

Quarterly Report to Congress

Financial Status of the Mutual Mortgage Insurance Fund

Fiscal Year 2022, Quarter Four

Office of Risk Management and Regulatory Affairs, Office of
Evaluation, Reporting & Analysis Division

Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2022 Q4
Data as of September 30, 2022

U.S. Department of Housing and Urban Development
Federal Housing Administration

FOREWORD

On behalf of Secretary Marcia L. Fudge and Assistant Secretary for Housing Julia R. Gordon, and pursuant to requirements of Section 202(a)(5) of the National Housing Act as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year (FY) 2022 Fourth Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration (FHA) for the reporting period covering July 1, 2022, through September 30, 2022.

Through the fourth quarter of FY 2022, FHA served 578,675 first-time homebuyers, representing 84 percent of FHA's forward purchase mortgage endorsements. FHA also served 196,114 households of color with purchase mortgages and 64,437 seniors were able to access their home equity using FHA's Home Equity Conversion Mortgage Program (HECM). During the same period, FHA maintained its strong focus on assisting homeowners facing hardships through the COVID-19 National Emergency. For those homeowners who fell behind on their mortgage payments since the start of the pandemic, FHA continued to deliver expanded flexibilities and forbearance options. The agency continues to engage with mortgage servicers, consumer advocates, and housing counselors, ensuring loss mitigation tools needed to manage delinquent forward and reverse mortgage loans are available to reach homeowners in need.

A number of FHA borrowers continued to face COVID-19 related hardships in the fourth quarter of FY 2022. Seriously delinquent mortgages (those past due 90 or more days) are still elevated from the pre-pandemic period, although the portfolio experienced a decline in delinquencies from 8.81 percent to 4.77 percent compared to the same quarter end of FY 2021. In addition, early payment defaults (defaults within six months of endorsement) declined from a peak of approximately nine percent in early 2020 to less than two percent through the current quarter. This is still above average relative to historical results but is an improving trend. FHA will continue to focus extensive efforts on helping struggling homeowners to obtain financial relief needed to achieve long-term homeownership sustainability.

This quarterly report also provides detailed information on the composition and credit quality of new insurance in force, and on FHA's financial position. In addition to this report to Congress, FHA provides information regarding the status of its Single-Family mortgage insurance portfolio via the publication of other complementary reports, including HUD's Annual Report to Congress on the Financial Status of the Mutual Mortgage Insurance Fund and the annual independent actuarial review of the MMI Fund. All FHA reports can be found in the [Office of Housing Reading Room](#).

The Department is pleased to provide details to members of Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Mia N. Pittman

Mia N. Pittman
Deputy Assistant Secretary Office of Risk
Management and Regulatory Affairs

This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund.

Endorsement Activity

During the fourth quarter of fiscal year (FY) 2022, FHA endorsed 216,036 forward mortgages for insurance, a decrease of 1.23 percent from the prior quarter (Figure 1a). This decrease is due to a decline in refinancing activity driven by the rise of interest rates. During the quarter, the dollar volume of purchase endorsements was up 7.33 percent or \$3.29 billion from the previous quarter while refinance endorsements (Conventional to FHA, FHA to FHA) of \$11.28 billion in the quarter were down \$2.31 billion, or 17.01 percent, from the previous quarter. The dollar volume of all forward mortgage endorsements of \$59.45 billion increased 1.67 percent (Exhibit A-2).

FHA purchase activity by loan count was up 4.45 percent from the previous quarter, from 161,080 mortgages to 168,250 mortgages. FHA-to-FHA refinance endorsements decreased by 25.38 percent from the previous quarter, from 34,393 to 25,663, mostly due to the recent rise in interest rates. Conventional to FHA refinance mortgages also decreased by a lesser percent, by 4.84 percent, from 23,249 to 22,123 mortgages.

Figure 1a. Forward Endorsement Counts by Fiscal Year and Quarter

SOURCE: U.S. Department of HUD/FHA, October 2022.

HECM endorsement volume, \$7.20 billion for the fourth quarter of FY 2022, decreased 22.78 percent from the previous quarter. The decline in HECM endorsements is likely attributable to an increase in market interest rates which outpaced any increase in home values. HECM endorsement counts during the fourth quarter of 13,867 similarly decreased by 22.79 percent from last quarter. Figure 1b shows FHA HECM endorsements relative to the Federal Housing Finance Agency (FHFA) Quarterly United States House Price Index.

Figure 1b. HECM Endorsement Counts by Fiscal Year and Quarter

FHA Loan Credit Characteristics

Average credit scores remained at 663 in the fourth quarter of FY 2022. While this average is lower than the peak of 703 in the second quarter of FY 2011, it remains well above the low of 624 during the first quarter of FY 2008 (Figure 2, Exhibit A-4).

