## Chapter 1. Introduction

### 1.1 Purpose

The *Form HUD-50058 Family Report Technical Reference Guide* provides information needed to develop software to capture and edit Form HUD-50058 data and prepare it for submission to the US Department of Housing and Urban Development (HUD).

PIH Information Center (PIC) is a HUD system that captures and stores tenant information contained in the Form HUD-50058 and submitted to HUD. PIC also generates various reports from the data stored in its database.

The *Guide* contains all the data descriptions and data edit requirements necessary to design software that will follow the Form HUD-50058 (06/2001) to transmit data to PIC.

### 1.2 Intended Audience

HUD developed the *Form HUD-50058 Technical Reference Guide* for PHAs and software vendors who develop software to capture and store Form HUD-50058 data and to view transmission error reports. The PIC development team at HUD Headquarters also uses the *Guide* to develop the edit and validation process for PIC data.

### 1.3 Summary

The *Guide* contains the following information:

- Summary of the Form HUD-50058
- Transmission file layout description
- Descriptions of each field in the transmission file layout and edits
- Cross reference between the data lines in Form HUD-50058 and the data field positions in the transmission file

### 1.4 Questions

Users of this Guide should post their questions to the Form HUD-50058 Technical Reference Guide Forum on the PIC Website. The address for this forum is <http://www.hud.gov/offices/pih/systems/pic/50058/forums.cfm>. HUD monitors and responds to questions posted to this forum on a regular basis. HUD will answer questions on this guide as responses to the forum questions. Additionally, HUD will post notice of changes to this guide in Quick Update! on the PIC Website. HUD will post the actual changes to the PIC Documentation web page in the same location as this original Guide. Users of the Guide should check the PIC Documentation web page periodically for updates. The address for the PIC Documentation page is <http://www.hud.gov/offices/pih/systems/pic/50058/pubs/>.

## **1.5 Form HUD-50058 Family Report**

The Form HUD-50058 captures information about residents who live in Public housing and about residents who receive Section 8 rental subsidies. The form contains:

- Demographic information for all members of the household
- Citizenship information
- Income information
- Rent calculations

PHAs who administer PIH's rental subsidy programs collect this tenant data and send it to HUD electronically. HUD uses the information for the following purposes:

- Support the analysis of policy, legislative, budget, and program management initiatives and evaluations
- Determine the accuracy of subsidy payments
- Detect fraud
- Monitor the efforts of project administrators, including Public Housing Agencies
- Provide demographic information on program participants to support HUD management, HUD Field Office, and Public Housing Agency (PHA) program objectives
- Monitor compliance with income reporting requirements and related eligibility factors
- Produce demographic information that describes the present occupancy of resident communities to Congress, sister Federal agencies, and special housing-related interest groups
- Perform income matching with the Social Security Administration and other agencies
- Monitor the accuracy of subsidy payments

Use the Form HUD-50058, the Form HUD-50058 Instruction Booklet along with this *Guide* to understand the flow of the information and to develop or modify software.

## **1.6 Transmission File Layout Description**

Form HUD-50058 transmission file is an ASCII flat file that contains information of one or more families. HUD receives the file submitted by PHAs and vendors through PIC Form 50058 Submission Module. This module extracts information from the file, and performs edits and validations before the information is stored into the database.

### 1.6.1 Transmission File Granularity

A transmission file contains information of one or more *families*; each family contains multiple *records*; and each record contains multiple *data fields*.

#### 1.6.1.1 Family

The first level of transmission file breakdown is at the family level shown in Figure 1.1.

**Figure 1.1 An Example of Family Layout in a Transmission File**

A transmission file must have a Header record and a Footer record. In between the Header and the Footer are families. Families may take spaces of different sizes in the file because some families may have more information than others.

#### 1.6.1.2 Record

The next level of transmission file breakdown is the record. For each family, there are many records each of which contains specific information of the family. Figure 1.2 shows an example of all the records in a family. At the end of each record, there is a new line character.

**Figure 1.2 An Example of Record layout in a Family**

A record contains information from certain section(s) of Form HUD-50058. Table 1.1 lists all the possible records and their respective form sections.

