

U.S. Department of Housing and Urban Development

FHA Single-Family Mutual Mortgage Insurance Fund Programs

Quarterly Report to Congress

FY 2018 Q1

Delivered: March 14, 2018

Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2018 Q1
Data as of December 31, 2017

U.S. Department of Housing and Urban Development
Federal Housing Administration

FOREWORD

On behalf of Secretary Carson and General Deputy Assistant Secretary for Housing Dana Wade, and pursuant to requirements of section 202(a)(5) of the National Housing Act, as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year 2018 First Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration. The reporting period covers October 1, 2017 through December 31, 2017.

This quarterly report provides detailed information on the composition and credit quality of new insurance, and on FHA's financial position. In addition to this report to Congress, FHA provides information regarding the status of the single-family mortgage-insurance portfolio via the publication of other complementary reports. All FHA reports can be found in the [Office of Housing Reading Room](#).

Also posted in the Office of Housing Reading Room are annual independent actuarial reviews of the MMI Fund and HUD's Annual Report to Congress on the financial status of that fund. HUD posted the Actuarial Review and Annual Report to Congress for FY 2017 on November 15, 2017. The FY 2017 Annual Report, which summarizes the independent actuary's exhaustive analysis of the portfolio, includes detailed projections of future performance and discussion of economic risk to the MMI Fund. The Department is pleased to provide details to the Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

A handwritten signature in blue ink that reads "Shawn Jones". The signature is fluid and cursive, with the first name "Shawn" and last name "Jones" clearly distinguishable.

Shawn Jones

Acting Deputy Assistant Secretary
Risk Management and Regulatory Affairs

This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund. The specific items requested under the Act are:

Mandated Item	Summary	Page	Exhibit
A) Cumulative volume of mortgage insurance commitments that have been made during such fiscal year through the end of the quarter for which the report is submitted	Single-family forward endorsements during the first quarter of FY 2018 decreased 12.3 percent by count from the prior quarter. Single-family forward endorsements were \$54.7 billion, down 11.9 percent from the prior quarter. Reverse Mortgage (HECM) endorsements by count were up 1.9 percent from the previous quarter. HECM endorsement volume, at \$4.6 billion for the first quarter of FY 2018, represents an increase of 3.1 percent from the previous quarter.	4 , 16 , 17	1 , A-1 , A-2
B) Types of mortgages insured, categorized by risk	The average credit score this quarter decreased by 2 points to 672. Endorsement share of 720+ credit score mortgages fell to 15.7 percent. Share of less than 640 credit score rose to 24.7 percent. Average borrower loan-to-value ratio fell to 92.4 percent.	5 , 6 , 7 , 18 , 19 , 20 , 21	2 , 3 , 4 , A-3 , A- 4 , A-5 , A-6
C) Any significant changes between actual and projected claim and prepayment activity	Prepayment speeds through this quarter were 13 percent higher than predicted counts. Claim payments were running 18 percent below predicted level by count and 45 percent below predicted level by dollar amount.	8 ,	5 ,
D) Projected versus actual loss rates	The year-to-date net loss rate on claim activity of 46.3 percent is much lower than the projection of 55.6 percent.	8	5
E) Updated projections of the annual subsidy rates	The budget execution credit subsidy rates (CSR) for FY 2018 Q1 are at -3.18 percent and -0.49 percent for forward mortgages and HECMs, respectively.	9	6

Additional Risk Factors	Summary	Page	Exhibit
F) MMI Fund Cash and Investments	The MMI Fund Cash and Investments account balance at the end of FY 2018 Q1 was \$50.8 billion, up from \$50.1 billion last quarter.	10	7
G) Business-Operations Cash Flow	Core business-operations cash flow in FY 2018 Q1 was \$1,748 million. FHA paid \$2.0 billion in claims and property expenses, while receiving \$3.8 billion in revenues from premium collections, sale of notes and properties, and other revenue.	11	8
H) Early Payment Delinquency	The early payment delinquency (EPD) rate increased this quarter to 0.73 percent, from 0.35 percent last quarter. This increase is due primarily to the hurricanes and wildfires that affected the United States and its territories in the second half of calendar year 2017.	12	9
I) Serious Delinquency Rates	The portfolio-level serious delinquency rate increased this quarter to 5.19 percent, from 4.32 percent last quarter. This increase is due primarily to the hurricanes and wildfires that affected the United States and its territories in the second half of calendar year 2017.	13, 14	10, 11
J) Cash-Out Refinancing Rates	Cash-out refinance rate increased from 77 percent the last quarter to 78 percent.	23	A-8
K) Debt-to-Income (DTI) Rates	The proportion of borrowers with DTI ratios above 50 percent increased from 21.9 percent in 2017 Q4 to 23.0 percent in 2018 Q1.	24	A-9
L) Down Payment Assistance (DPA) – Serious Delinquency Rate (SDQ)	The Down Payment Assistance program rate (Purchase only mortgages) increased from 38.5 percent last quarter to 39.5 percent.	25	A-10
M) Reverse Mortgage (HECM) Program Claims	HECM program’s claims total increased this quarter by 4.5 percent from 16,204 loans to 16,937 loans.	26	A-11

