

Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2021 Q3 Data as of June 30, 2021

U.S. Department of Housing and Urban Development Federal Housing Administration

FOREWORD

On behalf of Secretary Fudge and Principal Deputy Assistant Secretary Lopa P. Kolluri and pursuant to requirements of section 202(a)(5) of the National Housing Act, as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year 2021 Third Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration (FHA). The reporting period covers April 1, 2021 through June 30, 2021.

Immediately upon taking office, the Biden Administration began taking substantive actions to prioritize housing stability and keep individuals and families safely housed during the COVID-19 National Emergency. These efforts continue to address the economic challenges to homeowners with FHA-insured mortgages, many of whom are first time, low-to-moderate income borrowers, and disproportionately homeowners of color. During the third quarter of FY 2021, FHA maintained its strong focus on assisting homeowners facing hardships during these unprecedented times. On June 25, 2021, FHA announced its Advance Loan Modification, extended the time period for homeowners to start new forbearance plans to September 30, 2021, extended Home Equity Conversion Mortgage extension requests, and made other changes to assist those impacted by COVID-19. The agency continues to engage with mortgage servicers, consumer advocates, and housing counselors, ensuring tools and flexibilities needed to manage delinquent forward and reverse mortgage loans are available to reach homeowners in need.

COVID-19 related hardships continued in the third quarter of FY 2021. Seriously delinquent mortgages saw increases from 9 percent to approximately 10 percent compared to the same quarter of the previous year. However, early payment defaults (EPDs) decreased from a peak around nine percent in early 2020 to below two percent. This is still elevated relative to historical results but is an improving trend. We must continue to focus extensive efforts on reaching and helping struggling homeowners to obtain both immediate relief and return to long-term homeownership sustainability.

This quarterly report also provides detailed information on the composition and credit quality of new insurance in force, and on FHA's financial position. In addition to this report to Congress, FHA provides information regarding the status of its Single-Family mortgage-insurance portfolio via the publication of other complementary reports, including the annual independent actuarial review of the MMI Fund and HUD's Annual Report to Congress on the Financial Status of the Mutual Mortgage Insurance Fund. All FHA reports can be found in the Office of Housing Reading Room.

The Department is pleased to provide details to the Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Mia N. Pittman

Deputy Assistant Secretary

Mia N. Pittman

Office of Risk Management and Regulatory Affairs

U.S. Department of Housing and Urban Development
This report is in fulfillment of the requirement under section 2118 of the Housing and Economic
Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis
respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund.

Endorsement Activity

During the third quarter of fiscal year (FY) 2021, FHA endorsed 366,115 forward mortgages for insurance, an increase of 2.16 percent from the prior quarter (Exhibit A-1). This is the largest number of forward endorsements since FY 2015 Q4.

The dollar volume of purchase endorsements during the quarter was up 6.43 percent from the previous quarter.

The dollar volume of refinance endorsements (Conventional to FHA, FHA to FHA) in the quarter was down 4.33 percent from the previous quarter. The dollar volume of all forward-mortgage endorsements increased 1.66 percent (Exhibit A-2).

FHA purchase activity by loan count was up 5.4 percent from the previous quarter from 193,525 mortgages to 203,897 mortgages. FHA-to-FHA refinance activity, in terms of endorsed mortgages decreased by 2.73 percent from the previous quarter, from 142,844 to 138,948. Conventional to FHA refinance mortgages increased by 5.26 percent, from 22,021 to 23,180 mortgages.

HECM endorsement volume, \$5.60 billion for the third quarter of FY 2021, was up 5.26 percent from the previous quarter. HECM endorsement counts in FY 2021 Q3 of 12,683 were down 1.01 percent from last quarter.

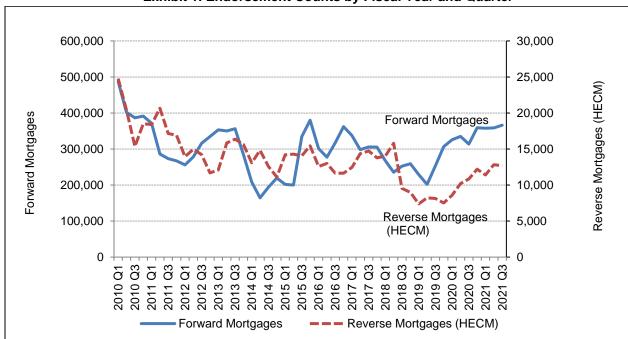

Exhibit 1. Endorsement Counts by Fiscal Year and Quarter

FHA Loan Credit Characteristics

Average credit scores decreased to 670. While this average is lower than the peak of 703 during FY 2011 Q2, it is well above the low of 624 during FY 2008 Q1 (Exhibit 2, Exhibit A-4).

