Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2021 Q1
Data as of December 31, 2020

U.S. Department of Housing and Urban Development
Federal Housing Administration

FOREWORD

On behalf of Secretary Fudge and Principal Deputy Assistant Secretary Lopa P. Kolluri and pursuant to requirements of section 202(a)(5) of the National Housing Act, as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year 2021 First Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration. The reporting period covers October 1, 2020 through December 31, 2020.

Millions of Americans are facing continued hardship from the COVID-10 pandemic, and the Biden Administration is taking action to prioritize housing stability and keep individuals and families safely housed. The COVID-19 pandemic has created a National Emergency for the United States and brought economic challenges to homeowners with FHA loans, many of whom are first time, low-to-moderate income borrowers, and disproportionately homeowners of color. FHA has taken proactive policy steps to assist homeowners facing hardships during these unprecedented times, offering forbearance, deferral of payments, and streamlined loss mitigation options for those impacted by COVID-19. The agency has ramped up mortgage servicer and housing counselor engagement, ensuring tools and flexibilities needed to manage delinquent forward and reverse mortgage loans are available to reach homeowners in need. HUD has coordinated with other federal housing agencies including VA and USDA to achieve alignment, with support from the [Biden Administration](#).

Early performance of the MMI Fund during FY 2020 showed improvement until the onset of the COVID-19 emergency in March 2020. The share of loans originated with higher risk attributes decreased or moderated in FY 2020. However, while early performance reflected overall improvement in the credit quality of FY 2020 endorsements during the first two quarters, portfolio performance deteriorated in the back end of the year, largely driven by COVID-19 related factors. COVID-19 related hardships continued in the first quarter of FY 2021. Seriously delinquent mortgages saw increases from 4 percent to approximately 12 percent compared to the same quarter of the previous year. Similarly, early payment defaults (EPDs) increased from less than one percent to almost six percent.

This quarterly report provides detailed information on the composition and credit quality of new insurance in force, and on FHA's financial position. In addition to this report to Congress, FHA provides information regarding the status of its Single-Family mortgage-insurance portfolio via the publication of other complementary reports, including the annual independent actuarial review of the MMI Fund and HUD's Annual Report to Congress on the Financial Status of the Mutual Mortgage Insurance Fund. All FHA reports can be found in the [Office of Housing Reading Room](#).

The Department is pleased to provide details to the Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Shawn R. Jones

Acting Associate Deputy Assistant Secretary
Office of Risk Management and Regulatory Affairs

This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund. The specific items requested under the Act are:

Mandated Item	Summary	Page	Exhibit
A) Cumulative volume of mortgage insurance commitments that have been made during such fiscal year through the end of the quarter for which the report is submitted	Single-Family forward endorsements during the first quarter of FY 2021 declined 0.47 percent by count from the prior quarter. Single-Family forward endorsement volume was \$84.66 billion, up by 0.83 percent from the prior quarter. Home Equity Conversion Mortgage (HECM) reverse mortgage endorsements by count were down 6.59 percent from the previous quarter. HECM endorsement volume, at \$4.71 billion for the first quarter of FY 2021, represents a decrease of 6.81 percent from the previous quarter.	5 , 18 , 19	1 , A-1 , A-2
B) Types of mortgages insured, categorized by risk	The average credit score this quarter decreased to 676. Endorsement share of 720+ credit score mortgages decreased from 15.78 percent to 15.20 percent. The share of less than 640 credit score mortgages increased from 16.16 percent to 17.10 percent. 22.87 percent of all FHA-insured forward mortgage purchase transactions in this quarter were comprised of mortgages where the debt-to-income (DTI) ratio is above 50 percent. This is up from last quarter and down from 25.40 the same quarter last year. The average DTI for mortgages endorsed this quarter was 43.07. Average property loan-to-value ratio for all endorsements during this period decreased to 93.43 percent.	6 , 7 , 8 , 9 , 10 , 19 , 20 , 21 , 22 , 23 , 26	2 , 3a , 3b , 4 , 5 , A-3 , A-4 , A-5 , A-6 , A-9
C) Any significant changes between actual and projected claim and prepayment activity	Prepayment speeds this quarter were 30.22 percent higher than predicted. Claims were 77.45 percent below predicted level by count and 79.75	11 ,	6 ,

	percent below predicted level by dollar amount.		
D) Projected versus actual loss rates	The year-to-date actual net loss rate on claim activity of 35.20 percent is higher than the projection of 30.09 percent.	11	6
E) Updated projections of the annual subsidy rates	The budget execution credit subsidy rates (CSR) for FY 2021 Q1 are at - 3.36 percent for forward mortgages and -2.39 for HECMs.	12	7