Endorsement Activity

During the first quarter of fiscal year (FY) 2018, the FHA endorsed 267,521 forward mortgages for insurance, down 12.3 percent from the prior quarter.

The dollar volume of refinance endorsements (Conventional to FHA, FHA to FHA) in the quarter was up 6.4 percent from the previous quarter, while the dollar volume of all forward-mortgage endorsements was down 11.9 percent (Exhibit A-2).

FHA-to-FHA refinance activity, in terms of endorsed mortgages, increased by 7.3 percent from the quarter-earlier period—from 39,144 to 42,014.

HECM endorsement volume, \$4.6 billion for the first quarter of FY 2018, was up 3.1 percent from the previous quarter. HECM endorsement counts in FY 2018 Q1 (14,024) were up 1.9 percent from last quarter.

Exhibit 1. Endorsement Counts by Fiscal Year and Quarter

SOURCE: U.S. Department of HUD/FHA, January 2018.

Borrower Credit Scores

Average borrower credit scores fell by 2 points to 672. This continued to be well above the levels preceding the mortgage and credit crisis (Exhibit 2, Exhibit A-4).

Exhibit 2. Average Borrower Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance activity.

SOURCE: U.S. Department of HUD/FHA, January 2018

As shown in Exhibit 3, the distribution of borrower credit scores remained fairly consistent over the past few years. The core of the distribution is in the 640–679 range (36.4 percent). In FY 2018 Q1 the share of 680–850 credit scores continued to decline. (Exhibit 3, Exhibit A-3).

A shift in FHA’s risk profile could easily be lost by focusing on average credit score alone. As shown in Exhibit 3, mortgages with less than 620 credit score accounted for almost 25 percent of total originations in 2009, compared to 10.3 percent today. On the other hand, the share of mortgages with credit scores exceeding 720, which accounted for more than one-third of FHA’s production in 2011, is now under 16 percent.

NOTE: Excludes streamline refinance activity.

SOURCE: U.S. Department of HUD/FHA, January 2018.

Average Loan-to-Value (LTV)

The average LTV decreased slightly from 92.8 percent to 92.4 percent for all FHA mortgages combined. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages. (Exhibit 4, Exhibit A-1, Exhibit A-5, Exhibit A-6).

Exhibit 4. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

NOTE: Excludes streamline refinance activity.

SOURCE: U.S. Department of HUD/FHA, January 2018.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the fourth quarter of FY 2018 are presented in Exhibit 5. Prepayment speeds were higher than predicted. Claims were well below predictions. The number of claims through FY 2018 Q1 (17,553) was 18 percent less than predicted (21,408). That deviation comes from a combination of continued foreclosure-processing delays in many states and more aggressive servicing actions to promote home retention. Neither of these is a factor that can easily be captured in the actuarial forecast models, which are based upon behavioral relationships observed over many years. When institutional and/or borrower behaviors change, it can take a number of years for the actuarial models to have enough data to reset the behavioral patterns to adapt to those changes (Exhibit 5).

Exhibit 5. Termination and Claim Loss Experience Compared to Forecasts

Oct 2017–Sep (FY 2018)	Year to Date Predicted ^a	Year to Date Actual	Deviation (Actual Minus Predicted)	Percentage Deviation (Actual Versus Predicted)
Prepayments (number)	217,620	245,469	27,849	13
Claims (number) ^a	21,408	17,553	(3,855)	(18)
Claims (\$ millions) ^b	2,704	1,494	(1,210)	(45)
Net Loss on Claims (%) ^c	55.58	46.29	(9.29)	(17)

na = not applicable.

^a Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2017 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

^b Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

^c These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

SOURCE: U.S. Department of HUD/FHA, January 2018.

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2018 Q1 is -3.18 percent. The subsidy rate for HECM mortgages is -0.49 percent for FY 2018 Q1 (Exhibit 6).

Exhibit 6. Budget Execution Credit Subsidy Rates, FY 2018 Q1

Type of Mortgage	Rate (%) ^a
Forward Mortgages	-3.18
Reverse Mortgages (HECM)	-0.49

^a Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows.
SOURCE: U.S. Department of HUD/FHA, January 2018.