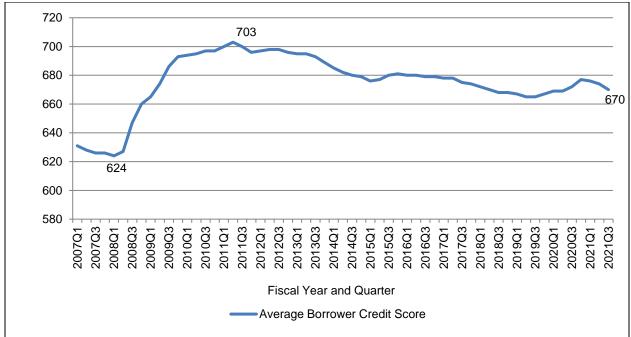

Exhibit 2. Average Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM endorsements.

As shown in Exhibit 3a, the distribution of credit scores on FHA loans has gradually changed over the past few years. The core of the distribution is in the 640–679 range (42.26 percent). In FY 2021 Q3 the share of 680–850 credit scores decreased by 3.71 percentage points from FY 2021 Q2. (Exhibit 3a, Exhibit A-3).

Exhibit 3a, shows that FHA's credit risk profile has been shifting from nearly 42 percent of mortgages with 680 and greater credit scores in FY 2020 Q4 to about 35 percent, currently. At the same time, the share of mortgages with less than 640 credit scores increased to around 23 percent from 22 percent a year ago.

As shown in Exhibit 3b, FHA loans originated with greater than 720 credit scores decreased to 12.68 percent in FY 2021 Q3 from 14.48 percent in FY 2021 Q2, while FHA loans originated with less than 620 credit scores increased from 5.75 percent in FY 2021 Q2 to 7.48 percent in FY 2021 Q3.

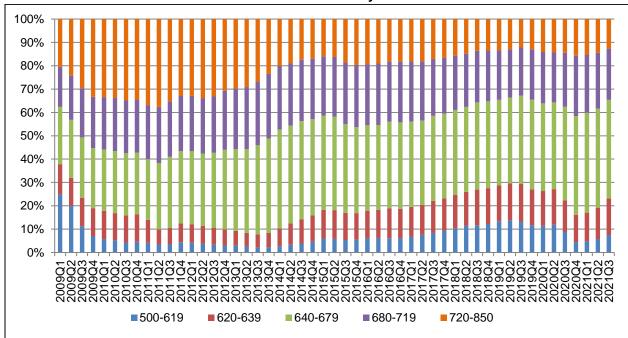

Exhibit 3a. Distribution of Credit Scores by Fiscal Year and Quarter

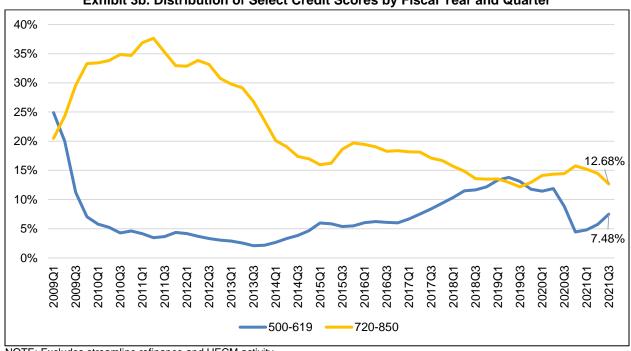

Exhibit 3b. Distribution of Select Credit Scores by Fiscal Year and Quarter

Debt-to-Income (DTI)

More than 24 percent of all FHA-insured forward mortgage purchase transactions in FY 2021 are comprised of mortgages with DTI ratios exceeding 50 percent. The average DTI for all endorsements during this quarter increased to 43.27 percent, compared with 43.09 percent the previous quarter.

