2022 FHA Appraisal Policies, Principles and Practices for Appraisers

March 31, 2022

Presented by:
Malcolm Jefferson
Branch Chief
Technical Branch I, Processing and Underwriting Division
Atlanta Homeownership Center

Richard P. Negro
Senior Review Appraiser
Technical Branch II, Processing and Underwriting Division
Philadelphia Homeownership Center

Last Updated: 03/11/2022
Homeownership Center (HOC) Training Team

- Mr. Malcolm Jefferson, Technical Branch I Chief
  - Atlanta Homeownership Center (AHOC)

- Mr. Richard P. Negro, Technical Branch II Senior Appraiser
  - Philadelphia Homeownership Center (PHOC)
The purpose of this presentation is to provide an overview and summation of recent changes to the Federal Housing Administration (FHA) policy. It introduces and explains official policy issued in Department of Housing and Urban Development (HUD) Handbooks and Mortgagee Letters. If you find a discrepancy between the presentation and Handbooks, Mortgagee Letters, etc., the official policies prevail. Please note the information provided in this training is subject to change.

Please consult Handbook 4000.1 and Mortgagee Letters through HUDClips for the most recent updates and current policy.
Agenda

- Single Family Housing Policy Handbook 4000.1
- Appraisal Guidance Update 2020-2021
- Appraisal Integrity
- Components of Appraisal Guidance
- Defective Property Conditions
Agenda (cont.)

- Fannie Mae Form 1004
- Fannie Mae Form 1004c
- Fannie Mae Form 1073
- Transferring Appraisals and Reconsideration of Value
- New Construction
HUD.GOV Appraiser’s Page

Reporting Requirements

Single Family Housing Appraisal Report and Data Delivery Guide

- Posted to the Department of Housing and Urban Development (HUD) website: https://www.hud.gov/sites/documents/SFH_POLI_APPR_RPT_FIN.PDF

- Describes reporting requirements for the five appraisal report forms utilized by the Federal Housing Administration (FHA).

- Includes Fannie Mae/Freddie Mac Uniform Appraisal Dataset (UAD) formats and requirements where applicable.

- Appraisal software companies will use this document to ensure that their products will comply with FHA requirements.
Evaluating Credit History

Appraisal Guidance Update 2020/2021
**Exterior only Scope of Work Option**

**Mortgagee Letter 2020-05**

- FHA Single Family’s Exterior-Only or Desktop-Only Appraisal inspection option limits face-to-face contact for certain transactions affected by the Presidentially-Declared COVID-19 National Emergency Declaration.

- Policy updates in this Mortgagee Letter (ML) are temporary and will not be incorporated into Handbook 4000.1.

- ML 2020-05 was not extended beyond 6-30-2021

There is a new manufactured home category that include features that are found in site-built construction, including, but not limited to high pitched roof lines, interior drywall finished and attached garages.

Appraisals must include at least two sales with similar certification when available.

These programs are:
- Fannie Mae MH Advantage®
- Freddie Mac CHOICEHome®

These manufactured homes will have a sticker affixed near the HUD data plate.

A photo of the sticker must be included to meet documentation requirements.
Manufactured Housing Comparable Selection (cont.)

- Under a temporary exception, (expires on 12/31/2022), if less than two comparable MH Advantage® (Figure 1) or CHOICEHome® (Figure 2) sales are available, the Appraiser may utilize other factory-built, or site-built construction as comparable sales.
ML 2021-27 (November 17, 2021)

- HUD expects all parties engaged in the FHA-insured Mortgages process to comply with all anti-discrimination laws, rules, and requirements applicable in the performance of their duties, including full compliance with the relevant provisions of:
  - Title VIII of the Civil Rights Act of 1968 (Fair Housing Act);
  - Fair Credit Reporting Act, Public Law 91-508;
  - Equal Credit Opportunity Act (ECOA), Public Law 94-239 and 12 CFR Part 202; and
  - 5 CFR 5.105(a)(1) and (2).
The Fair Housing Act prohibits discrimination because of actual or perceived race, color, national origin, religion, sex (including sexual orientation or gender), familial status, and disability in the sale or rental of housing, including against individuals seeking a mortgage or housing assistance or other housing-related activities. Various federal fair housing and civil rights laws require HUD and its program participants to affirmatively further the purposes of the Fair Housing Act.
Appraisal Integrity
Property Acceptability Criteria

• The Mortgagee must evaluate the appraisal and any supporting documentation to determine if the property complies with HUD’s Property Acceptability Criteria.

