOL). Subsequently, using its internally developed allocation basis, HUD CFO allocates the imputed cost data to each of its reporting offices. The imputed costs reported by FHA in its Statements of Net Cost are equal to the amounts of imputed financing in its Statements of Changes in Net Position.

Salary and Administrative Expenses

Salary and administrative expenses include FHA's reimbursement to HUD for FHA personnel costs and FHA's payments to third party contractors for administrative contract expenses. Beginning in fiscal year 2010 and going forward, FHA is only using the MMI program fund to record salaries and related expenses.

Subsidy Expense

Subsidy expense, positive and negative, consists of credit subsidy expense from new endorsements, and modifications. Credit subsidy expense is the estimated long-term cost to the U.S. Government of a direct loan or loan guarantee, calculated on a net present value basis of the estimated future cash flows associated with the direct loan or loan guarantee.

Reestimate Expense

Reestimate expense captures the cost associated with revisions to the liability for loan guarantee. A reestimate is calculated annually.

Interest Accumulation Expense

Interest accumulation expense is calculated as the difference between interest revenue and interest expense. For guaranteed loans, the liability for loan guarantees is adjusted with the offset to interest accumulation expense. In addition, for direct loans, the allowance for subsidy on credit program assets is adjusted with the offset to interest accumulation expense.

Bad Debt Expense

Bad debt expense represents the provision for loss recorded for uncollectible amounts related to FHA's pre-1992 accounts receivable and credit program assets. FHA calculates its bad debt expense based on the estimated change of these assets' historical loss experience and FHA management's judgment concerning current economic factors.

Loan Loss Reserve Expense

Loan loss reserve expense is recorded to account for the change in the balance of the loan loss reserve liabilities associated with FHA's pre-1992 loan guarantees. The loan loss reserve is provided for the estimated losses incurred by FHA to pay claims on its pre-1992 insured mortgages when defaults have taken place, but the claims have not yet been filed with FHA.

Other Expenses

Other expenses with the public include only those associated with the FHA pre-1992 loan guarantees. They consist of net losses or gains on sales of FHA credit program assets, insurance claim expenses, fee expenses, and other miscellaneous expenses incurred to carry out FHA operations. Other intragovernmental expenses include expenses from intra-agency agreements.

Several presentation updates were made this year. Refer to **Note 23. Financial Statement Presentation and Policy Disclosures** for details of changes to Note 13.

Note 14. Earned Revenue

Earned revenues generated by FHA for the period ended September 30, 2018 and 2017 are as follows:

FY 2018	Single Family		HECM		Multifamily		Healthcare		Total
	Forward								
Intragovernmental:									
Interest Revenue from Deposits at U.S. Treasury	\$	746	\$	718	\$	29	\$	10	\$ 1,503
Interest Revenue from MMI/CMHI Investments		431		6		-		-	437
Total Intragovernmental	\$	1,177	\$	724	\$	29	\$	10	\$ 1,940
With the Public:									
Insurance Premium Revenue	\$	-	\$	-	\$	1	\$	-	\$ 1
Income from Notes and Properties		5		-		90		-	95
Other Revenue		2		-		42		-	44
Total With the Public	\$	7	\$	-	\$	133	\$	-	\$ 140
Total Earned Revenue	\$	1,184	\$	724	\$	162	\$	10	\$ 2,080

FY 2017	Single Family		HECM		Multifamily		Healthcare		Total
	Forward								
Intragovernmental:									
Interest Revenue from Deposits at U.S. Treasury	\$	552	\$	804	\$	23	\$	16	1,395
Interest Revenue from MMI/CMHI Investments		253		26		-		-	279
Total Intragovernmental	\$	805	\$	830	\$	23	\$	16	1,674
With the Public:									
Insurance Premium Revenue	\$	-	\$	-	\$	1	\$	-	1
Income from Notes and Properties		9		-		43		1	53
Other Revenue		1		-		23		-	24
Total With the Public	\$	10	\$	-	\$	67	\$	1	78
Total Earned Revenue	\$	815	\$	830	\$	90	\$	17	1,752

Interest Revenue

Intragovernmental interest revenue includes interest revenue from deposits at the U.S. Treasury and investments in U.S. Treasury securities. FHA's U.S. Treasury deposits are generated from post-1991 loan guarantees and direct loans in the financing accounts. FHA's investments in U.S. Treasury securities consist of investments of surplus resources in the MMI/CMHI Capital Reserve account.

Premium Revenue

According to the FCRA accounting, FHA's premium revenue includes only premiums associated with the pre-1992 loan guarantee business. Premiums for post-1991 guarantee loans are included in the balance of the LLG. The FHA premium structure includes both up-front premiums and annual periodic premiums.

Up-front Premiums

The up-front premium rates vary according to the mortgage type and the year of origination. The FHA up-front premium rates for loans committed in fiscal year 2018 were:

Upfront Premium Rates	
10/01/2017 - 9/30/2018	
Single Family	1.75%
Multifamily	0.25%, 0.50%, 0.65%, 0.80% or 1.00%
HECM	2.00% (Based on Maximum Claim Amount)

Annual Periodic Premiums

The periodic premium rate is used to calculate monthly or annual premiums. These rates also vary by mortgage type and program. The FHA annual periodic premium rates for loans committed in fiscal year 2018 were:

Annual Periodic Premium Rates	
10/01/2017 - 9/30/2018	
Single Family - Term > 15 years	0.80%, 0.85%, 1.00% or 1.05%
Single Family - Term ≤ 15 years	0.45%, 0.70% or 0.95%
Multifamily	0.45%, 0.57%, 0.65% or 0.70%
HECM	0.50%

For Title I, the maximum insurance premium paid for guaranteed cases endorsed in years 1992 through 2001 is equal to 0.50 percent of the loan amount multiplied by the number of years of the loan term. The annual insurance premium for a Title I Property Improvement loan is 0.50 percent of the loan amount until the maximum insurance charge is paid. The annual insurance premium of a Title I Manufactured Housing loan is calculated in tiers by loan term until the maximum insurance charge is paid.

Income from Notes and Property

Income from Notes and Property includes revenue associated with FHA pre-1992 loan guarantees. This income includes revenue from Notes and Properties held and sold, and gains associated with the sale.

Other Revenue

Other revenue includes revenue associated with FHA pre-1992 loan guarantees. FHA's other revenue consists of late charges and penalty revenue, fee income, miscellaneous income generated from FHA operations, and FFB interest revenue.

Note 15. Gross Cost and Earned Revenue by Budget Functional Classification

FHA cost and earned revenue reported on the Statements of Net Cost is categorized under the budget functional classification (BFC) for Mortgage Credit (371). All FHA U.S. Treasury account symbols found under the department code “86” for Department of Housing and Urban Development appear with the Mortgage Credit BFC.

Note 16. Transfers In and Other Financing Sources

Transfers In and Other Financing Sources incurred by FHA for the period ended September 30, 2018 and 2017 are as follows:

(Dollars in millions)

FY 2018	Cumulative Results of Operations	Unexpended Appropriations	Total
Transfers In:			
HUD	\$ 611	\$ -	\$ 611
Other Financing Sources:			
Treasury	\$ (2,373)	\$ -	\$ (2,373)

FY 2017 Restated	Cumulative Results of Operations	Unexpended Appropriations	Total
Transfers In:			
HUD	\$ 600	\$ -	\$ 600
Non Exchange Revenue			
HUD	\$ 2	\$ -	\$ 2
Other Financing Sources:			
Treasury	\$ (473)	\$ -	\$ (473)

Transfers In from HUD

FHA does not receive an appropriation for salaries and expense; instead the FHA amounts are appropriated directly to HUD. To recognize these costs in FHA's Statement of Net Cost, a Transfer In from HUD is recorded based on amounts computed by HUD.

Non Exchange Revenue

Non exchange revenue consists of late fees incurred on Multi-Family and Single-Family premiums.

Other Financing Sources

Transfers out to U.S. Treasury consist of negative subsidy from new endorsements, modifications and downward credit subsidy reestimates in the GI/SRI general fund receipt account.

Note 17. Unexpended Appropriations

Unexpended appropriation balances at September 30, 2018 and 2017 are as follows:

(Dollars in millions)

FY 2018	Beginning Balance	Appropriations Received	Other Adjustments	Appropriations Used	Ending Balance
Positive Subsidy	\$ 2	\$ -	\$ -	\$ -	\$ 2
Authority for Contract Expenses	253	130	(39)	(112)	232
Reestimates	-	1,923	-	(1,923)	-
GI/SRI Liquidating	204	25	-	-	229
Total	\$ 459	\$ 2,078	\$ (39)	\$ (2,035)	\$ 463

FY 2017	Beginning Balance	Appropriations Received	Other Adjustments	Appropriations Used	Ending Balance
Positive Subsidy	\$ 2	\$ -	\$ -	\$ -	\$ 2
Authority for Contract Expenses	233	130	-	(108)	255
Reestimates	-	4,318	-	(4,318)	-
GI/SRI Liquidating	180	25	-	(3)	202
Total	\$ 415	\$ 4,473	\$ -	\$ (4,429)	\$ 459

As required under FCRA, FHA receives appropriations to cover expenses or fund shortages related to its loan guarantee and direct loan operations.

FHA receives appropriations in the MMI program account for administrative and contract expenses. The GI/SRI no-year program account also receives appropriations for positive credit subsidy and upward reestimates. Additionally, FHA obtains permanent indefinite appropriations to cover any shortfalls for its GI/SRI pre-1992 loan guarantee operations.

When appropriations are first received, they are reported as unexpended appropriations. As these appropriations are expended, appropriations used are increased and unexpended appropriations are decreased. Additionally, unexpended appropriations are decreased when: administrative expenses and working capital funds are transferred out to HUD; appropriations are rescinded; or other miscellaneous adjustments are required.

Note 18. Budgetary Resources

Obligated balances as of September 30, 2018 and 2017 are as follows:

Unpaid Obligations

(Dollars in Millions)				FY 2018	
		Federal	Non-Federal		Total
MMI/CMHI	\$	13	\$ 1,819	\$	1,832
GI/SRI		18	993		1,012
H4H		-	2		2
Undelivered Orders Subtotal	\$	31	\$ 2,814	\$	2,846

				FY 2017	
		Federal	Non-Federal		Total
MMI/CMHI	\$	17	\$ 1,877	\$	1,895
GI/SRI		-	912		912
H4H		-	1		1
Undelivered Orders Subtotal	\$	17	\$ 2,790	\$	2,808

The presentation of this note changed in FY2018 in accordance with OMB Circular A-136, Revised. Refer to **Note 23. Financial Statement Presentation and Policy Disclosures** for details of changes to Note 18.

Note 19. Budgetary Resources - Collections

The following table presents the composition of FHA's collections for the period ended September 30, 2018 and 2017:

(Dollars in Millions)

FY 2018	MMI/CMHI	GI/SRI	H4H	Total
Collections:				
Premiums	\$ 13,125	\$ 872	\$ 1	\$ 13,998
Notes	1,149	659	-	1,808
Property	2,173	142	-	2,315

Subsidy	6,732	-	-	6,732
Reestimates	13,650	1,923	-	15,573
Collections from settlements	192	-	-	192
Other	142	135	-	277
Total	\$ 38,480	\$ 4,215	\$ 2	\$ 42,697

FY 2017	MMI/CMHI	GI/SRI	H4H	Total
Collections:				
Premiums	\$ 13,431	\$ 866	\$ 1	\$ 14,298
Notes	1,269	806	-	2,075
Property	3,385	196	-	3,581
Interest Earned from U.S. Treasury	1,193	471	-	1,664
Subsidy	11,151	-	-	11,151
Reestimates	20,369	4,720	-	25,089
Collections from settlements	150	-	-	150
Other	104	(368)	-	(264)
Total	\$ 51,052	\$ 6,691	\$ 1	\$ 57,744

Note 20. Budgetary Resources – Obligations

The following table presents the composition of FHA's obligations for the period ended September 30, 2018 and 2017:

(Dollars in Millions)

September 30, 2018	MMI/CMHI	GI/SRI	H4H	Total
Obligations				
Claims	\$ 13,929	\$ 2,107	\$ 2	\$ 16,038
Property Expenses	487	103	1	591
Interest on Borrowings	841	230	-	1,071
Subsidy	6,732	702	-	7,434
Downward Reestimates	1,012	433	-	1,445
Upward Reestimates	12,638	1,923	-	14,561
Administrative Contracts	131	-	-	131
FFB Direct Loans	-	636	-	636
Other	35	168	-	203
Total	\$ 35,805	\$ 6,302	\$ 3	\$ 42,110

September 30, 2017	MMI/CMHI	GI/SRI	H4H	Total
Obligations				
Claims	\$ 15,694	\$ 2,676	\$ 1	\$ 18,371
Property Expenses	613	49	-	662
Interest on Borrowings	904	230	-	1,134
Subsidy	11,152	800	-	11,952
Downward Reestimates	1,672	402	-	2,074
Upward Reestimates	18,691	4,318	-	23,009
Admin, Contract and Working Capital	133	-	-	133
FFB Direct Loans	-	951	-	951
Other	9	(103)	-	(94)
Total	\$ 48,868	\$ 9,323	\$ 1	\$ 58,192

Note 21. Budget and Accrual Reconciliation (BAR)

Federal Housing Administration For the Period Ended September 30, 2018

	Intragovernmental	With the Public	Total
NET COST	\$ (642)	\$ (8,146)	\$ (8,788)
Components of Net Cost That Are Not Part of Net Outlays:			
Increase/(decrease) in assets:			
Accounts receivable	-	(83)	(83)
Loans receivable	-	5,543	5,543
Investments	139	(36)	103
Other assets	-	(6)	(6)
(Increase)/decrease in liabilities:			
Accounts payable	(11)	(42)	(52)
Insurance and guarantee program liabilities	-	1,509	1,509
Other liabilities (Unfunded leave, Unfunded FECA, Actuarial FECA)	(1,052)	55	(998)
Other financing sources:			
Federal employee retirement benefit costs paid by OPM and imputed of the agency	(18)	-	(18)
Transfers out (in) without reimbursement	(611)	-	(611)
Other imputed financing	-	-	-
Total Components of Net Cost That Are Not Part of Net Outlays	\$ (1,553)	\$ 6,940	\$ 5,387
Components of Net Outlays That Are Not Part of Net Cost:			
Other	2,373	-	2,373
Total Components of Net Outlays That Are Not Part of Net Cost	\$ 2,373	\$ -	\$ 2,373
Other Temporary Timing Differences	(1,321)	-	(1,321)
NET OUTLAYS	\$ (1,143)	\$ (1,206)	\$ (2,349)
Net Outlays from SBR		\$	(2,349)

The Budget and Accrual Reconciliation (BAR), requires a reconciliation of the entity's net outlays on a budgetary basis and the net cost of operations during the reporting period. The BAR replaces the current Statement of Finance (SOF) note disclosure, which reconciles the budgetary resources obligated (and some non-budgetary resources) and the net cost of operation.

