

HUD IT Summit

Washington, D.C.

June 4, 2018

IT SUMMIT

Agenda:

Welcome Remarks (DJ LaVoy)

ISDV Overview (George Forbes)

Protocol (Brendan Dowd)

Decision Trees (Kim Scoles)

Break

VEDGA Overview (Eric Krapf)

June 4, 2018

What to Expect

- HUD will be discussing where we are today.
 - HUD will be discussing a plethora of technical topics, such as Decision Tree logic, the Defect Dictionary, and forecasted architecture.
 - Participants are asked to provide information, feedback, and comments on these topics.
 - The goal is to help HUD better shape future IT solutions and business processes surrounding UPCS-V.
- Participant/Industry input
 - There is no intent or expectation to reach agreement or consensus.
 - All comments/concerns/alternative ideas are welcomed.
 - This session does not constitute an agreement of an IT solution or change in business process, but the session is designed to share information to help HUD shape future system builds.
- HUD encourages PHA and industry partner engagement throughout future development processes.
- The topics being discussed throughout the agenda are not finalized.
- Any development made by industry is at the vendor discretion.

Other Items

- Cell Phones
 - Please remember to turn off cell phones or put your phone on vibrate.
 - If you need to leave in the middle of a discussion, please do so quietly.
- Valuables and Materials
 - Please take valuables (phones, purses, etc.) with you on break.
- Questions and Comments
 - Feel free to ask questions throughout the presentation.

VEDGA Overview (Eric Krapf)

June 4, 2018

Inspection Standards & Data for Vouchers Update

Why

- Vast majority of inspections on paper
- OIG 90+ direct findings for HQS
 - Over 2,200 indirect findings
- FY15 Sample (27,000 units) study discovered lack of:
 - Objectivity
 - Consistency
 - Accuracy
- FY16 Appropriations authorized UPCS-V Demonstration

What

- UPCS-V Protocol established
- Software – Salesforce transition to open source
- Data – analysis and dissemination
 - Capture 3 million inspections
 - Utilize Oracle tools
 - Enable feedback loop

Protocol Timeline – Proposed Rule

UPCS-V Inspections Summary

Milestones

# Inspections Conducted	Target PHAs Trained: April	# PHAs Participating
29,132	170	247

Inspections of Record

PHA Training

PHA Training Trends

UPCS-V Defect Summary

Defects By Inspectable Area

Inspectable Area	Percentage of Total
Unit	86.3%
Health And Safety	9.7%
Building Exterior	1.3%
Site	1.0%
Common Area	0.9%
Building Systems	0.7%
Grand Total	100.0%

Defects In Unit

Unit Defect Type	Percentage of Total
Electrical System	31.9%
Structure and Finish(es)	30.9%
Plumbing System	13.0%
Life Safety Equipment	10.2%
Cabinets/Countertops/Appl.	8.1%
Heating/Cooling/Vent.	3.6%
Infestation	2.3%
Grand Total	100.0%

Defect Examples: Real Cases

Structure and Finishes

Entry Door Broken

Inspector 2
Maricopa Housing Authority
(AZ009)
1624 S 114th Dr.

