**Note:**
A computer that satisfies the minimum requirements, in itself, does not guarantee that RAPID will perform perfectly. On any computer, different applications contend for resources at different levels. Therefore, if a particular computer with limited resources is running many applications simultaneously, the performance will be noticeably slow. If the computer has many open applications, the user would need more memory. If the user is running a graphics processing application, the user would need more processing power.

Before installing this new version of RAPID (DCD 4.0) users MUST complete the below step

1. Please make sure you complete all the inspections that in progress status and upload them into the REAC system.

**Before installing this version of RAPID (DCD 4.0) users MUST backup current RAPID client and inspection data**

1. Open Windows Explorer and Go to the following folder on your C drive: C:\Program Files
2. Select the ‘PASS’ folder

In case of RAPID installed on some other location, please go to that location and select the PASS folder.

3. Right click the ‘PASS’ folder and select ‘RENAME’ option.
4. Rename the 'PASS' folder to something else and make sense (e.g. PASS_OLD)

Now the old data will not be overwritten by the new installation.

5. Rename the ‘PASS’ folder to something else and make sense (e.g. PASS_OLD).
6. Delete the RAPID Icon on the Desktop.