Other Temporary Timing Differences

Captures the amount of FHA's General Fund Receipt Account cash transferred to Treasury at fiscal year-end.

Note 22. Restatement of FHA's Fiscal Year 2017 Financial Statements and Notes

In FY 2018, FHA corrected a material misstatement to recognize the effects of a discounting error in the HECM Return on Assets (ROA) cash flow model used to calculate the recovery rate applied to the annual financial statement reestimate. FHA discovered that it improperly discounted cash flows in the HECM ROA model back to the cohort year of endorsement, instead of discounting back to the year of forecast, September 30, 2017, which resulted in the rates for return on note assets to be lower, leading to less favorable estimates of FHA's financial performance. This correction impacted the Consolidated Balance Sheet (BS), the Statement of Net Cost (SNC) and the Statement of Changes in Net Position (SCNP) and related notes, and also resulted in a cohort in the GI fund to go from an upward reestimate to a downward reestimate, which created a payable to Treasury. On the BS, Net Loans Receivable and Related Foreclosed Property was understated by \$1,696 million and Intragovernmental Other Liabilities were understated by \$61 million. On the SNC, HECM Gross Costs with the Public were overstated by \$1,696 million. On the SCNP, Net Cost of Operations was overstated by \$1,696 million and Other Financing Sources were understated by \$61 million, for a Net Cumulative Results of Operations increase of \$1,636 million. The following FHA notes were impacted; Note 2 Non-Entity Assets, Note 7 Direct Loan and Loan Guarantees, Note 11 Other Liabilities, Note 13 Gross Costs, and Note 16 Transfers In and Other Financing Sources.

Although there was no budgetary impact as a result of the discounting error, if the allowance for subsidy calculation for the HECM program had used the correct discounting in FY2017, the liquidated upward re-estimate in FY2018 would have decreased leading to fewer obligations incurred in the Program accounts and fewer offsetting collections in the Financing accounts, by \$1,632 million. Furthermore, the Program accounts would have seen a reduction in the permanent, indefinite appropriation received by \$525 million. Alternatively, the liquidated downward re-estimate in FY2018 would have been larger, resulting in increased obligations in the Financing accounts and greater offsetting receipts/collections in the Downward Re-estimate Receipt and Capital Reserve accounts by \$64 million.

HUD also corrected a cost allocation issue that underestimated allocated costs related to salaries and administrative expenses to FHA, resulting in an understatement of \$174 million in expenses reported by FHA on the Statement of Net Costs. HUD allocated costs to the Office of Housing but did not further allocate costs directly attributed to FHA activities. As a result, the SNC's Salaries and Administrative Expenses, Intragovernmental Gross Costs, were understated by \$74 million and Salaries and Administrative Expenses, Gross Costs with the Public, were understated by \$100 million. In addition, the SCNP, Other Financing Sources (Nonexchange) Transfers In/Out Without Reimbursement were understated by \$174 million. This restatement will also impact Note 13 Gross Costs and Note 16 Transfers In and Other Financing Sources.

Additionally, FHA incorrectly reported the following items in its FY 2017 financial statements notes: 1) Note 3 Fund Balance with U.S. Treasury; \$233 million in Borrowing Authority Carried Forward, and \$1.5 million Unfilled Customer Orders Without Advances, were reported as Unavailable Resources, instead of Available Resources. 2) Note 7 Direct Loans and Loan Guarantees, Non-Federal Borrowers; \$8 million classified as LLR Technical/Default Re-estimate on the Schedule for Reconciling Loan Guarantee Liability Balances, should have been classified as LLR Adjustments Other. 3) Note 5 Investments; total Market Value of investments was overstated by \$46 million, due to the erroneous inclusion of accrued interest.

FHA has restated its FY 2017 financial statements to correct for the impact of the restatements mentioned. Due to the imminent publishing of the FY 2018 audited financial statements, the FY2017 financial statement and notes restatement will be presented comparatively.

Note 23. Financial Statement Presentation and Policy Disclosures

During FY 2018, FHA management made several changes in accounting and reporting policy, some of which resulted from updated reporting requirements published in OMB Circular A-136 *Financial Reporting Requirements, Revised*, that affected balances of several lines of the FHA FY 2017 and 2018 financial statements and notes.

The FY 2018 Revised OMB Circular A-136 included changes to the presentation of the Statement of Changes in Net Position (SCNP) and the Statement of Budgetary Resources (SBR). The presentation of the SCNP was reformatted to show Unexpended Appropriations before Cumulative Results of Operations and the SBR presentation was changed to streamline requirements of the Federal Accounting Standards Board. In addition, the presentation of FHA Note 18, Budgetary Resources, was updated to disclose Federal and Non-Federal undelivered orders.

In prior years, FHA presented its technical reestimate subsidy reestimate expense and interest expense on the subsidy reestimate expense, as two separate components. In FY 2018, for consistency with OMB A-136 illustrative guidance, the subsidy reestimate expense and interest expense on the subsidy reestimate expense, were combined and reported as a single amount. This impacted Note 7 Direct Loan and Loan Guarantees and Note 13 Gross Costs. Because the interest expense on the subsidy reestimate expense component of the technical reestimate, was not previously reported as part of the Subsidy Expense in Note 7, Subsidy Expense for both Direct Loans and Loan Guarantees increased as follows: FHA's FY 2017 MMI/CMHI and GI/SRI Subsidy Expense for Modification and Reestimates increased by \$3.2 and \$2.8 billion, respectively, for a total increase of \$6 billion. The Direct Loan GI/SRI Subsidy Expense for Reestimates increased by \$2.6 million.

Since FHA's financial statements are audited and published comparatively, the presentation changes impacting FY 2017 were updated for comparative reporting.

Required Supplementary Information

Schedule A: Intragovernmental Assets

FHA's Intra-governmental assets, by Federal entity, are as follows on September 30, 2018 and 2017:

(Dollars in Millions)

FY 2018	Fund Balance with U.S. Treasury	Investments in U.S. Treasury Securities	Total
U.S. Treasury	\$ 33,690	\$ 26,697	\$ 60,387
Total	\$ 33,690	\$ 26,697	\$ 60,387

FY 2017	Fund Balance with U.S. Treasury	Investments in U.S. Treasury Securities	Total
U.S. Treasury	\$ 29,112	\$ 30,841	\$ 59,953
Total	\$ 29,112	\$ 30,841	\$ 59,953

Schedule B: Intragovernmental Liabilities

FHA's Intra-governmental liabilities, by Federal entity, are as follows on September 30, 2018 and 2017:

(Dollars in Millions)

FY 2018	Accounts Payable	Borrowings	Other Liabilities	Total
Federal Financing Bank	\$ -	\$ 1,671	\$ -	\$ 1,671

AUDITOR'S REPORT

This report was issued separately on November 14, 2018 by the HUD Office of Inspector General entitled, "Federal Housing Administration, Washington, DC, Fiscal Years 2018 and 2017 (Restated) Financial Statements Audit" (2019-FO-0002). The report is available at HUD, OIG's internet site at: <http://www.hudoig.gov>

To: Brian Montgomery, Assistant Secretary for Housing, H

From: Thomas R. McEnanly, Director, Financial Audits Division, GAF

Subject: Audit of the Federal Housing Administration's Financial Statements for Fiscal Years 2018 and 2017 (Restated)

Attached is the U.S. Department of Housing and Urban Development (HUD), Office of Inspector General's (OIG) final results of our audit of the Federal Housing Administration's fiscal years 2018 and 2017 (restated) financial statements.

HUD Handbook 2000.06, REV-4, sets specific timeframes for management decisions on recommended corrective actions. For each recommendation without a management decision, please respond and provide status reports in accordance with the HUD Handbook. Please furnish us copies of any correspondence or directives issued because of the audit.

The Inspector General Act, Title 5 United States Code, section 8M, requires that OIG post its publicly available reports on the OIG website. Accordingly, this report will be posted at <http://www.hudoig.gov>.

If you have any questions or comments about this report, please do not hesitate to call me at 202-402-8216.

Audit Report Number: 2019-FO-0002

Date: November 14, 2018

**Audit of the Federal Housing Administration's Financial Statements for
Fiscal Years 2018 and 2017 (Restated)**

Highlights

What We Audited and Why

The Chief Financial Officers Act of 1990 (Public Law 101-576), as amended, requires the Office of Inspector General to audit the financial statements of the Federal Housing Administration (FHA) annually. We audited the accompanying financial statements and notes of FHA as of and for the fiscal years ending September 30, 2018 and 2017 (restated), which are comprised of the balance sheets, related statements of net cost and changes in net position, and combined statements of budgetary resources for the years then ended. Additionally, we audited the restatement adjustments made by FHA in fiscal year 2018 to restate its fiscal year 2017 financial statements and notes. We conducted these audits in accordance with U.S. generally accepted government auditing standards.

What We Found

In our opinion, FHA's fiscal years 2018 and 2017 financial statements were presented fairly, in all material respects, in accordance with the U.S. generally accepted accounting principles for the Federal Government. Our opinion is reported in FHA's Fiscal Year 2018 Annual Management Report. The results of our audit of FHA's principal financial statements and notes for the fiscal years ending September 30, 2018 and 2017, including our report on FHA's internal control and test of compliance with selected provisions of laws and regulations applicable to FHA, are presented in this report. Our audit disclosed one material weaknesses, three significant deficiencies in internal controls, and no instances of noncompliance with applicable laws and regulations, which are discussed further in the body of this report.

What We Recommend

To support reliable financial reporting, we recommend that FHA strengthen its existing system of internal control processes, policies, procedures, and information systems to (1) ensure effective model governance implementation and (2) prevent material misstatements from occurring in the financial statements and notes or detect such mistakes in a timely manner. Additionally, we recommend that FHA deobligate \$399 million to recapture funds with invalid obligations.

U.S. DEPARTMENT OF
HOUSING AND URBAN DEVELOPMENT
OFFICE OF INSPECTOR GENERAL

Independent Auditor's Report

General Deputy Assistant Secretary
Federal Housing Administration

In our audits of the fiscal years 2018 and 2017 (restated) financial statements of the Federal Housing Administration (FHA), a component of the U.S. Department of Housing and Urban Development (HUD), we found

- That FHA's financial statements as of and for the fiscal years ending September 30, 2018 and 2017, were presented fairly, in all material respects, in accordance with U.S. generally accepted accounting principles.
- One material weaknesses in internal control over financial reporting.
- Three significant deficiencies in internal control over financial reporting.
- No instances of reportable noncompliance for fiscal year 2018 with certain provisions of applicable laws and regulations we tested.

The following sections and appendixes discuss in more detail (1) our report on the financial statements, which includes emphasis-of-matter paragraphs related to the loan guarantee liability (LGL) and restatement of the fiscal year 2017 financial statements and notes, required supplementary information (RSI), and other information included with the financial statements; (2) our report on internal control over financial reporting; (3) our report on compliance with laws and regulations; (4) agency comments and Office of Inspector General (OIG) evaluation; (5) the current status of prior-year findings; and (6) a schedule of funds to be put to better use.

Report on the Financial Statements

In accordance with U.S. generally accepted auditing standards, we audited FHA's financial statements. FHA's financial statements comprise the balance sheets as of September 30, 2018 and 2017 (restated), the related statements of net cost, changes in net position, the combined statements of budgetary resources for the fiscal years then ended, and the related notes to the financial statements. We conducted our audits in accordance with U.S. generally accepted auditing standards. We believe that the audit evidence we have obtained was sufficient and appropriate to provide a basis for our audit opinion.

Management's Responsibility

FHA's management is responsible for (1) the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; (2) preparing, measuring, and presenting the RSI in accordance with U.S. generally accepted accounting principles; (3) preparing and presenting other information included in documents containing the audited financial statements and auditor's report and ensuring the consistency of that information with the audited financial statements and the RSI; and (4) maintaining effective internal control over financial

reporting, including the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. U.S. generally accepted government auditing standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement. We also conducted our audits in accordance with Office of Management and Budget (OMB) Bulletin 19-01, Audit Requirements for Federal Financial Statements. We are further responsible for applying certain limited procedures to the RSI and other information included with the financial statements.

An audit of financial statements involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the auditor's assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to FHA's preparation and fair presentation of the financial statements to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit of financial statements also involves evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audits also included performing such other procedures we considered necessary in the circumstances.

Opinion on Financial Statements

In our opinion, FHA's financial statements referred to above presented fairly, in all material respects, the financial position of FHA as of September 30, 2018 and 2017 (restated), and its net costs, changes in net position, and budgetary resources for the years then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As discussed in notes 1 and 7 to the financial statements, the LGL is an estimate of the net present value of future claims, net of future premiums, and future recoveries from loans insured as of the end of the fiscal year. This estimate is developed using econometric models that integrate historical loan-level program and economic data with regional house price appreciation forecasts to develop assumptions about future portfolio performance. In fiscal year 2018, FHA changed its discounting period to allocate the reestimate expense from the middle-of-year discount period assumption to the beginning-of-year discount period assumption. The LGL is discussed further in note 7 to the financial statements. Our opinion was not modified with respect to this matter.

