

U.S. Department of Housing and Urban Development

FHA Single-Family Mutual Mortgage Insurance Fund Programs

Quarterly Report to Congress FY 2019 Q2

Delivered: June 07, 2019

Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2019 Q2 Data as of March 31, 2019

U.S. Department of Housing and Urban Development Federal Housing Administration

FOREWORD

On behalf of Secretary Carson and FHA Commissioner Brian Montgomery, and pursuant to requirements of section 202(a)(5) of the National Housing Act, as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year 2019 Second Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration. The reporting period covers January 1, 2019 through March 31, 2019.

This quarterly report provides detailed information on the composition and credit quality of new insurance, and on FHA's financial position. In addition to this report to Congress, FHA provides information regarding the status of the single-family mortgage-insurance portfolio via the publication of other complementary reports. All FHA reports can be found in the Office of Housing Reading Room.

Also posted in the Office of Housing Reading Room are annual independent actuarial reviews of the MMI Fund and HUD's Annual Report to Congress on the financial status of that fund. HUD posted the Actuarial Review and Annual Report to Congress for FY 2018 on November 15, 2018. The FY 2018 Annual Report, which summarizes the independent actuary's analysis of the portfolio, includes detailed projections of future performance and discussion of economic risk to the MMI Fund. The Department is pleased to provide details to the Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Keith N. Becker

Kingh Bul

Deputy Assistant Secretary Office of Risk Management and Regulatory Affairs This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund. The specific items requested under the Act are:

Mandated Item	Summary	Page	Exhibit
A) Cumulative volume of mortgage insurance commitments that have been made during such fiscal year through the end of the quarter for which the report is submitted	Single-family forward endorsements during the second quarter of FY 2019 decreased 11.78 percent by count from the prior quarter. Single-family forward endorsements were \$42.52 billion, down 10.57 percent from the prior quarter. Reverse Mortgage (HECM) endorsements by count were up 11.32 percent from the previous quarter. HECM endorsement volume, at \$2.80 billion for the second quarter of FY 2019, represents an increase of 12.89 percent from the previous quarter.	5, 17, 18	1, A-1, A-2
B) Types of mortgages insured, categorized by risk	The average credit score this quarter fell by 2 points to 665. Endorsement share of 720+ credit score mortgages declined to 12.95 percent. Share of less than 640 credit score rose to 29.63 percent. FHA has seen an increase in the concentration of mortgages with high debt-to-income (DTI) ratios. Nearly 28 percent of all FHA-insured forward mortgage purchase transactions in this quarter were comprised of mortgages where the borrower had a DTI ratio above 50 percent. Average property loan-to-value ratio fell to 92.05 percent.	6, 7,8, 9, 19, 20, 21, 22, 23	2, 3a, 3b, 4, 5, A-3, A-4, A-5, A-6, A-9
C) Any significant changes between actual and projected claim and prepayment activity	Prepayment speeds this quarter were 44.21 percent lower than predicted due mostly to the re-calibration of FHA's prepayment model. Claims were 17.39 percent below predicted level by count and 36.39 percent below predicted level by dollar amount.	<u>10,</u>	<u>6,</u>

D) Projected versus actual loss rates	The year-to-date net loss rate on claim activity of 42.77 percent is slightly higher than the projection of 42.51 percent.	<u>10</u>	<u>6</u>
E) Updated projections of the annual subsidy rates	The budget execution credit subsidy rates (CSR) for FY 2019 Q2 are at -3.20 percent and -0.15 percent for forward mortgages and HECMs, respectively.	<u>11</u>	7