• Existing and New Construction properties must comply with Application of Minimum Property Requirements and Minimum Property Standards by Construction Status.

Handbook 4000.1, Section II.A.3.a
Appraiser and Mortgagee Responsibilities

- Mortgagees bear primary responsibility for determining eligibility; however, the Appraiser:
  - Provides preliminary verification that the property meets the Property Acceptability Criteria, which includes HUD’s Minimum Property Requirements (MPR) and Minimum Property Standards (MPS).

Handbook 4000.1, Section II.A.3.a.ii
• **The Mortgagee must** evaluate the appraisal in accordance with the requirements for Defective Conditions to determine if the Property is eligible for an FHA-insured Mortgage.

• If defective conditions exist and correction is not feasible, **the Mortgagee must reject the Property.**
Components of Appraisal Guidance
# Components of Appraisal Guidance

<table>
<thead>
<tr>

<tr>
<td>Property Requirements</td>
<td>FHA requires underwriting of Property condition, as well as valuation.</td>
</tr>
<tr>
<td>Appraiser Requirements to Observe, Analyze, and Report</td>
<td>The appraisal provides the Mortgagee with necessary information to determine if a property meets the minimum requirements and eligibility standards for an FHA-insured Mortgage.</td>
</tr>
<tr>
<td>FHA Appraiser Roster Relations</td>
<td>FHA Appraiser Roster relationship is discussed in the Doing Business with FHA section of Handbook 4000.1.</td>
</tr>
<tr>
<td>FHA Appraiser Quality Control and Oversight</td>
<td>FHA monitors FHA Appraisers and employs enforcement actions if its requirements are violated.</td>
</tr>
</tbody>
</table>
Information Required before Commencement of the Appraisal:

- The Effective Date of the appraisal cannot be a date before FHA case number assignment unless the Mortgagee certified that the appraisal:
  - Was ordered for conventional lending or Government-guaranteed loan purposes; and
  - Was performed pursuant to FHA guidelines.

Handbook 4000.1, Section II.D.1.a
Intended Use/User

- The intended use of the appraisal must indicate that it is solely to assist FHA in assessing the risk of the Property securing the FHA-insured Mortgage.

- Additionally, FHA and the Mortgagee must be indicated as the intended users of the appraisal report.
Documents Provided to Appraiser

- A complete copy of the Executed Sales Contract when a purchase transaction occurred
- The land lease, if applicable
- Surveys or legal description, if available
- A point of contact and contact information for the Mortgagee so that the Appraiser can communicate noncompliance issues
- Any other legal documents contained in the loan file

Handbook 4000.1, Section II.D.1.a
Update of Appraisal

• The 120-day validity period for an appraisal may be extended for 30 days at the option of the Mortgagee without an appraisal update, if:
  1. The Mortgagee approved the borrower or HUD issued the Firm Commitment before the expiration of the original appraisal; or
  2. The borrower signed a valid sales contract prior to the expiration date of the appraisal.

• If an appraisal will expire before an update can be completed, or a 30-day extension of the original appraisal is insufficient to complete the insurance process, the Mortgagee may:
  - Order a new appraisal under the same case number; or
  - Cancel the case number and order a new case number and appraisal.
Update of Appraisal (cont.)

- Update of Appraisal must be performed before the initial appraisal, with no extension, has expired.

- An appraisal cannot be updated if an appraisal extension has been issued.

- Once updated, the maximum validity period for an appraisal is 240 days after the Effective Date of the initial appraisal report.
• The update should be completed by the same appraiser who performed the original appraisal. Extenuating circumstances may warrant an exception to this requirement.

• The update must be completed on the 1004D form.

• A new 1004MC must accompany the 1004D.

Handbook 4000.1, Section II.A.1.b.ii
General Appraiser Requirements

• When performing an appraisal, the Appraiser must review and analyze the following:
  – A complete copy of the executed sales contract for the subject, if a purchase transaction;
  – The land lease, if applicable;
  – Surveys or legal descriptions, if available; and
  – Any other legal documents contained in the loan file.