Figure 2. Average Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM endorsements.
 SOURCE: U.S. Department of HUD/FHA, October 2022

As shown in Figure 3a, the distribution of credit scores on FHA loans has gradually shifted over the past few years. The core of the distribution continues to be in the 640–679 range (39.41 percent). In the fourth quarter of FY 2022, the share of 720+ credit scores increased by 0.41 percentage points from the quarter prior. (Figure 3a, Exhibit A-3).

Figure 3a shows FHA’s credit risk profile shifting from nearly 36 percent of mortgages with 680 and greater credit scores in the third quarter of FY 2021 to about 31 percent currently. At the same time, the share of mortgages with less than 640 credit scores increased to near 30 percent from 23 percent a year ago. This shift likely reflects FHA lenders easing the more stringent underwriting standards that were enforced at the start of the pandemic.

Figure 3a. Distribution of Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity.
 SOURCE: U.S. Department of HUD/FHA, October 2022.

Figure 3b shows another perspective of the shift in FHA’s credit profile with loans endorsed with greater than 720 credit scores increasing to 10.75 percent in the fourth quarter of FY 2022 from 10.34 percent in the prior quarter and loans endorsed with less than 620 credit scores increasing from 12.98 percent in the second quarter of FY 2022 to 13.62 percent this quarter.

Figure 3b. Distribution of Select Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity.
 SOURCE: U.S. Department of HUD/FHA, October 2022.

Debt-to-Income (DTI)