Electrical Systems

Cover Plate Broken

Inspector 11
Edinburg Housing Authority (TX062)
1908 AGUA FINA Apt. 1

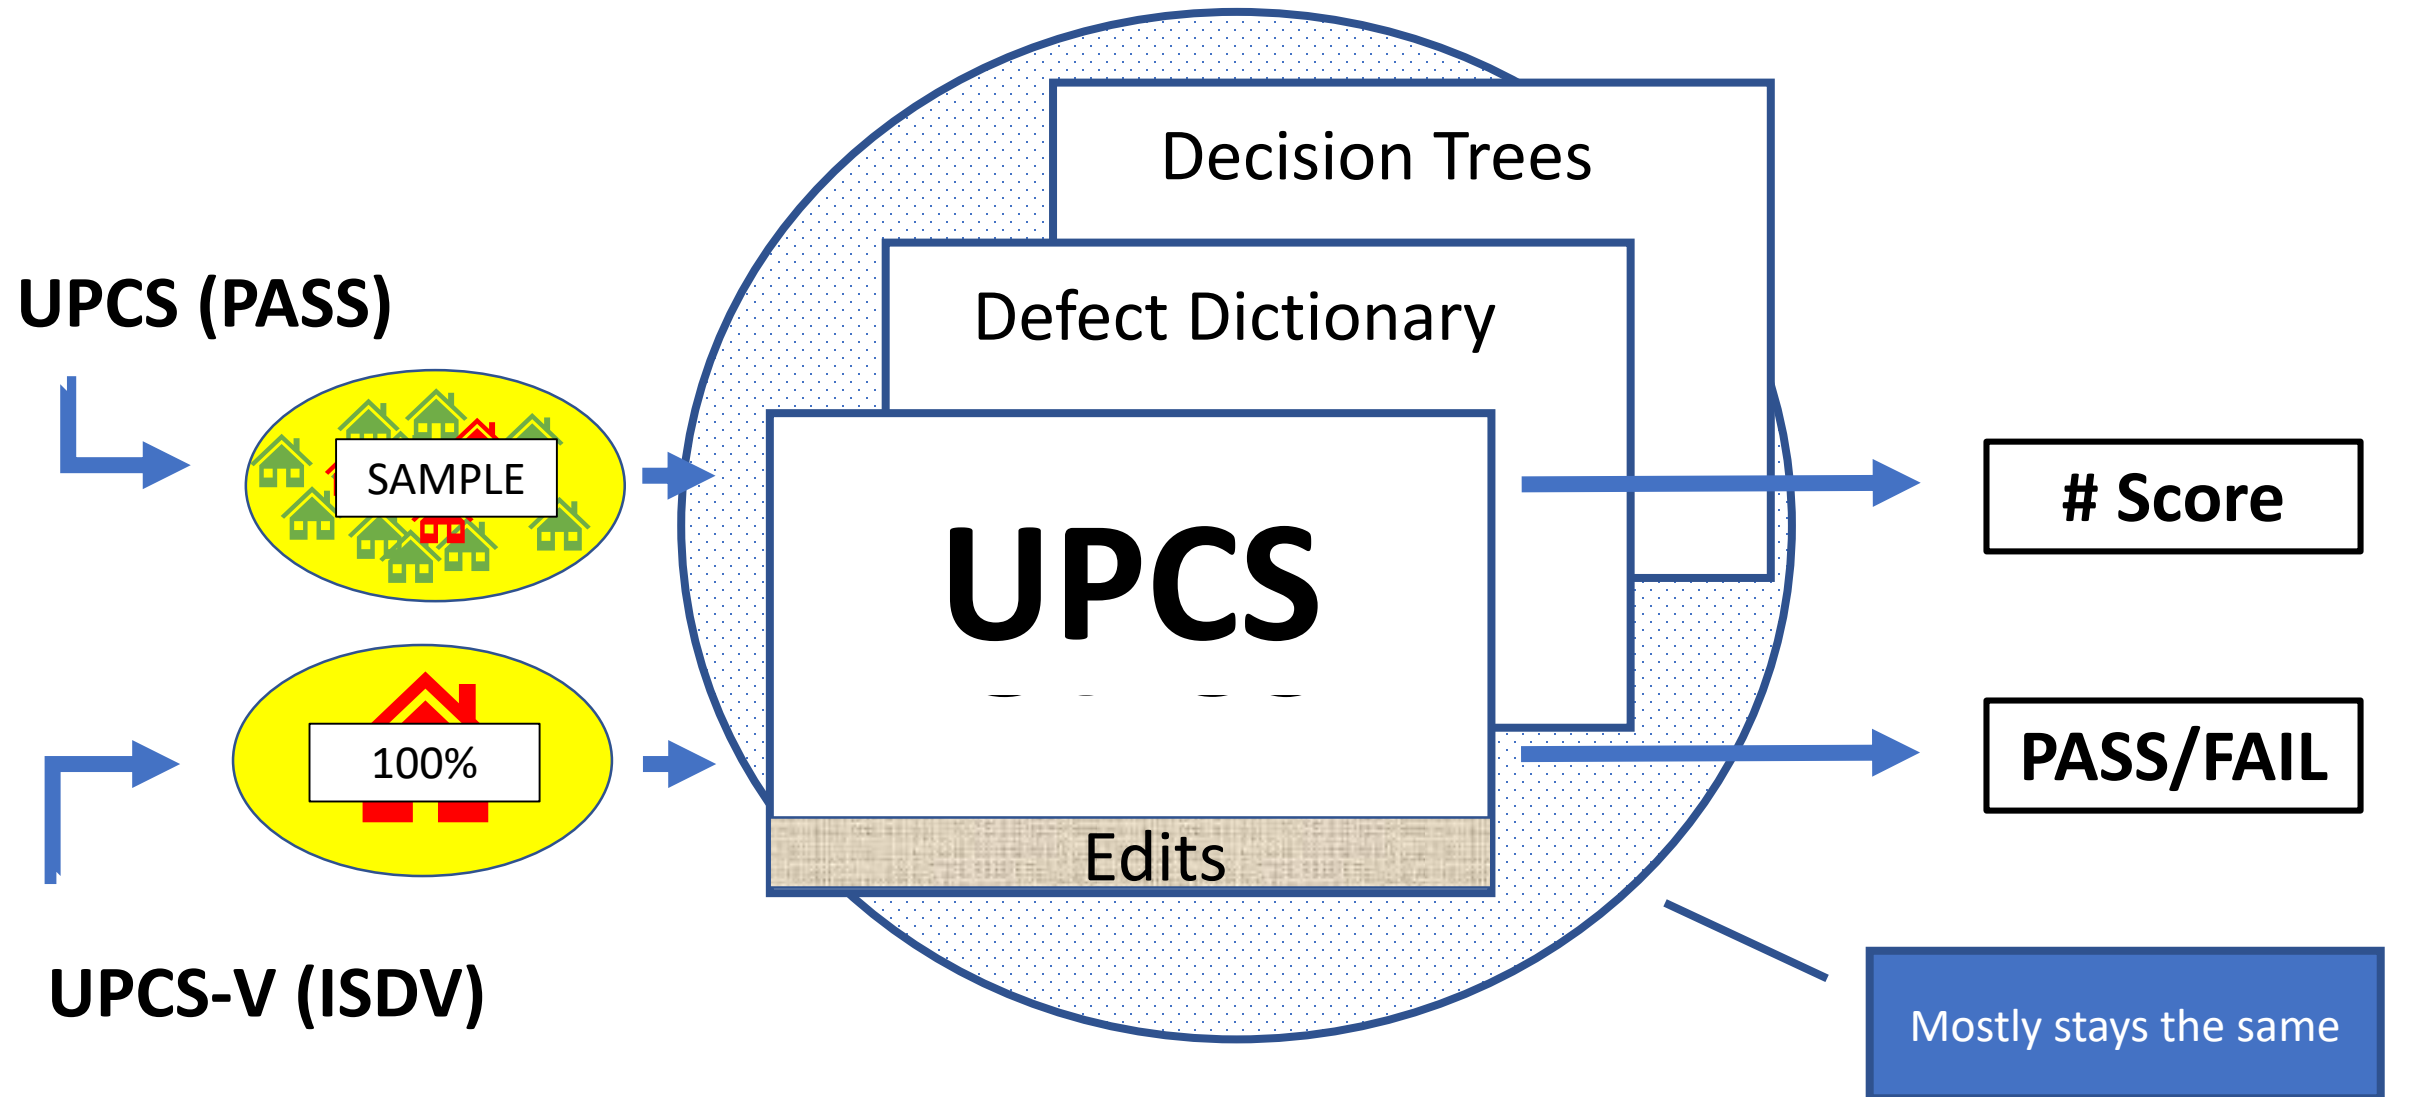

Plumbing Systems

Leaking Sink

Inspector 3
Weatherford Housing Authority
(TX349)
1212 W. Ball St. B

UPCS v. UPCS-V Comparison

VEDGA Overview (Eric Krapf)

June 4, 2018

Why is HQS Changing?

- HUD was directed by Congress to implement a single inspection protocol for public housing and voucher units.
- HUD decided to update HQS and to align to UPCS.
- ISDV is operating under a Demonstration to create and test a new housing standard for voucher units.
- The Demonstration Period ends in July 2019.

What is the UPCS-V Protocol

- It is the set of rules and standards for conducting UPCS-V inspections.
- It includes specific Pass/Fail language for inspectable items.
- The UPCS-V Protocol is much more specific and inclusive than HQS in order to produce more accurate, consistent, and objective results.

How Did HQS Evolve Into UPCS-V?

- To build a new standard for voucher units, the initial UPCS-V drafters turned HQS' requirements and standards into the UPCS-V Fundamental Requirements.
- The UPCS-V Fundamental Requirements serve as a basic standard for HCV units in addition to inspections of individual inspectable items.

HQS Space and Security Acceptability Requirement

"At a minimum, the dwelling unit must have a living room, a kitchen and a bathroom."

UPCS-V Protocol Fundamental Requirement

"All Units must have a living room, a kitchen, and a bathroom at a minimum."

Inspectable Items in UPCS-V

- Each UPCS-V inspectable item (sinks, walls, doors, etc.) has a possible deficiency with a Pass/Fail threshold.
- Additionally, UPCS-V has adopted a list of **Life Threatening or Emergency (LTE) deficiencies**.
- Policy items, such as timelines for repair of deficiencies, will remain the same unless changed by the Housing Choice Voucher (HCV) program office.

What's new in Protocol Beta?