Additional Risk Factors	Summary	Page	Exhibit
F) MMI Fund Cash and Investments	The MMI Fund Cash and Investments account balance at the end of FY 2019 Q2 was \$49.87 billion, up from \$49.52 billion last quarter.	12	8
G) Business Operations Cash Flow	Core business-operations cash flow in FY 2019 Q2 was \$201 million this quarter. FHA paid \$3.71 billion in claims and property expenses, while receiving approximately \$3.91 billion in revenues from premium collections, sale of notes and properties, and other revenue.	<u>13</u>	9
H) Early Payment Delinquency	The early payment delinquency (EPD) rate increased this quarter to 0.87 percent, from 0.77 percent last quarter. This increase is likely due to both seasonal effects and a higher level of credit risk being brought into the portfolio through new endorsements.	<u>14</u>	10
I) Serious Delinquency Rates	The portfolio-level serious delinquency rate decreased this quarter to 3.88 percent, from 4.08 percent last quarter.	<u>15</u>	11
J) Termination Claim Type with Loss Severity Rates	The single family forward portfolio loss rate decreased to 40.22 percent from 42.90 percent last quarter. Total loan dispositions of 10,357 are lower by 40.05 percent due to reduced REO alternatives inventory levels.	<u>23</u>	<u>A-7</u>
K) Cash-Out Refinancing Rates	Purchase mortgage share decreased from 78.52 percent last quarter to 76.03 percent. Cash-out refinance mortgage	<u>24</u>	<u>A-8</u>

Additional Risk Factors	Summary	Page	Exhibit
	share slightly increased as a percentage of overall business to 17.72 percent from 17.26 percent last quarter.		
L) Down Payment Assistance (DPA) – Serious Delinquency Rate (SDQ)	The share of Down Payment Assistance (Purchase only mortgages) increased from 40.06 percent last quarter to 40.48 percent. Generally, higher SDQ rates are associated with mortgages where down payment assistance came from self-identified governmental entities.	<u>26</u>	<u>A-10</u>
M) Reverse Mortgage (HECM) Program Claims	Total HECM program claims decreased this quarter by 23.11 percent from 23,718 loans to 18,236 loans due to lower number of Assigned Claims (Type 2) to HUD.	<u>27</u>	<u>A-11</u>

Endorsement Activity

During the second quarter of fiscal year (FY) 2019, the FHA endorsed 201,779 forward mortgages for insurance, down 11.78 percent from the prior quarter (Exhibit A-1).

The dollar volume of refinance endorsements (Conventional to FHA, FHA to FHA) in the quarter was up 2.38 percent from the previous quarter, while the dollar volume of all forward-mortgage endorsements was down 10.57 percent (Exhibit A-2).

FHA-to-FHA refinance activity, in terms of endorsed mortgages, increased by 7.34 percent from the quarter-earlier period from 22,931 to 24,614.

HECM endorsement volume, \$2.80 billion for the second quarter of FY 2019, was up 12.89 percent from the previous quarter. HECM endorsement counts in FY 2019 Q2 of 8,222 was up 11.32% percent from last quarter. HECM endorsements likely increased due in part to the partial government shutdown which prevented HECM endorsements to be endorsed for part of the first quarter of FY 2019.

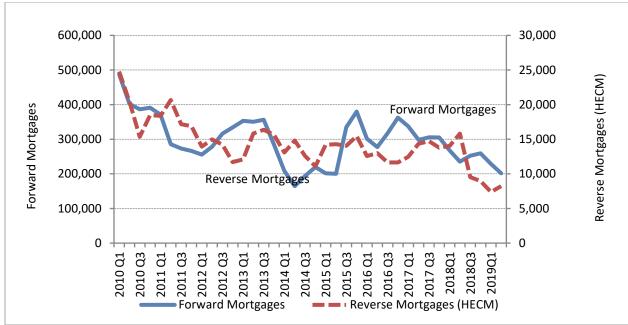

Exhibit 1. Endorsement Counts by Fiscal Year and Quarter

Borrower Credit Scores

Average borrower credit scores decreased to 665. Although this continues to be above the levels preceding the mortgage and credit crisis, it is well below the peak of 703 in FY 2011 Q2 (Exhibit 2, Exhibit A-4).