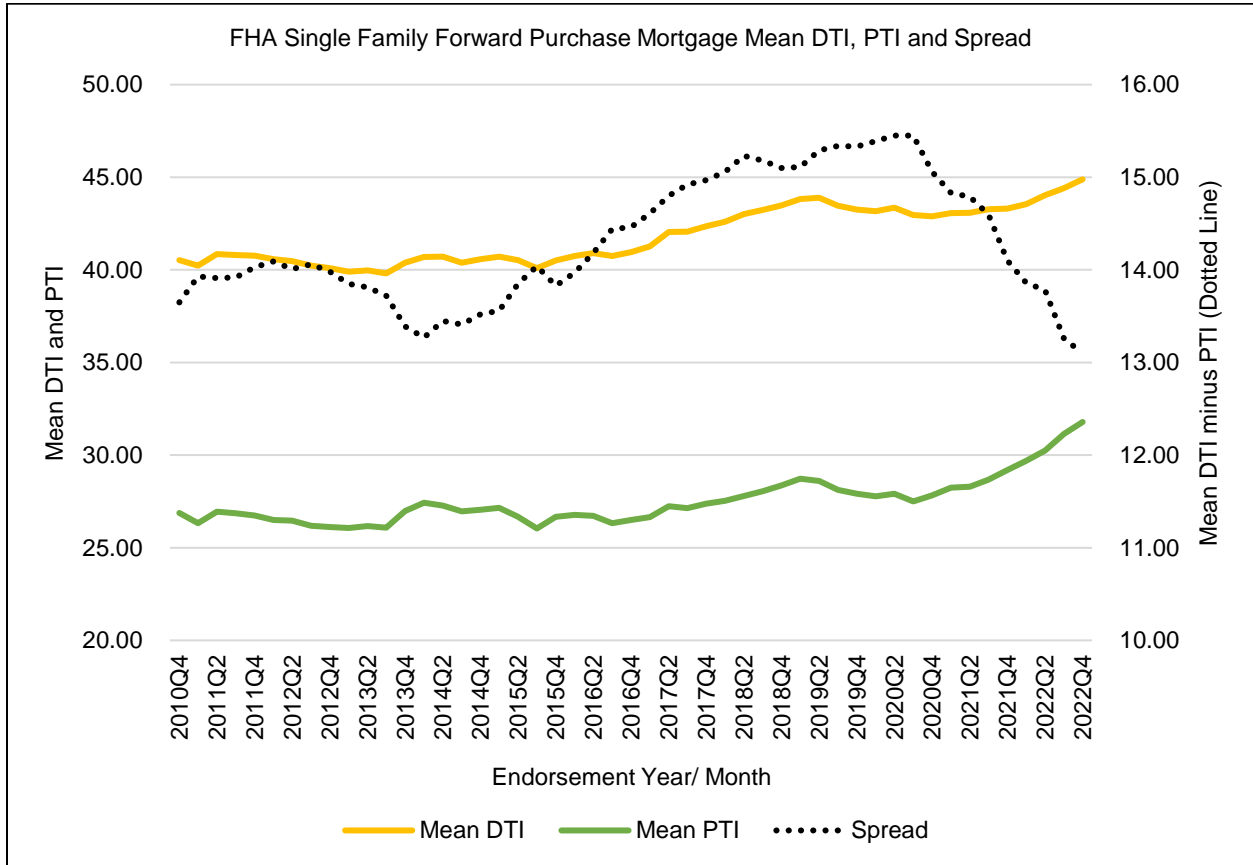

Nearly 31 percent of all FHA-insured forward mortgage purchase transactions in the fourth quarter of FY 2022 are comprised of mortgages with DTI ratios 50 percent or greater. This is up from approximately 29 percent last quarter, and higher by five percentage points prior to the pandemic. The average DTI for all endorsements during this quarter increased to 44.89 percent, compared with 44.42 percent the previous quarter. The distribution changes and historical average DTI are shown in Figure 4a below. In addition, Figure 4b reflects the median DTI, mean payment-to-income ratio (PTI) as well as the spread between those two ratios for endorsed FHA forward mortgages. The decrease in the spread between ratios may indicate that borrowers are spending a larger percentage of their incomes on housing expenses, likely due at least in part to decreasing housing affordability resulting from rising home prices seen in recent years.

Figure 4a. Debt-to-Income Ratios on New Purchase Endorsements by Fiscal Year and Quarter

Figure 4b. Debt-to-Income and Payment-to-Income Ratios on New Purchase Endorsements by Fiscal Year and Quarter

NOTE: FHA Single Family purchase mortgages only.
 SOURCE: U.S. Department of HUD/FHA, October 2022.

Average Loan-to-Value (LTV)

The average overall LTV ratio for purchase and refinance loans increased from 89.25 percent to 89.57 percent for all FHA mortgages combined. This is due to a decline in the number of refinance endorsements, which usually have lower LTVs. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages. (Figure 5, Exhibit A-5, Exhibit A-6).¹

Figure 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity.
 SOURCE: U.S. Department of HUD/FHA, October 2022.

¹ For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction. For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the fourth quarter of FY 2022 are presented in Figure 6. Prepayment speeds remain higher than predicted, primarily due to refinancing activity which occurred in the lower interest rate environment that existed in the first and second quarters of FY 2022. However, prepayment speeds have slowed considerably due to higher mortgage rates during the latter two quarters of the year. Claims were still below predicted levels due to policy decisions regarding eviction moratoria, forbearance, and loss mitigation options. However, the foreclosure moratorium ended in FY 2021 Q4, and we anticipate the number of actual claims to rise in the coming months. Through the fourth quarter of FY 2022, the number of actual claims was 13,159 or 75.37 percent less than the predicted 53,416. While there were significantly fewer claims than predicted, those loans that resulted in claims had typically been delinquent longer, had more missed payments, and were in worse condition at foreclosure, thus resulting in a 6.74 percentage point deviation between predicted and actual loss rates.

Figure 6. Termination and Claim Loss Experience Compared to Forecasts¹

As of September, 2022	Year to Date Predicted ¹	Year to Date Actual	Deviation (Actual Minus Predicted)	Percentage Deviation (Actual Versus Predicted)
Prepayments (number)	885,436	1,205,356	319,920	36.13
Claims (number) ²	53,416	13,159	(40,257)	(75.37)
Claims (\$ millions) ³	4,129	797	(3,332)	(80.70)
Net Loss on Claims (%) ⁴	25.49	32.23	6.74	26.43

na = not applicable.

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report. Excludes HECM endorsements.

¹ Deviations in this quarter's predicted versus actual prepayments, claims and loss rates have resulted from persistent and unexpected economic and policy conditions which were not in existence during the original modeled estimates. It is expected as budgetary and forecast models become more aligned with policy and economic realities, deviations in predicted and actual values should tighten.

² Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2021 and FY 2022 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

³ Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

⁴ These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

SOURCE: U.S. Department of HUD/FHA, October 2022

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2022 was -2.69 percent. The subsidy rate for HECM mortgages was -2.54 percent for FY 2022 (Figure 7).

Figure 7. Budget Execution Credit Subsidy Rates, FY 2022 Q4

Type of Mortgage	Rate (%) ¹
Forward Mortgages	-2.69
Reverse Mortgages (HECM)	-2.54

¹ Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see <https://www.govinfo.gov/content/pkg/BUDGET-2022-BUD/pdf/BUDGET-2022-BUD.pdf>

MMI Fund Cash and Investments

As Figure 8 shows, the total cash and investments of the MMI Fund decreased to \$131.60 billion in the fourth quarter of FY 2022, with \$10.00 billion held in the Financing account and \$121.60 billion held in the Capital Reserve account. MMIF Total Capital Resources is derived from netting other assets and liabilities from total cash and investments.