Version Number

- This protocol is called “Beta” because the document is a work-in-progress.
- It is currently being reviewed and tested.

Guiding Principles

- ISDV defined a set of Guiding Principles as common themes for the protocol.
 - Simplicity & Transparency
 - Alignment to UPCS
 - Meeting the Objective of National Housing Policy

What's new in Protocol Beta?

Other Changes

- Alignment to UPCS, the standards used for Public Housing inspections
- The addition of a glossary of terms
- An updated LTE (Life Threatening or Emergency) deficiency list
- The inclusion of carbon monoxide detectors as an inspectable items
- A 53% decrease in total length of the document mainly due to consolidation of redundant information
- The alphabetization of the Defect Dictionary
- An overall reorganization of the document to be more clear and consistent and to avoid redundancies

VEDGA Overview (Eric Krapf)

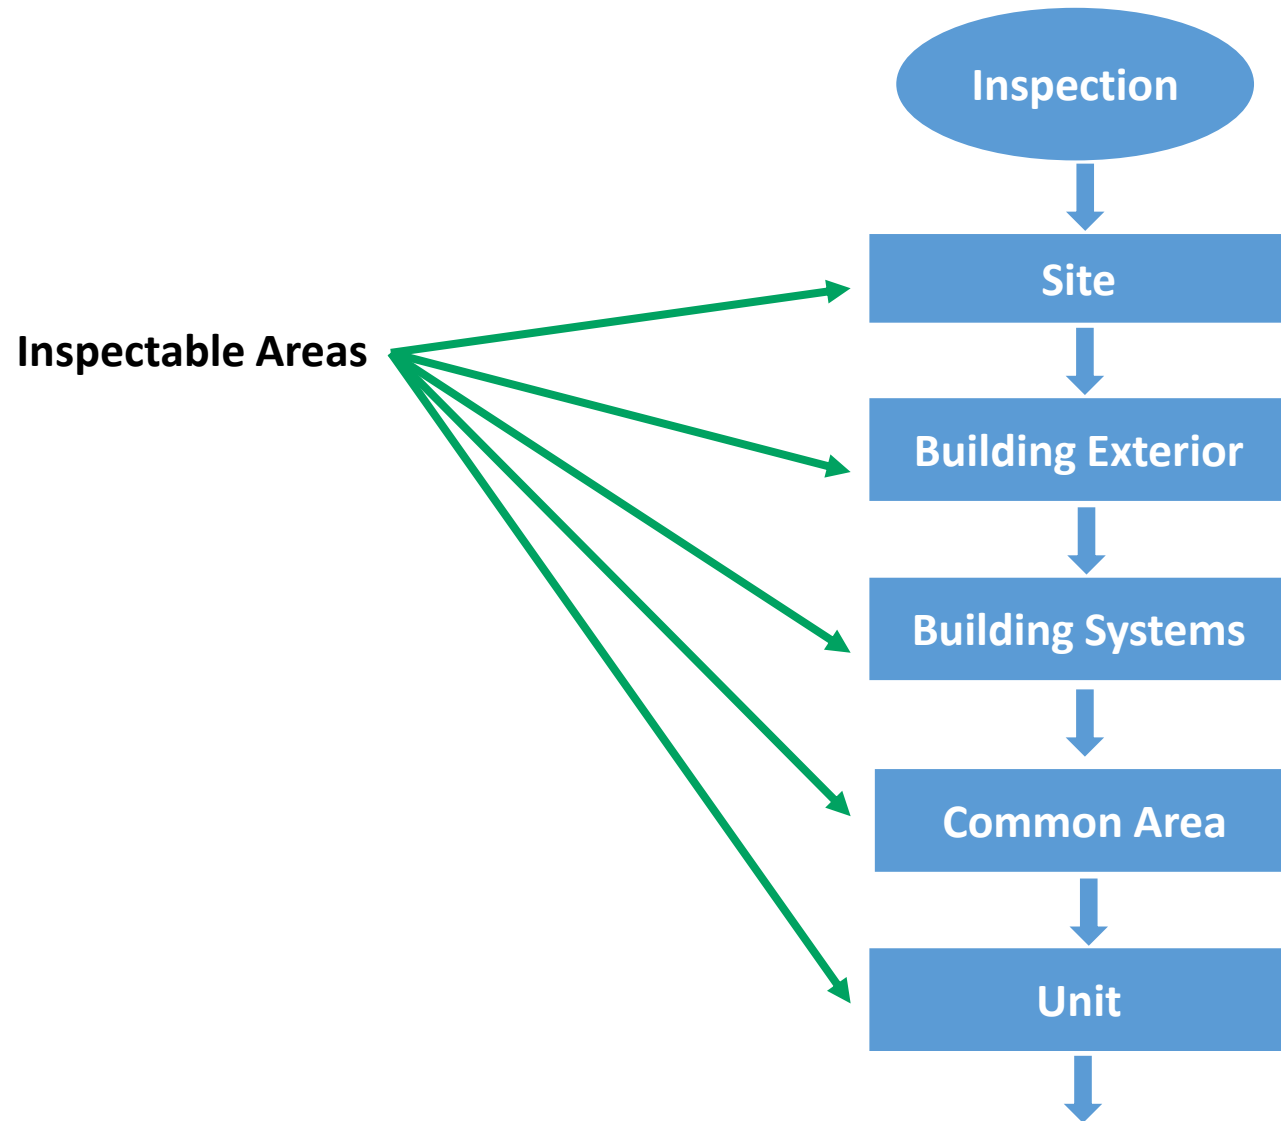

June 4, 2018

Overview

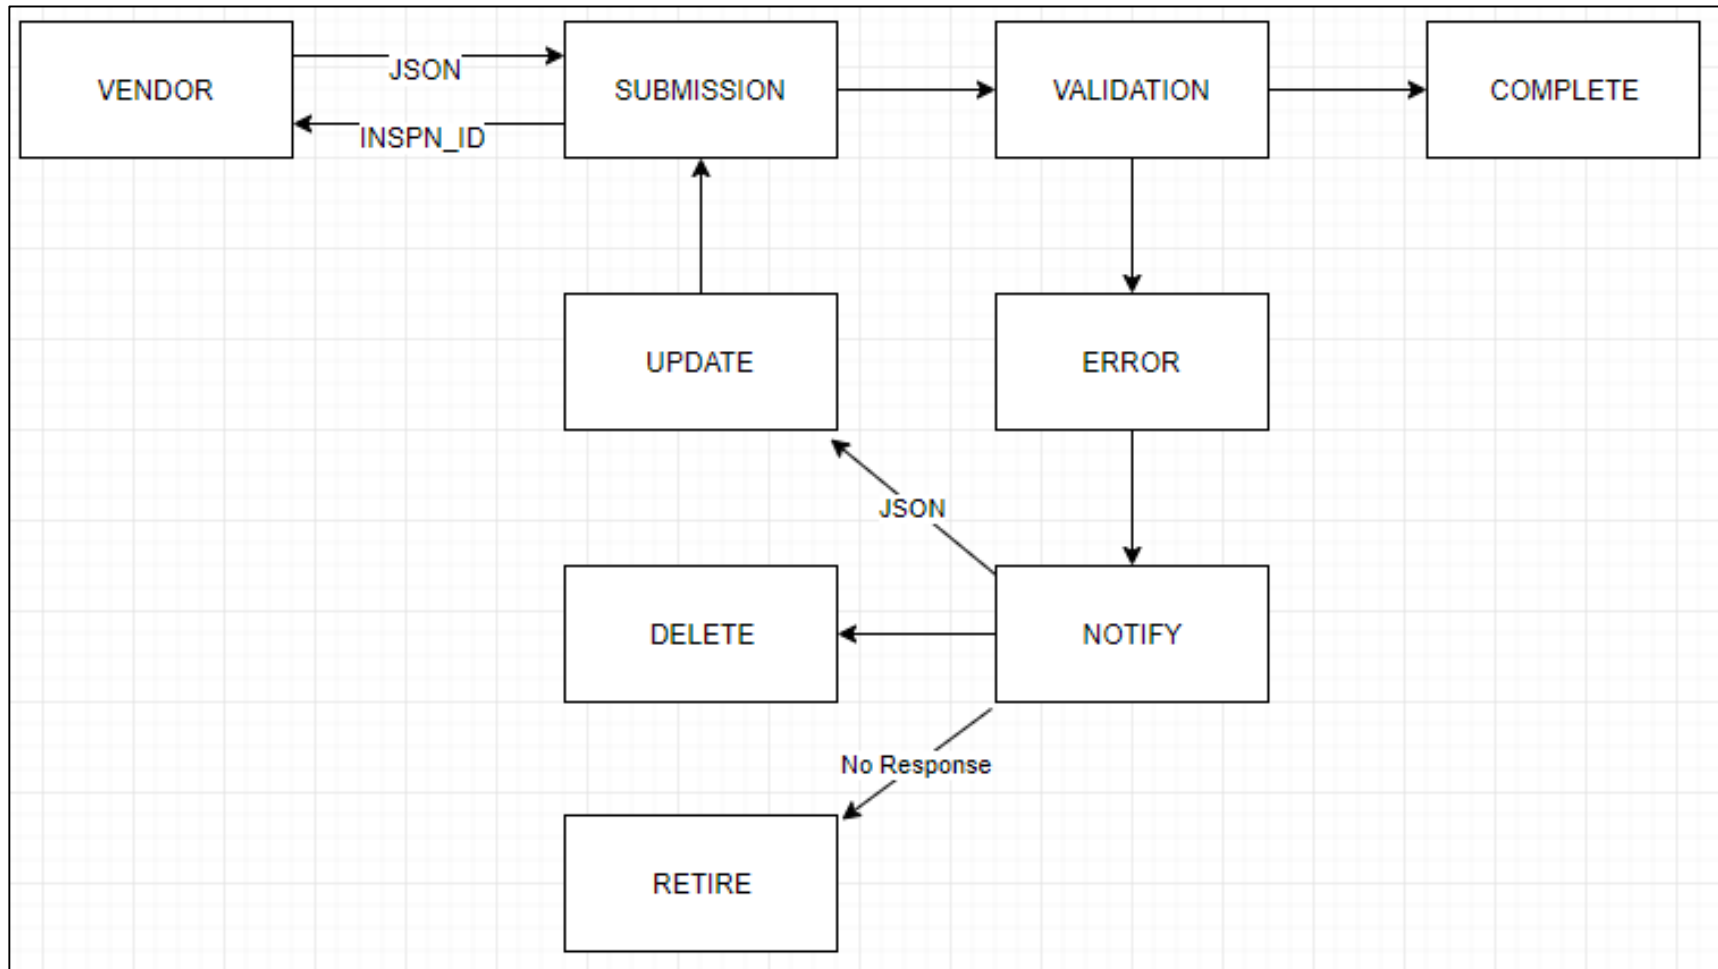

VEDGA Components (Currently)

- Web Services
- Inspection Mobile Application

Architecture

Flow

Security