• The Appraiser must report the result of that analysis in the appraisal report.

Handbook 4000.1, Section II.D.2
Encroachments

- The Appraiser must identify any Encroachments of the subject’s dwelling, garage, or other improvement onto an adjacent Property, right-of-way, utility Easement, or building restriction line.

- The Appraiser must also identify any Encroachments of a neighboring dwelling, garage, other physical Structure or improvements onto the subject Property.

Handbook 4000.1, Section II.D.3.b.ii.(d)
Encroachments (cont.)

• Encroachment by the subject or adjacent Property fences is acceptable provided such Encroachment does not affect the marketability of the subject Property.
Easements and Deed Restrictions

- The Appraiser must analyze and report the effect that Easements and other legal restrictions, such as Deed Restrictions, may have on the use, value and marketability of the Property.

- The Appraiser must review recorded subdivision plats and deeds when available through the normal course of business.

Handbook 4000.1, Section II.D.3.b.ii.(e)
Externalities refer to off-site conditions that affect a Property’s value.

- Externalities include:
  - Heavy traffic, airport noise and hazards, special airport hazards, proximity to high pressure gas lines, Overhead Electric Power Transmission Lines and Local Distribution Lines, smoke, fumes and other offensive or noxious odors, and stationary storage tanks.

- The Appraiser must report the presence of Externalities so that the Mortgagee can determine eligibility.

Handbook 4000.1, Section II.D.3.b.iii
Externalities (cont.)

Airport Noise and Hazards

• The Appraiser must identify if the property is affected by noise and hazards of low flying aircraft because it is near an airport.

• The Appraiser must review airport contour maps and analyze accordingly.

• The Appraiser must identify if the Property is located within a Runway Clear Zone (also known as a Runway Protection Zone).

• For Properties located in an Accident Potential Zone 1 (APZ 1) at military airfields, the Appraiser must require compliance with the Department of Defense (DoD) Guidelines.

Handbook 4000.1, Section II.D.3.b.iii
Airport Noise and Hazards

https://www.faa.gov/airports/environmental/airport_noise/noise_exposure_maps/

Handbook 4000.1, Section II.D.3.b.iii
High Voltage Transmission Line

• The appraiser must notify the Mortgagee of the deficiency of MPR or MPS if:
  – The Overhead Electric Power Transmission Lines or the Local Distribution Lines pass directly over any dwelling, Structure or related property improvement, including pools, spas, or water features; or
  – The dwelling or related property improvements are located within an Easement or if they appear to be located within an unsafe distance of any power line or tower.
Externalities (cont.)

Stationary Storage Tanks

- If the subject property line is located within 300 feet of an above ground stationary storage tank with a capacity of 1,000 gallons or more of flammable or explosive material, then the property is ineligible for FHA insurance.
Nonresidential Use

• The nonresidential portion of the total floor area may not exceed 49 percent.
  – Storage areas or similar spaces that are integral parts of the non-residential portion must be included in the calculation of the non-residential area.

• Any nonresidential use of the Property must be subordinate to its residential use, character and appearance.

• Nonresidential use may not impair the residential character or marketability of the Property.

Handbook 4000.1, Section II.D.3.b.ii.(B)
Mixed Use

- Mixed Use refers to:
  - A Property suitable for a combination of uses including any of the following: commercial, residential, retail, office or parking space.
Mixed Use (cont.)

Mixed Use one- to four-unit Single Family Properties are eligible for FHA insurance, provided:

– A minimum of 51 percent of the entire building square footage is for residential use; and
– The commercial use will not affect the health and safety of the occupants of the residential Property.

Handbook 4000.1, Section II.D.13
A Planned Unit Development (PUD) refers to:
- A residential development that contains, within the overall boundary of the subdivision, common areas and facilities owned by a Homeowners’ Association (HOA), to which all homeowners must belong and to which they must pay lien-supported assessments.

A unit in a PUD consists of:
- The fee title to the real estate represented by the land; and
- The improvements thereon plus the benefits arising from ownership of an interest in the HOA.
Partially Below-Grade Habitable Space

- Partially Below-Grade Habitable Space
  - Refers to living area constructed partially below-grade but that has the full utility of gross living area (GLA).