Additional Risk Factors	Summary	Page	Exhibit
F) MMI Fund Cash and Investments	The MMI Fund Cash and Investments account total balance at the end of FY 2021 Q1 was \$82.27 billion, up from \$79.86 billion last quarter.	13	8
G) Business Operations Cash Flow	FHA received approximately \$4.76 billion in revenues from premium collections, sale of notes and properties, and other revenue. FHA paid \$2.43 billion in claims and property expenses. In FY 2021 Q1, core business-operations cash flow increased to \$2.33 billion mostly due to a lower volume of claims.	14	9
H) Early Payment Default	The early payment default (EPD) rate decreased this quarter to 6.06 percent, from 8.90 percent last quarter.	15	10
I) Serious Delinquency Rates	The portfolio-level serious delinquency rate increased this quarter to 11.89 percent, from 11.59 percent last quarter. However, subsequent to FY2021Q1 end serious delinquency rates have slightly declined and are at 11.83 percent for month ending January 31, 2021.	16	11
J) Termination Claim Type with Loss Severity Rates	The forward portfolio loss rate decreased to 35.40 percent from 38.47 percent last quarter. Total loan dispositions fell from 8,286 last quarter to 4,329 this quarter due to FHA's	24	A-7

Additional Risk Factors	Summary	Page	Exhibit
	temporary foreclosure and eviction moratorium.		
K) Cash-Out Refinancing Rates	Purchase mortgage share decreased from 65.27 percent last quarter to 63.80 percent. Cash-out refinance mortgage share increased to 5.33 percent from 4.48 percent last quarter.	25	A-8
L) Down Payment Assistance (DPA) – Serious Delinquency Rate (SDQ)	The share of Down Payment Assistance (Purchase only mortgages) increased from 39.19 percent last quarter to 40.72 percent.	27	A-10
M) Reverse Mortgage (HECM) Program Claims	Total HECM program claims decreased this quarter from 11,872 loans to 9,263 loans due to lower number of assigned Claims (Type 1, Type 2 and Supplemental) to HUD.	28	A-11

Endorsement Activity

During the first quarter of fiscal year (FY) 2021, FHA endorsed 357,540 forward mortgages for insurance, a decrease of 0.47 percent from the prior quarter (Exhibit A-1).

The dollar volume of refinance endorsements (Conventional to FHA, FHA to FHA) in the quarter was up 2.82 percent from the previous quarter, while the dollar volume of all forward-mortgage endorsements increased 0.83 percent (Exhibit A-2).

FHA-to-FHA refinance activity, in terms of endorsed mortgages increased by 2.79 percent from the previous quarter, from 110,605 to 113,686. Over the last two years, FHA has seen a significant increase of FHA streamline loan endorsements.

HECM endorsement volume, \$4.71 billion for the first quarter of FY 2021, was down 6.81 percent from the previous quarter. HECM endorsement counts in FY 2021 Q1 of 11,386 were down 6.59 percent from last quarter.

Exhibit 1. Endorsement Counts by Fiscal Year and Quarter

SOURCE: U.S. Department of HUD/FHA, January 2021.

FHA Loan Credit Characteristics

Average credit scores decreased to 676. This remains above the level preceding the mortgage and credit crisis, and below the peak of 703 in FY 2011 Q2 (Exhibit 2, Exhibit A-4).

Exhibit 2. Average Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM endorsements.

SOURCE: U.S. Department of HUD/FHA, January 2021

As shown in Exhibit 3a, the distribution of credit scores on FHA loans has gradually changed over the past few years. The core of the distribution is in the 640–679 range (42.78 percent). In FY 2021 Q1 the share of 680–850 credit scores decreased by 1.36 percentage points from FY 2020 Q4. (Exhibit 3a, Exhibit A-3).

Exhibit 3a, shows that FHA’s credit risk profile has been shifting from nearly 50 percent of mortgages with 680 and greater credit scores in FY 2012 to about 40 percent, currently. At the same time, the share of mortgages with less than 640 credit scores declined to around 17 percent from 26 percent a year ago.

As shown in Exhibit 3b, FHA loans originated with greater than 720 credit scores decreased to 15.20 percent in Q1 FY 2021 from 15.78 percent in Q4 FY 2020, while FHA loans originated with less than 620 credit scores increased modestly from 4.45 percent in Q4 FY 2020 to 4.81 percent in Q1 FY 2021.

