Quantity Quotes - Your Energy Procurements

Are Now Faster, Easier and Cost Effective

Gone are the days of piles of paperwork and lengthy phone conversations for Housing Authorities (HA) to purchase ENERGY STAR products. If you are trying to save money and conserve energy, look no further than QuantityQuotes.net. There is no limit to the number of transactions, reports or quotes you can make.
Eco-Wise

Are you trying to save money and conserve energy, look no further than your residents. Resident education programs that involve the residents in the planning, construction, and maintenance of Energy Conservation Measures (ECMs) can help you achieve projected savings. These programs can be an important component of the financial benefits that can be realized through energy efficiency.

According to an Energy Service Company industry participant, group and one-on-one training can ensure that residents know how their bills will be reduced and how they should maintain ECMs. At the Tampa Housing Authority, they do just that. The agency provides one-on-one training and counseling to residents who experience a lower their individual housing costs. Tampa has also encouraged resident participation – residents of the 17 public housing communities play an active role in the implementation of ECMs and work collaboratively to achieve savings.

Getting residents to participate can be easy if you provide the right incentives. At meetings you provide the right incentives. At meetings, you can offer incentives to those who participate, which ensures competitive quotes. Within a few days of submitting a product request, you start to receive quotes. With a minimum of three quotes required, you may fulfill your procurement requirements with a few clicks of the mouse.

ENERGY STAR products have a wide variety of product specifications and each resident allows you to request exactly what you need for your development. For example, you can specify the electrical requirements and maximum dimensions of a clothes washer; the lumen output for a light bulb, or the style, finish and wattage of a light fixture. While the focus of ECMs is to generate substantial dollar savings for both the HA and residents of the 17 public housing communities employed to collect housing monitoring data as well as plan and execute the installation of energy efficient appliances. While bringing economic benefits to residents, these activities also provide residents with a sense of community involvement, which leads to greater incentives to participate in and maintain ECMs in the long term.

Quantity Quotes - Your Energy Procurements

How it Works
1. Submit purchase request to suppliers
2. Interested suppliers respond through website
3. Follow up with suppliers to arrange purchase

QuantityQuotes.net is a website that the Department of Energy created to make it easier for private and public sector customers to find available ENERGY STAR products, make contact with vendors, and negotiate discounted prices.
