

INTERPRETATIVE BULLETIN C-4-76
3/8" MAXIMUM FOAM PLASTIC SIDING
BACKER BOARD - 3280.207(b)

The maximum allowed flame spread rating of 75 or less as determined by ASTM E-84 is only applicable to the foam plastic contained in the 3/8" siding backer board or sheathing. The 75 or less flame spread rating is not applicable to the outer covering of the sheathing containing the foam plastic (i.e. liner material, etc.)