Other Matters

Fiscal Year 2017 Financial Statements and Notes

In our report, dated November 15, 2017, we expressed an opinion that FHA's financial statements for fiscal year 2017 fairly presented the financial position of FHA's financial statements as of September 30, 2017, and its net costs, changes in net position, and budgetary resources for the years then ended in accordance with generally accepted accounting principles. However, in fiscal year 2018, as discussed in note 22 to the financial statements, errors were identified in the 2017 financial statements and notes, which required correction of the balances in fiscal year 2018. FHA made restatements to (1) the balance sheet, statement of net cost, and statement of changes in net position, as well as Note 2 – Non-Entity Assets, Note 7 – Direct Loan and Loan Guarantees, Note 11 – Other Liabilities, Note 13 – Gross Costs, and Note 16 – Transfers In and Other Financing Sources, due to a material discounting error in the home equity conversion mortgage (HECM) return on assets (ROA) cash flow model; (2) Note 3 – Fund Balance with U.S. Treasury to correct the classification of the status of fund balance with the U.S. Department of the Treasury; (3) the statement of net cost, the statement of changes in net position, Note 13 – Gross Costs, and Note 16 – Transfers in and Other Financing Sources to correct an error in the cost allocation related to salaries and administrative expenses; (4) Note 7 – Direct Loans and Loan Guarantees to correct reporting the loan loss reserve (LLR) as an LLR technical-default reestimate instead of an LLR adjustment; and (5) Note 5 – Investments to remove the inclusion of accrued interest from the market value of investments. For these reasons, the opinion expressed in the 2017 audited financial statements was no longer appropriate because the financial statements and accompanying notes, as published at that time, contained material misstatements. Accordingly, our opinion on the audited financial statements for 2017 is withdrawn because it can no longer be relied upon and is replaced by the auditor's report on the restated financial statements. Additional details regarding the material weakness related to the discounting error in the HECM ROA cash flow model can be found in finding 1. Additional details regarding the significant deficiency in financial reporting internal controls for the other errors reported can be found in finding 2.

Required Supplementary Information

U.S. generally accepted accounting principles issued by the Federal Accounting Standards Advisory Board (FASAB) require that the RSI be presented to supplement the financial statements. The RSI consists of "Management's Discussion and Analysis" and the "Combining Statement of Budgetary Resources," which are included with the financial statements. Although the RSI is not a part of the financial statements, FASAB considers this information to be an essential part of financial reporting for placing the financial statements in appropriate operational, economic, or historical context. We applied certain limited procedures to the RSI in accordance with U.S. generally accepted government auditing standards, which consisted of inquiries of management about the methods of preparing the RSI and comparing the information for consistency with management's responses to the auditor's inquiries, the financial statements, and other knowledge we obtained during the audit of the financial statements, in order to report omissions or material departures from FASAB guidelines, if any, identified by these limited procedures. We did not audit and we do not express an opinion or provide any assurance on the RSI because the limited procedures we applied do not provide sufficient evidence to express an opinion or provide any assurance.

Other Information

FHA's other information contains a wide range of information, some of which is not directly related to the financial statements and consists of information included with the financial statements, other than the RSI and the auditor's report. This information, including the message from the FHA Commissioner, is presented for purposes of additional analysis and is not a required part of the financial statements or the RSI. We read the other information included with the financial statements to identify material inconsistencies, if any, with the audited financial statements. Our audit was conducted for the purpose of forming an opinion on FHA's financial statements. We did not audit and do not express an opinion or provide any assurance on the other information.

Report on Internal Control Over Financial Reporting

In connection with our audits of FHA's financial statements, we considered FHA's internal control over financial reporting, consistent with our auditor's responsibility discussed below. We performed our procedures related to FHA's internal control over financial reporting in accordance with U.S. generally accepted government auditing standards.

Management's Responsibility

FHA management is responsible for maintaining effective internal control over financial reporting, including the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

In planning and performing our audit of FHA's financial statements as of and for the year ending September 30, 2018, in accordance with U.S. generally accepted government auditing standards, we considered FHA's internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements but not for the purpose of expressing an opinion on the effectiveness of FHA's internal control over financial reporting. Accordingly, we do not express an opinion on FHA's internal control over financial reporting. We are required to report all deficiencies that are considered to be significant deficiencies or material weaknesses. We did not consider all internal controls relevant to operating objectives, such as those controls relevant to preparing performance information and ensuring efficient operations.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of FHA's financial statements will not be prevented or detected and corrected on a timely basis. A significant deficiency is a deficiency or combination of deficiencies in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

Definition and Inherent Limitations of Internal Control Over Financial Reporting

An entity's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, the objectives of which are to provide reasonable assurance that (1) transactions are properly recorded, processed, and summarized to permit the preparation of financial statements in accordance with U.S. generally accepted accounting principles and assets are safeguarded against loss from unauthorized acquisition, use, or disposition and (2) transactions are executed in accordance with provisions of applicable laws, including those governing the use of budget authority, regulations, contracts, and grant agreements, noncompliance with which could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect and correct misstatements due to fraud or error.

Results of Our Consideration of Internal Control Over Financial Reporting

Our consideration of internal control was for the limited purpose described above and was not designed to identify all deficiencies in internal control that might be material weaknesses and significant deficiencies or to express an opinion on the effectiveness of FHA's internal control over financial reporting. Therefore, other deficiencies in internal control that might be material weaknesses or significant deficiencies may exist that were not identified.

During our 2018 audit, we identified four deficiencies in FHA's internal control over financial reporting described below. We consider one to be a material weakness and three to be significant deficiencies. We have communicated these matters to FHA management.

Weaknesses Continued in FHA's Modeling Processes

FHA had addressed some previous-year modeling weaknesses, but improvements are still needed. While FHA had corrected the specific modeling errors cited in our fiscal year 2017 audit report, new modeling errors were identified during our fiscal year 2018 audit. For example, in fiscal year 2018, FHA discovered that cash flows were improperly discounted in the fiscal year 2017 HECM ROA model. Errors were also identified in the HECM and multifamily liabilities for loan guarantees (LLG) cash flow models. In addition, FHA continued to face challenges with its model governance and model practices and failed to test or consider the impact of assumptions used in its HECM models. These conditions were due to ineffective oversight and FHA's failure to follow its established guidelines. As a result of improperly discounting cash flows in the HECM ROA model, the loans receivable and related foreclosed-on property line item was understated by \$1.7 billion on the fiscal year 2017 financial statements. Further, there were additional errors totaling \$19.1 million in the fiscal year 2018 models, and FHA remained susceptible to modeling errors due to its model governance and practices and its failure to test or consider the impact of assumptions.

FHA's Controls Over Financial Reporting Had Weaknesses

In fiscal year 2018, some of the control deficiencies in financial reporting identified in 2017 continued, and new control deficiencies were identified. Specifically, these new control deficiencies included issues related to the lack of subsidiary ledger systems or inadequate designs within subsidiary ledger systems and incorrect assumptions and inadequate controls used for financial statement reporting. These conditions occurred because FHA did not have effective monitoring and processes in place to ensure (1) that subsidiary ledger systems were

implemented and accurately designed to record accounting events and (2) the accuracy of data reported in the financial statements. As a result, \$588 million in expenses was incorrectly reported in the financial statement note disclosures, and \$461.5 million was restated in fiscal year 2017 financial statement notes. Additionally, FHA may have missed an opportunity to put \$399 million of its unobligated funds to better use because invalid obligations were not always deobligated on time.

FHA's Controls Related to Partial Claims Had Improved, but Weaknesses Remained

While FHA made progress on resolving unsupported partial claims in fiscal year 2018, it did not follow up with the Office of Program Enforcement (OPE) to determine whether it should refer seriously noncompliant lenders to the Mortgagee Review Board (MRB) for temporary suspension or termination. These lenders did not provide required supporting documentation, did not reimburse FHA for the partial claim plus incentive fee, or did not reach a settlement in a timely manner. The cases remained unresolved an average of 591 days after the execution of the partial claim. FHA is no longer waiting until 6 months after execution of partial claims to begin requesting payment from lenders that do not provide the supporting promissory note, and it is sending requests for payments more frequently and on average, in a timely manner and in accordance with its newly implemented process. However, for lenders that have not sent the recorded mortgage within 6 months, letters requesting reimbursement in the amount of the partial claim plus the incentive fee were sent between 33 and 62 days after the expiration of the 6-month period and on average, 48 days after the expiration of the 6-month period. Failure to collect from noncompliant lenders with unsupported partial claims is a deficient cash management practice and does not help improve the health of the Mutual Mortgage Insurance fund.

Weaknesses Were Identified in Select FHA Information Technology Systems

FHA had security vulnerabilities within the management of the Computerized Homes Underwriting Management System (CHUMS) application. These conditions occurred because of a lack of oversight. As a result, the confidentiality, integrity, and availability of critical information may have been negatively impacted. We also determined that weaknesses previously reported with selected FHA information systems and the credit reform estimation and reestimation process had not been fully remediated.

Intended Purpose of Report on Internal Control Over Financial Reporting

The purpose of this report is solely to describe the scope of our consideration of FHA's internal control over financial reporting and the results of our procedures and not to provide an opinion on the effectiveness of FHA's internal control over financial reporting. This report is an integral part of an audit performed in accordance with U.S. generally accepted government auditing standards in considering internal control over financial reporting. Accordingly, this report on internal control over financial reporting is not suitable for any other purpose. In addition to this report and providing specific recommendations to FHA management, we noted other matters involving internal control over financial reporting and FHA's operation that we are reporting to FHA management in a separate management letter.

Report on Compliance With Laws and Regulations

In connection with our audits of FHA's financial statements, we tested compliance with selected provisions of applicable laws and regulations consistent with our auditor's responsibility discussed below. We caution that noncompliance may occur and not be detected by these tests. We performed our tests of compliance in accordance with U.S. generally accepted government auditing standards.

Management's Responsibility

FHA management is responsible for complying with laws and regulations applicable to FHA.

Auditor's Responsibility

Our responsibility is to test compliance with selected provisions of applicable laws and regulations applicable to FHA that have a direct effect on the determination of material amounts and disclosures in FHA's financial statements and perform certain other limited procedures. Accordingly, we did not test compliance with all laws and regulations applicable to FHA.

Results of Our Tests for Compliance With Laws and Regulations

Our tests for compliance with selected provisions of applicable laws and regulations disclosed no instances of noncompliance for fiscal year 2018 that would be reportable under U.S. generally accepted government auditing standards. However, the objective of our tests was not to provide an opinion on compliance with laws and regulations applicable to FHA. Accordingly, we do not express such an opinion.

Intended Purpose of Report on Compliance With Laws and Regulations

The purpose of this report is solely to describe the scope of our testing of compliance with selected provisions of applicable laws and regulations and the results of that testing and not to provide an opinion on compliance. This report is an integral part of an audit performed in accordance with U.S. generally accepted government auditing standards in considering compliance. Accordingly, this report on compliance with laws and regulations is not suitable for any other purpose. In addition to this report and providing specific recommendations to FHA management, we noted other compliance issues and issues with FHA's operation that we are reporting to FHA management in a separate management letter.

Agency Comments and Our Evaluation

In commenting on a draft of this report, FHA generally concurred with the findings and recommendations. Efforts have been made to address recommendations from prior years and FHA has already implemented recommendations based upon the current year audit. FHA's continued efforts in improving and strengthening its controls over the modeling process, financial reporting, partial claims and information systems will improve the reliability of the financial statements. OIG looks forward to working with FHA to reach a mutually acceptable management decision to close out the recommendations during the audit resolution process. The complete text of FHA's response is reprinted in appendix B.

Acting Assistant Inspector General for Audit
Washington, DC

November 14, 2018

Material Weaknesses

Finding 1: Weaknesses Continued in FHA's Modeling Processes

FHA had addressed some previous-year modeling weaknesses, but improvements are still needed. While FHA had corrected the specific modeling errors cited in our fiscal year 2017 audit report, new modeling errors were identified during our fiscal year 2018 audit. For example, in fiscal year 2018, FHA discovered that cash flows were improperly discounted in the fiscal year 2017 HECM ROA model. Errors were also identified in the HECM and multifamily liabilities for LLG cash flow models. In addition, FHA continued to face challenges with its model governance and model practices and failed to test or consider the impact of assumptions used in its HECM models. These conditions were due to ineffective oversight and FHA's failure to follow its established guidelines. As a result of improperly discounting cash flows in the HECM ROA model, the loans receivable and related foreclosed-on property line item was understated by \$1.7 billion on the fiscal year 2017 financial statements. Further, there were additional errors totaling \$19.1 million in the fiscal year 2018 models, and FHA remained susceptible to modeling errors due to its model governance and practices and its failure to test or consider the impact of assumptions.

Modeling Errors Not Prevented or Detected in a Timely Manner

In our fiscal year 2017 audit report, we identified a number of modeling errors for the single-family, HECM, and multifamily programs. Although FHA corrected the specific errors identified in the fiscal year 2017 audit report, additional errors were identified during our fiscal year 2018 audit. Errors were identified in the HECM ROA model and the HECM and multifamily LLG cash flow models. OMB Circular A-123, Management's Responsibility for Enterprise Risk Management and Internal Control, requires agencies to establish and maintain internal control to ensure the reliability of financial reporting. The errors in the fiscal year 2018 models illustrate the need for FHA to strengthen its controls over modeling processes.

Improper discounting of cash flows in the HECM ROA model. In September 2018, FHA notified us that it improperly discounted cash flows in the HECM ROA model in fiscal year 2017. Cash flows were improperly discounted back to the cohort date¹ instead of being discounted to fiscal year 2017. Discounting back to the cohort date rather than to the year of forecast caused the rates for the return on notes and ROA to be lower than they should have been.

FHA stated that it discovered the error in August 2018 through its internal review process. During its review of the HECM ROA model results, FHA analyzed the nominal and discounted recoveries on a cohort-level basis and noted a linear trend between the recovery rate and the age of the cohort in the return on notes component of the ROA model. This trend suggested the use of the incorrect discount dates. FHA attributed the error to an oversight and credited its internal controls with detecting the error. Although FHA credits its internal controls with detecting the error, FHA's controls were not effective enough to detect the error before the preparation of the fiscal year 2017 financial statements. This error resulted in a \$1.7 billion understatement of the loans receivable and related foreclosed-on property line item on the fiscal year 2017 financial statements. In addition, the receipt account liability was understated by \$61 million, and the reestimate was overstated by \$1.7 billion. FHA properly discounted the cash flows in the HECM ROA model in fiscal year 2018.

¹ The cohort date refers to the year when FHA endorsed the mortgages.

Cash flows were excluded from some HECM cohorts. FHA excluded cash flows from some HECM cohorts in its interim LLG cash flow model for fiscal year 2018. FHA forecasted 35 years of cash flows for cohorts before 2015, while it forecasted 70 years of cash flows for cohorts 2015 and later. FHA changed the forecasting methodology for cohorts before 2015 to 50 years to avoid excluding cash flows for any cohort in the final LLG cash flow model. If FHA had excluded the cash flows in the final LLG cash flow model, the LLG would have been overstated by \$17.8 million in fiscal year 2018. FHA declined to test the impact of this error on the LLG for fiscal year 2017.