MMI Fund Cash and Investments

As Exhibit 7 shows, the cash and investments of the MMI Fund increased to \$50.8 billion in FY 2018 Q1. \$17.3 billion is held in the Financing account, and \$33.5 billion is held in the Capital Reserve account.

Exhibit 7. MMI Fund Cash and Investments by Quarter, FY 2011–FY 2018

Fiscal Year	Quarter	Capital Reserve Account ^a (\$ billions)	Financing Account ^b (\$ billions)	Total ^{cd} (\$ billions)

NOTE: Only end-of-year balances represent audited figures.

^a This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget reestimates.

^b This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

^c Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

^d Capital Reserve Account and Financing Account may not always add to total because of rounding.

SOURCE: U.S. Department of HUD/FHA, January 2018.

Cash Flows from Business Operations

FY 2018 Q1 net cash flow was \$1,748 million compared to FY 2017 Q4 of \$845 million. HUD has been proactive in reducing average losses per claim through a more diversified asset disposition strategy, which includes note sales, promotion of third-party sales at foreclosure auctions, Claims Without Conveyance of Title (CWCOT), and expanded eligibility for pre-foreclosure (short) sales. Claim costs (as measured by loss rates) have decreased from a high of 65 percent in 2011 to around 50 percent over the last four quarters (Exhibit A-7).

Exhibit 8. Business Operations Cash Flows, FY 2017 Q2–FY 2018 Q1 (\$ millions)

Early-Payment Delinquency Rates

The Early-Payment Delinquency (EPD) rate for mortgages originated in FY 2017 Q3 is up 38 basis points from the previous quarter. This increase is due primarily to the hurricanes and wildfires that affected the United States and its territories in the second half of calendar year 2017.

Exhibit 9. Early Payment Delinquency Rates

Fiscal Year	Origination Quarter	Loan Type / Purpose (%)

^a Percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycles.

SOURCE: U.S. Department of HUD/FHA, January 2018.

Serious Delinquency Rates

Serious delinquency (SDQ) rates for this quarter increased to 5.19 percent from last quarter. As the portfolio serious delinquency rate has reached a historical low and FHA expands access to underserved borrowers, FHA may see increases in SDQ rates going forward. For all cohorts, mortgages with DPA have underperformed those without DPA (Exhibit A-10).

SDQ rates tend to be somewhat seasonal and may fluctuate along current levels. Recent disasters such as hurricanes Harvey, Irma, and Maria, as well as wildfires in the Western United States, had a near term effect on overall delinquency rates. Overall, serious delinquency rates are significantly improved from the highs seen in 2011.

Exhibit 10. Serious Delinquency Rates, All Single-Family Forward Endorsements

SOURCE: U.S. Department of HUD/FHA, January 2018.

Exhibit 11 follows the serious delinquency rates of recent vintages from their month of origination. Serious delinquency rates have risen in more recent vintages. This may be due to expansion of credit to underserved borrowers or other factors in the economy. The late 2017 hurricanes and wildfires in the United States and its territories has also created an increase in serious delinquency rates. However, recent vintage delinquency rates are still considerably lower than for those mortgages originated during 2006-2010.

Exhibit 11. Serious Delinquency Rate by Fiscal Year

NOTE: The FY 2009 cohort is separated into two parts, representing mortgage originations from October through March in 2009-1 and mortgage originations from April through September in 2009-2.
SOURCE: U.S. Department of HUD/FHA, January 2018.

2018	Oct–Dec	10.3	14.4	36.4	23.2	15.7

NOTES: Shares in each row may not sum to 100% due to rounding; excludes streamline refinance mortgages.

^a Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. They are grouped here according to the “decision” score used for mortgage underwriting. That score represents the weakest borrower on a mortgage application when there are multiple applicants. Streamline refinance mortgages do not require full underwriting; therefore, they are not represented here.

2018	Oct–Dec	674	668	663	672

NOTE: Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for mortgages with equity positions of 10 percent or more, which may have credit scores as low as 500. They are grouped here according to the “decision” score used for mortgage underwriting. The decision score represents the weakest borrower on a mortgage application when there are multiple applicants. Streamline refinance mortgages do not require full underwriting; therefore, they are not represented here.

^a These include only fully-underwritten mortgages and exclude streamline refinancing.

^a Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

^b REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less than the amount owed. Short sales are part of the pre-foreclosure sale (PFS) program. CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title to the property to HUD. Note sale refers to the sale of defaulted mortgage notes in order to reduce foreclosure costs for borrowers. Note sales are conducted through the Distressed Asset Stabilization Program (DASP).

^c Data through August 2017.
