PHECC Operations & Maintenance Checklist

BUILDING ENVELOPE

- Caulk frames and openings
- Patch holes in the building envelope
- Repair cracked windowpanes
- Weatherstrip windows and doors
- Install storm windows and doors at the beginning of the heating season
- Remove unit air conditioners in the winter
- Open and close shades in common areas
- Lower awnings in the summer
- Check automatic door closing mechanisms

HEATING and COOLING

Heating systems in individual dwelling units

- Turn off pilot light in summer
- Clean and adjust burners
- Change/clean filters on forced-air systems
- Inspect equipment for worn or damaged parts
- Lubricate equipment

Central boilers and furnaces

- Turn off pilot light in summer
- Clean and adjust burners
- Check and adjust fuel-to-air ratios
- Calibrate and adjust controls
- Clean fireside of boiler or furnace
- Remove scale buildup on heat exchanger and waterside of boiler
- Operate only as many boilers as needed at one time

Cooling

- Turn off cooling systems in unoccupied common areas
- Clean or change air filters
- Clean evaporator coils
- Clean condenser coils
- Clean blower

Central heating distribution systems

- Reduce thermostat settings in unoccupied areas
- Check ductwork for leaks
- Keep radiators and hot air registers clean and unobstructed
- Operate vents in hot water radiators and baseboard units
- Check and repair air vents and steam traps
- Balance steam distribution
- Lower steam pressure
- Monitor make-up water consumption
- Replace steam traps
- Check heating elements, controls, and fans on electric distribution systems

Heat Pumps

- Keep air registers open
- Lubricate fan motors and adjust blowers and drive belts
- Clean coils

Public Housing Energy Conservation Clearinghouse
PHECC Operations & Maintenance Checklist

□ Maintain chillers
□ Maintain evaporative coolers

DOMESTIC HOT WATER SYSTEM

□ Lower water temperature
□ Repair all leaks
□ Insulate domestic hot water pipes
□ Turn off domestic hot water supply to areas that do not need it
□ Reduce water pressure
□ Flush tank-type water heaters
□ Clean/adjust burners on gas and oil water heaters
□ Check electrodes on electric water heaters

LIGHTING

□ De-lamp overlit areas
□ Keep energy-efficient lamps in stock for replacement
□ Clean lighting fixtures
□ Clean or paint walls
□ Check timers on exterior lighting

MISCELLANEOUS

□ Calibrate checkmeters
□ Check for and repair water leaks
□ Reduce ventilation rates
□ Reduce the amount of exhausted air
□ Check refrigerators for proper door closure
