Privacy Impact Assessment

July 2007

Document Endorsement

DOCUMENT ENDORSEMENT

I have carefully assessed the Privacy Impact Assessment (PIA) for **GMP**. This document has been completed in accordance with the requirement set forth by the [E-Government Act of 2002](#) and [OMB Memorandum 03-22](#) which requires that "Privacy Impact Assessments" (PIAs) be conducted for all new and/ or significantly altered IT Systems, and Information Collection Requests.

ENDORSEMENT SECTION

Please check the appropriate statement.

- The document is accepted.**
- The document is accepted pending the changes noted.**
- The document is not accepted.**

Based on our authority and judgment, the data captured in this document is current and accurate.

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
PRIVACY IMPACT ASSESSMENT (PIA) FOR:
GRANTS MANAGEMENT PROCESS SYSTEM (GMP)**

OMB Unique Identifier: N/A and PCAS# 00252210

July 2007

NOTE: See Section 2 for PIA answers and Section 3 for Privacy Advocate's determination.

SECTION 1: BACKGROUND

Importance of Privacy Protection – Legislative Mandates:

HUD is responsible for ensuring the privacy and confidentiality of the information it collects on members of the public, beneficiaries of HUD programs, business partners, and its own employees. These people have a right to expect that HUD will collect, maintain, use, and disseminate identifiable personal information only as authorized by law and as necessary to carry out agency responsibilities.

The information HUD collects is protected by the following legislation and regulations:

- [Privacy Act of 1974, as amended](#) affords individuals the right to privacy in records that are maintained and used by Federal agencies. (See <http://www.usdoj.gov/foia/privstat.htm>; see also [HUD Handbook 1325.1 at www.hudclips.org](#));
- Computer Matching and Privacy Protection Act of 1988 is an amendment to the Privacy Act that specifies the conditions under which private information may (or may not) be shared among government agencies. (See <http://www.usdoj.gov/foia/privstat.htm>);
- [Freedom of Information Act of 1966, as amended](#) (http://www.usdoj.gov/oip/foia_updates/Vol_XVII_4/page2.htm) provides for the disclosure of information maintained by Federal agencies to the public, while allowing limited protections for privacy. See also [HUD's Freedom of Information Act Handbook \(HUD Handbook 1327.1 at www.hudclips.org\)](#));
- [E-Government Act of 2002](#) requires Federal agencies to conduct Privacy Impact Assessments (PIAs) on its electronic systems. (See http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=107_cong_public_laws&docid=f:publ347.107.pdf; see also the summary of the E-Government Act at http://www.whitehouse.gov/omb/egov/pres_state2.htm);
- [Federal Information Security Management Act of 2002](#) (which superceded the Computer Security Act of 1987) provides a comprehensive framework for ensuring the effectiveness of information security controls over information resources that support Federal operations and assets, etc. See also the codified version of Information Security regulations at [Title 44 U.S. Code chapter 35 subchapter II](#) (<http://uscode.house.gov/search/criteria.php>); and

- [OMB Circular A-130, Management of Federal Information Resources, Appendix I](http://www.whitehouse.gov/omb/circulars/a130/appendix_i.pdf) (http://www.whitehouse.gov/omb/circulars/a130/appendix_i.pdf) defines Federal Agency responsibilities for maintaining records about individuals.

Access to personally identifiable information will be restricted to those staff that has a need to access the data to carry out their duties; and they will be held accountable for ensuring privacy and confidentiality of the data.

What is the Privacy Impact Assessment (PIA) Process?

The Privacy Impact Assessment (PIA) is a process that evaluates issues related to the privacy of personally identifiable information in electronic systems. See background on PIAs and the 7 questions that need to be answered, at: <http://www.hud.gov/offices/cio/privacy/pia/pia.cfm>. Personally identifiable information is defined as information that actually identifies an individual, e.g., name, address, social security number (SSN), or identifying number or code; or other personal/ sensitive information such as race, marital status, financial information, home telephone number, personal e-mail address, etc. Of particular concern is the combination of multiple identifying elements. For example, knowing name + SSN + birth date + financial information would pose more risk to privacy than just name + SSN alone.