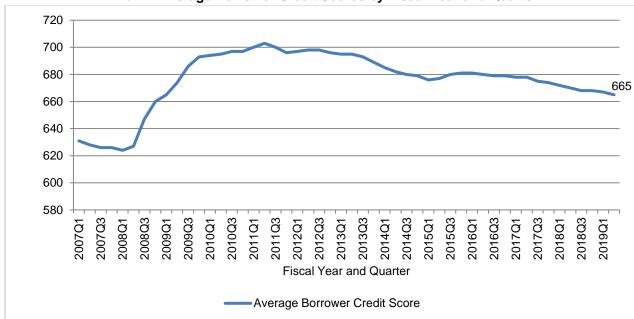

Exhibit 2. Average Borrower Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM endorsements. SOURCE: U.S. Department of HUD/FHA, April 2019

As shown in Exhibit 3a, the distribution of borrower credit scores has gradually changed over the past few years. The core of the distribution is in the 640–679 range (36.75 percent). In FY 2019 Q2 the share of 680–850 credit scores continued to decline. (Exhibit 3a, Exhibit A-3).

In Exhibit 3a, FHA's credit risk profile has been shifting from nearly 60 percent of borrowers at greater than 680 credit scores in FY2011 to about 34 percent, currently. At the same time, less than 640 borrowers have grown to nearly 30 percent. This increase shows a much riskier population of mortgages being endorsed by FHA. Performance of these mortgages will be closely monitored to determine when policy changes should be implemented.

In Exhibit 3b, borrowers with 720 and greater credit score decreased to 12.95 percent in Q2 FY 2019 from 13.51 percent in Q1 FY 2019, while borrowers with less than 620 credit score increased from 13.31 percent in Q1 FY 2019 to 13.76 percent in Q2 FY 2019.

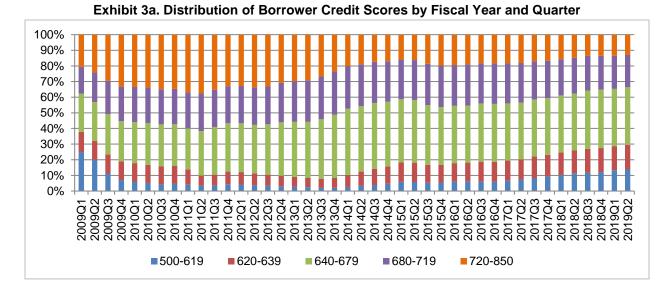

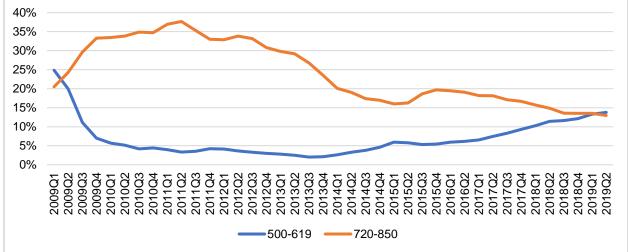

Exhibit 3b. Distribution of Select Borrower Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity. SOURCE: U.S. Department of HUD/FHA, April 2019.

Debt-to-Income (DTI)

FHA has seen an increase in the concentration of mortgages with high debt-to-income (DTI) ratios. High DTI ratios may preclude borrowers from having the ability to make current mortgage obligations. Almost 25 percent of all FHA-insured forward mortgage purchase transactions in FY 2018 were comprised of mortgages where the borrower had a DTI ratio above 50 percent, and for this quarter, the percentage of borrowers with DTI's above 50 is nearly 28 percent -the highest percentage since at least the year 2000. This is a risk to the MMIF that the FHA is attempting to manage and mitigate through various policy levers.