	Jul–Sep	121.60	10.00	131.60

NOTE: Only end-of-year balances represent audited figures.

¹ This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget re-estimates. The MMI Fund Cash and Investments includes a \$1.7 billion mandatory appropriation taken in FY 2013.

² This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

³ Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

⁴ Capital Reserve Account and Financing Account may not always add to total because of rounding.

SOURCE: U.S. Department of HUD/FHA, October 2022.

Cash Flows from Business Operations

Fourth quarter FY 2022 net cash flow increased to \$1,105 million compared to second quarter FY 2022 net cash flow of \$295 million, due to lower claims expenses. Claims cost for forward endorsements decreased by 11 percent this quarter, down significantly from a large increase during the last quarter (Figure 9). HUD has been proactive in reducing average losses per claim through a more diversified asset disposition strategy, which includes the promotion of third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program, expanded eligibility for pre-foreclosure (short) and note sales. Overall, claim costs (as measured by loss rates) have decreased from a high of 55 percent in 2014 to less than 36 percent over the last four quarters (see Exhibit A-7).

Figure 9. Business Operations Cash Flows, FY 2022 Q1 – FY 2022 Q4 (\$ millions)

³ Claims payments shown here include conveyance, pre-foreclosure sale, note sales, loss mitigation (home retention) actions, and all HECM claims (assignment and shortfall claims).

SOURCE: U.S. Department of HUD/FHA, October 2022.

Early-Payment Default Rates

The overall Early-Payment Default (EPD) rate remains elevated compared to pre-pandemic levels. FHA saw a large jump in EPD rates at the beginning of the pandemic which continued through mid-2020. The EPD rate, which remains elevated from pre-pandemic norms, has decreased in the fourth quarter of FY 2022 to 1.63 percent compared to the previous quarter at 1.87 percent.

¹ Percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycle.

*Data for January and February only. There is a 7-month lag. Due to late reporting by a large servicer, the EPD rates in repayment FY 2020 Q4 are likely understated.

SOURCE: U.S. Department of HUD/FHA, October 2022.

Serious Delinquency Rates

The pandemic and its impact to the health and economic condition of citizens has been a major factor for the increase in serious delinquency (SDQ) rates compared to FHA’s pre-pandemic rate. Starting in April 2020, a significant number of FHA borrowers requested approval to pause their monthly mortgage payments under the forbearance provisions of the CARES Act. As forbearance requests transitioned into payment delinquencies starting in the summer of 2020, the SDQ rate quickly rose from 4.04 percent in April 2020 to 11.90 percent by November FY 2020, as seen in Figure 11 below. However, the SDQ rate improved throughout the year and the portfolio experienced a decline to 4.77 percent at the end of the fourth quarter of FY 2022 from 5.00 percent at the prior quarter, likely attributed to continued success in transitioning seriously delinquent borrowers into loss mitigation plans.