Exhibit 3b. Distribution of Select Credit Scores by Fiscal Year and Quarter

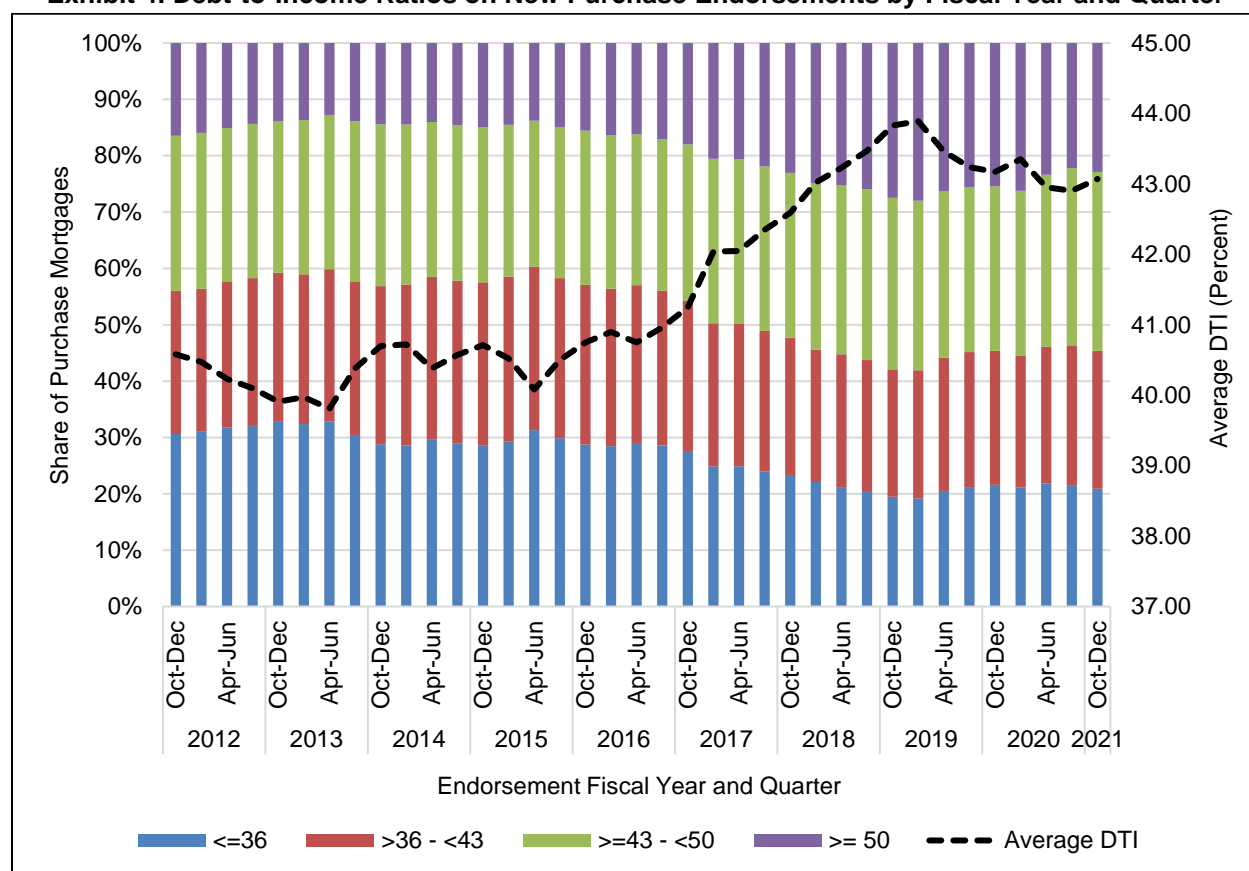

NOTE: Excludes streamline refinance and HECM activity.
SOURCE: U.S. Department of HUD/FHA, January 2021.

Debt-to-Income (DTI)

From FY 2015 to FY 2019 FHA saw average increases in the concentration of purchase mortgages with high debt-to-income (DTI) ratios. More than 22 percent of all FHA-insured forward mortgage purchase transactions in FY 2021 are comprised of mortgages with DTI ratios exceeding 50 percent. The average DTI for all endorsements during this quarter was 43.07.