- The Appraiser must report:
  - The design and measurements of the subject;
  - The market acceptance or preference;
  - How the levels and areas of the dwelling are being calculated and compared; and
  - The effect that this has on the analysis.
• Regardless of the description of the rooms, bedrooms or baths as above grade or below grade:
  – The Appraiser must analyze all components of the subject Property in the valuation process.

• The Appraiser must not identify a room as a bedroom that cannot accommodate ingress or egress in the event of an emergency:
  – Regardless of location above or below grade.
The Appraiser must treat room additions and garage conversions as part of the GLA of the dwelling, provided that the addition or conversion space:

- Is accessible from the interior of the main dwelling in a functional manner;
- Has a permanent and sufficient heat source; and
- Was built in keeping with the design, appeal, and quality of construction of the main dwelling.
Additions and Converted Space (cont.)

- Room additions and garage conversions that do not meet the criteria listed above are to be addressed as a separate line item in the sales grid, not in the GLA.

- The Appraiser must not add an Accessory Dwelling Unit (ADU) or secondary living area to the GLA.

Handbook 4000.1, Section II.D.3.c.iii
Appliances

• Definition
  – Appliances refer to refrigerators, ranges/ovens, dishwashers, disposals, microwaves, and washers/dryers.

• Standard
  – Appliances that are to remain and that contribute to the market value opinion must be operational.

Handbook 4000.1, Section II.D.3.d
• The Appraiser must notify the Mortgagee if mechanical systems do not appear to:
  – Have reasonable future utility, durability, and economy;
  – Be safe to operate;
  – Be protected from destructive elements; or
  – Have adequate capacity.
• The Appraiser must notify the Mortgagee of the deficiency of MPR or MPS if the permanently installed heating system does not:
  – Automatically heat the living areas of the house to a minimum of 50 degrees Fahrenheit in all Gross Living Areas (GLAs), as well as in non-GLAs containing building or system components subject to failure or damage due to freezing;
  – Provide healthful and comfortable heat or is not safe to operate; or
  – Rely upon a fuel source that is readily obtainable within the subject’s geographic area.
The Appraiser must notify the Mortgagee of the deficiency of MPR or MPS if the permanently installed heating system does not:

- Have market acceptance within the subject’s marketplace; and
- Operate without human intervention for extended periods of time.
Central air conditioning is not required but, if installed, must be operational.

Handbook 4000.1, Section II.D.3.iii
Flush the toilets and operate a sample of faucets to:

• Observe water pressure and flow; and

• Determine whether:
  – the plumbing system is intact;
  – any foul odors are emitted;
  – faucets function appropriately, that both cold and hot water run; and
  – there is no readily observable evidence of leaks or structural damage under fixtures.
**Excess Land** refers to land that is not needed to serve or support the existing improvements.

- The highest and best use of the Excess Land may or may not be the same as the highest and best use of the improved parcel.

- Excess Land may have the potential to be sold separately.
Surplus Land refers to land that is not currently needed to support the existing improvement but cannot be separated from the Property and sold off.

- Surplus Land does not have an independent highest and best use and may or may not contribute to the value of the improved parcels.
  - The Appraiser must include the highest and best use analysis in the appraisal report to support the Appraiser’s conclusion of the existence of Excess Land.
  - The Appraiser must include Surplus Land in the valuation.
Excess vs. Surplus Land (cont.)

• If the subject of an appraisal contains two or more legally conforming platted lots under one legal description and ownership, and the second vacant lot is capable of being divided and/or developed as a separate parcel where such a division will not result in a non-conformity in zoning regulations for the remaining improved lot, the second vacant lot is Excess Land.

• The value of the second lot must be excluded from the final value conclusion of the appraisal and the Appraiser must provide a value of only the principal site and improvements under a hypothetical condition.
Excess vs Surplus Land (cont.)

- House
- Vacant Lot
- House
Defective Property Conditions
Defective Conditions

• Defective construction, evidence of continuing settlement, excessive dampness, leakage, decay, termites, environmental hazards, or other conditions affecting the health and safety of occupants, collateral security or structural soundness of the dwelling.

• The Mortgagee must render the property ineligible until the defects or conditions have been remedied and the probability of further damage eliminated.