<b>Record Name</b>	<b>Record Identifier</b>	<b>Relevant 50058 Section(s)</b>	<b>Record Type</b>
Transmission Header	MHR58	None	Mandatory
Basic Record	B	Sections 1, 2, 3, 4, 5, 6, 7, 8, 9	Mandatory
Family Record	T	Section 3	Mandatory
Income Record	I	Section 7	Optional
Public Housing Record	P	Section 10	Selective
Section 8 Certificate, Project Based Voucher Record	C	Section 11	Selective
Section 8 Voucher Record	V	Section 12	Selective
Mod Rehab Record	R	Section 13	Selective
Homeownership Record	H	Section 15	Selective
FSS/WtW Record	F	Section 17	Selective
Transmission Footer	MND58	None	Mandatory

**Table 1.1 All Possible Records in a Family**

Depending on the PIH program and action type of the submission, a family may have different record compositions. Section 1.6.2 describes the general rules about which records constitute a family in different circumstances.

**1.6.1.3 Data Fields**

Data fields are the atomic units in a transmission file. In most cases, each data field corresponds to one line item on the paper Form HUD-50058. The Edits and Validation section gives a detailed description of all the data fields in all the records, their sizes and positions in the respective records, their cross references between line numbers on the paper Form HUD-50058, along with their edits. Figure 1.3 shows the data field layout in the Basic Record.

**Figure 1.3 Data Field Layout in Basic Record**

As illustrated in the Edits and Validation section, every record starts with a record identifier field and a record number data field. In the Basic Record, the third data field is Date Modified with no line number in the Form HUD-50058. All other fields are sequentially laid out in the record and identified by corresponding field line numbers in the Form HUD-50058.

**1.6.2 General Rules on Transmitting Records**

As indicated in Table 1.1, there are three types of records: mandatory records, selective records and optional.

- **Mandatory records** identify the family and must be transmitted.
- **Selective records** for each family are determined by:
  - ⇒ Program Code (line 1c in the HUD-50058)
  - ⇒ Action Type (line 2a in the HUD-50058)
 For example, if 1c is valued 'P' (for Public Housing) and 2a is valued 1 (for New Admission), a Public Housing Record (Record Identifier 'P'), and for each family member, a Family Record (Record Identifier 'T') must be included in the transmission file.
- **Optional records** include only income records. They are needed only if the information in the records exist. If the family does not have income of any type, there is no need to include an Income Record in the transmission file.

When a PHA or a vendor transmits an entire Form HUD-50058, a data transmission must contain these records for a family:

- Transmission Header Record (mandatory, Record identifier equals 'MHR58')
- 50058 Basic Record (mandatory, Record Identifier equals 'B')
- 50058 Family Record (mandatory, Record Identifier equals 'T') for each member of the family
- If the family has any income, a 50058 Income Record (optional, Record Identifier equals 'I'), for each member of the family and the source of income.
- One of the selective program records:
  - 50058 Public Housing Record (Record Identifier equals 'P')
  - 50058 Certificate Record (Record Identifier equals 'C')
  - 50058 Voucher Record (Record Identifier equals 'V')
  - 50058 Mod Rehab Record (Record Identifier equals 'R')
  - 50058 Homeownership Record (Record Identifier equals 'H')

**Form HUD-50058 Technical Reference Guide**

- If any family member participates in the FSS program or if the family receives a Welfare to Work (WtW) Voucher, 50058 FSS/WtW Addendum Record (selective, Record Identifier equals 'F'). The FSS/WtW Addendum Record can come with or without any selective program record.
  - Transmission Footer Record (mandatory, Record identifier equals 'MND58')

**1.6.3 Special Instructions for Some Action Types**

The Transmission File Layout section gives a complete list of data fields and their edits for all the records in the transmission file. Although the Basic and Family Records are mandatory for all families, for some action types (2a values), HUD requires submission of fewer fields to identify the family and requires PHAs or vendors to submit data values only for certain fields.

Table 1.2 below lists these special action types, the corresponding required and optional data fields (referred by their line numbers).

**Form HUD-50058 Technical Reference Guide**

Action Code	Action Type	Basic Record		Family Record	Program Type Record	Other Records

Notes: The fields in *italics* identify those for Public Housing only. The fields enclosed by [ ] identify those required depending on the values of preceding fields.

For data fields not listed in Table 1.2 with corresponding action types, PIC will ignore any value provided to them and will use the value from a previous record where the field's value is not zero or blank (except for action type 15). For action type 15 (Void), the most recent historical record for the tenant becomes the current record for that tenant. For action types 8 and 13, field (2a) "Type of Action" is not updated and instead uses the value from the field "Type of Action" of the most recently submitted 50058 for that tenant. Additionally, for action type 13, field 5h is no longer updated.

**1.6.4 Graphical Representation**

To summarize the transmission file layout in a graphical representation of a transmission file from a PHA, envision a strip of film.