Exhibit 4. Debt-to-Income Ratios on New Purchase Endorsements by Fiscal Year and Quarter

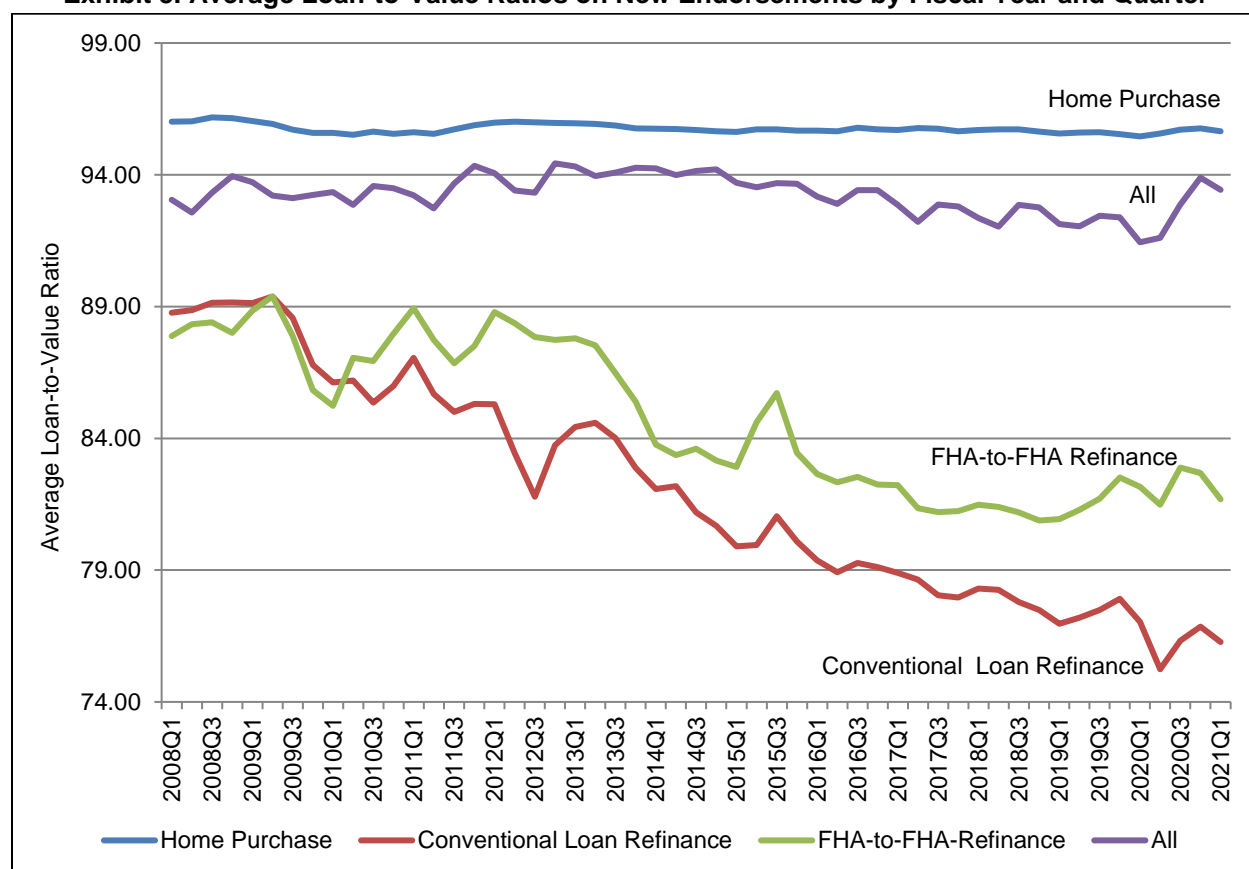

NOTE: Excludes streamline refinance and HECM activity.

SOURCE: U.S. Department of HUD/FHA, January 2021.

Average Loan-to-Value (LTV)

The average LTV ratio decreased from 93.89 percent to 93.43 percent for all FHA mortgages combined. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages. (Exhibit 5, Exhibit A-1, Exhibit A-5, Exhibit A-6). For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction.¹ For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

Exhibit 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity.

SOURCE: U.S. Department of HUD/FHA, January 2021.

¹ Interested Party Contributions are contributions made to the borrower from an interested party to the transaction, customarily the property seller.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the first quarter of FY 2021 are presented in Exhibit 6. Prepayment speeds were significantly higher than predicted. Claims were well below predicted. The number of actual claims through FY 2021 Q1 of 5,224 was 77.45 percent less than the predicted 23,167. When institutional and/or borrower behaviors change, it can take a few years for the actuarial models to have enough data to reset the behavioral patterns to adapt to those changes (Exhibit 6).

Exhibit 6. Termination and Claim Loss Experience Compared to Forecasts

As of December, 2020	Year to Date Predicted ^a	Year to Date Actual	Deviation (Actual Minus Predicted)	Percentage Deviation (Actual Versus Predicted)
Prepayments (number)	362,774	472,394	109,620	30.22
Claims (number) ^a	23,167	5,224	(17,943)	(77.45)
Claims (\$ millions) ^b	1,785	362	(1,424)	(79.75)
Net Loss on Claims (%) ^c	30.09	35.20	5.11	16.98

na = not applicable.