Handbook 4000.1, Section II.D.3.a.iii.
Defective Conditions (cont.)

Inspection Requirements:

• Examples of conditions that require an inspection by qualified individuals or Entities include, but are not limited to:
  – Standing water against the foundation and/or excessively damp basements
  – Hazardous materials on the site or within the improvements
  – Faulty or defective mechanical systems (electrical, plumbing or heating)
  – Evidence of possible structural failure (e.g., settlement or bulging foundation wall, unsupported floor joists, cracked masonry walls or foundation)

Handbook 4000.1, Section II.D.3.a.iv
Defective Conditions (cont.)

Inspection Requirements (cont.):

• Examples of conditions that require an inspection by qualified individuals or Entities include, but are not limited to:
  – Evidence of possible pest infestation
  – Leaking or worn-out roofs
  – Chipped, Peeling, Loose Lead-Based Paint (on homes built in 1978 or prior)
  – The reason for or indication of a particular problem must be given when requiring an inspection of any mechanical system, structural system, etc.
Minimum Required Repairs

• When the appraisal report or inspection from a Qualified Entity indicates that repairs are required to make the property meet HUD’s MPR or MPS, the Mortgagee must comply with Repair Requirements.

• If repairs for Existing Construction cannot be completed prior to closing, the Mortgagee may establish an escrow account in accordance with Repair Completion Escrow Requirements.

Handbook 4000.1, Section II.A.3.a.III
Minimum Required Repairs (cont.)

• The mortgagee must determine which repairs for a Property must be made for the property to be eligible for FHA-insured financing.

• Required repairs are limited to those repairs necessary to maintain safety, security and soundness.

• Required repairs are those necessary to preserve the continued marketability of the property and protect the health and safety of the occupants.

• If an element is functioning well but has not reached the end of its useful life, the appraiser should not recommend replacement because of age.
Methamphetamine Contaminated Properties

• Contaminated properties have potentially significant environmental risks due to use and/or storage of dangerous chemicals on the property.

• If the Mortgagee notifies the Appraiser or the Appraiser has evidence that a Property is contaminated by the presence of methamphetamine (meth), either by its manufacture or by consumption, the Appraiser must render the appraisal subject to the Property being certified safe for habitation.

• The Appraiser must analyze and report any long-term stigma caused by the Property’s contamination by meth and the impact on value or marketability.

Handbook 4000.1, Section II.D.3.n.ii
Documentation Requirements:

• If additional inspections, repairs, or certifications are noted by the appraisal or are required to demonstrate compliance with **Property Acceptability Criteria**, the Mortgagee must obtain evidence of completion of such inspections, repairs, or certifications.

Handbook 4000.1, Section II.A.3.b

**OFFICE OF SINGLE FAMILY HOUSING**

74
Observing the Site

- FHA requires the appraiser to disclose any hazards that:
  - Endanger physical improvements;
  - Affect livability;
  - Impair marketability; and
  - Risk health and safety of occupants.

Handbook 4000.1, Section II.D.3.b.iv
Observing the Site (cont.)
Observing the Site (cont.)
Observing the Site (cont.)
• A property is not eligible for FHA insurance if:
  – A residential building and related improvements to the property are located within Special
    Flood Hazard Area AND insurance under the National Flood Insurance Program (NFIP) is not
    available in the community; or
  – The improvements are, or are proposed to be, located within a Coastal Barrier Resource
    System (CBRS).

• The appraiser **must** provide a copy of a flood map when the property is located
  within a special flood hazard area.

• The Appraiser must quantify the effect on value, if any, for Properties situated
  within a designated SFHA.

Handbook 4000.1, Section II.D.3.b.iv
Public Water Supply System

• The Mortgagee must confirm that a connection is made to a public or Community Water System whenever feasible and available at a reasonable cost.

• If connection costs to the public or community system are not reasonable, the existing onsite systems are acceptable, provided they are functioning properly and meet the requirements of the local health department.

• The underwriter, not the appraiser, is required to determine feasibility of connecting improvements to public water and/or septic system.
Individual Water Supply Systems (Wells)

• When an Individual Water Supply System is present, the Mortgagee must ensure that the water quality meets the requirements of the health authority with jurisdiction.