Coding error in the multifamily models impacted the cash flow projections. A statistical analysis system software coding error in the multifamily LLG cash flow and ROA models for fiscal years 2017 and 2018 resulted in some expenses and payables not being included in the cash flow projections. After we brought this error to FHA's attention, FHA corrected the error in the fiscal year 2018 cash flow model. If FHA had not made this correction, the multifamily LLG would have been overstated by \$1.3 million in fiscal year 2018. The impact of this error on the fiscal year 2017 LLG was \$0.88 million.

Weaknesses in Controls Over Model Governance

We first reported on model governance in fiscal year 2016, and since that time, FHA has addressed some of the weaknesses in its model governance. For example, FHA finalized its Credit Reform Board charter and Model Risk Management Guidelines in fiscal year 2017 and established a policy for its model risk rating and policies and procedures for data management and validation. Although FHA had improved its model governance, it did not always follow its established guidance in fiscal year 2018. Specifically, FHA did not (1) perform important data validation steps, (2) use the loan limits established by policy when modeling the HECM program, and (3) update the final single-family and HECM ROA models with the most recently available data.

Policies and procedures for data validation were not fully implemented. FHA established a policy for its model risk rating and policies and procedures for data management and validation in fiscal year 2017, but it did not fully implement these policies and procedures. In fiscal year 2018, we were unable to determine whether FHA's data validation steps included a quantitative process to validate row counts and discard outliers during the model execution phase. In addition, FHA did not validate the interim HECM model output. If FHA had validated the interim HECM model output, it would have detected that some HECM cash flows were excluded.² Further, FHA did not perform necessary steps to improve its predictions over time by comparing predicted versus actual results for the HECM program, and it did not provide evidence of a model inventory system for the single-family and HECM programs.

Established loan limits were not used in the HECM LLG cash flow model. FHA did not consider the loan limits established by mortgagee letters during its modeling for the HECM program. Each year, FHA issues a mortgagee letter that specifies the loan limit for reverse mortgages, based on geographic location. Instead of using the established loan limits, FHA (1) developed a formula to determine the loan limit to use in the LLG cash flow model for cohorts before 2009 and (2) set the loan limit at \$625,500 for cohorts 2009 and later, although this was not the loan limit for each of those years. We estimated that the LLG for fiscal year 2018 could be understated by \$38.5 million

² See "Cash flows were excluded from some HECM cohorts" under the section, Modeling Errors Not Prevented or Detected in a Timely Manner.

because FHA did not use the loan limits established by the mortgagee letters.³ In its final fiscal year 2018 model, FHA corrected the loan limit for the 2017 cohort but did not correct the limits for the other years. According to the FHA modeling team, it did not have the data to correct the limits for these years. However, we were able to obtain the correct loan limits from the Office of Single Family Program Development.

Final ROA models were not updated with the final LLG and return on notes cash flow results. When FHA determined the cash flow forecast from the final LLG and return on notes cash flow models for the single-family and HECM programs, it did not update the final ROA models. The cash flow forecast produced by the single-family LLG cash flow model and HECM return on notes cash flow model are an input to the ROA models. Updating the ROA model results with the final LLG cash flow and HECM return on notes cash flow results will ensure that consistent cash flows are used for the LLG and ROA estimates.⁴ Table 1 shows the impact of not using the final LLG and return on notes cash flow model results in the final ROA model.

Table 1: Impact of not updating the final ROA models

Program and fund	ROA percentage using interim LLG and return on notes cash flow results	ROA percentage using final LLG and return on notes cash flow results	Increase (decrease)	Impact on allowance amount if the final LLG and return on notes cash flow results were used
Single-family Mutual Mortgage Insurance fund	55.61	56.60	.99	Increase of \$127 million
HECM General Insurance-Special Risk Insurance fund	55.98	54.76	(1.22)	Decrease of \$78 million
HECM Mutual Mortgage Insurance fund	69.16	67.97	(1.19)	Decrease of \$201 million

FHA stated that it could not update the final ROA models because the Credit Reform Board had not granted approval.⁵ According to FHA, the Credit Reform Board has to approve all assumptions in the models, and the Board approved the use of the assumptions (which were based on March 2018 data) in the interim ROA models at its August 2018 meeting. Because the board did not meet again after the August 2018 meeting, the final ROA models could not be updated with the cash

³ Our estimate is based on using the less granular historical national loan limits, which is a conservative measure of the understatement.

⁴ The final ROA model uses March 2018 data, while the final LLG cash flow and HECM return on notes models use June 2018 data.

⁵ The Credit Reform Board consists of HUD management and includes the (1) General Deputy Assistant Secretary for Housing (2) Deputy Assistant Secretary for Finance and Budget, (3) Deputy Assistant Secretary for Single Family Housing, (4) Deputy Assistant Secretary for Multifamily Housing, (5) Deputy Assistant Secretary for Healthcare Programs, (6) Deputy Assistant Secretary for Risk Management and Regulatory Affairs, and (7) Assistant Secretary for Policy Development and Research.

flow results from the final LLG and return on notes cash flow models (which were based on June 2018 data). It is unclear why data for June 2018 could not have been used for the August 2018 meeting or why the Board could not have been notified when the June data were available.

Susceptibility to Modeling Errors Due to Ineffective Modeling Practices

We identified ineffective modeling practices during our fiscal year 2016 and 2017 audits. These ineffective practices were related to FHA's model documentation and coding. Specifically, model documentation contained errors and inconsistent information and did not include necessary information. In addition, FHA had not adopted some industry best model coding practices. In fiscal year 2018, FHA took steps to improve its documentation and adopt best practices. However, its model documentation remained deficient, and some coding practices were still contrary to industry best practices. As in fiscal year 2017, we had difficulties initially replicating the single-family model results. Improving its model documentation and adopting additional industry best coding practices can further reduce the risk of errors and reduce FHA's maintenance of its programming code.

Weaknesses in model documentation remained. In our fiscal years 2016 and 2017 audit reports, we reported on the weaknesses in FHA's model documentation for the single-family and HECM program. Model documentation remained a concern for both of these programs in fiscal year 2018. FASAB Technical Release 6 requires model documentation to be complete and stand on its own so that an independent person could perform the same steps and replicate the results with little or no outside explanation or assistance. While we were able to replicate the model results in fiscal year 2018 with fewer problems than in the previous 2 fiscal years, FHA model documentation needs improvement. HECM program documentation weaknesses included (1) assumptions that were not adequately addressed in the documentation, (2) formulas that were not consistent with the formulas in the model, and (3) outdated codes in the documentation. For the single-family program, we noted that FHA did not include in its model documentation (1) a justification for incorporating an override factor for prepayment rates into the model, (2) its analysis on how it accounted for a significant policy change, and (3) which operating system needed to be used to replicate the model results. After we brought the documentation weaknesses to FHA's attention, FHA revised its documentation to address some of the weaknesses.

Additional industry best model coding practices need to be adopted. During our fiscal year 2017 audit, we identified a number of modeling code practices and techniques, which significantly increased FHA's risk of modeling errors for the single-family and HECM programs. For example, there were large sections of duplicated code in the single-family and HECM programs, and FHA did not assign "global"⁶ values and references in the single-family and HECM programs. FHA made improvements in its coding practices in fiscal year 2018 and addressed many of the high-risk practices identified during our fiscal year 2017 audit. However, additional steps need to be taken to further reduce the risk of modeling errors. During our review of the 2018 single-family and HECM models, we again found duplicated sections of codes in the HECM program and hard-coded variables in the single-family and HECM models. These coding practices increased the risk of susceptibility of the code to error.

⁶ A global variable can be used across software code.

Assumptions or Impact of Assumptions Not Tested

In fiscal years 2016 and 2017, we reported that FHA did not perform a sensitivity analysis on some assumptions in the LLG cash flow models and on the assumptions in the ROA models. In fiscal year 2018, FHA performed a sensitivity analysis on assumptions used in the fiscal year 2018 LLG and ROA models for the single-family, HECM, and multifamily programs. FASAB Technical Release 6 states that agencies should test assumptions to identify which assumptions have the greatest impact on LLG estimates and have a rationale for selecting specific methodologies. Although FHA performed a sensitivity analysis for assumptions in the fiscal year 2018 models, it did not perform a sensitivity analysis on the assumptions in the fiscal year 2017 multifamily ROA model until October 2018. In addition, FHA had not tested the impact of assumptions used in the HECM LLG cash flow and ROA models. These assumptions were related to FHA's prediction on the number of HECM mortgages that would be assigned to HUD and the maintenance risk discount rate.

A sensitivity analysis on assumptions in the fiscal year 2017 multifamily ROA model was not performed until October 2018. Although FHA performed a sensitivity analysis for assumptions used in the fiscal year 2018 multifamily ROA model, it did not perform a sensitivity analysis on the fiscal year 2017 assumptions in the model until after we suggested it. Performing sensitivity analyses annually guides the inherent risk assessment of the underlying assumptions. FHA should analyze the individual assumptions to determine the marginal impact of changes to each assumption. The ability to change the sensitivity for critical assumptions each year allows the reviewer to determine bias in the model.

Impact of assumptions related to HECM assignments was not tested or considered. When performing its modeling, FHA relies on actual data for a portion of the year and projects data for the remainder of the forecast. One of the things that FHA must project for the HECM program is the number of the mortgages that will be eligible to be assigned to HUD during the remainder of the year and the number of mortgages that will not be eligible. The cash flows related to assignments are significant in the HECM models. When a mortgage is assigned to HUD by the end of the fiscal year, the cash flows for the assigned mortgage are captured in the ROA model. The cash flows for mortgages not assigned to HUD are captured in the LLG. When a mortgage is projected to be eligible to be assigned by the end of the fiscal year but is not assigned, the recovery stage cash flows are excluded from the LLG estimate. According to FHA, this was a model design choice implemented to avoid double counting the same mortgage in both models. During our review, we determined that FHA did not fully evaluate the risks associated with assignment assumptions or consider alternatives to avoid double counting.

- An assignment-eligible status was not projected for mortgages with an unpaid principal balance greater than the maximum claim amount. This no assignment status remains in effect for all projected future cash flows. FHA did not provide analysis or documentation to support its rationale for not projecting an assignment status for any portion of mortgages with an unpaid principal balance greater than the maximum claim amount or assess the impact of not projecting an assignment-eligible status for these mortgages. According to FHA, there are several reasons why mortgages may not be eligible to be assigned to HUD, and it did not project an eligible assignment status for these mortgages based on the principle of conservatism since assignments reduce the LLG. The LLG cash flow model uses only a subset of several reasons that FHA provides for a mortgage to be eligible to be assigned.

For fiscal year 2018, there were 27,829 mortgages with an unpaid principal balance greater than the maximum claim amount that were deemed ineligible to be assigned by FHA's model. To quantify the possible impact of FHA's assumption, we assumed that all of these mortgages were assigned to HUD in fiscal year 2019. Based on our assumption, the LLG balance for fiscal year 2018 would be overstated as much as \$300.8 million. We acknowledge that all of these mortgages may not be eligible or likely to be assigned. However, because FHA did not provide us with the historical assignment data for mortgages with an unpaid principal balance greater than the maximum claim amount, we were unable to evaluate the reasonableness of FHA's assignment assumption.

- Cash flows were mistakenly excluded from the LLG cash flow and the ROA models because FHA adjusts the ROA model using the unpaid principal balance of the actual assigned HECM portfolio at yearend. Specifically, if a mortgage is predicted to be eligible to be assigned during the remainder of the year but is not assigned, the LLG balance increases since the cash flows for these mortgages were excluded from both the LLG cash flow and the ROA models.

After we identified this issue, FHA acknowledged that cash flows were excluded. FHA maintains that there are instances in which an eligible assignment status was not predicted to occur but an assignment occurred, thereby reducing the LLG balance. In these instances, the cash flows are double counted when they are predicted to be assigned later in the projections. This is the double counting situation that FHA had intended to avoid with its model design. FHA asserted that the incorrectly excluded and incorrectly included cash flows basically offset each other over the long term. FHA acknowledged that in any given quarter, one could demonstrate instances in which exclusions outnumbered inclusions but argued that there were other quarters in which inclusions outnumbered exclusions. However, FHA did not provide an analysis to support its assertion until prompted. In addition, FHA did not provide an analysis to support why this assumption was adopted as opposed to alternative methods that may satisfy FHA's double counting concerns without introducing these increased model risks. FHA maintained its view that its analysis for the model, as a whole, demonstrates that there is no bias over the long term.

We requested that FHA's modeling team provide the necessary data for us to independently perform a back-testing analysis of FHA's assignment projection, but FHA did not provide the data. Therefore, as an alternative, we used the HECM Exposure Report⁷ to conduct our analysis of FHA's assumption. We identified 23,586⁸ instances in which FHA incorrectly excluded cash flows and one instance in which FHA incorrectly included cash flows. While we acknowledge that our limited testing is relevant only to the current period, this asymmetric impact increases our concerns regarding the unknown risk that FHA introduced with this model assumption. Based on our analysis, the LLG could be potentially understated as much as \$1.1 billion in fiscal year 2018. We also noted that there was an \$847.2 million variance between the HECM LLG for the Mutual Mortgage Insurance fund and the net present value of cash flows, using actual data instead of projected data, for the fourth quarter of fiscal year 2018. We acknowledge that there could

⁷ The HECM Exposure Report is a report that shows the HECM mortgages in FHA's assigned inventory. This report is used by the FHA General Ledger Division so it can determine the line of credit payments due to HECM borrowers at the end of each quarter.

⁸ Of the 23,586 mortgages that were predicted to be eligible to be assigned, 383 were terminated.

be other factors, such endorsements and terminations, that potentially introduce forecast risk and cause an offsetting effect on the \$1.1 billion.

Risk of not resetting the HECM maintenance risk discount rate assumption was not assessed. FHA had not assessed the risk of not resetting the maintenance risk discount rate in the HECM LLG cash flow model. FHA calculates the maintenance risk discount to capture the sales value changes of HECM homes depending on the loan age and the relative value of the homes to the market median. The maintenance risk discount rate is a significant factor in the LLG cash flow model, and FHA had not reset the rate since it was implemented in 2009.

Conclusion

While FHA has addressed some of the modeling weaknesses reported in fiscal years 2016 and 2017, it should continue to improve its modeling processes to ensure the reliability of the LLG estimates. These improvements should focus on minimizing the risk of modeling errors to the extent possible and detecting modeling errors in a timely manner. Although FHA has made notable progress with its model governance, it needs to improve its data validation procedures and take additional measures to ensure that the most accurate and up-to-date data are used in its models. FHA also needs to continue to improve its modeling documentation and follow best coding practices to reduce the risk of error. Further, FHA can benefit from testing assumptions used in its models in a timely manner and testing or considering the impact of its assumptions.

