L. Comparison Approach to Value

7. The undersigned has recited three sales of properties most similar and proximate to the subject property and has described and analyzed these in this analysis. If there is a significant variation between the subject and comparable properties, the analysis includes a dollar adjustment reflecting the market reaction to those items or an explanation supported by the market data. If a significant item in the comparable property is superior to, or more favorable than, the subject property, a minus (-) adjustment is made, thus reducing the indicated value of the subject property. If a significant item in the comparable property is inferior to, or less favorable than, the subject property, a plus (+) adjustment is made, thus increasing the indicated value of the subject property.

8. Indicated Value by Sales Comparison Approach \$ _____

9. The market value (or replacement cost) of the property, as of the effective date of the appraisal, is \$ _____ ** see note below

**** Note:** For Section 221 mortgage insurance application processing, acceptable risk analysis produces a supportable replacement cost estimate, and the estimate reflected here is the replacement cost new/summation approach result. In effect, such "appraisals" are in fact USPAP "consultations" concerning supportable cost limits. For Section 207 and 223 processing, all three approaches to value are included in the appraisal, but the subject property is appraised for intended multifamily use, not necessarily its "highest and best use." The definition provided in USPAP for "market value" is generally observed, but see Handbook 4465.1, paragraph 8-4 for qualifications.

Effective Dates: For new construction or substantial rehabilitation proposals, the effective date of the improvements component estimation is the Line G53 month estimate added to the report and certification date below. The land component is valued as of the inspection date. For Section 223, the effective date of the appraisal is the same as the reporting date, but assumes (hypothetically) the completion of all required repairs/work write-up items.

Comments on: (continue on separate page if necessary)

- Sales comparison (including reconciliation of all indicators of value as to consistency and relative strength and evaluation of the typical investors'/purchasers' motivation in that market).
- Analysis of any current agreement of sale, option, or listing of the subject property and analysis of any prior sales of the subject and comparables within three years of the date of appraisal.
