Reposting of Chapter 6 and Appendix 6

Chapter 6, Energy and Water Conservation, and its supplement Appendix 6 are both new to the latest revision of the MAP Guide. These two new sections address HUD’s incentive programs for meeting specific energy and water conservation standards and compliance requirements in greater detail.

Given the significance of the information outlined in these sections and the potential underwriting impact, the latest revised versions of these two sections are being reposted to the Drafting Table for additional communication to the public and stakeholders for greater familiarity.