Recommendations

We recommend that the Director of the Office of Evaluation

- 1A. Correct the impact of all of the modeling errors identified in this report.
- 1B. Revise the modeling policies and procedures to use the established HECM loan limits in the HECM LLG cash flow model.
- 1C. Develop alternative policies and procedures that would enable the use of the final single-family LLG cash flow model results and HECM return on notes cash flow model results in the final ROA models.
- 1D. Reassess the HECM assumption that mortgages with an unpaid principal balance greater than the maximum claim amount will not be assigned to HUD and perform the following: (1) compare this assumption to historical experience, (2) document the basis for selecting the assumption as opposed to alternative assumptions, and (3) determine the impact of this assumption and the associated risk.
- 1E. Reassess the model design that was implemented to avoid the double counting of the cash flows for HECM mortgages in the LLG cash flow and ROA models and perform the following: (1) determine whether there are alternative methodologies that will not result in the exclusion of cash flows in both models, (2) document the basis of the selected methodology, and (3) determine the impact and risk of the selected methodology.

We recommend that the Deputy Assistant Secretary of Finance and Budget

- 1F. Restate the fiscal year 2017 financial statements to correct the impact of using the improper discounting methodology in the HECM ROA model in fiscal year 2017.

Significant Deficiencies

Finding 2: FHA's Controls Over Financial Reporting Had Weaknesses

In fiscal year 2018, some of the control deficiencies in financial reporting identified in 2017 continued, and new control deficiencies were identified. Specifically, these new control deficiencies included issues related to the lack of subsidiary ledger systems or inadequate designs within subsidiary ledger systems and incorrect assumptions and inadequate controls used for financial statement reporting. These conditions occurred because FHA did not have effective monitoring and processes in place to ensure (1) that subsidiary ledger systems were implemented and accurately designed to record accounting events and (2) the accuracy of data reported in the financial statements. As a result, \$588 million in expenses was incorrectly reported in the financial statement note disclosures,⁹ and \$461.5 million¹⁰ was restated in fiscal year 2017 financial statement notes. Additionally, FHA may have missed an opportunity to put \$399 million of its unobligated funds to better use because invalid obligations were not always deobligated on time.

No Subsidiary Ledger for the Federal Financing Bank Direct Loan Program

FHA did not have a subsidiary ledger system in place with the capability of generating reliable and detailed loan-level accounting reports for the life of its \$1.7 billion portfolio of 133 direct loans and related borrowings. FHA used data from Treasury and Federal Financing Bank (FFB)¹¹ reports to manually record journal entries for all principal and interest on the direct loans and related borrowings directly into the general ledger system. While FHA was able to support the total \$1.7 billion portfolio recorded in the general ledger with summarized Treasury and FFB reports, it used a manual process to enter loan-level data from approved Schedule 1-B forms (payment schedule) to an Excel spreadsheet and did not include FHA's accrued interest on the related borrowings for each direct loan. Additionally, FHA did not have comprehensive policies and procedures in place for the manual accounting of FFB direct loans and related borrowings.

Manual transactions were recorded in the general ledger due to the lack of a subsidiary ledger system. In fiscal year 2015, FHA began an FFB Risk Share program, an interagency partnership among HUD, FFB, and various housing finance authorities (HFA). Under this program, FHA records a direct loan with the public as an asset on its balance sheet and, conversely, borrowing from FFB as a liability. The borrowing that FHA records requires it to also pay interest. FHA entered into an agreement with FFB, and FFB entered into agreements with the HFA and the HFA's custodian as part of the FFB Risk Share program. The HFA is required to pay principal and interest to FFB as determined in the approved payment schedule (Schedule 1-B). The approved Schedule 1-B lists the amounts of principal and interest to be paid at each payment date until the loan is fully repaid. FHA's direct loans outstanding had increased from just \$14 million

⁹ The \$588 million (absolute value of \$294 million) was due to the interest expense on reestimates being understated by \$294 million and the subsidy reestimates expense being overstated by the same amount. However, due to a change in presentation for fiscal year 2018 and the comparative fiscal year 2017 financial statements and notes for the reestimate expense, the effects of the overstatement and understatement of \$294 million is not presented in the financial statement notes.

¹⁰ The restatements included \$174 million related to salaries and administrative expenses, \$233 million related to borrowing authority carried forward, \$1.5 million related to Unfilled Customer Orders Without Advance, \$7 million related to the LLR, and \$46 million related to accrued interest for investments.

¹¹ FFB is a government corporation and an instrumentality of the United States under the general supervision and direction of the Secretary of the Treasury. FFB provides financing to help Federal agencies manage their borrowing and lending programs and to ensure that all Federal Government borrowing from the public is conducted through the Treasury and not through program agencies.

in 2014 to approximately \$1.7 billion as of September 30, 2018. The amount of direct loans outstanding began to increase with the introduction of the FFB Risk Share program in 2015. FHA did not anticipate the rapid expansion of the program. FHA was in the process of awarding a contract to establish a subsidiary system to account for the loan level transactions, however, contract award protests have delayed the implementation of a system. As a result, it did not have a subsidiary ledger system in place to account for the loan-level transactions.

In 2017, FHA awarded a contract to service and account for FFB direct loans, however, due to the multiple protests related to the award, the contract was not ratified. FHA stated it is in the process of re-procuring this contract and will update the requirements for the new FFB subsidiary system as a result. The contract required the contractor to receive funds from FFB directly, ensure that the amounts had been paid according to the amortization schedule, and provide a separate category for the management and monitoring of the loans. The contract also required the contractor to include a system that interfaced with the general ledger, FHA Subsidiary Ledger, and Pay.gov (including the capability to upload to Treasury and download from Treasury). Although FHA awarded the contract, it had not been implemented.

Since FHA lacked a subsidiary ledger system, it used the monthly Treasury Governmentwide Accounting report to manually record the direct loan receivable and the related borrowing for the disbursed direct loan directly into the general ledger. The HFA is required to pay the principal and interest to FFB according to the preapproved payment schedule; however, FFB did not provide loan-level information regarding the principal or interest transactions on the direct loan or the related borrowing, instead FHA used the same Schedule 1-Bs, as those provided to FFB, to manually record the principal and interest amounts. FHA then used a summarized report from FFB to adjust the direct loan principal and interest balances directly in the general ledger. Reports that FHA received from FFB on the related borrowings were summarized either by fund or by the United States Government Standard General Ledger. When the accrued interest in FHA's general ledger, which was based on monthly FFB reports, did not match the quarterly FFB reports, FHA recorded a "true-up" journal entry to match the general ledger balance with FFB records, without understanding why the monthly and quarterly reports did not agree. FHA relied on FFB records since it did not have a subsidiary ledger system in place to determine the correct amount of accrued interest. FHA did not document comprehensive policies and procedures for accounting for all of the principal and interest on the direct loans and related borrowings and made entries to reflect the reports received.

Weaknesses in Processing of Recorded HECM Assignments

FHA had weaknesses in the processing of recorded HECM assignments. Specifically, there were processing delays for recorded assignments, and not all key dates were tracked on the assignment timeline. These conditions were attributed to (1) the increased volume of assignments, (2) the absence of a billing and sanctioning process to address servicers' delays in providing recorded assignments, and (3) the design of the assignment timeline in the Home Equity Reverse Mortgage Information Technology (HERMIT) system.¹² As a result, there is a risk that recorded assignments may not have been properly recorded, and FHA was unable to determine the status of the assignments.

When the loan balance of reverse mortgages reaches 98 percent of the maximum claim amount, servicers are allowed to assign the mortgages to HUD. Servicers are required to send the assignments to the appropriate counties for recording and send the recorded assignments to FHA's

¹² HERMIT is the online system of record for HECMs.

loan servicing contractor. Once the loan servicing contractor receives the recorded assignments, the contractor reviews the assignments and issues final title approval if it determines that the assignments have been properly recorded. We identified two weaknesses in this process: (1) there were delays in the processing of recorded assignments, and (2) key dates were not tracked on the assignment timeline.

Delays in the processing of recorded assignments. As of September 2018, FHA had 2,594 mortgages in its loans receivable inventory that had been sent for recording from February 2014 to March 2018, but final title approval had not been issued.¹³ The loans receivable balance for these 2,594 mortgages totaled \$729 million. According to FHA, either (1) the loan-servicing contractor had not received the recorded assignments from the servicers, or (2) the loan-servicing contractor had received but had not yet reviewed the recorded assignments.

FHA attributed loan-servicing contractor delays in processing recorded assignments to an increase in recorded assignments. We believe the absence of a billing and sanctioning process may have contributed to the servicers' delay in providing recorded assignments in a timely manner.¹⁴ According to the Office of Single Family Asset Management, servicers are notified monthly of their overdue assignments, but the Office had not taken additional action beyond this notification. In September 2018, the Office of Single Family Asset Management informed us that it was finalizing a process with OPE and the Office of General Counsel to add a billing and sanctioning process for servicers with overdue assignments.

The U.S. Government Accountability Office's (GAO) Standards for Internal Control in the Federal Government, Principle 10, states that management should design control activities to achieve objectives and respond to risks. Because there were weaknesses in the processing of recorded assignments, there was a risk that mortgages in the loans receivable inventory may have not been properly recorded in HUD's name.

Key dates were not tracked on the assignment timeline. FHA tracks many key dates on the HERMIT system assignment timeline. However, FHA did not track other key dates on the assignment timeline, which could assist in tracking the status of an assignment, such as the date on which the servicer received the recorded assignment back from the counties' recorder of deeds office and the date on which the servicer mailed the recorded assignments to the loan-servicing contractor. These dates were not included because the HERMIT assignment timeline was not designed to track all of the key dates between the time when the servicer sends the recorded assignment to the county for recording and the time when the loan-servicing contractor issues final title approval. As a result of not tracking the key dates on the HERMIT assignment timeline, FHA was unable to determine how many assignments had yet to be recorded and how many had been recorded but not yet received or reviewed by the loan-servicing contractor.

Incorrect Discount Period Assumption Used To Allocate the Liquidating Reestimate

FHA used the incorrect discount period assumption in allocating the liquidating reestimate in fiscal years 2017 and 2018. This error occurred because FHA's Office of Financial Analysis and Reporting (OFAR) relied on information provided by FHA's Office of Budget and Field Resources

¹³ FHA's loan-servicing contractor issues final title approval when it receives the recorded assignments from the servicers and verifies that the assignments have been properly recorded in HUD's name.

¹⁴ Mortgagee Letter 2017-05 states that lenders must forward the recorded assignment to the loan-servicing contractor once received but no later than 6 months after the claim has been paid. If the recorded assignment is not received within 6 months of claim payment, the lender will be responsible for reimbursing the agency for any costs incurred to obtain copies of the recorded assignment and will be referred to the appropriate office(s) for sanctioning.

(OBFR) to determine the allocation between the subsidy reestimate and interest expense and OFAR incorrectly believed that OBFR used the same discount period assumption it intended to use for the reestimates. As a result, the interest expense on reestimates was overstated by \$190 million, and the subsidy reestimate expense was understated by the same amount on the third quarter fiscal year 2018 financial statements. On the fiscal year 2017 financial statements, the interest expense on reestimates was understated by \$294 million, and the subsidy reestimates expense was overstated by the same amount.

In June 2018, we found that for the fiscal years 2017 and 2018 liquidating reestimates, FHA used the incorrect discount period assumption in allocating the reestimate between the subsidy reestimate and interest expense on reestimates. In fiscal year 2017 and at the beginning of fiscal year 2018, FHA management decided that FHA should use the middle-of-year discount period for both the annual reestimates and the liquidating reestimates. However, FHA used the beginning-of-year discount period instead of the middle-of-year discount period for the liquidating reestimate in fiscal years 2017 and 2018. FHA used the intended discount period (middle-of-year) for the annual estimates.

GAO's Standards for Internal Control in the Federal Government states that management should design control activities to ensure that transactions are accurately recorded to maintain their relevance and value to management in controlling operations and making decisions. OFAR relied on information provided by OBFR to determine the liquidating reestimates for fiscal years 2017 and 2018 and incorrectly believed that the OBFR office used the same discount period assumption (middle-of-year) as that used for the annual reestimates. After we notified FHA that different discount period assumptions were used for the annual and liquidating reestimates, FHA met with the OBFR and learned that the budget office used the beginning-of-year discount period and not the middle-of-year discount period in fiscal years 2017 and 2018.

Because FHA used the beginning-of-year discount period instead of the middle-of-year discount period for the liquidating estimates as it had intended, the interest expense on reestimates was overstated by \$190 million, and the subsidy reestimate expense was understated by the same amount on the third quarter fiscal year 2018 financial statements.¹⁵ On the fiscal year 2017 financial statements, the interest expense on reestimates was understated by \$294 million, and the subsidy reestimates expense was overstated by the same amount.

In September 2018, FHA notified us that it planned to use the beginning-of-year discount period for the annual and liquidating reestimates instead of the middle-of-year discount period starting with this fiscal year. In addition, FHA informed us that it planned to combine the interest expense on reestimates and the subsidy reestimate expense on the notes to the financial statements starting in fiscal year 2018. Only the total reestimates amount will be shown on the financial statements. Combining the interest expense on reestimates and the subsidy reestimate expense does not change the total reestimates amount.

Ineffective Controls Over Calculating Salaries and Administrative Expenses

In 2018, FHA determined that the salaries and administrative expenses reported on the fiscal year 2017 statement of net cost (SNC) understated FHA's personnel-related costs by \$31 million as a result of FHA's using an incomplete payroll report. In addition, FHA was informed that HUD's Office of the Chief Financial Officer (OCFO) provided FHA with an allocation of imputed, direct, and indirect salaries and expenses (S&E) costs, which was understated by \$143 million as a result

¹⁵ The gross costs note to the financial statements refers to interest expense on reestimates as interest expense and refers to the subsidy reestimate as the reestimate expense.

of a miscalculation and was also included in FHA's fiscal year 2017 salaries and administrative expenses reported on the SNC. To that end, FHA's total salaries and administrative expenses of \$523 million reported on the fiscal year 2017 SNC were understated by \$174 million.

