Michael Moglia: According to the NFPA, cooking is the number one reason of home fires and to decrease the fire protection at the cooking range will not only weaken that protection but weaken the MH industry fight against the requirement of fire suppression systems. This requirement should not be diminished but should be marketed to consumers.

Cameron Tomasbi: Upon further consideration, I do not believe the action on this item should be reviewed and considered, no further action required. I believe that MHCC should forward this DRC on to encourage HUD to withdraw the interpretative rule. The statute is clear in itself and the interpretive rule may be overruled by executive orders 13891 and 13892.
