Greetings!

**IHBG Competitive NOFA.** The deadline for this important competition is August 8th, which is just a week away. Applications will be rated and ranked using personnel from both ONAP headquarters and the field and it is expected that there will be potentially hundreds of applications to consider. This is a tremendous amount of work to review each application and staff it, so that every application is reviewed by more than one person.

**FY 2020 Budget.** The proposed budget deal was passed by the Senate 67-28 on August 1, 2019, with a corresponding two year raising of the debt ceiling. It had already passed the House.

**Monitoring.** One of the important requirements of NAHASDA is that recipients of funding under the
Act serve as good stewards of their Federal resources. In addition to an independent annual audit (for those recipients with $750,000 or more in all Federal funding) and an Annual Performance Report (APR), NAHASDA at Section 405 provides that the Secretary, by means of his staff, may conduct an audit or review of recipients to ensure compliance with program and other Federal requirements. To help determine which grantees will be monitored each year, ONAP utilizes a risk assessment scoring process.

Some of the factors that go into the risk assessment are the size of the grant, i.e., those with more grant money being more likely to be looked at, the length of time since the last monitoring review, whether the grantee has ever been monitored before, Office of the Inspector General referrals, and whether the grantee has outstanding audit findings or open prior cycle monitoring findings. This is not a comprehensive list but rather some of the more prominent factors in the risk assessment. Based on the factors, which are weighted, a number is generated which identifies which grantees have the highest score. Also weighted in are some subjective factors such as known resident complaints, high turnover of grantee staff, lack of experienced housing leadership within the program, and the like. These all go into selecting which grantees will be monitored. ONAP cannot monitor all grantees in any given year and so takes this sampling approach in the expectation that all programs will be monitored over time. For EWONAP, all programs, with the exception of the newly recognized Virginia Tribes, will have been monitored by the end of FY 2020.

As mentioned above, the point of monitoring is to ensure compliance with NAHASDA, its implementing regulations, and general regulations having to do with fiscal and asset management found at 2 CFR Part 200 (which generally protect the taxpayer funded programs from loss, fraud or mismanagement). This means that ONAP monitoring teams are not looking to find fault with a program, but rather to identify problem areas that might cause loss, and to help protect against fraud or mismanagement. Of course, ONAP will not ignore a blatant statutory or regulatory violation, but once identified, can work with the grantee to bring the program back into compliance through adopting better policies and procedures as well as recommending training to give staff the knowledge and tools to run a good housing program. Some programs end up having no findings or only minor concerns because they are well-run. Such programs will likely not need to be monitored for the next several years. Clean audits, a well-trained staff and knowledgeable Board members are key to running a solid, well-run program. It would be wrong to think that if you get a notice of monitoring that ONAP is out to find fault. Such visits are a routine occurrence and can be prepared for by taking self-monitoring seriously to self-identify problem areas and address them before ONAP conducts a monitoring visit. This is required annually under Section 403 of NAHASDA. If a grantee program is small and feels it doesn’t have the staff to conduct an objective self-monitoring review, it is acceptable to ask a nearby program to do it, or perhaps elicit the assistance of a Community College or University class. ONAP is required to give any grantee 30-days notice prior to a monitoring review and tries to minimize interruptions to staff by requesting documents in advance.

Another key to having a clean monitoring review is to procure an audit that is thorough and does sampling of program compliance as well as financial reviews. Having good records on file also reduces the likelihood that ONAP will identify concerns with your program. Examples of problematic record keeping might include a grantee who thought they had performed the required level of Environmental Review for their program but had no records that documented that effort. Another might be a grantee who had no procurement record of who bid on its projects of who was the low bidder. A common problem might include poor record keeping or inconsistent record keeping in tenant files or of periodic inspections. If you are in doubt as to what records to keep or for how long, please call your Grants Evaluation Specialist.

Today we are having one of the few good weather days Chicago has to offer. I hope you are finally getting similar summer weather. I look forward to seeing many of you and the Minnesota Indian Housing Conference in Prairie Island, MN in late August.

Enjoy the summer while you can.
