Chickasaw Nation Chikasha House

The Chikasha House, located in Ada, Oklahoma, directly southwest of the Chickasaw Nation Medical Center (CNMC) is within close walking distance of the medical center. The Chikasha House is a hospitality house providing a restful, comfortable home environment for family members/caregivers traveling long distance to be with a loved one during his or her hospitalization at the CNMC. The Chikasha House maintains six guest rooms, and two handicapped accessible rooms. Each guest room has two full-sized beds with a private bathroom, a television, an alarm clock, and a small refrigerator along with a laundry facility and fresh linens and towels provided to guests. The lawns and flower beds were beautifully landscaped, impeccably manicured, and well lit. In keeping with the National Green House initiative, the Chickasaw Nation incorporated a polyethylene tank rainwater system which collects the rain and recycles it to water the lawn and flower beds.