- Authentication and Authorization are necessary to access the web service APIs and swagger page.
- Authentication is performed (currently) by Siteminder.
- Authorization is performed (currently) by WASS.
- Vendors will need to have access to a HUD ID and provide it to IT Team.
- We set up access for that HUD ID in WASS for VEDGA.
- Certification Process TBD

Web Services in Development

- POST /inspections/vedga/ - allows submission of Inspection in JSON (will contain associated pictures).
- GET /inspections/vedga/status/{inspectionId} - allows get of the status of the Inspection submission.
- GET /inspections/vedga/validate/ - allows pre-validation of the Inspection JSON before final submission to HUD.

Web Services Planned

- PUT /inspections/vedga/{inspectionId} - This will allow for partial submissions and updates to an existing Inspection.
- DELETE /inspections/vedga/{inspectionId} - allows deletion of an already submitted Inspection.
- GET /inspections/vedga/data/{inspectionId} – allows get of an already submitted inspection.
- GET /inspections/vedga/status/ - allows get of the status of all inspections submitted by the logged in PHA.
- GET /inspections/vedga/decisiontree/{versionId} – provides the requested decision tree in JSON.

Swagger Page Demo

URL: <https://hudapps.hud.gov/picngdemo/inspection/swagger-ui.html#/inspections>

Sample JSON:

```
{"header":{"submissionType":"INSPN"},"agency":{"phaName":"Kihn LLC","phaCode":"CA001"},"unitOccupied":{"address":{"street":"123 Street","apartment":"123","city":"New York","state":"NY","zip":"1234","zipPlus":null}},"defect":{"phaInspectionId":"7777","inspectableArea":"unit","location":"kitchen","item":"sink","defect":"broken","decision":"fail","healthSafetyHazard":null}}
```

Protocol Conversion

- Inspection
- Observation
 - Inspectable Area
 - Location
 - Item
 - Defect
 - Decision

Inspection

- Inspection ID – Generated by HUD-REAC
- PHA's Inspection ID – PHA's unique identifier for the inspection (optional)
- The Unit Information (Address / HUD-REAC Unit Identifier)
- The Owner Information (Name / TIN)
- The Inspector Info (Name / Inspector ID)

Defect Index Number System

- INSPN_AREA_LCTN_ID – Inspection Area Location ID
- AREA_ID – Area ID (Site, Unit, Common Area)
- LCTN_ID – Location ID (Bedroom, Bathroom, None)
- LCTN_CNT – Location Count (Bedroom 01, Bedroom 02, NULL)

