

SECTION 8 MIS  
DATABASE DICTIONARY

The Database Dictionary is arranged by data element numbers. It includes, for each data element, the characteristics of the element, the production stage at which it is reported to the database, the input and data sources, the Data Entry Facility screen on which it is reported, and a definition of the element. Appendix 11 is a cross-reference between the data element names and data element numbers which allows easy access to the Database Dictionary for readers more familiar with the names. The Database Dictionary codes are explained below:

**Element Number:** The System 2000 numeric identifier of the data element, prefaced with a "C".

**Element Name:** The name of the data element.

**Size:** Maximum length of the data element including special characters.

**Type:** System 2000 type of data stored in the data element.

|    |   |                              |
|----|---|------------------------------|
| DM | = | Decimal number               |
| DT | = | Date (month/day/year format) |
| IN | = | Integer number               |
| NM | = | Name (Alphanumeric)          |
| TX | = | Text (Alpha)                 |

**Key = K:** These elements may be referenced in a "where" clause query.

**Non-key = NK:** These elements may not be included in a "where" clause query.

**Stage Reported:** The production stage when the data element is posted to the database. Each has a numeric equivalent posted to Processing stage (C1063). These are program-dependent.

|          |   |                                                                                  |
|----------|---|----------------------------------------------------------------------------------|
| AA       | = | Application Approved (08)                                                        |
| ACC/HAP  | = | Annual Contributions Contract (17) or HAP Contract Executed (19) (if obligatory) |
| ADR      | = | Address Reported (none)                                                          |
| AR       | = | Application Received (02, 03, 04, 05)                                            |
| CORR     | = | Correction to previously entered data                                            |
| FPA      | = | Final Proposal Approved (14)                                                     |
| FPR      | = | Final Proposal Received (05, 07,13)                                              |
| HAA      | = | HAP Agreement Approved (18)                                                      |
| HCE      | = | HAP Contract Executed (19)                                                       |
| HLA      | = | ACC/HAP List Approved (15)                                                       |
| IFP/NOFA | = | Publication of IFP/NOFA (01)                                                     |
| OCC      | = | Occupancy Reported (none)                                                        |
| OPNS     | = | Operations (project in Management phase) (20)                                    |
| PA       | = | Proposal Approved (12)                                                           |
| PPA      | = | Preliminary Proposal Approved (09)                                               |
| PPR      | = | Preliminary Proposal Received (03, 06, 07)                                       |

PPX = Preliminary Proposal Terminated (90)  
 PR = Proposal Received (04, 11)  
 R = Reservation of Contract Authority (10)  
 T = Project transfer to another Field Office (none)  
 X = Termination (90)

4050.5 REV-1

APPENDIX 13

Input Source:

HUD Form Numbers used for input to the Section 8 MIS.

CG (computer-generated) = The data value is automatically derived by the update programs based upon other elements entered or the Section 8 program type.  
 IG (interface-generated) = The data element value is passed from another system by an automated interface.  
 MEMO = Formal memorandum from Field Office to Office of Regional Housing.

Data Source: For values directly input to the Section 8 MIS, the document name or source of the data is given.

ADDRESS = Formal Address reporting documents  
 AHAP = HAP Agreement Approved  
 AHAS = Assisted Housing Accounting System  
 APPLICATION = Formal Application documents  
 CORRECTION = Correction to previously entered data  
 CPD = Computer processing date generated by the update programs using the computer date  
 CPL = Computer processing location of the terminal site.  
 EHAP = Executed HAP Contract  
 FH&EO = Supplied by the Field Office's Fair Housing & Equal Opportunity Office  
 FINAL PROP = Formal Final Proposal document  
 FIRST = Posted from the first occurrence of data entered  
 INVITATION = Published IFP/NOFA  
 LAST = Posted from the most recent occurrence of data entered  
 LIST = HAP List  
 MGT REVIEW = Formal Management Review documents  
 MIDLIS = Multifamily Insured and Direct Loan Information System  
 NOTIFICATION = Field Office Notification letter  
 OWNER = Supplied by project owner  
 PHA = Public Housing Authority  
 PAS = Project Accounting System  
 PRE PROP = Formal Preliminary Proposal documents
