8.1 Claims Overview

The Servicing Module allows servicers to electronically submit and follow up on a claim on behalf of lenders/investors. Additionally, the HUD Claims staff can review and process the claims.

The following claim types can be processed in the system.

- **Foreclosure/Deed-In-Lieu (Claim Type 21):** This claim is initiated by a servicer on behalf of a lender/investor due to acquisition of title of the property through foreclosure proceedings or deed-in-lieu of foreclosure. In these cases servicers can file:
  - **Sale Based Claim:** If the property was disposed in a manner that was insufficient to satisfy the debt.
  - **Appraisal Based Claim:** If the property was not disposed within six months after the acquisition of the title and property.
- **Assignment (Claim Type 22):** This claim is initiated by a servicer on behalf of a lender/investor if the principal balance, including accrued interest and monthly insurance premium, reaches the threshold percentage (as established by HUD) of the maximum claim amount, and the servicer asks for approval to exercise the option to assign the loan to HUD.
- **Mortgagor’s Short Sale (Claim Type 23):** This claim is initiated by a servicer on behalf of a lender/investor if the mortgagor or the mortgagor’s estate sells the property but the sales proceeds are insufficient to satisfy the debt.
- **Supplemental (Claim Type 24):** This claim is initiated by a servicer on behalf of a lender/investor if additional reimbursements are required from HUD on a previously settled claim (Claim Type 21 or 23).

The below sections explain the submission and processing of the above mentioned claim types.

8.1.1 Claim Processing Activities

CT 21, 22, or 23 can be initiated on loans with a case status of Endorsed and CT 24 can be initiated on loans with a case status of Terminated. For all claim types, a servicer must initiate the respective claim timeline on the loan and complete the required steps to submit the claim using the online Form HUD-27011. The system pre-fills Form HUD-27011 with information captured based on loan
activities and timelines (Example: loan transactions, due and payable and loss mitigation activities) which cannot be manually edited by the user.

The claim is submitted to HUD for review when the timeline step to submit Form HUD-27011 is completed. HUD can approve, deny, request additional information, or indicate the claim is still being reviewed. The following activities are performed by servicers and HUD Claims staff.

- **Servicer activities:**
  - Initiate a claim timeline
  - Review and edit claim data
  - Finalize and submit a claim
  - Resubmit a claim if additional information is required by HUD

- **HUD Claims staff activities:**
  - Process a claim (approvals, denials, pending additional information)
  - Assign a no pay order if needed
  - Cancel a claim payment if needed

### 8.1.2 Claims Setup - Search Criteria

The Claims Setup screen allows authorized users to initiate a claims timeline. A timeline is a set of steps that must be completed before a claim can be submitted to HUD for processing. Please refer to Chapter 7 for additional details on timelines.

To access the Claims Setup screen:

1. Move the cursor to the **Endorsed** tab from the top menu.
2. Move the cursor to the **Claims** option and then click **Setup**.

8.2 Initiating and Submitting Claim Type 21

This claim is initiated by a servicer on behalf of a lender/investor due to acquisition of title of the property through foreclosure proceedings or deed-in-lieu of foreclosure. In these cases servicers can file:

- **Sale Based Claim**: If the property was disposed in a manner that was insufficient to satisfy the debt.
- **Appraisal Based Claim**: If the property was not disposed within six months after the acquisition of the title and property.

This timeline requires HUD Claims Staff interaction. Upon initiation of this timeline, the case sub-status is updated to CT 21 – DIL/FCL. Only one active Claim Type 21 – DIL/FCL timeline can be associated with a loan.

The Servicing Management tab can be used to inactivate the timeline. If the timeline is inactivated, the case sub-status is updated accordingly. Once the timeline is inactivated, none of the steps can be edited. The timeline cannot be activated once inactivated.

### 8.9 Payment Processing

This section explains the claims payment processing in HERMIT (Servicing and Accounting Modules) system.

1. The claim transaction is generated when the claim is approved in the Servicing Module. These FHA cases are sent to the Accounting Module for generation of payables via an interface file with exception to payment cancellation (documented in Cancel Payment section) or a No Pay flag (documented in No Pay Order section).

2. The Servicing Module assigns a batch ID and batch status for the payable request to track the payment status. Once the file is generated and sent to the Accounting Module, the batch status (Sent to GL - Held) is updated to indicate that the transaction has been sent to the Accounting Module. The system adds a new step Submitted for Payment on the claims timeline, this step is auto-completed with the date the interface file is sent to Accounting Module.
3. The Accounting Module processes the file, records the payable in a held status and sends a response file to the Servicing Module. The Servicing Module processes the response file from the Accounting Module and updates the batch status (Success – Held).

4. The Servicing Module sends the release transaction to the Accounting Module via an interface file. The Accounting Module processes the file, records the payable in the release status and sends a response file to the Servicing Module. The Servicing Module processes the response file from the Accounting Module and updates the batch status (Success – Disburse).

5. The HUD Financial Operations and Control Section (FOCS) will receive the PM 103 report for the claims processed in the Accounting Module. The HUD FOCS will generate the claims batch transmittal report from the Transmittals screen in the Servicing Module and manually validate the claims batch transmittal report against the PM 103. Upon completion, the HUD FOCS will populate the Disbursement Transmittal Report and send, via email or fax, the Disbursement Transmittal Report along with the Claims Payable Batch Transmittal Report to HUD’s CMB.

6. The CMB will complete budget check processes in the FHASL and attach the budget check report to the transmittal. The Accounting Module will generate a disbursement schedule file in Treasury SPS format for all daily approved claims payable requests. The daily SPS files will be placed on the HUD server for access by CMB.

7. The completed, approved transmittal with all attachments is used by a CMB DEO to select the appropriate Accounting Module Disbursement files placed on HUD’s server for final review. If the disbursement file and Disbursement Transmittal Report are in agreement, a CMB certifying officer certifies the schedules and transmits them to the Treasury Regional Finance Center for payment.

8. Once Treasury completes the payments, the HERMIT accounting support team will download the RFC report and confirm the payment schedules in the Accounting Module. The Accounting Module will then send the disbursement confirmation to the Servicing Module via an interface file.

9. The Servicing Module processes this file and the batch status is updated to Disbursed. The system updates the claim status to Paid and adds a step Claim Paid on the claims timeline, this step is auto-completed with the date the file has been processed.

The table below shows the claim type, case status and case sub-status updates upon receipt of payment confirmation from Accounting Module:
