

LIST OF HUD-APPROVED LEAD SAFE WORK PRACTICES TRAINING CURRICULA  
(as of October 20, 2010)

Notes to All Users:

1. This is a list of training course materials (curricula). It is not a list of training providers.
2. Select a Curriculum for Your Audience: Each curriculum on this list meets HUD’s minimum training requirements for people performing interim controls, paint stabilization, standard treatments and ongoing LBP maintenance work as required by the Lead Safe Housing Rule. Each curriculum was designed by an organization to meet the specific training needs of its target audience of workers. Before selecting a training curriculum, you should carefully evaluate your choices. Then select the one that is the most appropriate for your workers and the jobs they perform.
3. HUD Recommends Instructor Qualifications and Notices of Completion: Instructors who have knowledge about lead-based paint and have a background in adult education may deliver any curriculum on this list. Training providers delivering these curricula should provide a “notice of completion” to each student who successfully completes a listed curriculum.

Notes to Training Providers:

1. Please review the document, “Interim Criteria to Evaluate Training Courses in Lead-Safe Work Practices (June 2000)”
2. Course deliveries must comply with the criteria.

HUD-Approved Curricula List:

1. EPA- or State-Approved Renovator, Repair and Painter (RRP) Initial Curriculum

This course was developed by the U.S. EPA, in collaboration with the U.S. Department of Housing and Urban Development (HUD), to train renovation, repair, and painting contractors who need certification as renovators on how to comply with EPA's Renovation, Repair, and Painting (RRP) rule, and HUD's Lead Safe Housing rule. Training providers who teach this curriculum for HUD audiences are required to be accredited by EPA.

NOTE 1: Contractors and training providers must contact the State or Tribal agency that administers the lead-based paint certification programs to find out if the State is authorized by EPA to administer the RRP certification program. If it is authorized, the State-approved RRP initial courses are approved as Lead-Safe Work Practices (LSWP) courses by HUD.

NOTE 2: In the States and Tribal Areas for which EPA administers the RRP certification program, EPA accepts the RRP refresher course as completing the training requirement for renovation certification if a student has passed one of the LSWP courses listed at the EPA’s Renovation Training Provider Instructions Web page, [www.epa.gov/lead/pubs/trainerinstructions.htm](http://www.epa.gov/lead/pubs/trainerinstructions.htm), which includes 13 of the HUD-approved

LSWP courses, namely, curricula 2, 3, 4, 5, 6, 8, 10, 11, 12, 13, 14, 15, and 16, below. (The RRP refresher course on its own is not accepted by HUD as sufficient LSWP training.) HUD accepts certified renovators as having passed HUD-approved LSWP courses.

2. Abatement worker or supervisor course accredited by EPA, or an EPA authorized State or Tribal program.

Course requirements for these programs are found in EPA's 402/404 rules and qualify people to perform lead-based paint abatement. These courses meet the HUD lead-safe work practices training requirement.

3. HUD's Adaptation of EPA Model Curriculum for Remodelers and Renovators titled "Addressing Lead-Based Paint Hazards During Renovation, Remodeling and Rehabilitation in Federally Owned and Assisted Housing"

This one-day course is HUD's February, 2001, adaptation of the EPA model course for remodelers and renovators. It provides information about the containment, minimization and cleanup of lead hazards during these activities in federally owned and assisted housing. The appendices include The Lead Paint Safety Field Guide, the "Protect Your Family from Lead in Your Home" pamphlet, summaries of important lead regulations, and other useful information. Appendix 10 is an optional module on Supervisory and Business Issues.

4. HUD Lead-Based Paint Training for Remodelers and Renovators

This one-day training program is designed to teach lead-safe work practices to people doing remodeling, renovating and general rehabilitation such as dry wallers, painters and carpenters. The original two-day HUD/National Association of the Remodeling Industry (NARI) course was shortened to this one-day version.

The course materials are easy to read and understand. They include notes to the instructor, icebreaker, nine training modules, examination and evaluation. Trainers can create handouts by printing the power point presentation as "Handouts" or "Notes pages." This curriculum is available in MS Power Point for download at [www.hud.gov/offices/lead/lbptraining.cfm](http://www.hud.gov/offices/lead/lbptraining.cfm). Any individual who is qualified by being knowledgeable about lead and experience in training or adult education can deliver this course.