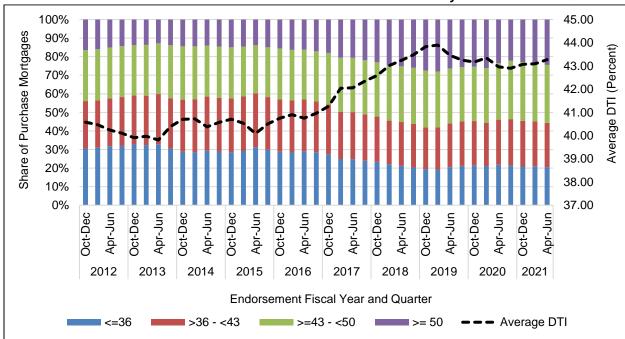

Exhibit 4. Debt-to-Income Ratios on New Purchase Endorsements by Fiscal Year and Quarter

Average Loan-to-Value (LTV)

The average overall LTV ratio for purchase and refinance loans decreased from 92.02 percent to 91.64 percent for all FHA mortgages combined. Typically, LTV¹ ratios of refinance mortgages are lower than home purchase mortgages. (Exhibit 5, Exhibit A-1, Exhibit A-5, Exhibit A-6).

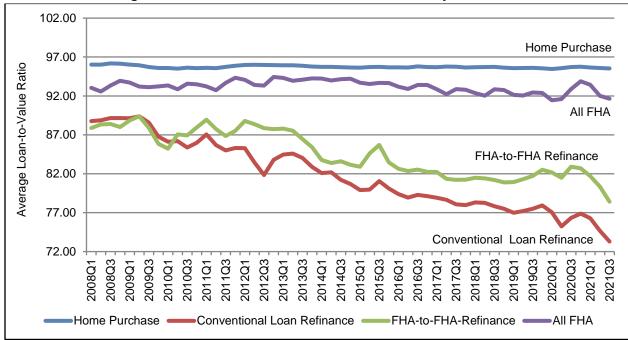

Exhibit 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

_

¹ For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction. For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the third quarter of FY 2021 are presented in Exhibit 6. Prepayment speeds were significantly higher than predicted due to actual interest rates remaining below forecasted interest rates. Claims were well below predicted due to policy decisions regarding eviction moratorium, forbearance, and loss mitigation options. The number of actual claims through FY 2021 Q3 of 14,078 was 78.52 percent less than the predicted 65,530. When institutional and/or borrower behaviors change, it can take a few years for the actuarial models to have enough data to reset the behavioral patterns to adapt to those changes (Exhibit 6).

Exhibit 6. Termination and Claim Loss Experience Compared to Forecasts

As of June, 2021	Year to Date Predicted ^a	Year to Date Actual	Deviation (Actual Minus Predicted)	Percentage Deviation (Actual Versus Predicted)
Prepayments (number)	1,113,512	1,429,984	316,472	28.42
Claims (number) ^a	65,530	14,078	(51,452)	(78.52)
Claims (\$ millions) ^b	4,978	962	(4,016)	(80.68)
Net Loss on Claims (%) ^c	27.40	35.81	8.40	30.67

na = not applicable.

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^a Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2020 and FY 2021 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

^b Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

^c These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2021 Q3 is -3.36 percent. The subsidy rate for HECM mortgages is -2.39 percent for FY 2021 Q3 (Exhibit 7).

Exhibit 7. Budget Execution Credit Subsidy Rates, FY 2021 Q3

Type of Mortgage	Rate (%) ^a
Forward Mortgages	-3.36
Reverse Mortgages (HECM)	-2.39

^a Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see https://www.govinfo.gov/content/pkg/BUDGET-2021-FCS/pdf/BUDGET-2021-FCS.pdf. SOURCE: U.S. Department of HUD/FHA, July 2021.

MMI Fund Cash and Investments

As Exhibit 8 shows, the total cash, and investments of the MMI Fund increased to \$87.36 billion in FY 2021 Q3, \$4.95 billion is held in the Financing account, and \$82.41 billion is held in the Capital Reserve account.

NOTE: Only end-of-year balances represent audited figures.

^a This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget reestimates.

b This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

^d Capital Reserve Account and Financing Account may not always add to total because of rounding.