The PIA:

- Identifies the type of personally identifiable information in the system (including any ability to combine multiple identifying elements on an individual);
- Identifies who has access to that information (whether full access or limited access rights); and
- Describes the administrative controls that ensure that only information that is necessary and relevant to HUD's mission is included.

Who Completes the PIA?

Both the program area System Owner and IT Project Leader work together to complete the PIA. The System Owner describes what personal data types are collected, how the data is used, and who has access to the personal data. The IT Project Leader describes whether technical implementation of the System Owner's requirements presents any risks to privacy, and what controls are in place to restrict access of personally identifiable information.

When is a Privacy Impact Assessment (PIA) Required?

- 1. New Systems:** Any new system that will contain personal information on members of the public requires a PIA, per OMB requirements (this covers both major and non-major systems).
- 2. Existing Systems:** Where there are significant modifications involving personal information on members of the public, or where significant changes been made to the system that may create a new privacy risk, a PIA is required.

3. Information Collection Requests, per the Paperwork Reduction Act (PRA):

Agencies must obtain OMB approval for new information collections from ten or more members of the public. If the information collection is both a new collection and automated, then a PIA is required.

What are the Privacy Act Requirements?

Privacy Act. The [Privacy Act of 1974](http://www.usdoj.gov/foia/privstat.htm), as amended (<http://www.usdoj.gov/foia/privstat.htm>) requires that agencies publish a Federal Register Notice for public comment on any intended information collection. Privacy Act Systems of Records are created when information pertaining to an individual is collected and maintained by the Department, and is retrieved by the name of the individual or by some other identifying number, symbol, or other identifying particular assigned to an individual. The [E-Government Act of 2002](#) requires PIAs for electronic systems as well as information collection requests that are automated. So, there is a relationship between the new PIA requirement (when automation is involved) and the long-standing Privacy Act System of Records Notices (for both paper-based and automated records that are of a private nature). For additional information, contact the Departmental Privacy Act Officer in the Office of the Chief Information Officer.

Why is the PIA Summary Made Publicly Available?

The E-Government Act of 2002 requires that the analysis and determinations resulting from the PIA be made publicly available. The Privacy Advocate in HUD's Office of the Chief Information Officer (OCIO) is responsible for publishing the PIA summary on HUD's web site. See: <http://www.hud.gov/offices/cio/privacy/pia/pia.cfm>.

SECTION 2 – COMPLETING A PRIVACY IMPACT ASSESSMENT

Please submit answers to the Departmental Privacy Advocate in the Office of the Chief Information Officer (OCIO). If any question does not apply, state Not Applicable (N/A) for that question, and briefly explain why it is not applicable.

Program Area: Office of Community Planning and Development

Subject matter expert in the program area: Jill Kennerly, System Development and Evaluation Division, Office of Community Planning and Development, HUD, 202.402.3827. Renee Ryles, Office of Field Management, Office of Community Planning and Development, HUD, 202.402.4609

Program Area Manager: Ronald Herbert, Director, CPD Field Management, Office of Community Planning and Development, HUD, 202.402.6606

IT Project Leader: Isaac Szanzer, Computer Specialist, Office of Systems Integration and Efficiency, Office of the Chief Information Officer, 202.402.6061

For IT Systems:

- **Name of system:** Grants Management Process System (GMP)
- **PCAS #:** 252210
- **OMB Unique Project Identifier #:** N/A
- **System Code:** C07A

For Information Collection Requests:

- **Name of Information Collection Request:** N/A
- **OMB Control #:**

Question 1: Provide a brief description of what personal information is collected.

The system does not collect, maintain, or disseminate personal information on individuals. GMP is a monitoring and tracking system for all CPD grant programs. The system provides information that helps Grantees to effectively and efficiently implement HUD programs thereby helping to improve program results.

Access to the GMP system requires the last four (4) digits of the users SSN for the initial log-on to system. Once the network log-in is generated the last four (4) digits is no longer available, stored or viewable via GMP. This information is required for verification and authentication purposes.

