

INTERPRETATIVE BULLETIN B-2-76
INTERIOR DOOR CONSTRUCTION - 3280.108 AND 3280.304

The standards do not have specific requirements for materials used in the construction of interior doors, other than the flame spread and combustibility limitations of 3280.203 with respect to doors to water heater and furnace compartments and the requirements for a privacy lock for bathroom and toilet compartment doors in 3280.107 and for passage hardware when installed on interior doors in accordance with 3280.108.
