1. Introduction

FHA Catalyst: Multifamily Application Module is a web-based secure medium that supports digital delivery of Multifamily Application documents by lenders to the Federal Housing Administration (FHA). This document provides instructions to lenders on how to access and use the Multifamily Application.

- Created By – name of the user who created the MFH application, and the date and time it was created.

2. Click the search field. There could be name suggestions displayed based on the records you have interacted with recently. If none of the names are the desired target owner, start typing a name or email in the search field then press the **Enter** key. Partial search is also accepted here.

![Figure 17. Customer Portal User Results](image)
4. Make sure **Send notification email** box is checked to send the new owner an email notification.

You will get the error message, “**The user you selected is not from the same organization. Please select a different user.**” if you try to assign the record to an individual who is not from the same organization.

Below is a sample email notification. When new owner clicks the link in the email, it will direct them to the Catalyst Login (if they are not currently logged in). After successfully logging in, they will see the MFH Application details page.