5. "Lead-Based Paint Maintenance Training: Work Smart, Work Wet, Work Clean to Work Lead-Safe"

This video-based course was specifically designed to teach lead-safe work practices and procedures to maintenance workers and supervisors who work in multifamily properties that have or may contain lead-based paint. The course materials include an instructor's guide, video and hard copy of slide presentation suitable for use as a student handout. The course includes several exercises and optional hands-on activities. This course may

be delivered by any individual knowledgeable about lead and having experience teaching adults.

This curriculum is available for purchase from:  
National Environmental, Safety and Health Training Association  
P.O. Box 10321  
Phoenix, AZ 85064-0321  
602-956-6099

6. Interim Controls/Lead-Safe Work Practices and Awareness Manual

This training manual contains information on how to perform interim controls, paint stabilization ongoing maintenance and standard treatments in accordance with the Lead Safe Housing Rule. Copies of regulations and reference charts for HUD's Lead Safe Housing Rule are included as appendices of the manual. This curriculum was delivered to the National Apartment Association.

Connor Environmental Services  
1421 Clarkview Road, Suite 100  
Baltimore, MD 21209-2188  
(410) 296-7971

7. State of Vermont Essential Maintenance Practices Course

This course was designed to teach lead-safe work practices to maintenance workers in Vermont.

Lead Poisoning Prevention and Surveillance Program  
Vermont Department of Health  
108 Cherry Street  
Burlington, VT 05402

In Vermont, call 800-439-8550 for a list of training providers.  
From outside Vermont, call 802- 865-7786.

8. State of Maine Lead-Smart Renovator Course

This course teaches lead-safe work practices to people doing renovation and repainting in the State of Maine. Call for a list of Maine's DEP-licensed training providers.

Lead Hazard Enforcement Program  
Bureau of Remediation & Waste Management  
Maine Department of Environmental Protection  
17 State House Station  
Augusta, Maine 04333-0017  
207-287-7722

9. EMI Lead Hazard Reduction for Maintenance Workers and Painters

People taking this course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance.

Environmental Management Institute, Inc.  
5610 Crawfordsville Road, Suite 15  
Indianapolis, IN 46224-3787  
317-248-4848

10. Craven County, NC Lead-Safe Work Practices Course

People taking this course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance. It is based on the one-day version of the HUD/NARI course and includes State- and County-specific information and resources.

Children's Environmental Health  
Craven County Health Department  
406 Craven St.  
New Bern, NC 28560-4971  
252-636-4920

11. Occupational Knowledge Interim Controls/Lead-Safe Work Practices and Awareness Training

People taking this course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance. This course uses the manual, "Interim Controls/Lead-Safe Work Practices and Awareness."

Occupational Knowledge International  
4444 Geary Boulevard, Suite 300  
San Francisco, CA 94118  
415-221-8900

12. Commonwealth of Massachusetts Lead-Safe Renovator Worker and Supervisor

People taking this course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance, as defined by HUD. Additionally, these courses meet the requirements for certification in Massachusetts for Lead-Safe Renovator Worker and Supervisor.

Massachusetts Department of Labor and Workforce Development  
Division of Occupational Safety

19 Staniford Street, 2nd Floor  
Boston, MA 02114  
617-626-6975

13. State of Connecticut Lead-Safe Work Practices for Painting, Remodeling, and Maintenance Course (English and Spanish versions available)

People taking this course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance, as defined by HUD.

Childhood Lead Poisoning Prevention Program  
Lead Environmental Management Unit  
Department of Public Health  
State of Connecticut  
410 Capitol Avenue - MS #51LED  
P.O. Box 340308  
Hartford, CT 06134  
860-509-7299

14. State of Wisconsin Lead Low-Risk Worker Course

People taking this 8-hour course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance, as defined by HUD. Additionally, successful completion of this course provides eligibility for Wisconsin certification as a lead low-risk worker. Low-risk work in Wisconsin includes activities such as surface preparation and repainting, restoring proper functioning of doors and windows, and enclosure or encapsulation of lead-based painted components without removing components. This course provides a minimum of 4 hours of hands-on practice and a hands-on skills assessment. For information, contact:

Wisconsin Department of Health and Family Services  
Asbestos and Lead Certification Section, Rm. 139  
P.O. Box 2659  
Madison WI 53701-2659  
608- 261-6876

15. Lead-Safe Work Practices Training

People taking this course are qualified to perform interim controls, paint stabilization, standard treatments and ongoing LBP maintenance, as defined by HUD.

Baker Environmental Consulting, Inc.  
7941 Westgate Street  
Lenexa, KS 66215-2636  
913-541-0220