Defect Index Number System

- OSRVTN_ID – Observation ID
- ITEM_ID – Item ID (Ceiling, Wall, Toilet)
- CNDTN_ID – Condition ID (OD, NOD, N/A)
- DFCT_ID – Defect ID (Water Stain, Broken, Leaking)
- DFCT_DCSN_ID – Defect Decision ID
- (Hole in wall is greater than 1 inch, Hole in wall is smaller than 1 inch)
- CMNT - Comment

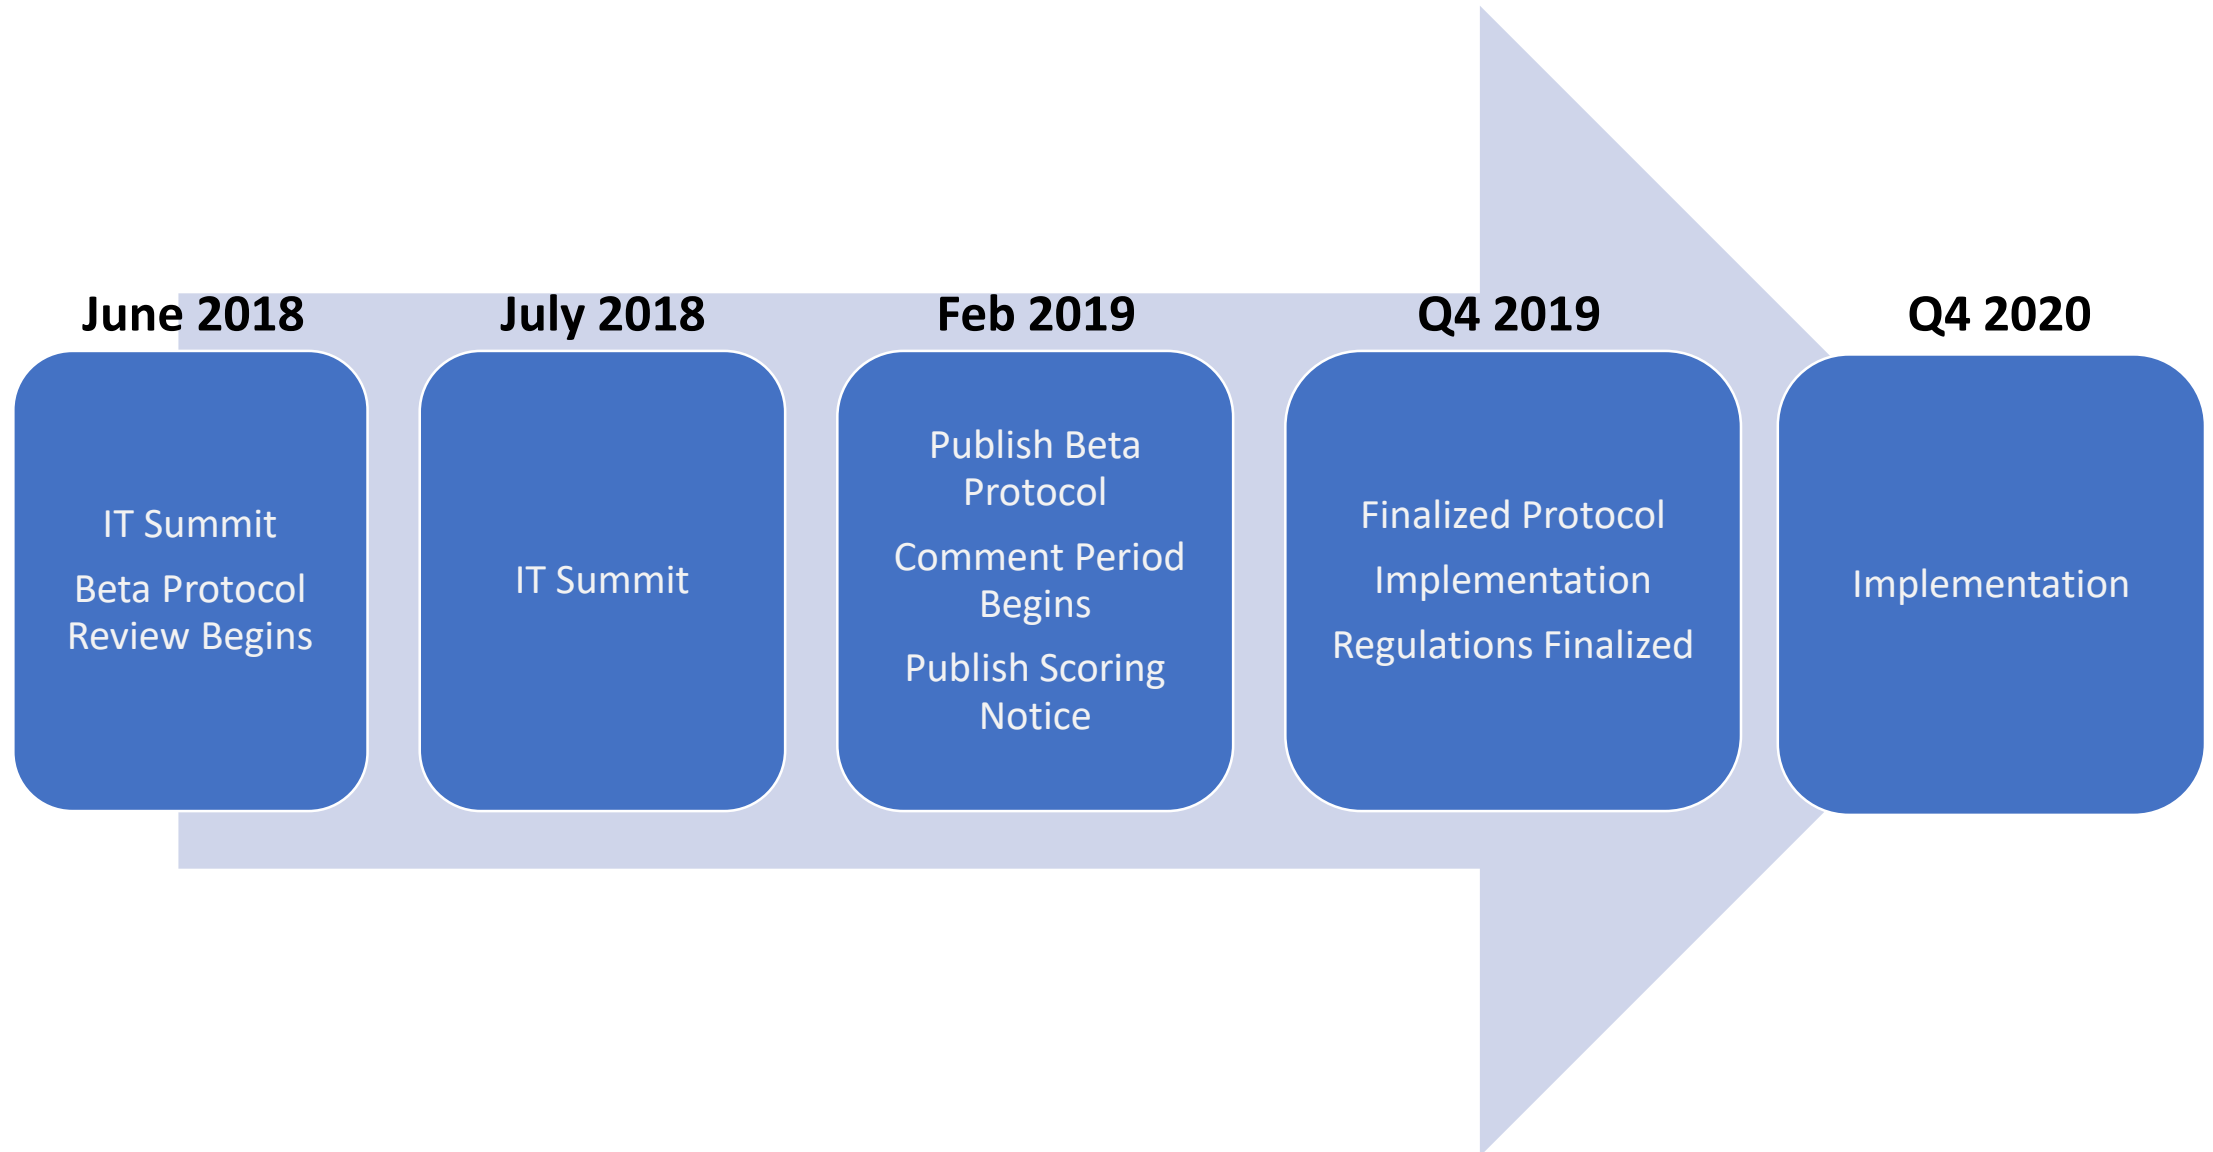

Versioning

- The Beta version of UPCS-V will be the first version released.
- Future versions of the decision tree will be published as needed.
- Previous versions of the decision tree will be maintained for past Inspections.

Communication with SWAT

- The VEDGA team can be reached on:
 - Email: ISDV@HUD.GOV
 - Slack Channel: PIC-NG (request an invite)

Next Steps – Target Timeframe

Conclusion

- Final Thoughts
- Questions and Answers
- Continue to provide your thoughts and feedback at ISDV@hud.gov.

Thank You!