FHA and HUD OCFO are responsible for the allocation of the Office of Housing's salaries and expenses. FHA must accurately report full cost on its financial statements in accordance with FASAB's Statement of Federal Financial Accounting Standards (SFFAS) No. 4, Managerial Cost Accounting. SFFAS No. 4 requires that transferred costs be accurately reported by program, activity, or output. FHA's funding activities are included in the Office of Housing section of the HUD's budget, and its salary and expense cost allocation accounting entries are calculated by HUD employees. Annually, FHA records a transfer in and expense for the Office of Housing's S&E costs to cover personnel costs, information technology expenditures, overhead expenses, OIG costs, and working Capital Fund costs. Personnel costs constitute most of the S&E.

Every 3 years, FHA conducts a cost allocation survey to estimate and determine the allocation of payroll-related expenditures for each of its major programs on its SNC.

Administrative and overhead costs (such as S&E or imputed costs) are reported separately and not allocated to specific FHA programs. FHA separates non-FHA activity costs from Office of Housing's personnel costs to accurately reflect administrative and overhead costs in FHA's SNC. Annually, at fiscal yearend, FHA uses a payroll report to determine the total personnel-related costs for the year. Based upon the report, FHA will determine the direct personnel-related cost that will be charged to the FHA and non-FHA programs within the Office of Housing by applying the percentages from the cost allocation survey. FHA then provides HUD OCFO with a personnel report that separates the Office of Housing's FHA and non-FHA personnel costs. At fiscal yearend, HUD OCFO uses the personnel report from FHA to calculate other imputed, direct, and indirect S&E costs attributable to FHA activities and provides FHA with a spreadsheet of its attributable costs. The total of the actual imputed, direct, and indirect S&E costs attributable to FHA, calculated by FHA and HUD OCFO, is reported in FHA's SNC.

FHA and HUD OCFO Did Not Have Adequate Controls To Ensure That the Calculations Were Accurate. FHA did not communicate to HUD OCFO that it used a payroll report outside HUD's general ledger system to determine FHA personnel costs. FHA and HUD OCFO did not have controls in place to ensure that FHA used complete and accurate yearend payroll information. FHA used an incomplete yearend payroll report to determine FHA's allocation of personnel, compensation, and benefits related costs for the year. HUD OCFO miscalculated FHA's portion of imputed, direct, and indirect S&E costs and provided the costs to FHA. FHA did not have a review process to ensure that S&E cost information obtained from HUD OCFO was accurate and complete. HUD OCFO had not provided an explanation for what caused the miscalculation that was provided to FHA.

Financial Statement Note Errors Not Prevented or Detected in a Timely Manner

FHA incorrectly reported several items in the fiscal year 2017 financial statement notes and failed to detect the errors until fiscal year 2018. FHA restated (1) Note 3 – Fund Balance with U.S. Treasury to correct the classification of \$233 million in borrowing authority carried forward and \$1.5 million related to unfilled customer orders without advance, as an unavailable resource instead of as an available resource, (2) Note 7 – Direct Loans and Loan Guarantees to correct reporting the LLR of \$7 million as an LLR technical-default reestimate instead of LLR adjustments other, and (3) Note 5 – Investments to remove the inclusion of \$46 million in accrued interest from the market value of investments. In addition, the interest accumulation expense was improperly calculated and reported in fiscal year 2017 by \$13 million and as a result of the improper

calculation of interest accumulation expense, interest expense was incorrectly reported by \$6.5 million. We reported the error in the calculation of the interest accumulation expense in the fiscal year 2017 management letter. In fiscal year 2018, FHA provided new policies and procedures for calculating and recording interest accumulation expense and calculated and recorded the interest accumulation expense correctly. However, we identified that the interest accumulation expense of \$10.8 million for the FFB program was improperly crosswalked and reported as other expenses instead of interest accumulation expense in the fiscal year 2018 financial statement notes.¹⁶ While the U.S. Treasury provides crosswalks from general ledger accounts to financial statement line items, it does not provide crosswalks to financial statement notes. The errors occurred because FHA did not have adequate policies and procedures to ensure that it used accurate crosswalks to various financial statement note line items. The financial statement review process did not ensure that the general ledger accounts were crosswalked to the correct financial statement note line items. Although FHA detected the errors in fiscal year 2018, FHA's controls were not adequate to detect the errors before the preparation of the fiscal years 2017 and 2018 financial statements.

Current-Year Status of Prior-Year Audit Matters

Challenges with deobligating invalid obligations. As in fiscal year 2017, FHA continued to face challenges in deobligating invalid obligations in fiscal year 2018. While FHA reported that it had made significant progress in deobligating the invalid obligations identified during our fiscal years 2016 and 2017 audits, FHA's efforts to deobligate invalid obligations in a timely manner remained a challenge. Of the \$399.1 million in invalid obligations identified in May and June of this fiscal year, FHA reported that only \$169.5 million had been deobligated by the end of September 2018. Table 2 shows the remaining amount of funds that needs to be deobligated according to FHA.

Table 2. Status of deobligating invalid obligations (in millions)

Year	Amount to be deobligated	Amount deobligated as of fiscal year 2018	Remaining amount to be deobligated as of fiscal year 2018
Fiscal year 2016	\$276.5	\$266.1	\$ 10.4
Fiscal year 2017	270.7	165.8	104.9
Fiscal year 2018	399.1	169.5	229.6

Discrepancies in the undelivered order balances for management and marketing contracts. In fiscal year 2016, we reported that FHA's individual contract undelivered order balances for single-family management and marketing contracts were not accurate on the report used for financial reporting.¹⁷ There was a \$2.3 million difference between the total undelivered order balance on the report used for financial reporting and the report that FHA identified as containing the correct balances. During our fiscal year 2017 audit, FHA reported that it had made significant progress in correcting the discrepancies on the report used for financial reporting and there was a difference of only about \$138,000. At fiscal yearend 2018, FHA's documentation showed that the difference had decreased

¹⁶ Restatements were not made to the interest accumulation and interest expenses in the fiscal year 2017 financial statement notes. The crosswalk of the \$10.8 million was corrected before the issuance of the fiscal year 2018 financial statement notes.

¹⁷ The undelivered order balance is the difference between the obligated amount and the expenditure amount.

even further to about \$31,000. We plan to review source documentation to verify the accuracy of the report used for financial reporting during our fiscal year 2019 audit.

Discrepancies identified in FHA systems loan endorsement amounts. In our fiscal year 2017 audit report, we reported that for the HECM and single-family forward programs, there were discrepancies in the current-year loan endorsement amounts between the systems that FHA used for financial reporting and CHUMS, which is the system where endorsements are initially recorded for these two loan programs. In fiscal year 2018, FHA began taking steps to identify discrepancies in the loan endorsements in its various systems. Since early fiscal year 2018, FHA has been performing reconciliations between CHUMS and the HERMIT system used to report the HECM loan endorsement amount in the financial statement notes. However, FHA only recently (August 2018) started performing reconciliations between CHUMS and the Single Family Insurance System for the single-family program. We did not test the control for the HECM or single-family program during our fiscal year 2018 audit because reconciliations were not fully implemented for both programs in fiscal year 2018. During our fiscal year 2019 audit, we will review FHA's reconciliations to determine the effectiveness of this control.

Conclusion

While efforts have been made to address the lack of a subsidiary system and the errors that were previously reported were restated, FHA should continue striving to improve its controls over financial reporting to minimize the risk of material misstatements in its financial reporting. Additionally, FHA should continue to implement the management decisions for the recommendations that remain open from prior-year findings.

Recommendations

We recommend that the Deputy Assistant Secretary for Finance and Budget

- 2A. Implement an automated subsidiary ledger system with the capability of obtaining loan-level transaction data from FHA, Treasury, and FFB source systems.
- 2B. Work with Treasury and FFB to receive monthly loan-level transaction reports.
- 2C. Identify the cause for the accrued interest differences and determine the correct accounting treatment.
- 2D. Establish policies and procedures for recording and accounting for manual transactions, including the accounting rationale for the principal and interest on the direct loans and accrued interest on the borrowings.
- 2E. Correct the error related to the allocation of the liquidating reestimates in fiscal years 2017 and 2018.
- 2F. Restate salary and administrative costs on FHA's fiscal year 2017 statement of net cost, statement of net position, and footnote disclosures.
- 2G. Require FHA and HUD OCFO to work together to determine a policy and procedure to ensure that both parties receive and provide complete information related to salaries and administrative costs.
- 2H. Establish and implement a review process for salary and administrative cost information that is received from HUD OCFO to ensure that the information is complete and accurate.
- 2I. Ensure that \$399.1 million identified as invalid obligations in fiscal year 2018 is deobligated as appropriate.
- 2J. Document the rationale and policy for the crosswalks used to prepare the financial statement note line items.

2K. Document and implement policies and procedures, which include a review process to ensure that the general ledger accounts are correctly crosswalked to financial statement note line items.

2L. Restate the fiscal year 2017 financial statement notes to correct inaccurate classifications, expenses, and market value balances reported by FHA.

We recommend that the Director of the Office of Single Family Asset Management

2M. In conjunction with the loan-servicing contractor, determine what actions can be taken to ensure that recorded assignments are reviewed in a timely manner after receipt.

2N. Develop and implement a billing and sanctioning process to ensure that FHA bills servicers for the costs incurred to obtain recorded assignments from the counties' recorder's offices and sanctions the servicers when they do not provide the recorded assignments within 6 months of claim payment.

2O. Improve the tracking of recording assignments by modifying the HERMIT assignment timeline to include date fields for servicers' (1) receipt of recorded assignments from counties and (2) mailing of recorded assignments to the loan-servicing contractor.

Finding 3: FHA's Controls Related to Partial Claims Had Improved, but Weaknesses Remained

While FHA made progress on resolving unsupported partial claims in fiscal year 2018, it did not follow up with OPE to determine whether it should refer seriously noncompliant lenders to the MRB for temporary suspension or termination. These lenders did not provide required supporting documentation, did not reimburse FHA for the partial claim plus incentive fee, or did not reach a settlement in a timely manner. The cases remained unresolved an average of 591 days after the execution of the partial claim. FHA is no longer waiting until 6 months after execution of partial claims to begin requesting payment from lenders that do not provide the supporting promissory note, and it is sending requests for payments more frequently and on average, in a timely manner and in accordance with its newly implemented process. However, for lenders that have not sent the recorded mortgage within 6 months, letters requesting reimbursement in the amount of the partial claim plus the incentive fee were sent between 33 and 62 days after the expiration of the 6-month period and on average, 48 days after the expiration of the 6 month period. Failure to collect from noncompliant lenders with unsupported partial claims is a deficient cash management practice and does not help improve the health of the Mutual Mortgage Insurance fund.

FHA Had Made Considerable Improvement in Pursuing Partial Claim Promissory Notes

During the audit resolution process for fiscal year 2016, FHA management agreed in fiscal year 2017 to send notices for missing promissory notes 61 and 91 days after execution of the partial claim. It also agreed to send reimbursement letters for the amount of the claim plus the incentive fee 181 and 211 days after the execution of the partial claim if the lender had not provided the promissory note or recorded mortgage. FHA also changed its referral process for noncompliant lenders. If noncompliant lenders were not responsive to the letters sent, it would now refer the lenders to OPE instead of the MRB. OPE would then notify the Office of Single Family Housing if it did not receive the funds or documents, and the Office of Single Family Housing would then refer these noncompliant lenders to the MRB within 14 business days for temporary suspension or termination. FHA began this new process in May 2017 and, therefore, had not fully implemented the process at the close of the 2017 fiscal year.

The amount of partial claims not supported by second mortgage notes within 60 days after the date of execution has drastically decreased over the 5-year period as noted in table 3.

Table 3: Partial claims not supported by second mortgage notes 60 days after execution

Fiscal year ended	Number of partial claims not supported	Gross loans receivable balance
September 30, 2018	422	\$10.7 million
September 30, 2017	695	8 million
September 30, 2016	2,798	76 million
September 30, 2015	12,057	376 million
September 30, 2014	57,164	1.5 billion

Policies and Procedures for Pursuing Partial Claim Promissory Notes Changed Over Time

In response to our fiscal year 2014 audit recommendations, FHA developed a number of policies and procedures and updated Mortgagee Letter 2015-18¹⁸ with the goal of identifying partial claims with missing promissory notes beyond the prescribed submission period and appropriately billing noncompliant lenders for the amount of partial claims paid plus the incentive fee for failure to submit the required documentation to FHA. Based on FHA's policy under the Mortgagee Letter and the regulatory requirements, FHA is to send the first reimbursement letter to a noncompliant lender if the promissory note has not been provided within 60 days of partial claim execution. However, this process did not ensure that FHA sent a reimbursement letter until 6 months after execution of the partial claim.

As the issue continued to exist in fiscal year 2015, four causes were reported in our finding in the fiscal year 2015 audit report under Finding 1: Controls To Prevent Misclassification of the Receivables Had Not Been Fully Implemented. One cause related to the untimely document processing by FHA's loan-servicing contractor. The other three causes were related to the timely billing of and collection from noncompliant lenders.

In our review for fiscal year 2016, we determined that none of the four causes reported in the fiscal year 2015 audit report had been fully addressed. The cause that related to FHA's contractors' not processing documents in a timely manner continued to be a problem. FHA planned to resolve the issue in fiscal year 2017 by procuring three new contracts in place of a single contract. The other three causes related to billing and collection efforts toward noncompliant lenders also continued in fiscal year 2016. When testing the designed process in fiscal year 2016, we noted additional delays in implementation. We identified two factors that led to delays in collecting partial claims with missing documents. One factor was that FHA made changes to its billing and collection process during fiscal year 2016; therefore, the new process had not been fully implemented as of the end of fiscal year 2016. The other factor was that FHA sent an extension letter to lenders at the request of the HUD Office of General Counsel and the FHA Commissioner following the issuance of the two reimbursement letters, which further delayed the process. Because of the

¹⁸ Mortgagee Letter 2015-18 has been superseded by Housing Handbook 4000.1, FHA Single Family Housing Policy Handbook, which was effective September 30, 2016.

delays embedded into the process, there was a need to strengthen controls to ensure timely referral for collection of loans receivable with missing promissory notes.

In our review for fiscal year 2017, FHA had begun billing noncompliant lenders between 2 and 59 days after the 60-day expiration period. Although FHA sent the letters relatively close to 30 days after the 61-day letters, the 91-day letters were sent between 24 and 71 days after the 90 days expired. Lastly, the 181-day letters sent to lenders that did not send the promissory note, payment, or recorded mortgage to FHA within 6 months were sent between 29 and 45 days after the expiration dates noted in the letter. Although it was requested, FHA did not provide evidence to show that it had fully implemented the new process and that it had sent the 211-day letters or referred noncompliant lenders to OPE under the new process.