• If there are no local (or state) water quality standards, then water quality must meet the standards set by the EPA, as presented in the National Primary Drinking Water regulations in 40 CFR §§ 141 and 142.

• The appraiser and/or Mortgagee must require inspections of readily observable deficiencies of well or septic systems.
Improvements Section

- Number of Units
- Stories
- Property Type
- Design
- Year Built
- Effective Age
Accessory Dwelling Units (ADU)

• An ADU refers to a habitable living unit added to, created within, or detached from a primary one-unit single family dwelling, which together constitute a single interest in real estate.

• It is a separate additional living unit, including:
  – Kitchen;
  – Sleeping; and
  – Bathroom facilities.
Accessory Dwelling Units (cont.)
Appraiser is to state what he/she saw and describe when necessary.

What is readily observable?

What upgrades did he/she see?
• The appraiser is required to observe the interiors of all attic spaces.

• The appraiser is not required to disturb insulation, move personal items, furniture, equipment or debris that obstructs access or visibility.
  – If unable to view the improvements safely in their entirety, the appraiser must contact the Mortgagee and reschedule a time when a complete visual observation can be performed; or complete the appraisal subject to inspection by a qualified third party.

• Photograph required.
Mechanical Systems

- All utilities must be on at the time of appraisal.

Handbook 4000.1, Section II.D.3.f

</tbody>
</table>
Property Condition Requirements

- Determine the overall quality and condition of property.

- Identify items that require immediate repair and are Defective Conditions (health & safety, structural soundness).

- Identify items where maintenance has been deferred, which may not require immediate repair.
Property Condition Requirements (cont.)

Property Condition Requirements (cont.)
Property Condition Requirements (cont.)
The three approaches to value are reconciled with a brief description of the validity of each approach with respect to the subject property appraisal:

- Sales Comparison Approach;
- Cost Approach; and
- Income Approach
The Appraiser must follow proper appraisal practices including:

• Application of the Principle of Contribution

• Calculation of Contributory Value

• Analysis via all applicable approaches:
  – Direct Sales Comparison Approach
  – Cost Approach
  – Income Approach

• Reconciliation of the indications calculated
## Identifying the Appraisal Report

<thead>
<tr>
<th><strong>CLARITY</strong></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AS IS</strong></td>
<td>No repairs, alterations or required inspections; Establish the “as is” value for 203(k); or Appraiser is recommending the property for rejection</td>
</tr>
<tr>
<td><strong>Subject To Completion per Plans &amp; Specs</strong></td>
<td>Subject is less than 90% complete</td>
</tr>
<tr>
<td><strong>Subject To Repairs or Alterations</strong></td>
<td>The subject property is 90% or more complete</td>
</tr>
<tr>
<td><strong>Subject To Required Inspection(s)</strong></td>
<td>The subject property is subject to inspection by a qualified individual or entity when the observation reveals evidence of a potential safety, soundness, or security issue beyond the appraiser’s ability to assess. (termite, electrical, structural, etc.)</td>
</tr>
</tbody>
</table>
Addressing Unique Properties

• Must be:
  – Legally zoned;
  – Structurally sound;
  – Marketable; and
  – Highest & Best Use.

• If zoning is Legal Non-Conforming—evidence property can be rebuilt.

• Mixed Use Properties require that a minimum of 51 percent of the entire building area be for Residential use.
# Photograph Requirements

<table>

<tr>
<td></td>
<td>• Multiple Listing Service (MLS) photographs are acceptable to exhibit comparable condition at the time of sale. However, appraisers must include their own photographs as well to document compliance.</td>
</tr>
<tr>
<td><strong>Subject Property Deficiencies</strong></td>
<td>• Photographs of the deficiency or condition requiring inspection or repair</td>
</tr>
<tr>
<td><strong>Condominium Projects</strong></td>
<td>• Additional photographs of the common areas and shared amenities of the Condominium Project</td>
</tr>
</tbody>
</table>
Required Exhibits

- Maps
  - Legible street map showing location of subject and each of the comparable properties, including sales, rentals, listings and other data points utilized.
  - If substantial distance exists; Additional legible maps must be included.
Required Exhibits (cont.)
Fannie Mae Form 1004C: Manufactured Housing
Manufactured Homes
Modular? Manufactured? Site Built?

