

ONAP BEST PRACTICE

November 2016

Absentee Shawnee Tribe (AST) Brownfields Clean-Up Site

The AST has demonstrated a commitment to preserving the environment and this project is an example of this commitment. The 200-acre Tribal Trust site was a brownfields cleanup site that has been cleaned up and repurposed to build the Tribal Children and Youth Camp. The site was contaminated with over 100 tires and the creek bed was an illegal dumping ground. The AST Brownfield Tribal Response Program cleaned up the site utilizing Environmental Protection Agency and Tribal funding.