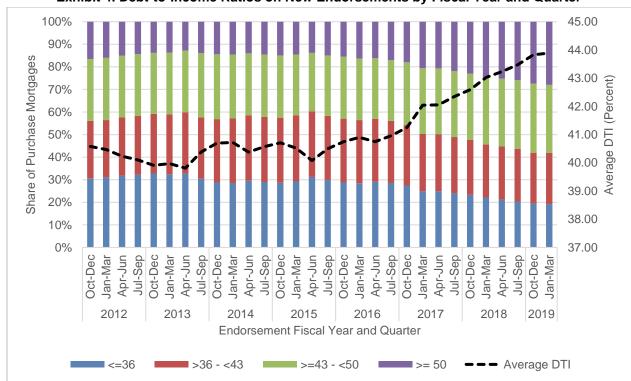

Exhibit 4. Debt-to-Income Ratios on New Endorsements by Fiscal Year and Quarter

Average Loan-to-Value (LTV)

The average LTV decreased from 92.13 percent to 92.05 percent for all FHA mortgages combined. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages. (Exhibit 4, Exhibit A-1, Exhibit A-5, Exhibit A-6). For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction. For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

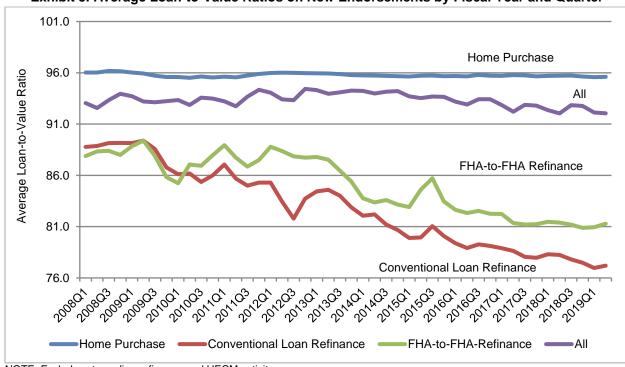

Exhibit 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity. SOURCE: U.S. Department of HUD/FHA, April 2019.

¹ Interested Party Contributions are contributions made to the borrower from an interested party to the transaction, customarily the property seller.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the second quarter of FY 2019 are presented in Exhibit 5. Prepayment speeds were lower than predicted. Claims were well below predictions. The number of actual claims through FY 2019 Q2 of 29,611 was 17.39 percent less than the predicted 35,843. That deviation comes from model forecasts and actuarial models deviating from actual experience. When institutional and/or borrower behaviors change, it can take a number of years for the actuarial models to have enough data to reset the behavioral patterns to adapt to those changes (Exhibit 5).

Exhibit 6. Termination and Claim Loss Experience Compared to Forecasts

January 2019– March 2019	Year to Date Predicted ^a	Year to Date Actual	Deviation (Actual Minus Predicted)	Percentage Deviation (Actual Versus Predicted)	
Prepayments (number)	595,045	331,981	(263,064)	(44.21)	
Claims (number) ^a	35,843	29,611	(6,232)	(17.39)	
Claims (\$ millions)b	3,619	2,302	(1,317)	(36.39)	
Net Loss on Claims (%) ^c	42.51	42.77	0.26	0.61	

na = not applicable.

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^a Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2018 and FY 2019 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

^b Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

^c These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2019 Q2 is -3.20 percent. The subsidy rate for HECM mortgages is -0.15 percent for FY 2019 Q2 (Exhibit 6).

Exhibit 7. Budget Execution Credit Subsidy Rates, FY 2019 Q2

Type of Mortgage	Rate (%) ^a
Forward Mortgages	-3.20
Reverse Mortgages (HECM)	-0.15

^a Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see https://www.govinfo.gov/content/pkg/BUDGET-2019-FCS/pdf/BUDGET-2019-FCS.pdf. SOURCE: U.S. Department of HUD/FHA, April 2019.