While this was a marked improvement from waiting until 6 months after the expiration period, letters were not always immediately sent after the expiration period, as we had previously recommended, or in accordance with the new process implemented.

Policies and Procedures That More Closely Align With Regulatory Requirements Had Been Implemented

In fiscal year 2017, FHA improved its policies and procedures for the partial claim promissory note process. FHA implemented a process to send letters to lenders requesting reimbursement in the amount of the partial claim plus the incentive fee if the lenders had not provided to FHA (1) partial claim promissory notes within 60 days of executing the partial claim or (2) the recorded secondary mortgage within 6 months of executing the partial claim. FHA was to send these letters to noncompliant lenders at 61-, 91-, 181-, and 211-day intervals, and each letter specified that the lender had 30 days to send the missing information or remit payment. After the expiration of the 211-day letter, FHA would refer the lender to OPE within 14 business days if the lender did not provide the missing promissory note or recorded mortgage or if the lender failed to respond to the letter. If OPE was unable to obtain the funds or documents from the lender, it was to notify FHA, and FHA would refer the noncompliant lenders to the MRB within 14 business days for temporary suspension or termination.

In fiscal year 2018, we reviewed a total of 45 partial claim cases, which as of June 30, 2018, had been referred to OPE for either not providing FHA with partial claim promissory notes or the recorded secondary mortgage more than 30 days after the 211-day noncompliance letter. We reviewed 12 letters that were to be sent at the 61-day interval, noting that the letters requested payment in the amount of the claim plus the incentive fee and were sent on average, 31 days after the 60 days expired. We also reviewed letters at the 91-day, 181-day, and 211-day intervals. These letters were sent in a timely manner on average. However, we noted 3 of 15 181-day letters reviewed that were sent 114 days after the 91-day letter and 1 letter that was sent 117 days after the 91-day letter.

We also reviewed 37 of the 181-day interval letters sent to lenders that did not send the recorded mortgage or payment to FHA within 6 months. Of the 37 letters sent, 25 lenders had not received any previous letters from FHA requesting reimbursement, as they had sent their partial claim promissory note within 60 days of claim payment. The 25 initial letters requesting reimbursement in the amount of the partial claim plus the incentive fee were sent between 33 and 62 days after the expiration of the 6 months and on average, 48 days after the expiration of the 6 months, which was not in a timely manner. We reviewed 37 of the 211-day letters sent to lenders that did not send the recorded mortgage or payment and determined that they were sent in a timely manner on average.

All 45 of the partial claim cases reviewed were referred to OPE. None of the 45 cases was referred to the MRB. We obtained the settlement status for 14 of the 45 cases. Of the 14 cases, settlement was pending for 9 cases. Of the nine cases, eight had been referred to OPE for more than 237 days, and one had been referred to OPE for more than 153 days as of September 30, 2018. The partial claims for those nine cases were executed between 530 and 632 days, with an average of 591 days, before September 30, 2018, and the lender still had not either sent the promissory note, recorded mortgage, or payment or reached a settlement. FHA reported that the remaining five cases sent either a settlement payment or the missing documentation.

Conclusion

FHA has experienced a significant decrease in noncompliant lenders. FHA is no longer waiting until 6 months after execution of partial claims to begin requesting payment from lenders that do not provide the supporting promissory note, and it is sending requests for payment more frequently and in a more timely manner on average. However, for lenders that have not sent the recorded mortgage within 6 months, letters requesting reimbursement in the amount of the partial claim plus the incentive fee were sent between 33 and 62 days after the expiration of the 6 months and on average, 48 days after the expiration of the 6 months. Additionally, resolution is taking more than 591 days on average for some noncompliant lenders, and FHA is not executing its option to refer lenders to the MRB.

Internal controls to rectify the weaknesses in FHA's controls related to claims, which were originally identified in fiscal year 2014, were fully implemented in fiscal year 2018. As of yearend 2018, 422 collectible partial claims with a total claim amount of \$10.7 million were missing promissory notes at least 60 days after the partial claim was executed. Collecting the amounts for unsupported partial claims in a timely manner improves the status of the Mutual Mortgage Insurance fund by restoring funds paid out as loss mitigation claims.

Recommendations

We recommend that HUD's Associate General Counsel for Program Enforcement

- 3A. Establish a timeframe and process to notify the Office of Single Family Housing that funds or documents were not received so noncompliant lenders can be referred to the MRB within 14 business days for temporary suspension or termination and notify FHA of any noncompliant lenders accordingly.

Finding 4: Weaknesses Were Identified in Selected FHA Information Technology Systems

FHA had security vulnerabilities within the management of the CHUMS¹⁹ application. These conditions occurred because of a lack of oversight. As a result, the confidentiality, integrity, and availability of critical information may have been negatively impacted. We also determined that weaknesses previously reported with selected FHA information systems and the credit reform estimation and reestimation process had not been fully remediated.

Interface Control Agreements for CHUMS Were Incomplete, and Security Documents Contained Inconsistent Information

FHA did not maintain complete and accurate information on the interfaces for the CHUMS application. Specifically, (1) one interface control agreement (ICA) document was not signed by both involved parties, and (2) CHUMS security documentation contained inconsistent information regarding the number of active CHUMS interfaces. The ICA was not signed because the system owner did not follow up with the office that the ICA was sent to for review and concurrence on the changes to the submitted documents. The inconsistencies in the reporting of active interfaces among the various security documents occurred because when changes were made to one source, the program office did not ensure that those changes were consistent among all of the other sources. If the interconnections between CHUMS and other applications are not properly defined, FHA has limited assurance that security controls will be in place and properly configured; the interconnection could expose FHA systems to access by unauthorized personnel; and the data that they store, process, or transmit could be compromised. Incomplete documentation could also lead to the insufficient protection of sensitive or critical resources. To be effective, the security documentation should be consistent and maintained to reflect current conditions, including interconnections. It should be periodically reviewed and if appropriate, updated and reissued to reflect changes due to factors, such as changes in entity mission or the types and configuration of computer resources in use. Revisions to policies, plans, or interconnected systems should be reviewed, approved, and documented in the relevant security documents.

Rules of Behavior Were Not in Place for External CHUMS Users

FHA did not establish and maintain rules of behavior for external²⁰ users of CHUMS. This condition occurred because before fiscal year 2014, the program office had no system security administrators or system compliance monitors for CHUMS. Although there is now a systems team in place addressing National Institute of Standards and Technology compliance requirements, this task had not been completed. The rules of behavior document is important as it describes the users' responsibilities with regard to the information and information system use. Not having rules of behavior in place or not requiring a user sign the rules of behavior to acknowledge receipt and understanding of the rules in place could result in a user's misusing the information maintained within the system or the information system itself.

¹⁹ CHUMS' mission is to support HUD employees, contractors, and external business partners with processing, underwriting, and quality control reviews of applications for single-family mortgage insurance. CHUMS is the primary system for operational information on all single-family mortgage insurance application and endorsement activity.

²⁰ External users are able to access the functionality of CHUMS only through FHA Connection.

CHUMS Users Performed Security and Nonsecurity Functions Using the Same Identifier

CHUMS users with privileged access to security relevant functions also performed nonsecurity functions using the same user identifier. The user identifier is an identification number that is assigned to CHUMS users, which allows them to perform functions²¹ within CHUMS. This condition occurred because FHA did not have a detailed process in place requiring the creation of a separate administrator ID for the staff assigned to perform privileged duties in accordance with HUD information technology security policy. Separation of duties addresses the potential for abuse of authorized privileges and helps to reduce the risk of malevolent activity without collusion. Least privilege limits exposure when operating from within privileged accounts or roles. Inadequately segregated duties increase the risk that erroneous or fraudulent transactions could be processed, that improper program changes could be implemented, and that computer resources could be damaged or destroyed. Misuse of privileged functions, either intentionally or unintentionally, by authorized users or by unauthorized external entities that have compromised information system accounts is a serious and ongoing concern and can have significant adverse impacts on organizations.

CHUMS Logging of Mainframe Processed Transactions Was Insufficient

FHA did not implement sufficient audit logging within CHUMS at the application level for transactions processed through the mainframe. Specifically, FHA (1) did not have adequate audit logs implemented until March 2018 and (2) did not develop policies and procedures for the regular review and maintenance of the audit logs produced. The lack of audit logs was initially identified during an authorization to operate (ATO) assessment²² that occurred during fiscal year 2017. In March 2018, FHA completed actions to inherit the audit-logging capability from the Unisys mainframe. As a result of that action, CHUMS events are now included in the audit logs generated by the mainframe. However, FHA did not request or review the reports or logs that were produced using that capability until we requested the reports. This condition occurred because FHA took actions necessary to address a finding from the ATO assessor but failed to apply the management controls necessary to fully implement the change. Without timely and consistent review of the audit logs, FHA would be unable to reconstruct events if the system were compromised or a malfunction occurred or was suspected. In addition, FHA could not conduct reviews for indications of inappropriate or unusual activity.

²¹ This includes both nonsecurity and security functions, depending upon the user's role and need to access CHUMS. Nonsecurity functions include data entry related to single-family mortgage insurance applications and endorsement activity, ad hoc reporting requests, report transmission to homeownership centers, and overnight creation of output reports. Security functions include assigning, maintaining, and updating user access privileges and the ability to access all users' information.

²² A review of the security and privacy controls within CHUMS to ensure the completeness and adequacy of CHUMS security and privacy documentation

Information System Control Weaknesses Previously Identified in Selected FHA Information Systems and the Credit Reform Estimation and Reestimation Process Were Being Addressed

In an audit we conducted in fiscal year 2017,²³ we identified instances in which controls over FHA's information systems did not fully comply with HUD information technology policies and Federal information system security and financial management requirements. FHA did not ensure adequate software maintenance support for its Asset Disposition and Management System. Specifically, the contractor used one software product that is no longer supported and two different versions of another software product. In addition, it did not properly maintain a list of the system components in the system security documentation. Lastly, the multifamily and single-family data sources for the credit reform estimation and reestimation were not properly protected.

We followed up on the status of these weaknesses during fiscal year 2018. HUD was addressing the weaknesses identified during the audit and implementing appropriate corrective actions.

These actions are scheduled to be completed by January 31, 2019.

Information System Control Weaknesses Previously Identified in FHA's SFPCS-P and SAMS Systems Had Not Been Fully Remediated

In an audit we conducted in fiscal year 2016,²⁴ we found that the general and application controls over the Single Family Premiums Collection System - Periodic (SFPCS-P) and Single Family Acquired Asset Management System (SAMS) did not fully comply with Federal requirements and HUD's own security policies. SFPCS-P was classified as a low-impact instead of a moderate-impact system, and some software used by SFPCS-P was outdated. In addition, some interface reconciliations of the data between the source system and SFPCS-P and SAMS were insufficient, and SFPCS-P application release documents were not processed and maintained properly by the HUD Application Release Tracking System. We found that SFPCS-P had not participated in HUD's disaster recovery exercise for more than 4 years. Also, segregation of duties for SFPCS-P developers and least privilege and segregation of duties requirements for SAMS users were not fully implemented, and SFPCS-P security documents were inaccurate.

We followed up on the status of these weaknesses during fiscal year 2018. HUD was addressing the weaknesses identified during the audit and implementing appropriate corrective actions. These actions have not been fully remediated.

²³ Audit Report 2018-DP-0002, Review of Information Systems Controls Over FHA, issued February 13, 2018. This was a limited distribution report because of the sensitive nature of the information reported and was not made available to the public.

²⁴ Audit Report 2017-DP-0002, Review of Information Systems Controls Over FHA's Single Family Premiums Collection Subsystem – Periodic and the Single Family Acquired Asset Management System, issued February 9, 2017. This was a limited distribution report because of the sensitive nature of the information reported and was not made available to the public.

Information System Control Weaknesses Previously Identified in FHA's SFIS and Claims Systems Had Not Been Fully Remediated

In an audit we conducted in fiscal year 2015,²⁵ we found that improvements were needed to ensure that information security controls over the Single Family Insurance System (SFIS) and the Single Family Insurance Claims Subsystem (Claims) fully complied with Federal requirements and HUD's own security policies. Some of the personally identifiable information retained in Claims' postmaintenance database files was not encrypted. In addition, five of nine vulnerabilities identified during the fiscal year 2015 vulnerability scan were identified during the fiscal year 2014 scan but had not been corrected. The remaining four vulnerabilities identified had remained uncorrected for longer than 90 days. In addition, SFIS had not implemented an effective application contingency planning practice. Further, the risk assessment prepared for SFIS did not accurately document whether SFIS was operating with an acceptable level of risk to information technology resources; information processed, stored, and transmitted in the application; and SFIS' connections to other systems.

An additional audit report²⁶ resulting from the fiscal year 2015 audit found that the general and application controls over SFIS and Claims did not fully comply with Federal requirements and HUD's own security policies. There were inconsistencies between soft error codes identified for claims submitted in May 2015 and the soft error code list maintained by FHA. In addition, for claims reported in the June 2015 suspense report, there were inconsistencies in 341 claims with errors in the initial case data and 2,018 claims with errors in the fiscal data of the application for single-family insurance benefits. The Office of the Chief Information Officer also did not retain the history of software modifications, including the related approvals, made throughout the development and life of the Claims system for more than 5 years. User access controls for SFIS and Claims were not adequately managed. SFIS and Claims management did not adequately implement effective application configuration management for the SFIS and Claims systems.

We followed up on the status of these weaknesses during fiscal year 2018. HUD was addressing the weaknesses identified during the audit and implementing appropriate corrective actions. These actions have not been fully remediated.

Conclusion

FHA must improve its information security controls over CHUMS to comply with Federal requirements and its own security policies to prevent an increased risk of unauthorized disclosure or modification of FHA system data.

Recommendations

Recommendations are included in a separate OIG audit report. Therefore, no recommendations are reported here.

²⁵ Audit Report 2016-DP-0002, Review of Information System Controls Over SFIS and Claims, issued December 21, 2015. This was a limited distribution report because of the sensitive nature of the information reported and was not made available to the public.

²⁶ Audit Report 2016-DP-0003, Additional Review of Information System Controls over FHA Information Systems, issued August 31, 2016. This was a limited distribution report because of the sensitive nature of the information reported and was not made available to the public.