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^a Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2020 and FY 2021 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

^b Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

^c These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

SOURCE: U.S. Department of HUD/FHA, January 2021.

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2021 Q1 is -3.36 percent. The subsidy rate for HECM mortgages is -2.39 percent for FY 2021 Q1 (Exhibit 7).

Exhibit 7. Budget Execution Credit Subsidy Rates, FY 2021 Q1

Type of Mortgage	Rate (%) ^a
Forward Mortgages	-3.36
Reverse Mortgages (HECM)	-2.39

^a Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see <https://www.govinfo.gov/content/pkg/BUDGET-2021-FCS/pdf/BUDGET-2021-FCS.pdf>. SOURCE: U.S. Department of HUD/FHA, January 2021.

MMI Fund Cash and Investments

As Exhibit 8 shows, the total cash, and investments of the MMI Fund increased to \$82.27 billion in FY 2021 Q1, \$9.62 billion is held in the Financing account, and \$72.65 billion is held in the Capital Reserve account.

Exhibit 8. MMI Fund Cash and Investments by Quarter, FY 2012–FY 2021

NOTE: Only end-of-year balances represent audited figures.

^a This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget reestimates.

^b This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

^c Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

^d Capital Reserve Account and Financing Account may not always add to total because of rounding.

SOURCE: U.S. Department of HUD/FHA, January 2021.

Cash Flows from Business Operations

FY 2021 Q1 net cash flow was \$2,333 million compared to FY 2020 Q4 of \$2,249 million (Exhibit 9). HUD has been proactive in reducing average losses per claim through a more diversified asset disposition strategy, which includes the promotion of third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program, expanded eligibility for pre-foreclosure (short) sales and Distressed Asset Stabilization Program (DASP). Claim costs (as measured by loss rates) have decreased from a high of 63 percent in 2012 to less than 40 percent over the last four quarters (see Exhibit A-7).

Exhibit 9. Business Operations Cash Flows, FY 2020 Q2–FY 2021 Q1 (\$ millions)

Early-Payment Default Rates

The Early-Payment Default (EPD) rate has increased as a result of ongoing COVID-19 hardships and the volume of loans entering forbearance. Virtually the entire increase occurred beginning May 2020, at the height of the pandemic's economic fallout. The EPD rate quickly increased to 9 percent by mid-year of FY 2020 and is now 6.06 percent.

^a Percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycle.

*Data for Apr and May only.

SOURCE: U.S. Department of HUD/FHA, January 2021.

Serious Delinquency Rates

The pandemic and its impact to the health and economic condition of citizens has created an increase in Serious delinquency (SDQ) rates from 11.59 percent last quarter to 11.89 percent this quarter. The increase is a result of the hardships that FHA borrowers experienced due to the COVID-19 economic and health crisis, and borrowers that have fallen behind on their mortgages having received forbearance, which allows them to delay payments under the CARES Act. Virtually the entire increase occurred beginning May 2020, resulting from the onset of the COVID-19 pandemic. The SDQ rate continues to rise in FY 2021, to nearly 12 percent as of December 31.

NOTE: Shares are based on loan counts. Excludes streamline refinancing. Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more which may have credit scores as low as 500. They are grouped here according to the “decision” score used for loan underwriting. The decision score represents the lowest score on a loan application when there are multiple applicants. Streamline refinance loans do not require full underwriting; therefore, they are not represented here.

NOTES: Shares are based on loan counts. Excludes streamline refinancing.

^a In accordance with statutory requirements for determining eligibility of loans for FHA insurance, HUD measures loan-to-Value (LTV) ratio without including any financed mortgage insurance premium in the loan balance.

^b The statutory maximum LTV since October 1, 2008, is 96.5 percent. Prior to October 1, 2008, the statutory maximum was 97 percent, with higher allowances for borrowers financing loan closing costs into the mortgage balance. If there was such financing, then the statutory maximum was between 97 and 98.15 percent, depending on the geographic location and price of the property.

NOTE: Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

^a October and November 2020 only.

^b REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less than the amount owed. Short sales are part of the pre-foreclosure sale (PFS) program. CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title to the property to HUD. Note Sale refers to the sale of defaulted mortgage notes in order to reduce foreclosure costs for borrowers. Note Sales are conducted through the Distressed Asset Stabilization Program (DASP).

^a Claims comprise claim types *Foreclosure*, *Deed in Lieu of Foreclosure*, and *Mortgagor's Short Sale*.^b Details may not sum to total due to rounding.

NOTE: The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary D. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation expenses. Due to differences in timing and data sources, cash flow amounts may not reconcile fully with other tables in this report.