MMI Fund Cash and Investments

As Exhibit 7 shows, the cash and investments of the MMI Fund increased to \$49.87 billion in FY 2019 Q2, \$19.47 billion is held in the Financing account, and \$30.41 billion is held in the Capital Reserve account.

Exhibit 8. MMI Fund Cash and Investments by Quarter, FY 2012-FY 2019

Fiscal Year	Quarter	Capital Reserve Account ^a (\$ billions)	Financing Account ^b (\$ billions)	Total ^{c,d} (\$ billions)

2019	Jan-Mar	30.41	19.47	49.87

NOTE: Only end-of-year balances represent audited figures.

^a This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget reestimates.

^b This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

^c Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

^d Capital Reserve Account and Financing Account may not always add to total because of rounding.

Cash Flows from Business Operations

FY 2019 Q2 net cash flow was \$201 million compared to FY 2019Q1 of negative (\$597) million (Exhibit 8). HUD has been proactive in reducing average losses per claim through a more diversified asset disposition strategy, which includes the Distressed Asset Stabilization Program (DASP), promotion of third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program, and expanded eligibility for pre-foreclosure (short) sales. Claim costs (as measured by loss rates) have decreased from a high of 65 percent in 2011 to less than 50 percent over the last four quarters.

Exhibit 9. Business Operations Cash Flows, FY 2018 Q3-FY 2019 Q2 (\$ millions)

	FY 2018 Q3	FY 2018 Q4	FY 2019 Q1	FY 2019 Q2	Past 4 Quarters

NOTE: Unaudited figures; details may not sum to total due to rounding. Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^a Claim payments shown here include conveyance, pre-foreclosure sale, note sales, loss mitigation (home retention) actions, and all HECM claims (assignment and shortfall claims).

Early-Payment Delinquency Rates

The Early-Payment Delinquency (EPD) rate for mortgages originated in FY 2019 Q2 is up 10 basis points from the previous quarter.

^a Percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycle. SOURCE: U.S. Department of HUD/FHA, April 2019.

14

Serious Delinquency Rates

Serious delinquency (SDQ) rates for this quarter decreased to 3.88 percent, down 20 bps from last quarter. As the portfolio serious delinquency rate has reached historic lows and FHA credit profile shifts, FHA may see increases in SDQ rates going forward. For all cohorts, mortgages with DPA have typically underperformed those without DPA (Exhibit A-10).

SDQ rates tend to be somewhat seasonal and may fluctuate along current levels. Overall, serious delinquency rates are significantly improved from the highs seen in 2012.

NOTES: Shares are based on loan counts. Excludes streamline refinancing.

a Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more, which may have credit scores as low as 500. They are grouped here according to the "decision" score used for loan underwriting. The decision score represents the weakest borrower on a loan application when there are multiple applicants. Streamline refinance loans do not require full underwriting; therefore, they are not represented here. SOURCE: U.S. Department of HUD/FHA, April 2019.

^a In accordance with statutory requirements for determining eligibility of loans for FHA insurance, HUD measures loan-to-Value (LTV) ratio without including any financed mortgage insurance premium in the loan balance.

^b The statutory maximum LTV since October 1, 2008, is 96.5 percent. Prior to October 1, 2008, the statutory maximum was 97 percent, with higher allowances for borrowers financing loan closing costs into the mortgage balance. If there was such financing, then the statutory maximum was between 97 and 98.15 percent, depending on the geographic location and price of the property.

NOTE: Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

^a January and February 2019 only.

^b REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less that the amount owed. Short sales are part of the pre-foreclosure sale (PFS) program. CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title to the property to HUD. Note Sale refers to the sale of defaulted mortgage notes in order to reduce foreclosure costs for borrowers. Note Sales are conducted through the Distressed Asset Stabilization Program (DASP). SOURCE: U.S. Department of HUD/FHA, April 2019.

NOTE: The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary D. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation expenses. Due to differences in timing and data sources, cash flow amounts may not reconcile fully with other tables in this report.
