TITLE: EGRESS
VERSION: V2.1
DATE PUBLISHED: 4/2/21

DEFINITION: A safe, continuous, and unobstructed path of travel from any point in the building, unit, or structure to the public way.

PURPOSE: To get all occupants out of a building in a safe and expeditious manner during a fire or other emergency.

NAME VARIANTS: Door; Window; Hallway; Escape ladder; Fire escape; Stairwell

COMMON MATERIALS: Wood; Glass; Metal

COMMON COMPONENTS: Door; Window; Escape ladder; Fire escape; Stairwell

LOCATION:
- Unit Hallway, stairwell, corridor
- Inside Hallway, stairwell, corridor
- Outside None

MORE INFORMATION: Related standards: Door – Entry; Door – General; Window; Stairs; Fire Escape; and Sidewalk, Walkway, and Ramp

DEFICIENCY 1: Obstructed egress on a building 4 stories or more.
LOCATION: Unit Inside

DEFICIENCY 2: Obstructed egress on a building 3 stories or less.
LOCATION: Unit Inside
DEFICIENCY I — UNIT:  **OBSURED EGRESS ON A BUILDING 4 STORIES OR MORE.**

**DEFICIENCY CRITERIA:**
- Egress door or window does not fully open.
- OR
- There is not a minimum of 2 unobstructed means of egress from a building to the public way and 1 unobstructed primary means of egress from the unit to the exit access.

**HEALTH AND SAFETY DETERMINATION:**
- Life-Threatening
- The Life-Threatening category includes deficiencies that, if evident in the home or on the property, present a high risk of death to resident.

**CORRECTION TIMEFRAME:**
- 24 hours

**HCV PASS / FAIL:**
- Fail

**HCV CORRECTION TIMEFRAME:**
- 24 hours

**RATIONALE:**

<table>

<td>R2</td>
<td>Safety</td>
<td>Indirect</td>
<td>Resident could be injured because of this condition.</td>
<td>In a building with 4 stories or more, if an egress door or window does not fully open or there is not the minimum number of unobstructed means of egress and there is a fire, then the resident may be unable to safely and expeditiously exit, which may result in injury or death.</td>
</tr>
<tr>
<td>R6</td>
<td>Usability or Operability of Fixtures</td>
<td>Direct</td>
<td>Because of this condition, the resident is unable to use certain fixtures, features, or appliances, which are reasonably assumed to be part of their rent.</td>
<td>In a building with 4 stories or more, if an egress door or window does not fully open or there is not the minimum number of unobstructed means of egress and there is a fire, then the resident may not be able to fully use the egress points to safely exit.</td>
</tr>
<tr>
<td>M1</td>
<td>Corrective Maintenance</td>
<td>Direct</td>
<td>It is reasonable to expect that a tenant to report this deficiency, and for facilities management to prioritize a work order response to fix that deficiency.</td>
<td>In a building with 4 stories or more, a resident is likely to notice an egress door or window does not fully open or there is not the minimum number of unobstructed means of egress within the unit and to recognize this is important enough to report to property management because it may present safety hazards. Property management should be expected to prioritize a work order to remedy this deficiency because it may result in safety hazards.</td>
</tr>
</tbody>
</table>

**INSPECTION PROCESS:**

- **Observation:**
  - Look for a minimum of 2 means of egress from a building to the public way and 1 primary means of egress from the unit to the exit access.
  - Verify the exit discharge is unobstructed.

- **Request for Help:**
  - None

- **Action:**
  - Verify the egress door fully opens, if applicable.
- Verify the egress window fully opens, if applicable.
- Verify the minimum number of unobstructed means of egress are present.

More Information: The following are examples of conditions on doors and windows that may obstruct means of egress to the exit access:
- Double key cylinder deadbolt locks or any lock that requires a key, a tool, or special knowledge or effort to operate (from the egress side) are not allowed on any door that serves as an exit or any door along the exit access.
- Window locks that require a key, a tool, or special knowledge or effort to operate (from the egress side).
- When fixed security bars are present that cover a window or door that is the designated primary means of emergency egress from the building, or a window that is the designated egress point to a designated fire escape.
- Any lock on moveable security bars for doors or windows requiring a key (special tool) to open, whether locked or unlocked at the time of inspection.
- Housekeeping or storage practices of placing items that obstruct a primary means of egress.

______________________________________________________________

**Tools or Equipment:**

**Required:**
- None

**Useful:**
- None
DEFICIENCY I — INSIDE: **OBSTRUCTED EGRESS ON A BUILDING 4 STORIES OR MORE.**

**DEFICIENCY CRITERIA:**
Egress door or window does not fully open.

OR

There is not a minimum of 2 unobstructed means of egress from a building to the public way, if so designed, and 1 unobstructed primary means of egress from the inside location to the exit access.

**HEALTH AND SAFETY DETERMINATION:**
Life-Threatening

The Life-Threatening category includes deficiencies that, if evident in the home or on the property, present a high risk of death to resident.

**CORRECTION TIMEFRAME:**
24 hours

**HCV PASS / FAIL:**
Fail

**HCV CORRECTION TIMEFRAME:**

INSPECTION PROCESS:
- **Observation:**
  - Look for a minimum of 2 means of egress from a building to the public way and 1 primary means of egress from the unit to the exit access.
  - Verify the exit discharge is unobstructed.
- **Request for Help:** None
- **Action:** Verify the egress door fully opens, if applicable.
- Verify the egress window fully opens, if applicable.
- Verify the minimum number of unobstructed means of egress are present.

More Information:
- Child safety window guards that are normally found in apartment and public hallway windows to protect children 10 years of age or younger from falling to the outside of the building are typically lightweight metal construction and can be dislodged with a reasonable degree of force when necessary; these should not be considered as obstructed egress unless they are improperly installed or constructed.
- A hasp attached to moveable security bars is not a deficiency provided that the inspector can test the bars to evaluate proper operation.
- The following are examples of conditions on doors and windows that may obstruct means of egress to the exit access:
  - Double key cylinder deadbolt locks or any lock that requires a key, a tool, or special knowledge or effort to operate (from the egress side) are not allowed on any door that serves as an exit or any door along the exit access.