You can no longer tell when sitting at the curb.
Manufactured Home Appraisal
HUD Certification Label: “Red Tag”

- HUD Certification Label, also known as a HUD seal or HUD tag, refers to a two inch by four-inch aluminum plate permanently attached to Manufactured Housing.

Handbook 4000.1, Section II. D. 5. f.
• The Appraiser must report the HUD label number for all sections, or report that the HUD Certification Label is missing or that the Appraiser was unable to locate it.

• If the appraisal indicates the HUD Certification Label is missing from the Manufactured Housing unit, the Mortgagee must obtain label verification from the Institute for Building Technology and Safety (IBTS). [https://www.ibts.org/](https://www.ibts.org/).

Handbook 4000.1, Section II. D. 5. f.; II. A.1. b.
Data Plate refers to a paper document located on the interior of the Property that contains specific information about the unit and its manufacturer.

Handbook 4000.1, Section II. D. 5. g.
The Appraiser must report the information on the Data Plate within the appraisal, including the manufacturer name, serial number, model and date of manufacture, as well as wind, roof load and thermal zone maps.

If the Data Plate is missing or the Appraiser is unable to locate it, the Appraiser must report this in the appraisal and is not required to secure the Data Plate information from another source.
For Manufactured Housing, the appraisal must be conditioned upon the certification of an engineer or architect that the foundation is in compliance with the Permanent Foundations Guide for Manufactured Housing (PFGMH) except when completing an appraisal for a HUD Real Estate Owned Property.

Handbook 4000.1, Section II. D. 3. I
PFGMH Certification

• The **Mortgagee** must obtain a certification by an engineer or architect, who is licensed/registered in the state where the Manufactured Home is located, attesting to compliance with the PFGMH.

• The Mortgagee may obtain a copy of the foundation certification from a previous FHA-insured Mortgage, showing that the foundation met the guidelines published in the PFGMH that were in effect at the time of certification, provided there are no alterations and/or observable damage to the foundation since the original certification.

Handbook 4000.1, Section II. A. 1. b.
Foundations – Perimeter Enclosure

Perimeter Enclosure refers to a continuous wall that is adequately secured to the perimeter of the unit and allows for proper ventilation of the crawl space.

Skirting refers to a non-structural enclosure of a foundation crawl space intended to ensure the crawl space is free from exposure to the elements and free from vermin, trash, and debris. Typically, but not always, it is a lightweight material such as vinyl or metal attached to the side of the Structure, extending to the ground (generally, not installed below frost depth).

Handbook 4000.1, Section II. D. 5. e.
New Construction

• The space beneath the house must be enclosed by a continuous foundation type construction designed to resist all forces to which it is subject without transmitting forces to the building superstructure. The enclosure must be adequately secured to the perimeter of the house and be constructed of materials that conform, accordingly, to HUD MPS (such as concrete, masonry or treated wood) and the PFGMH for foundations.
Existing Construction

- If the perimeter enclosure is non-load-bearing skirting comprised of lightweight material, the entire surface area of the skirting must be permanently attached to backing made of concrete, masonry, treated wood or a product with similar strength and durability.
Foundations - Skirting (Examples)
Foundations - Skirting (Examples) (cont.)
Foundations - Additions to Manufactured Housing
If the Appraiser notes additions or alterations to the Manufactured Housing unit, the Mortgagee must ensure the addition was addressed in the foundation certification. If the additions or alterations were not addressed in the foundation certification, the Mortgagee must obtain:

- An inspection by the state administrative agency that inspects Manufactured Housing for compliance; or

- Certification of the structural integrity from a licensed structural engineer if the state does not employ inspectors.
Additional Manufactured Home on Property
Additional Manufactured Home on Property (cont.)

• The Appraiser may consider a Manufactured Home to be an ADU if it meets the highest and best use and FHA requirements.

• The Appraiser may value a Manufactured Home on the Property that physically or legally may not be used as a dwelling and does not pose any health and safety issues by its continued presence as a storage unit.

Handbook 4000.1, Section II. D. 3. c.
Fannie Mae Form 1073: Individual Condominium Unit
Individual Condominium Unit

- Appraisal Report: Fannie Mae Form 1073
Condominiums

- Condominium Project refers to a project in which one-family Dwelling Units are attached, semi-detached, detached, or Manufactured Home units, and in which owners hold an undivided interest in Common Elements.