Cash Flows from Business Operations

FY 2021 Q3 net cash flow was \$2,322 million compared to FY 2021 Q2 of \$2,430 million (Exhibit 9). HUD has been proactive in reducing average losses per claim through a more diversified asset disposition strategy, which includes the promotion of third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program, expanded eligibility for preforeclosure (short) sales and Distressed Asset Stabilization Program (DASP). Claim costs (as measured by loss rates) have decreased from a high of 62 percent in 2013 to less than 40 percent over the last four quarters (see Exhibit A-7).

Exhibit 9. Business Operations Cash Flows, FY 2020 Q4 - FY 2021 Q3 (\$ millions)

	FY 2020 Q4	FY 2021 Q1	FY 2021 Q2	FY 2021 Q3	Past 4 Quarters

Net Operations Cash Flow	2,249	2,333	2,430	2,322	9,334

NOTE: Unaudited figures; details may not sum to total due to rounding. Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^{**} Note Sale Proceeds, are the Cash Receipts from Note Sales. Note Collections, include Principal and Interest collections on HUD-held defaulted notes (Partial Claims)

^a Claim payments shown here include conveyance, pre-foreclosure sale, note sales, loss mitigation (home retention) actions, and all HECM claims (assignment and shortfall claims).

Early-Payment Default Rates

The overall Early-Payment Default (EPD) rate, while still historically elevated, is down from the same quarter last year. FHA saw a large jump in EPD rates at the beginning of the pandemic which continued through mid-2020. The EPD rate has since moderated to 1.91 percent during FY 2021 Q3.

^a Percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycle.

^{*}Data for October and November only. Due to late reporting by a large servicer, the EPD rates in repayment FY 2020 Q4 are likely understated.

Serious Delinquency Rates

The pandemic and its impact to the health and economic condition of citizens has created an overall increase in Serious delinquency (SDQ) rates compared to FHA's pre-pandemic rate. However, we had a decline from 11.61 percent last quarter to 10.11 percent this quarter, likely attributed to this year's lower unemployment rate, government's stimulus efforts and overall improved economic conditions. FHA's overall SDQ rate increase since FY 2020 is a result of the hardships that FHA borrowers experienced due to the COVID-19 economic and health crisis, and borrowers that have fallen behind on their mortgages having received forbearance, which allows them to delay payments under the CARES Act. Virtually the entire increase occurred beginning May 2020, resulting from the onset of the COVID-19 pandemic.

NOTE: Shares are based on loan counts. Excludes streamline refinancing^a. Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more which may have credit scores as low as 500. Streamline refinance loans do not require full underwriting; therefore, they are not represented here SOURCE: U.S. Department of HUD/FHA, July 2021.

NOTES: Shares are based on loan counts. Excludes streamline refinancing.

^a In accordance with statutory requirements for determining eligibility of loans for FHA insurance, HUD measures loan-to-Value (LTV) ratio without including any financed mortgage insurance premium in the loan balance.
^b The statutory maximum LTV since October 1, 2008, is 96.5 percent. Prior to October 1, 2008, the statutory maximum was 97 percent, with

^b The statutory maximum LTV since October 1, 2008, is 96.5 percent. Prior to October 1, 2008, the statutory maximum was 97 percent, with higher allowances for borrowers financing loan closing costs into the mortgage balance. If there was such financing, then the statutory maximum was between 97 and 98.15 percent, depending on the geographic location and price of the property. NOTE: Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

^a April and May 2021 only

^b REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less that the amount owed. Short sales are part of the pre-foreclosure sale (PFS) program. CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgages without conveying (transferring) the title to the property to HUD. Note Sale refers to the sale of defaulted mortgage notes in order to reduce foreclosure costs for borrowers. Note Sales are conducted through the Distressed Asset Stabilization Program (DASP).

a Claims comprise claim types Foreclosure, Deed in Lieu of Foreclosure, and Mortgagor's Short Sale.

NOTE: The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary D. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation expenses. SOURCE: US Department of HUD/FHA, July 2021.

a Serious delinquency rates are the sum of 90 day delinquencies, plus in-foreclosures and in-bankruptcies. Due to late reporting by a large servicer, the delinquency rates for February 2021 are likely understated. SOURCE: US Department of HUD/FHA, July 2021.