Scope and Methodology

In accordance with the Chief Financial Officers Act of 1990, as amended, OIG is responsible for conducting the annual financial statement audit of FHA. The scope of this work includes the audit of FHA's balance sheets as of September 30, 2018 and 2017, and the related statements of net costs and changes in net position, the combined statements of budgetary resources for the years then ended, and the related notes to the financial statements. We conducted this audit in accordance with U.S. generally accepted government auditing standards and OMB Bulletin 19-01, Audit Requirements for Federal Financial Statements. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

To fulfill these responsibilities, we

- Examined, on a test basis, evidence supporting the amounts and disclosures in the principal financial statements.
- Assessed the accounting principles used and the significant estimates made by management.
- Evaluated the overall presentation of the principal financial statements.
- Obtained an understanding of internal controls over financial reporting (including safeguarding assets) and compliance with laws and regulations (including the execution of transactions in accordance with budget authority).
- Tested and evaluated the design and operating effectiveness of relevant internal controls over significant cycles, classes of transactions, and account balances.
- Tested FHA's compliance with certain provisions of laws and regulations; governmentwide policies, noncompliance with which could have a direct and material effect on the determination of financial statement amounts; and certain other laws and regulations specified in OMB Bulletin 19-01, including the requirements referred to in the Federal Managers' Financial Integrity Act of 1982 (FMFIA).
- Considered compliance with the process required by FMFIA for evaluating and reporting on internal controls and accounting systems.
- Performed other procedures we considered necessary in the circumstances.

We considered internal controls over financial reporting by obtaining an understanding of the design of FHA's internal controls, determined whether these internal controls had been placed into operation, assessed control risk, and performed tests of controls to determine our auditing procedures for expressing our opinion on the principal financial statements. We also tested compliance with selected provisions of applicable laws, regulations, and government policies that may materially affect the principal financial statements.

With respect to internal controls related to performance measures to be reported in FHA's Fiscal Year 2018 Annual Management Report, we obtained an understanding of the design of significant internal controls as described in OMB Bulletin 19-01. We performed limited testing procedures as required by the American Institute of Certified Public Accountants' auditing standards at AU-C, section 730, Required Supplementary Information, and OMB Bulletin 19-01. Our procedures were not designed to provide assurance on internal controls over reported performance measures, and, accordingly, we do not provide an opinion on such controls.

We did not evaluate the internal controls relevant to operating objectives as broadly defined by FMFIA. We limited our internal controls testing to those controls that are material in relation to

FHA's financial statements. Because of inherent limitations in any internal control structure, misstatements may occur and not be detected. We also caution that projection of any evaluation of the structure to future periods is subject to the risk that controls may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

Our consideration of the internal controls over financial reporting would not necessarily disclose all matters in the internal controls over financial reporting that might be significant deficiencies. We noted certain matters in the internal control structure and its operation that we consider material weaknesses and significant deficiencies under OMB Bulletin 19-01.

Followup on Prior Audits

The current fiscal yearend status of open recommendations from prior-year reports on FHA's financial statements are provided below. Specifically, we identified 13 unimplemented recommendations from prior-year reports. FHA should continue to track these recommendations under the prior-year report numbers in accordance with departmental procedures. Each of these open recommendations and its status is shown below.

Federal Housing Administration Fiscal Years 2017 and 2016 Financial Statements Audit, 2018-FO-0003

With respect to FHA's not having effective model documentation, model governance, and modeling practices, we recommended that the Deputy Assistant for Finance and Budget

- 1.a. Establish and implement an effective quality control process to prevent or detect model processing errors cited in our report and prevent other similar model processing errors in the future. (Final action target date was August 31, 2018; reported in the Audit Resolution and Corrective Actions Tracking System (ARCATS) as 2018-FO-0003-001-A.)
- 1.b. Reevaluate FHA's existing model documentation for single-family, HECM, and multifamily models to determine whether their current state is acceptable, so that it provides the intended users a thorough understanding of how the model works and also allows new users to assume responsibility for the model's use (operational procedures). Based on this review, FHA should make adjustments as needed to the model documentation. At a minimum, these adjustments should include appropriate actions taken to address model documentation deficiencies cited in our report. (Final action target date was July 31, 2018; reported in ARCATS as 2018-FO-0003-001-B.)
- 1.c. Review FHA's existing model coding for single-family, HECM, and multifamily models and make necessary changes to make them consistent with industry's best practices in model coding. At a minimum, FHA should implement actions to address model coding deficiencies cited in our report. (Final action target date was July 31, 2018; reported in ARCATS as 2018-FO-0003-001-C.)
- 1.d. Establish and implement policies and procedures for assessing and monitoring the reliability of the work performed by FHA's modeling contractors. (Final action target date was August 31, 2018; reported in ARCATS as 2018-FO-0003-001-D.)
- 1.e. Revisit the model's ability to predict future performance of the single-family portfolio, based on our concerns expressed in this report regarding relationships of certain variables (such as loan-to-value ratio and FICO scores to prepayment) that are not consistent with our expectations. FHA should provide us an analysis to support its position if it believes that a model design change is not warranted. (Final action target date was July 31, 2018; reported in ARCATS as 2018-FO-0003-001-E.)

With respect to FHA's not having effective monitoring and processing controls over its unliquidated obligation balances, recording subsidy expense in a timely manner, and using inaccurate data to report on its loan guarantees, we recommended that the Deputy Assistant for Finance and Budget

- 1.f. Ensure that the \$270.7 million identified as invalid obligations in fiscal year 2017 is deobligated as appropriate. (Final action target date was August 31, 2018; reported in ARCATS as 2018-FO-0003-002-A.)
- 1.g. Develop and implement a reconciliation process to ensure that the information in various systems is consistent for all accounting events. (Final action target date was September 30, 2018; reported in ARCATS as 2018-FO-0003-002-C, closed November 2, 2018.)
- 1.h. Develop and implement policies, procedures, and controls to ensure that the reported current-year endorsements in HERMIT and SFHEDW [Single Family Housing Enterprise Data Warehouse] agree with the current-year endorsements in CHUMS. (Final action target date was September 30, 2018; reported in ARCATS as 2018-FO-0003-002-F.)

Federal Housing Administration Fiscal Years 2016 and 2015 Financial Statements Audit, 2017-FO-0002

With respect to FHA's not having effective monitoring and processing controls over its unliquidated obligation balances and using inaccurate data to report on its undelivered orders, we recommended that the Acting FHA Comptroller

- 2.a. Establish and implement policies and procedures to ensure that accurate data are used to report the undelivered order balances for management and marketing contracts. (Final action target date was November 30, 2017; reported in ARCATS as 2017-FO-0002-002-C.)
- 2.b. Ensure that the \$276.5 million identified as invalid obligations in fiscal years 2015 and 2016 are deobligated as appropriate. (Final action target date was November 30, 2017; reported in ARCATS as 2017-FO-0002-002-D.)

With respect to FHA's not fully implementing controls to collect the amounts for unsupported partial claims, we recommended that the Office of Single Family Housing

- 2.c. Request payment in the amount of the claims paid, plus incentive, from mortgagees that have not provided the original note within the prescribed deadline for the \$55.3 million. (Final action target date was June 20, 2018; reported in ARCATS as 2017-FO-0002-003-C.)

Federal Housing Administration Fiscal Years 2015 and 2014 Financial Statements Audit, 2016-FO-0002

With respect to FHA's not fully implementing controls to prevent misclassification of the receivables, we recommended that the Office of Single Family Housing

- 3.a. Start the billing process for the claims paid, plus incentive, in which the lender has not provided the original note and security instrument within the prescribed deadlines for the \$291 million. (Final action target date was November 30, 2016; reported in ARCATS as 2016-FO-0002-001-C.)

**Federal Housing Administration Fiscal Years 2014 and 2013 Financial Statements Audit,
2015-FO-0001**

With respect to FHA's not establishing appropriate receivables for legal settlements and partial claims notes, we recommended that the Director of Single Family Asset Management

- 4.a. Initiate the billing process for the claims paid, plus incentive, where the lender has not provided the original of the note and security instrument within the prescribed deadlines for the \$1.5 billion. (Final action target date was October 31, 2015; reported in ARCATS as 2015-FO-0001-001-F.)

Appendixes

Appendix A

Schedule of Funds To Be Put to Better Use

Recommendation number	Funds to be put to better use 1/
2.I.	\$399,090,727
Totals	399,090,727

- 1/ Recommendations that funds be put to better use are estimates of amounts that could be used more efficiently if an OIG recommendation is implemented. These amounts include reductions in outlays, deobligation of funds, withdrawal of interest, costs not incurred by implementing recommended improvements, avoidance of unnecessary expenditures noted in preaward reviews, and any other savings that are specifically identified.

Comment 1

 OFFICE OF HOUSING	U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT WASHINGTON, DC 20410-8000
November 14, 2018	
MEMORANDUM FOR:	Thomas R. McEnanly, Director, Financial Audits Division, GAF
FROM:	 Susan A. Betts, Housing, Deputy Assistant Secretary for Finance and Budget, HW
SUBJECT:	Response to Fiscal Years 2018 and 2017 (Restated) Financial Statements Audit
<p>Thank you for providing us with the opportunity to respond to FHA's Independent Auditor's Report.</p> <p>We appreciate that the OIG is committed to FHA's mission, and is working to help provide us with actionable recommendations. FHA is committed to making the changes necessary to strengthen controls. This is a priority for FHA and the entire team is engaging to undertake these efforts. Working collaboratively with OIG, FHA will continue to identify and implement changes needed to address the internal control findings identified.</p> <p style="text-align: center;">Report on Internal Control</p> <p>Finding 1: Weaknesses Continued in FHA's Modeling Processes</p> <p>FHA is committed to the principle of constant improvement over FHA's modeling processes. The Fiscal Year (FY) 2017 audit report made important observations about the need to improve the quality control of our modeling processes. We appreciate those findings. While we continue to improve, we believe the audit deliverables we provided this year evidence strong improvement.</p> <p>During FY 2018, FHA and its contractors made enormous efforts to improve oversight and quality control procedures. These efforts include:</p> <ol style="list-style-type: none">1. A complete re-drafting of the "FHA Oversight and Quality Control of the Single-Family Forward/HECM Liability for Loan Guarantees Models" oversight governance document to include specific principles and practices.2. The contractor's development of a comprehensive quality control plan that includes 38 distinct controls, the documentation alone of which covers 38 pages.3. The execution of these controls results in over 500 pages of diagnostic output.4. A comprehensive re-coding of the statistical scripts to implement 23 model coding best practices. This is documented in flow charts and side-by-side comparisons totaling 125 <p style="text-align: right;">www.hud.gov espanol.hud.gov</p>

Comment 2

pages. FHA reviewed these changes in detail for over 11 hours during code review with its contractors.

5. Numerous enhancements to model documentation including user guide changes to support easy replication of results.

Based on the above, we believe that the material weakness was remediated.

We would like to address the primary deficiency identified in this audit finding, which concerns the FHA-identified and corrected issue of the \$1.7 billion in FY 2017 Return on Assets discounting. The FHA Audit Report states that "Although FHA credits its internal controls with detecting the error, FHA's controls were not effective enough to detect the error prior to the preparation of the FY 2017 financial statements." While true that formulation and review by all responsible entities during the FY 2017 audit cycle did not prevent this error, FHA's detection and correction of this error in FY 2018 is strong evidence of FHA's oversight abilities *in FY 2018 and FHA's improvements in this area from FY 2017 practices*. Nonetheless, we will continue to address this matter through enhanced diagnostic methods.

While we value the OIG's feedback, we have several concerns with the methodologies the OIG used. For some findings we believe there is a misunderstanding of how FHA program terms are applied in our models. For other findings (lack of documentation for policy changes and documentation not sufficient for external replication), we believe we provided evidence to support our position.

We would welcome the opportunity to meet with your office to detail our concerns with the findings identified.

Finding 2: FHA's Controls Over Financial Reporting Had Weaknesses

FHA has already implemented several of the recommendations identified in the finding relating to FHA's controls over financial reporting had weaknesses and will continue to complete the implementation of remaining recommendations in FY 2019.

As recommended by the OIG, FHA will focus on improved controls surrounding the Federal Financing Bank program in the coming year. In addition, FHA continues to make progress deobligating the invalid obligations identified. As part of the resolution process, FHA will collaborate with our partners, including the Chief Procurement Office, whom we are dependent upon to resolve this recommendation.

Regarding the OIG's concerns surrounding the processing of recorded HECM assignments, FHA has implemented process improvements to ensure that all recorded assignments are reviewed timely after receipt. Further, FHA is implementing a plan to obtain recorded assignments from county recorders' offices and bill servicers for the associated costs and working on a modification to its HERMIT systems to improve date tracking.

Auditee Comments and OIG's Evaluation

Auditee Comments

Comment 3

Comment 4

Finding 3: FHA's Controls Related to Partial Claims Had Improved, but Weaknesses Remain

FHA has made and will continue to make further changes to strengthen controls related to partial claims. The Office of Single Family Asset Management is working to establish a time frame and process for notification to the Office of Single Family Housing when cases are not resolved. Strengthened partial claim controls have generated case referrals to the Office of Program Enforcement providing resolution without the need to utilize the Mortgagee Review Board process for resolution.

Finding 4: Weaknesses Were Identified in Selected FHA Information Technology Systems

FHA is working to address the OIG's recommendations relating to the CHUMS system, several of which have been addressed. FHA will continue to support the OCIO's office to resolve current and prior year recommendations.

OIG Evaluation of Auditee Comments

- Comment 1 OIG accepts the response of concurrence with the recommendations. FHA’s continued efforts in improving its controls over the modeling process will improve the reliability of the estimation process and reliability of financial information related to the loan guarantee liability. OIG looks forward to working with FHA to reach a mutually acceptable management decision to close out the recommendations during the audit resolution process.
- Comment 2 OIG accepts the response of concurrence with the recommendations. FHA should continue their efforts to improve their internal controls over financial reporting in order to improve the reliability of the financial statements. OIG looks forward to working with FHA to reach a mutually acceptable management decision to close out the recommendations during the audit resolution process.
- Comment 3 OIG accepts the response of concurrence with the recommendations. FHA’s continued efforts to strengthen partial claim controls will continue to improve the status of the MMI fund. OIG looks forward to working with FHA to reach a mutually acceptable management decision to close out the recommendations during the audit resolution process.
- Comment 4 OIG looks forward to working with FHA to reach mutually acceptable management decisions during the audit resolution process to resolve the current recommendations. OIG also looks forward to the closure of the prior year recommendations.