Consider each frame in the film as a family and the entire film reel as the transmission file submitted from the PHA to HUD. The film reel might appear as follows:

## 1.7 Data Format Standards

The data format standards apply to the appropriate items in the transmission file layout and detailed layout information, unless otherwise specified in the Transmission File Layout section. These standards are:

- Transmitted data values shorter than the allocated data field length in the transmission file layout must be:
  - Left justified for alphanumeric fields, space fill as needed
  - Right justified for numeric fields, zero fill as needed
- Format all dates as MMDDYYYY, blank fill if no date is transmitted
- PIC does not accept nulls in lieu of spaces or zeros
  - Alphanumeric edits accept:
    - 0 (zero) through 9
    - a through z
    - A through Z
    - Special characters: \* + - / , . : ; ( ) = & % # \$ " ' < > @ \_ \ ! ^ | { } [ ] ~

## 1.8 Information on transition to New Project or New Development Numbers

This section of the technical reference guide provides information regarding transition to new project or new development numbers.

With the June 22, 2007 release, the existing project numbers in the PICTEST environment will be replaced by new project numbers. This transition in PICTEST is intended to provide system users a first hand look of the new project numbers and also provide an opportunity for the Form 50058 Software Vendors to make changes to their software and test those changes so that the HAs are ready to submit the Form 50058s with the new project numbers once the transition to new project numbers takes place in PIC Production.

**The transition to new project or new development numbers in PIC Production is currently planned for January 2008.**

### Format of the new project or new development numbers

The format of the new project or new development numbers is derived from the Asset Management Project (AMP) numbers. The AMP numbers are 12 characters in length having the character "P" as the 12<sup>th</sup> character.

The full AMP number format is:

[5-Character HA Code] + [6-digit AMP number] + "P"

For e.g. NY001000022P

The new project or new development number will be the AMP number WITHOUT the character "P". In the above example, the new project or new development number will be "NY001000022". Consequently, the new project or new development number is 11 characters in length.

In Form 50058, the combination of following fields should be used to submit the new development or new project numbers.

- 1d(1) – Project Number (8 characters), and
- 1d(2) – Project Number Suffix (3 characters)

In other words, positions 23 – 33 in the 50058 Basic record should contain the 11 character new project or new development number. Please refer to fields 1d(1) and 1d(2) (Pages 20 and 21) for more details.

## **Chapter 2. File Layout for Data Transmission to PIC**

This chapter outlines the file layout for data transmission. It provides the record identifier, record number, and other information pertaining to the file layout.

Most of the error messages have been changed to FATAL in order to enhance the integrity of the data.

**Processing Order:** PIC processes records within the transmission file in the order in which the files are received. PHA's must insure that they have created the transmission file in a logical sequence so that PIC can process that file without error. For example, if a transmission file contains a 50058 record with action type equal to 15 (Void) as well as an updated 50058 record for the same household, then the Void must precede the updated 50058 in the transmission file.

## Chapter 5. Form HUD-50058 Submission Instructions for Fatal Errors 5323 through 5327, 5331 and 5332

This chapter provides instructions about submitting Form HUD-50058 for the SSNs receiving the fatal error messages 5323 through 5327, 5331 and 5332.

When HUD receives a Form HUD 50058 containing an instance of an SSN or Alt ID for any household member that is apparently invalid or a duplicate in the system, the form is accepted and processed, and the household is *flagged* as requiring resolution of an *identity discrepancy*. While the *identity discrepancy flag* is in existence, PIC will only accept action 6 (“EOP”) or 15 (“VOID”) for that household.

If another Form HUD 50058 is submitted containing a subsequent instance of the same suspect SSN or Alt ID while the *identity discrepancy flag* is in existence, one of the following fatal errors will occur and the form will be rejected.

- FATAL: 5323 - Based on the Social Security Administration numbering scheme this SSN is invalid.

For the SSN receiving this error message in the submitted Form HUD-50058, perform one of the following options:

- If the submitted SSN is incorrect, replace the SSN online by using the “SSN to SSN” or “SSN to Alt ID” modification type on the “Replace ID” page of the “Tenant ID Management” sub-module. *This will remove the identity discrepancy flag.* Then, please resubmit Form HUD-50058 with the replaced SSN or AID.
- If the SSN is recently-issued and is correct, the user will need to wait until the system receives the monthly update of the latest “SSNs issued list” from SSA (Social Security Administration). *This will remove the identity discrepancy flag.* Once the system has been updated with new SSA data, the SSN will no longer appear in the Invalid SSN Report and then Form HUD-50058 can be resubmitted for the SSN.
