# 1 Introduction

## 1.1 Purpose

The *Moving to Work (MTW) Technical Reference Guide (Guide)* provides information for MTW public housing agencies (PHAs) and software vendors to develop software to capture, edit and submit select fields from the Form HUD-50058 MTW data to the U.S. Department of Housing and Urban Development (HUD). MTW PHAs submit data to the Public and Indian Housing (PIH) Inventory Management System (IMS) MTW module. The MTW module is a HUD system that captures and stores information on residents participating in the MTW Demonstration program.

## 1.2 Intended Audience

HUD prepared the *Guide* to instruct MTW PHAs and software vendors on how to develop software to capture, store and submit Form HUD-50058 MTW data to the MTW module and to view transmission error reports. The MTW development team at HUD Headquarters also uses the *Guide* to develop the edit and validation process for MTW data.

## 1.3 Summary

The *Guide* contains the following information:

- Summary of the Form HUD-50058 MTW
- Transmission file layout description
- Descriptions of each field in the transmission file layout and edits
- Cross-references between the data lines in Form HUD-50058 MTW and the data field positions in the transmission file.

## 1.4 Questions

Users of this *Guide* with questions can post their questions on the Form 50058 forum available on the IMS website. Questions should contain “MTW” in the first line of the posting. HUD monitors and responds to questions posted to this forum on a regular basis. The address for this forum is: <http://www.hud.gov/offices/pih/systems/pic/50058/forums.cfm>.

## 1.5 Form HUD-50058 MTW

The Form HUD-50058 MTW captures information about residents who live in public and assisted housing and participate in the MTW Demonstration program. The form contains:

- Demographic information for all members of the household
- Citizenship information
- Income information
- Rent information.

PHAs that participate in the MTW Demonstration program collect and transmit select fields from the Form HUD-50058 MTW and send it electronically to HUD. HUD uses the information for the following purposes:

- Support the analysis of policy, legislative, budget, and program management initiatives and evaluations
- Monitor the MTW Demonstration program

- Provide demographic information on program participants to support HUD management, HUD Field Office, and PHA program objectives
- Monitor compliance with income reporting requirements and related eligibility factors
- Produce demographic information that describes the present occupancy of resident communities to Congress, other Federal agencies, and special housing-related interest groups
- Perform income matching with the Social Security Administration and other agencies.

MTW PHAs and software vendors can use the Form HUD-50058 MTW, the Form HUD-50058 MTW Instruction Booklet and this *Guide* to understand the flow of the information and to develop or modify their software.

## **1.6 Transmission File Layout Description**

An MTW transmission file is an Excel file that contains information for one or more families. HUD receives the file submitted to IMS, extracts information from the file, and performs edits and validations before IMS stores the information in the MTW database.

IMS provides a template for the MTW PHAs to upload the MTW data file. This template can be downloaded from MTW -> Data Collection sub module in IMS. Before uploading the MTW data file, MTW PHAs should run the macro to perform an initial validation of the data. This will help the MTW PHAs identify any obvious invalid data. The step to run the macro is available in IMS in the Data Collection sub module.

MTW PHAs can also upload their MTW data in a pipe (|) delimited file. Detailed instructions to upload MTW data in the pipe delimited format are available in the Data Collection sub module in IMS.

### **1.6.1 Household Sheet**

This is the sheet where MTW PHAs enter the Household information.

### **1.6.2 Household Member Sheet**

This is the sheet where MTW PHAs enter the Household Member information.

## 1.7 Information on transition to New Project or New Development Numbers

This section of the technical reference guide provides information regarding transition to new project or new development numbers.

With the June 22, 2007 release, the existing project numbers in the PICTEST environment will be replaced by new project numbers. This transition in PICTEST is intended to provide system users a first hand look of the new project numbers and also provide an opportunity for the Form 50058 Software Vendors to make changes to their software and test those changes so that the PHAs are ready to submit the Form 50058s with the new project numbers once the transition to new project numbers takes place in PIC Production.

**The transition to new project or new development numbers in PIC Production is currently planned for January 2008.**

### Format of the new project or new development numbers

The format of the new project or new development numbers is derived from the Asset Management Project (AMP) numbers. AMP numbers are 12 characters in length with the character "P" as the 12<sup>th</sup> character.

The full AMP number format is:

[5-Character HA Code] + [6-digit AMP number] + "P"

For e.g. NY001000022P

The new project or new development number will be the AMP number WITHOUT the character "P". In the above example, the new project or new development number will be "NY001000022". Consequently, the new project or new development number is 11 characters in length.

Field 1d – Project Number in the MTW form needs to be used to submit the new project or development number. The field is 11 characters in length.

Please refer to field 1d (Page 9) for more details.