If this automated system (or Information Collection Request) involves personally identifiable information on members of the public, then mark any of the categories that apply below:

Personal Identifiers:

	Name
	Social Security Number (SSN)
	Other identification number (specify type):
	Birth date

	Home address
	Home telephone
	Personal e-mail address
	Fingerprint/ other “biometric”
	Other (specify):
X	None
	Comment:

Personal/ Sensitive Information:

	Race/ ethnicity
	Gender/ sex
	Marital status
	Spouse name
	# of children
	Income/ financial data (specify type of data, such as salary, Federal taxes paid, bank account number, etc.):
	Employment history:
	Education level
	Medical history/ information
	Disability
	Criminal record
	Other (specify):
X	None
	Comment:

Question 2: Will any of the personally identifiable information be accessed remotely or physically removed? If yes, what security controls are in place to protect the information e.g., encryptions (give details below)?

Yes	No	
<input type="checkbox"/>	<input type="checkbox"/>	
<input type="checkbox"/>	<input type="checkbox"/>	If yes, have the security controls been reviewed and approved by the Information Security Officer?
X		Not applicable
X		Comment: No personally identifiable information is collected in the system.

Question 3: Type of electronic system or information collection.

Fill out Section A, B, or C as applicable.

A. If a new electronic system (or one in development): Is this a new electronic system (implemented after April 2003, the effective date of the E-Government Act of 2002)?

Yes	No	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	a. Does the system require authentication?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	b. Is the system browser-based?
<input type="checkbox"/>	<input checked="" type="checkbox"/>	c. Is the system external-facing (with external users that require authentication)?
<input checked="" type="checkbox"/>		Comment: No personally identifiable information is collected in the system.

A. If an existing electronic system: Mark any of the following conditions for your existing system that OMB defines as a “trigger” for requiring a PIA (if not applicable, mark N/A):

N/A	Conversion: When paper-based records that contain personal information are converted to an electronic system
N/A	From Anonymous (Non-Identifiable) to “Non-Anonymous” (Personally Identifiable): When any systems application transforms an existing database or data collection so that previously anonymous data becomes personally identifiable
N/A	Significant System Management Changes: When new uses of an existing electronic system significantly change how personal information is managed in the system. (Example #1: when new “relational” databases could combine multiple identifying data elements to more easily identify an individual. Example #2: when a web portal extracts data elements from separate databases, and thereby creates a more open environment for exposure of personal data)
N/A	Merging Databases: When government databases are merged, centralized, matched, or otherwise significantly manipulated so that personal information becomes more accessible (with special concern for the ability to combine multiple identifying elements)
N/A	New Public Access: When <u>new</u> public access is given to members of the public or to business partners (even if the system is protected by password, digital certificate, or other user-authentication technology)
N/A	Commercial Sources: When agencies systematically incorporate into databases any personal data from commercial or public sources (ad hoc queries of such sources using existing technology does not trigger the need for a PIA)
N/A	New Inter-agency Uses: When agencies work together (such as the federal E-Gov initiatives), the lead agency should prepare the PIA
N/A	Business Process Re-engineering: When altering a business process results in significant new uses, disclosures, or additions of personal data
N/A	Alteration in Character of Data: When adding new personal data raises the risks to personal privacy (for example, adding financial information to an existing database that contains name and address)

B. If an Information Collection Request (ICR): Is this a new Request that will collect data that will be in an automated system? Agencies must obtain OMB approval for information collections from 10 or more members of the public. The E-Government Act of 2002 requires a PIA for ICRs only if the collection of information is a new request and the collected data will be in an automated system.

	Yes, this is a new ICR and the data will be automated
	No, the ICR does not require a PIA because it is not <u>new</u> or <u>automated</u>)
X	Comment: N/A

Question 4: Why is the personally identifiable information being collected? How will it be used?