- Common Elements refer to the Condominium Project’s common areas and facilities including underlying land and buildings, driveways, parking areas, elevators, outside hallways, recreation and landscaped areas, and other elements described in the condominium declaration.
Site Condominium or Single Family Home?
Condominium or Attached Single Family Residence?
FHA Condominium Project Approval (cont.)

Condominium or Manufactured Home?
FHA Condominium Project Approval (cont.)

- Condominium?
A Site Condominium refers to a:

- Condominium Project that consists entirely of single family detached dwellings that have no shared garages, or any other attached buildings; or

- Condominium Project that:
  - Consists of single family detached or horizontally attached (townhouse) dwellings where the unit consists of the dwelling and land;
  - Does not contain any Manufactured Housing units; and
  - Is encumbered by a declaration of condominium covenants or a condominium form of ownership.
Site Condos (cont.)

- Manufactured Housing condominium units may not be processed as Site Condominiums.

- Project approval is required for any condominium that does not meet the definition of a site condo.

- The appraiser must report the appraisal on Fannie Mae Form 1073/Freddie Mac Form 465, Individual Condominium Unit Appraisal Report.
Transferring Appraisals and Reconsideration of Value
Transferring Existing Appraisals

- The first Mortgagee must, at the Borrower’s request, transfer the appraisal to the second Mortgagee within five business days.

- The Appraiser is not required to provide the appraisal to the new Mortgagee. The client's name on the appraisal does not need to reflect the new Mortgagee.

- The second Mortgagee may not request the Appraiser to re-address the appraisal.

- If the second Mortgagee finds deficiencies in the appraisal, the Mortgagee must order a new appraisal.
Material Deficiencies

• Material deficiencies on appraisals are those deficiencies that have a direct impact on value and marketability.

• Material deficiencies must be evident on the effective date of the appraisal.

Handbook 4000.1, Section II.A.1.a.iii.(B)(9)(a)
Material Deficiencies (cont.)

- Material deficiencies include, but are not limited to:
  - Failure to report readily observable defects that impact the health and safety of the occupants and/or structural soundness of the house;
  - Reliance upon outdated or dissimilar comparable sales when more recent and/or comparable sales were available as of the effective date of the appraisal; and
  - Fraudulent statements or conclusions when the appraiser had reason to know or should have known that such statements or conclusions compromise the integrity, accuracy and/or thoroughness of the appraisal submitted to the client.

Handbook 4000.1, Section II.A.1.a.iii.(B)(9)(a)
Reconsideration of Value

• The underwriter may request a reconsideration of value when the appraiser did not consider information that was relevant on the effective date of the appraisal.

• The underwriter must provide the appraiser with all relevant data that is necessary for a reconsideration of value.
Reconsideration of Value (cont.)

- The Appraiser may charge an additional fee if the relevant data was not available on the effective date of the appraisal.

- If the unavailability of data is not the fault of the Borrower, the Borrower must not be held responsible for the additional costs.

- The effective date of the appraisal is the date the Appraiser inspected the Property.
New Construction
Construction Type Definitions

- “Proposed Construction” refers to a Property where no concrete or permanent material has been placed.

- Digging of footing is not considered permanent.

Handbook 4000.1, Section II.A.8.i.i
“Under Construction” refers to the period from the first placement of permanent material to 100 percent completion with no Certificate of Occupancy (CO) or equivalent.

Handbook 4000.1, Section II.A.8.i.i
• “Existing Less than One Year” refers to a Property that is 100 percent complete and has been completed less than one year from the date of the issuance of the CO or equivalent.

• The Property must have never been occupied.
• The Mortgagee must provide the Appraiser with a fully executed form HUD-92541, signed and dated no more than 30 Days prior to the date the appraisal was ordered.

• For Properties 90 percent completed or less, the Mortgagee must provide a copy of the floor plan, plot plan, and any other exhibits necessary to allow the Appraiser to determine the size and level of finish of the house they are appraising.
• For Properties greater than 90 percent but less than 100 percent completed, the Mortgagee must provide the Appraiser with a list of components to be installed or completed after the date of inspection.
