1 Welcome to the Case Binder Module

FHA Catalyst: Case Binder Module is a web-based platform that supports digital delivery of origination documents by the Mortgagees to the Federal Housing Administration (FHA). As part of the Housing Information Technology (IT) Modernization effort, the Case Binder Module will replace the receipt of paper loan origination case binders with electronic format of case binders to the FHA.

FHA-Approved Mortgagees can submit Single Family Forward and Home Equity Conversion Mortgage (HECM) loan origination case binder documents electronically for FHA review and endorsement. Mortgagees can submit Notice of Return (NOR) Resubmission documents electronically by uploading into FHA Catalyst – Case Binder module. Mortgagees seeking Unconditional Direct Endorsement (DE) authority Test Case Lenders can also submit Test Cases electronically through this platform, thereby eliminating physical shipment of paper case binder. For Post Endorsement reviews, Mortgagees can also submit case binders requested for post-endorsement review in the Loan Review System (LRS) to FHA. Mortgagees can also upload Case Binders and related documents for other HUD requests by using “Other” binder submissions.

This document has been developed to provide Mortgagees with guidance on how to upload different categories of loan documents using the Case Binder Module in FHA Catalyst. Please refer to the Single-Family Housing Policy Handbook 4000.1 for case binder stacking order, in-depth information on FHA policy, event definitions, reporting timeframes, data elements, and post-audit requirements.