Mark any that apply:

Homeownership:

	Credit checks (eligibility for loans)
	Loan applications and case-binder files (via lenders) – including borrower SSNs, salary, employment, race, and other information
	Loan servicing (MIP collections/refunds and debt servicing for defaulted loans assigned to HUD)
	Loan default tracking
	Issuing mortgage and loan insurance
	Other (specify):
	Comment:

Rental Housing Assistance:

	Eligibility for rental assistance or other HUD program benefits
	Characteristics on those receiving rental assistance (for example, race/ethnicity, # of children, age)
	Property inspections
	Other (specify):
	Comment:

Grants:

	Grant application scoring and selection – if any personal information on the grantee is included
	Disbursement of funds to grantees – if any personal information is included
	Other (specify):
X	Comment: GMP tracks the status of grant funds to local government and non-profit entities. It does not collect personal information on individuals.

Fair Housing:

	Housing discrimination complaints and resulting case files
	Other (specify):
	Comment:

Internal operations:

	Employee payroll or personnel records
	Payment for employee travel expenses

	Payment for services or products (to contractors) – if any personal information on the payee is included
	Computer security files – with personal information in the database, collected in order to grant user IDs
	Other (specify):
	Comment:

Other lines of business (specify uses):

Question 5: Will you share the information with others? (e.g., another agency for a programmatic purpose or outside the government)?

Mark any that apply:

	Federal agencies?
	State, local, or tribal governments?
	Public Housing Agencies (PHAs) or Section 8 property owners/agents?
	FHA-approved lenders?
	Credit bureaus?
	Local and national organizations?
	Non-profits?
	Faith-based organizations?
	Builders/ developers?
	Others? (specify):
X	Comment: N/A

Question 6: Can individuals “opt-out” by declining to provide personal information or by consenting only to particular use (e.g., allowing their financial information to be used for basic rent eligibility determination, but for not for sharing with other government agencies)?

	Yes, they can “opt-out” by declining to provide private information or by consenting only to particular use
	No, they can’t “opt-out” – all personal information is required
X	Comment: No personal information on individuals is collected within GMP.

If Yes, please explain the issues and circumstances of being able to opt-out (either for specific data elements or specific uses of the data): _____

Question 6: How will the privacy of the information be protected/ secured? What are the administrative and technological controls?

Mark any that apply and give details if requested:

X	System users must log-in with a password: GMP does require the last four (4) digits of the users SSN for the initial log-on to system. Once the network log-in is generated the last four (4) digits is no longer available, stored or viewable via GMP. This information is required for verification and authentication purposes.
X	When an employee leaves: <ul style="list-style-type: none"> • How soon is the user ID terminated? (1 day, 1 week, 1 month, unknown)? • How do you know that the former employee no longer has access to your system? (explain your procedures or describe your plan to improve): Through the GMP System Administrator.
X	Are access rights selectively granted, depending on duties and need-to-know? If Yes, specify the approximate # of authorized users who have either: <ul style="list-style-type: none"> • Full access rights to all data in the system: 2 Users • Limited/restricted access rights to only selected data: 800 Users
N/A	Are disks, tapes, and printouts that contain personal information locked in cabinets when not in use? (explain your procedures, or describe your plan to improve): No personal information on individuals is collected within GMP
	If data from your system is shared with another system or data warehouse, who is responsible for protecting the privacy of data that came from your system but now resides in another? Explain the existing privacy protections, or your plans to improve:
	Other methods of protecting privacy (specify):
	Comment:

Question 7: If privacy information is involved, by what data element(s) is it retrieved from the system?

Mark any that apply

	Name:
	Social Security Number (SSN)
	Identification number (specify type):
	Birth date
	Race/ ethnicity
	Marital status
	Spouse name
	Home address
	Home telephone
	Personal e-mail address
	Other (specify):

X	None: No personal information on individuals is collected within GMP.
	Comment:

Other Comments (or details on any Question above):

SECTION 3: DETERMINATION BY HUD PRIVACY ADVOCATE

The Grants Management Process System (GMP) does not contain any personally identifiable information. It only tracks the status of grant funds to local government and non-profit entities. Therefore, there is not concern for privacy with GMP (2007).
