

LIFE-CYCLE COST ANALYSES OF
UTILITY COMBINATIONS FOR PUBLIC HOUSING PROJECTS

TABLE OF CONTENTS

	Page
 CHAPTER 1. LIFE-CYCLE COST ANALYSES OF UTILITY COMBINATIONS	
1-1. Purpose	1-1
1-2. Authority	1-1
1-3. Utility Selection	1-1
1-4. Principles of Utility Planning and Evaluation	1-2
1-5. Cost Comparisons	1-4
1-6. Preparation of Life-Cycle Cost Analyses of Utility Systems	1-5
1-7. Selection of Utility Combination	1-6
 CHAPTER 2. ESTIMATING FUEL and ENERGY CONSUMPTIONS	
2-1. Purpose	2-1
2-2. Definitions	2-1
2-3. Water Consumptions	2-2
2-4. Electrical Consumptions for Lighting, Refrigeration and Cooking	2-3
2-5. Gas Consumptions	2-11
2-6. Fuel and Heating Supplies	2-12
2-7. Selecting an Air Conditioning System	2-15
2-8. Heat Pump	2-20
2-9. Solar Energy System	2-20
2-10. Operating Labor	2-21
2-11. Gas Pipeline Safety Regulations	2-21
 Tables	
I. Electrical Consumption and Demand Per Dwelling Per Month	2-3
II. Estimated Monthly Consumption for Electrical Appliances	2-5
III. Estimated Gas Consumption for Cooking in Therms PUM	2-11
IV. Use Factors - Space Heating	2-14
V. Equivalent Full-Load Hours (EFLH) of Operation for Residential Air Conditioning	2-17

CHAPTER 3. INITIAL COSTS, SERVICE LIFE AND
ANNUAL EXPENSE FACTORS OF FACILITIES
AND EQUIPMENT

	page
3-1. General	
3-2. Initial Costs and Service Life	3-1
3-3. Annual Charges for Replacement	3-1
3-4. Procedure for Making Adjustments	3-2
3-5. Annual Expenses from Maintenance and Repair	3-2

Tables:

I.	Electrical System	3-3
II.	Natural Gas systems	3-3
III.	Project Operated Domestic Hot Water Equipment	3-4
IV.	Project Operated Space Heating Equipment	3-5
V.	Individual Dwelling Domestic Hot Water Equipment	3-6
VI.	Individual Dwelling Space Heating Equipment	3-7
VII.	Structural and Related Items	3-9
VIII.	Cooking and Air Conditioning Equipment	3-11

APPENDIX 1.

Form HUD-51994 Life-Cycle Cost Analysis of Utility Combinations