Figure 11. Serious Delinquency Rates, All Single-Family Forward Endorsements

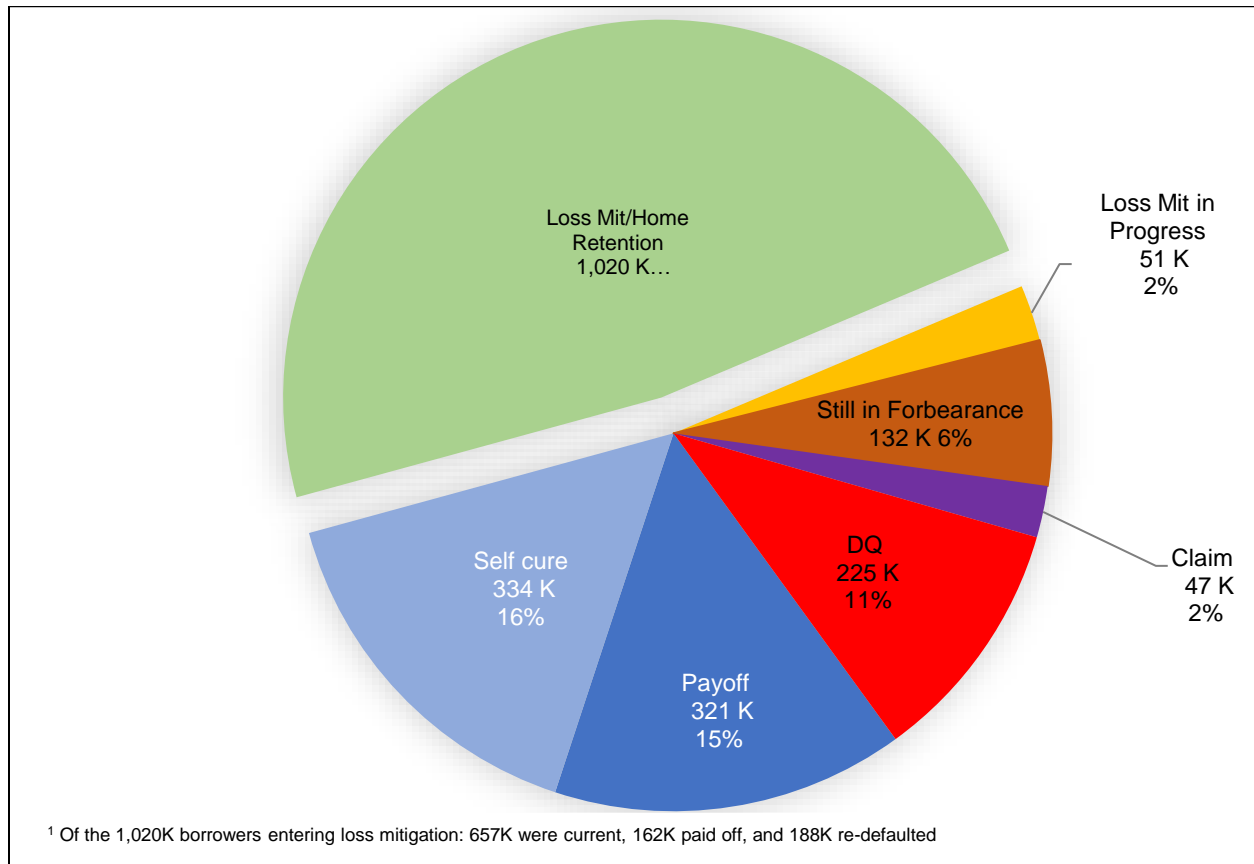

SOURCE: U.S. Department of HUD/FHA, October 2022.

Since the start of the pandemic, FHA has helped more than 2 million borrowers with FHA-insured mortgages through COVID-19 forbearance and COVID-19 loss mitigation home retention options. Of those 2 million borrowers, as of September 30, 2022, over 1.8 million FHA borrowers received a forbearance due to a hardship created or exacerbated by COVID-19. Over 1 million of these borrowers have subsequently transitioned into a loss mitigation plan that would enable the borrower to remain in the home through a home retention option or are in process of doing so. Another 655,000 have cured or paid off their mortgage without need of a loss mitigation plan. Of those that successfully transitioned into a loss mitigation plan, the vast majority remained current or had paid off their loans while approximately 188,000 had become delinquent again.

While 132,000 of the total SDQ population remains in forbearance, another 225,000 families with FHA-insured mortgages who have not sought assistance from their mortgage servicer or have not

completed a loss mitigation home retention option remain behind on their mortgage payments. It is this remaining population in particular that FHA will continue to focus on reaching and assisting through FHA loss-mitigation home retention options.

Figure 12. Status of Borrowers Who Were Delinquent During the COVID-19 Emergency

¹ The FHA reverse-mortgage insurance program is called the Home Equity Conversion Mortgage (HECM) program. Starting in FY 2009 (2008 Q4), all new HECM endorsements are included in the Mutual Mortgage Insurance Fund. Previous endorsements, by law, remain in the General and Special Risk Insurance Fund.

	Jul–Sep	13.62	15.87	39.41	20.36	10.75

NOTE: Shares are based on loan counts. Excludes streamline refinances. Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more which may have credit scores as low as 500. Streamline refinance loans do not require full underwriting; therefore, they are not represented here

NOTE: Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

¹ July and August 2022 only

² REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less than the amount owed. In the FHA single family program, short sales are referred to as pre-foreclosure sale (PFS). CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title to the property to HUD. Note Sale refers to the sale of defaulted mortgage notes. Note Sales are conducted through the Single Family Asset Sales program.

1 Claims comprise of Foreclosure, Deed in Lieu of Foreclosure, and Mortgagor's Short Sale.

2 Details may not sum to total due to rounding.

NOTE: The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary D. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation expenses.

¹ Serious delinquency rates are the sum of 90-day delinquencies, plus in-foreclosures and in-bankruptcies. Due to late reporting by a large servicer, the delinquency rates for February 2021 and February 2022 are likely understated.
